In the parliamentary elections, the centre-right Citizens for European Development of Bulgaria (GERB), led by former Sofia mayor Boiko Borisov, emerged as the undisputed winner. GERB garnered 39.72% of the votes and secured 116 seats in the 240-seat National Assembly, while the Socialist-led Coalition for Bulgaria claimed 17.7% of the votes and 40 seats. Borisov took office as prime minister on July 27. In September the country's new minister of justice, Margarita Popova, presented the European Commission with a comprehensive plan for reforming the judicial system and for dealing with corruption. In response, the European Commission unblocked a portion of the SAPARD funds for Bulgaria that it had frozen a year earlier.

Although its long-term economic outlook improved over the year, Bulgaria dropped two spots, to 44th, on the World Bank's ranking of countries based on their attractiveness to foreign investment. Projected inflation for 2009 was 1.8%, owing in part to lower oil and raw-material prices. The country's current account deficit was estimated at \$4.1 billion, compared with \$7.3 billion a year earlier. Tourism revenues, which contributed 14% of GDP, declined 25% from 2008.

During the year Bulgarians were reminded once again of their ancient past when archaeologist Nikolay Ovcharov unearthed the remains of the original St. Peter and St. Paul Monastery and the St. Ivan of Rila Church; the discovery provided information about life in medieval Veliko Tarnovo, capital of the second Bulgarian empire (1185–1396 CE). Excavations offered evidence that the Bulgarian aristocracy was not destroyed by the Ottoman invasion in the 14th century. (IVA TEIXEIRA; BORIS YOVCHEV)

BURKINA FASO

Area: 267,950 sq km (103,456 sq mi)

Population (2009 est.): 15,757,000

Capital: Ouagadougou

Chief of state: President Blaise Compaoré

Head of government: Prime Minister
Tertius Zongo

Under a new government initiative announced in May 2009, more than 5 million Burkina Faso citizens would be issued birth certificates free of charge. This program was expected to be completed before the scheduled 2010 presidential elections.

A population growth rate of 3.1% threatened to offset strong increases in economic growth. Despite Burkina Faso's record harvests, food prices remained high. In February the UN World Food Programme (WFP) launched a food-voucher scheme designed to benefit 20,000 Ouagadougou households. On August 10 the WFP called for expansion of the emergency program, calling attention to the continued high prices and empty shelves in their warehouses. At least 30,000 more families in the capital alone were estimated to be in dire need of help. September floods left more than 150,000 residents homeless, most of them in Ouagadougou's suburbs.

Actors perform during the opening ceremony of the Pan-African Film and Television Festival in Ouagadougou, the capital of Burkina Faso, in February.

Ahmed Ouoba—Maxppp/Landov

On August 4 the first of 800 infantry troops arrived in The Sudan to join the African Union–UN peacekeeping force in Darfur. In February the U.S. had given Burkina Faso military equipment worth \$17 million in preparation for the deployment to that troubled region.

The 40th annual Ouagadougou Pan-African Film and Television Festival (FESPACO) was held in late February and early March. Despite some organizational and funding problems, FESPACO proved a great success with both the participants and the public in general. The Ethiopian film *Teza* was awarded the Golden Stallion of Yennenga, the festival's grand prize.

BURUNDI

Area: 27,816 sq km (10,740 sq mi)

Population (2009 est.): 8,303,000

Capital: Bujumbura

Head of state and government: President
Pierre Nkurunziza

Following the civil war between the Tutsi and Hutu (which began in 1993) and many years of stalled peace accords, several hopeful signs appeared in 2009 to show that Burundi was solidly on the road to stability. A pact to officially activate the 2006 cease-fire agreement had been signed in December 2008 by the Burundian government and the last remaining rebel group, the National Liberation Forces (FNL). After the release by the government in early January 2009 of 247 former FNL prisoners and the freeing by the FNL in April of 136 child soldiers, the pact was implemented. (See Special Report on page 180.) Nearly 3,500 former FNL soldiers were demobilized in April and May and integrated into the national army and police force. Despite the progress made in honouring the peace agreement, some 16,000 former

rebels rejected the terms of demobilization, and several hundred crossed the border into the Democratic Republic of the Congo to be recruited by the Democratic Forces for the Liberation of Rwanda, an ethnic Hutu militia operating in the DRC.

By the end of 2008, most refugee camps in Tanzania had closed and about 63,000 Burundians had returned home in that year alone. In 2009 nearly 36,000 refugees continued to live in the one remaining camp. The United Nations High Commissioner for Refugees estimated that over the six-year-long repatriation effort, more than 470,000 refugees had returned to Burundi. In addition, about 165,000 refugees sought citizenship in Tanzania, under a special agreement between the two countries. While great strides in protecting human rights were made—in February the Burundian Senate passed draft legislation that abolished the death penalty and rejected a proposed amendment that would have outlawed homosexuality—in April the lower house voted for the abolition of the death penalty and pushed for the passage of the latter amendment. The bill was voted into law, making homosexuality a crime.

The International Monetary Fund and the World Bank canceled 92% of the country's debt, which totaled more than \$1.4 billion. The move freed up more than \$40 million annually over the next 20 years, funds that would be earmarked for social and development programs. In March the Paris Club of creditor nations canceled the entire \$134 million debt owed by Burundi.

(MARY EBELING)

CAMBODIA

Area: 181,035 sq km (69,898 sq mi)

Population (2009 est.): 14,494,000

Capital: Phnom Penh

Chief of state: King Norodom Sihamoni

Head of government: Prime Minister
Hun Sen

Tensions between Cambodia and Thailand continued into 2009, with both countries maintaining significant military presence on the border near disputed territory adjoining the ancient

temple of Preah Vihear. Diplomatic negotiations early in the year broke down, and a brief clash in April resulted in the death of at least one Thai soldier (Cambodians claimed to have killed four), several injuries, and the destruction of a Cambodian market. Tensions surged again in July, with further reported troop buildup around the date of the one-year anniversary of UNESCO's declaration of Preah Vihear as a World Heritage site. At the same time, partly for bureaucratic reasons, UNESCO ignored Thailand's petition that the declaration be reconsidered or that both countries jointly administer the site; Cambodian authorities proclaimed this a major victory. As in Thailand, the standoff figured in Cambodian nationalist discourse and was used politically. Iconography of Preah Vihear became widespread, appearing on T-shirts and in music videos and pictures in hotel lobbies. Schools and temples were asked to ring bells to celebrate the anniversary, and a massive concert was broadcast live. Further talks led to some troop withdrawals in August and optimism for a settlement.

Much international attention focused on the first public trial held by the Khmer Rouge Tribunal (officially the Extraordinary Chambers in the Courts of Cambodia [ECCC]). The trial of 67-year-old Kaing Guek Eav (better known as Duch), who headed the notorious S-21 prison during the 1975–79 Pol Pot regime, began on February 17 and drew to a close in November, but a verdict was not expected until 2010. Witnesses included scholars, S-21 prison staff, and the few surviving victims. Early in the trial Duch dramatically confessed his responsibility for the crimes. Proceedings were broadcast on television; observers complained of only moderate Cambodian public interest, although the numbers of courtroom spectators grew throughout the trial.

The four remaining defendants in ECCC custody were to be tried jointly. ECCC was considered a "hybrid" court in that it was within the Cambodian legal system but included international jurists. A call by the international jurists for indicting more Khmer Rouge leaders was initially resisted by the court's Cambodian judges—mirroring the position of Prime Minister Hun Sen, who said that such a move would cause unrest. In September, however, the court formally opened up the possibility of more indictments, and the prosecution submitted five names. The tribunal continued to be plagued, how-

ever, by a lack of funding and charges of corruption.

Human rights organizations complained about the increasing number of lawsuits being brought against the political opposition. One notable case involved a speech made by Hun Sen in April in which he allegedly attacked parliamentarian Mu Sochua, using phrases with sexual innuendo. Mu Sochua, a former minister of women's affairs, sued Hun Sen for defamation for a nominal amount, 500 riels (\$0.12), saying that she really wanted only an apology. Hun Sen countersued both Mu Sochua and her lawyer, who eventually abandoned the defamation suit. After being stripped of parliamentary immunity, Mu Sochua was fined 16.5 million riels (\$4,000) for defamation in August. She refused to pay and could face prison.

(JOHN A. MARSTON)

CAMEROON

Area: 476,350 sq km (183,920 sq mi), including the 700-sq-km (270-sq-mi) Bakassi Peninsula

Population (2009 est.): 19,522,000

Capital: Yaoundé

Chief of state: President Paul Biya

Head of government: Prime Ministers

Ephraïm Inoni and, from June 30,

Philemon Yang

In a long-anticipated move, Cameroonian Pres. Paul Biya reshuffled the government on June 30, 2009. He named lawyer Philemon Yang, a member of the ruling Democratic Rally of the Cameroon People, as prime minister.

Corruption in the public sector remained widespread, despite the government's efforts to eradicate it. On March 10, Paul Ngamo Hamani, former head of the bankrupt Cameroon Airlines, was imprisoned on charges of having embezzled €194 million (about \$245 million). On August 19, seven civil servants working for the city of Douala, the country's economic capital, were found guilty of having appropriated nearly €3 million (about \$4.2 million).

Concerns over Cameroon's human rights record continued to make headlines. On January 9, Reporters Without Borders strongly protested the three-year prison sentence given to Lewis

Medjo, managing editor of an opposition weekly journal. Incarcerated since September 2008, Medjo was convicted in January of "spreading false news." Amnesty International (AI) published a report on January 29 accusing the government of having committed severe human rights violations, especially in its efforts to crush political dissent. AI cited the use of extreme violence against prisoners. On August 12, the government's own human rights commission published a damning report on prison conditions. More than 23,000 prisoners, many of them awaiting trial, were in facilities designed for a maximum occupancy of 16,000.

On March 19, on his first stop of a weeklong African trip, Pope Benedict XVI celebrated mass before some 60,000 people in Yaoundé's football stadium. A charity football match between Cameroon and Côte d'Ivoire was held on June 13 in Abidjan, Côte d'Ivoire, where, on March 29, 19 people had been crushed to death in a stampede during a World Cup qualifying match between Côte d'Ivoire and Malawi.

(NANCY ELLEN LAWLER)

CANADA

Area: 9,984,670 sq km (3,855,103 sq mi)

Population (2009 est.): 33,687,000

Capital: Ottawa

Chief of state: Queen Elizabeth II, represented by Governor-General Michaëlle Jean

Head of government: Prime Minister Stephen Harper

Domestic Affairs. Canada entered 2009 still reeling from a constitutional crisis that had threatened the months-old Conservative minority government. Prime Minister Stephen Harper's newly reelected centre-right government had introduced a much-maligned economic update on Nov. 27, 2008, that projected a series of small budget surpluses in spite of the worldwide economic downturn. The budget update also contained new policies, including the suspension of programs to achieve pay equity between women and men, the temporary suspension of the federal public sector's right to strike, and the elimination of public financing for political parties. The three parliamentary opposition

parties, which combined held a majority of seats in the House of Commons, announced that they were prepared to bring down the government through a vote of no confidence in the fiscal legislation and proposed installing a centre-left Liberal-New Democratic Party (NDP) coalition government in its place. The new coalition would have had guaranteed support on confidence matters from the separatist Bloc Québécois for 18 months. Facing an imminent defeat, Harper asked Gov.-Gen. Michaëlle Jean to prorogue Parliament on Dec. 4, 2008, only weeks after the new session had begun, in an attempt to find time to introduce a revised budget that would win support from at least one of the opposition parties. Jean acceded to his request, and a new session of Parliament was scheduled to begin in late January 2009.

Parliament resumed on January 26 with a short new speech from the throne, in which the government briefly presented a six-point economic plan to stimulate the economy. The following day Finance Minister Jim Flaherty introduced the revised federal budget, which projected the first deficit since the 1997–98 fiscal year. The budget document also predicted that the federal government would remain in a deficit for at least four years before returning to balanced budgets. Projected future deficits included Can\$33.7 billion (Can\$1 = about U.S.\$0.87) for fiscal year 2009–10, Can\$29.8 billion for 2010–11, Can\$13 billion for 2011–12, and Can\$7.3 billion for 2012–13. Although falling corporate and personal tax revenue contributed to some of the shortfall, a massive fiscal stimulus plan aimed at helping the country weather the global recession accounted for the bulk of the red ink. New spending initiatives included public and private investment, an infrastructure program, enhanced benefits for low-income and unemployed Canadians, worker-retraining programs, new funding for aboriginal peoples, and support for the ailing forestry and auto sectors. Personal income tax cuts worth approximately Can\$4 billion over two years and an individual home-renovation tax credit of up to Can\$1,350 were also introduced as a part of the budget. The official opposition, the centrist Liberal Party, agreed to support the budget

Heinz Ruckemann—UPI/Landov

The new leader of the Liberal Party of Canada, Michael Ignatieff, speaks to delegates at the party's convention in Vancouver on May 2.

and the speech from the throne, both confidence matters, in exchange for three promised budget reports. These reports would be confidence matters before the House of Commons and an opportunity to bring down the government if progress was not seen. During a fiscal update held on September 11, Flaherty revised his forecast deficit for the 2009–10 fiscal year upward to an estimated Can\$55.9 billion. He suggested, however, that budget deficits could be eliminated without future tax increases.

Following the Liberal Party's disastrous showing in the October 2008 election, in which the party took its worst share of the popular vote since confederation in 1867, the Liberal leader, Stéphane Dion, announced that he would resign as soon as the party selected a new leader. When the surprise Liberal-NDP coalition emerged as a potential government, Dion said that he would become a caretaker prime minister until the Liberal leadership was decided; however, with Parliament prorogued and the possibility of a new election if the government's new budget was defeated, the Liberals sought to have a more permanent leader in place immediately. On Dec. 10, 2008, Michael Ignatieff was named interim Liberal leader. His leadership was confirmed by 97% of the delegates at a party convention on May 2, 2009. Two other expected candidates for the leadership, Bob Rae and Dominic LeBlanc, had announced earlier that they were withdrawing from the race to leave Ignatieff, a former academic, the presumptive

winner. The party also voted to adopt a one-member, one-vote policy for future leadership conventions. The Liberals had been the last national party to use a delegate system at leadership conventions.

Following the release of the second scheduled budget report, on June 11, the Liberals demanded the establishment of a bipartisan six-member panel to review the employment insurance program. The Liberals wanted to implement a national standard of eligibility in place of the existing complex system of regional considerations. When the panel failed to reach agreement on such a reform to the program, Ignatieff announced during a national caucus meeting (August 31–September 2) that his party

would put forth a vote of no confidence at the earliest possible date. A seemingly imminent election was averted when the Bloc Québécois and the NDP agreed to support the government temporarily in exchange for some modest concessions. On December 30, Parliament was again prorogued at Harper's request and was to remain shut down until early March 2010, following the Olympic Winter Games in Vancouver.

In the provinces the governing centre-right Liberals in British Columbia were reelected on May 12 to a third consecutive majority government under Premier Gordon Campbell. On June 9 Nova Scotia elected the province's first New Democratic government; the centre-left NDP won 31 of 52 seats as the incumbent centre-right Progressive Conservatives, who had governed for 10 years, fell to third place behind the centrist Liberals. Manitoba's Gary Doer, Canada's longest-serving premier, announced on August 27 that he would leave office once his centre-left New Democrats had selected a new leader; the following day he was designated Canada's next ambassador to the U.S. Former Manitoba finance minister Gary Selinger was selected as the new NDP leader and premier-designate. The unexpected shutdown of the nuclear reactor at Chalk River, Ont., on May 14 precipitated a crisis in the medical community, as well as political repercussions. (See Sidebar.)

The Economy. On October 20, Toronto-Dominion Bank released a report predicting a combined federal-provincial deficit of Can\$90 billion–Can\$100 bil-

Chalk River Reactor Shutdown

Canada's 52-year-old nuclear reactor at Chalk River, Ont., experienced a sudden and unexpected shutdown on May 14, 2009, owing to a local power outage, and in the early morning of May 15 a leak of heavy water was detected. Although the reactor was originally forecast to be offline for one month, by August officials had revealed that the reactor would not resume production of medical-quality isotopes until the spring of 2010 at the earliest. The shutdown resulted in the delay or cancellation of numerous diagnostic appointments as well as other medical imaging procedures that utilize isotopes.

Members of the medical community suggested that the temporary loss of the reactor's production was a "catastrophe," as the reactor supplied one-third of the world's supply of medical isotopes. Experts said that Canada's reputation as a safe and steady supplier of these materials was badly damaged and suggested that major importers would likely investigate whether it would be in their self-interest to develop their own means of producing the isotopes (a bill approving such a program passed the U.S. House of Representatives in November). Following a decision to split up and sell off the publicly

owned Atomic Energy of Canada Ltd., on June 10 Prime Minister Stephen Harper announced that the federal government would eventually pull out of the the medical-isotope-production industry altogether.

Lisa Raitt, minister of natural resources, came under fire on June 3 for her handling of the isotope case when it was revealed that she or a member of her staff had left classified briefing papers about the nuclear reactor at a television station following an interview. Although she offered her resignation to the prime minister, it was not accepted. Days later Raitt once again faced criticism from the opposition after a journalist based in Halifax, N.S., reported on the contents of a privately taped conversation between the minister and her former director of communications, Jasmine MacDonnell, in which Raitt described the story about nuclear radiation leaks and cancer as "sexy" and questioned the political acumen of Leona Aglukkaq, the minister for health. Raitt eventually offered a tearful apology to cancer survivors and their families for her remarks and noted that she had lost her own father and brother to cancer.

(WILL STOS)

lion for the 2009–10 fiscal year. Only one year earlier the federal government and all provincial and territorial governments had initially proposed balanced budgets for fiscal 2008–09. In spite of growing deficits, surging personal bankruptcies, and the loss of nearly 400,000 jobs from peak employment in October 2008 to August 2009, Canada remained in the best financial situation of the Group of Eight (G-8) industrialized countries, according to the federal government and some economists. The country's conservative risk-averse banking system, which had strictly controlled cash-to-credit ratios, was able to emerge from the 2008 credit crisis relatively unscathed and without the bank bailouts and extensive credit guarantees that were common in the U.S.

Other industrial sectors faced much more difficult conditions, however. Prime Minister Harper and Ontario Premier Dalton McGuinty announced on June 1 that the federal and Ontario provincial governments would buy a 12% stake in General Motors (GM) in exchange for Can\$10.5 billion. Up to 85,000 jobs would be lost, mostly in southern Ontario, if GM did not undergo government-backed restructuring. The agreement between the governments and the automaker precluded GM's Canadian operations from entering court-approved bankruptcy protection.

Foreign Affairs. A ruling by Canada's Immigration and Refugee Board, which had granted a white man

refugee status in Canada on the basis of the racial prejudice and violence that he claimed to have experienced in South Africa from the black majority there, prompted the federal Ministry of Immigration to announce on September 3 a plan to appeal that decision in the face of international outrage. South African officials condemned the original ruling, made by a quasi-judicial and independent board, as one that would serve to perpetuate racism. The refugee claimant had been living in Canada illegally since leaving South Africa. The South African government noted that the government had made efforts to fight violence and crime against all people, regardless of ethnicity or creed.

Trade negotiations between Canada and the European Union (EU) were launched at a leaders summit on May 6 in Prague. Topics up for discussion included facilitating the freer trade of agricultural goods, enhancing investment opportunities and government contract procurement, permitting temporary movement of workers between Canada and the EU member countries, and trying to better harmonize regulations concerning animal safety and intellectual property. The talks, which could take up to two years to complete, were hailed by Canadian free-trade proponents as a hopeful counterbalance to Canada's dependence on the U.S.'s economy and market. The EU was Canada's second largest trading partner, after the U.S.

A newly enacted EU ban on a range of seal products from Canada was expected to be an irritant during trade talks between Canada and the EU. The ban—which was lodged as a protest to an annual hunt of some 300,000 harp seals that some environmentalists and EU legislators had labeled as cruel and inhumane—affected only products from Canada's Atlantic region and excluded seal products produced by the Canadian Arctic's indigenous Inuit peoples. Canada defended the hunt as being conducted in a humane manner and as essential to the livelihoods of people living in rural and isolated areas on Canada's East Coast. The EU had imported Can\$2.5 million worth of seal products from Canada in 2008.

(WILL STOS)

CAPE VERDE

Area: 4,033 sq km (1,557 sq mi)

Population (2009 est.): 509,000

Capital: Praia

Chief of state: President Pedro Pires

Head of government: Prime Minister José Maria Neves

When in August 2009 U.S. Secretary of State Hillary Clinton made Cape Verde the seventh stop on her African tour,

she praised the country's economic advances and its successful implementation of the \$110 million Millennium Challenge compact to improve social services, increase agricultural productivity, and develop infrastructure. She noted the progress that the government was making toward greater accountability and transparency and that Cape Verde was the only country in Africa where women made up more than half of the government's cabinet ministers.

Cape Verde remained heavily dependent on the remittances sent home by people who had left, 500,000 of whom lived in the U.S., and on donor money from the European Union and elsewhere. Cape Verde's ties with China continued to grow, as did those with Angola; Pres. Pedro Pires had made an official visit there in December 2008. Cape Verde was, with Angola, active in the Community of Portuguese-Speaking Countries (CPLP), and ties between the ruling parties of the two countries were close. Also active in the Economic Community of West African States, Cape Verde hoped to extend its territorial waters into the Atlantic Ocean by another 150 nautical miles, but it remained to be seen whether the country could do so.

(CHRISTOPHER SAUNDERS)

CENTRAL AFRICAN REPUBLIC

Area: 622,436 sq km (240,324 sq mi)

Population (2009 est.): 4,511,000

Capital: Bangui

Chief of state: President François Bozizé

Head of government: Prime Minister Faustin Archange Touadéra

Despite some progress in 2008 in a series of peace agreements with rebel groups, continued insecurity in 2009 in the northern region of the Central African Republic (CAR) forced another 10,000 CAR refugees to flee into southern Chad, where they joined an estimated 60,000 of their countrymen. In February government troops were accused of having carried out violent reprisals in the Ndele region against civilians who were thought to be supporting rebels. UN peacekeepers took over responsibility for the troubled cross-border area on March 15, amid

fears that the Ugandan Lord's Resistance Army (LRA) was preparing to move across the CAR border from its bases in the Democratic Republic of the Congo. After CAR rebels burned surrounding villages on June 6, they struck a military base in the northern town of Birao. In late July, the LRA attacked towns in CAR, killing at least 10 people and causing hundreds to flee their homes. That same month UN officials called for immediate and urgent humanitarian aid to be sent to the world's second poorest country.

Fighting on April 12 between farmers and cattle traders killed an estimated 20 people in a livestock market near Bangui. Dozens were injured when clashes erupted over the ownership of cattle stolen a week earlier by bandits.

Under pressure from the Vatican, two senior prelates resigned in May, triggering a one-day strike by priests. The departure of the archbishop of Bangui and the bishop of Bossangoa followed an investigation into charges of moral laxity among the capital's priests.

(NANCY ELLEN LAWLER)

CHAD

Area: 1,284,000 sq km (495,755 sq mi)

Population (2009 est.): 10,329,000, excluding about 250,000 refugees from The Sudan

Capital: N'Djamena

Chief of state: President Lieut. Gen. Idriss Déby

Head of government: Prime Minister Youssouf Saleh Abbas

Chad's chronic instability persisted throughout 2009. The governments of The Sudan and Chad again agreed not to provide support to each other's rebel movements, but this had little effect. One of the rebel movements in the war-torn Sudanese region of Darfur continued to launch operations from Chad and was thought to receive much of its funding from Pres. Idriss Déby; meanwhile, Chadian rebels continued to operate from Darfur. Government forces in Chad were able to rebuff a rebel attack in May, and by mid-2009, despite a steep decline in fighting in Darfur that led some observers to declare that the region should no longer be considered a war zone, some 250,000 refugees

from the region remained in eastern Chad, where a small UN peacekeeping operation was stationed.

Déby's highly authoritarian government refused to enter into dialogue with the president's internal opponents. On the Economist Intelligence Unit's democracy index, published in late 2008, Chad was ranked 166th out of 167 countries. Chad's oil revenues did not bring the social and economic benefits promised by the government to local communities, but instead the revenues were used to build up the military and to facilitate corruption. Chad's main allies—France, Libya, the U.S., and China—did little to challenge the country's abuse of human rights, though U.S. Pres. Barack Obama's special envoy to The Sudan, retired air force general J. Scott Gration, did meet with Chadian officials. There was speculation that French Pres. Nicolas Sarkozy might abandon France's military bases in Chad, but the bases remained, and the U.S. continued to train Chadian soldiers, allegedly to fight al-Qaeda-affiliated terrorists.

(CHRISTOPHER SAUNDERS)

CHILE

Area: 756,096 sq km (291,930 sq mi)

Population (2009 est.): 16,602,000

Capitals: Santiago (national) and Valparaíso (legislative)

Head of state and government: President Michelle Bachelet

In 2009 Pres. Michelle Bachelet neared the completion of her four-year term in office having become the most popular president in contemporary Chilean political history. Since her election in January 2006, Bachelet had promised to bring an openness and accessibility to the presidency and to focus public policies on helping the poor and the marginalized—especially women, children, and the elderly. Despite a somewhat rocky start, Bachelet was able to meet these goals, which was reflected in her extraordinary popularity; a poll taken in October showed that 78% of Chileans gave her high marks.

Bachelet had only four years to achieve these goals because the presidential term of office had been short-

Aliosha Marquez—AP

A day after winning the first round of voting in Chile's presidential election, Sebastián Piñera holds up a replica of La Moneda, the country's presidential palace, during a campaign event in Santiago on December 14.

ened in a set of constitutional reforms approved during the previous administration of Ricardo Lagos. Moreover, as the fourth successive president to belong to the centre-left Concertación coalition, Bachelet had to battle a growing sense of political exhaustion among Concertación supporters; by the time she was to leave office in March 2010, the coalition would have been in power for 20 years.

The political contest to succeed Bachelet was lively, with four candidates vying for the presidency. For the first time, the political centre-left fielded three presidential candidates, thus splitting that vote. The Concertación's official candidate was Eduardo Frei Ruiz-Tagle, who had previously served (1994–2000) as president. Frei's inability to generate enthusiasm among Concertación supporters, however, led to the upstart candidacy of Marco Enríquez-Ominami, who ran as an independent. In contrast to Frei, Enríquez-Ominami was young and charismatic, and he centred his campaign on a critique of Frei and the old-style politics that he represented. To the left of both Frei and Enríquez-Ominami was Jorge Arrate, the Communist Party candidate, who registered only in single digits in polling.

On the political right, Sebastián Piñera, who lost to Bachelet in the 2006 runoff election, was vying again for the presidency. Unlike in his first attempt, however, when Piñera had to best Joaquín Lavín to become the right's candidate against Bachelet, Piñera was now

the consensus candidate of the right-wing alliance and waged a campaign that highlighted the need for greater governmental efficiency rather than one that presented a more fundamental critique of Concertación policy. Polling consistently put Piñera in first place among the four candidates.

As expected, no candidate gained an absolute majority of more than 50% in the December 13 election; as a result, a second round of voting was scheduled to take place on Jan 17, 2010. Piñera took the first round with 44% of the vote; Frei came in second with 30%; and Enríquez-Ominami garnered 20%. Although the combined vote total for the

three centre-left candidates was 56%, it was unclear whether Frei could capture all of those votes, especially those that went to Enríquez-Ominami. If Piñera won, it would mark the end of the era of the Concertación.

On the economic front, the country weathered the global recession relatively well, in large part because Bachelet had not bowed to political pressure early in her administration to spend the unexpected financial windfall that had resulted from the high price of copper, one of Chile's main exports. Instead, the government saved this revenue and was able to draw on these reserves when the country's export-driven economy slowed and the value of Chilean exports dropped by 30% during the global downturn.

(LOIS HECHT OPPENHEIM)

Domestic Affairs. Following the success of the 2008 Olympic Games in Beijing, China turned its political gaze inward in 2009, focusing its attention on sensitive historical anniversaries, ethnic unrest in its frontier regions, and the effort to maintain the economic growth that the Communist Party of China (CPC) believed underpinned its rule and the country's stability. At the same time, though, the strong performance of China's economy despite the global economic crisis gave the country unprecedented prominence on the world stage. (See Special Report on page 174.)

Foreshadowing a year of dissent, prominent Chinese dissidents and intellectuals issued Charter 08 in December 2008 after nearly a year of planning. This manifesto demanded that human rights, democracy, and constitutional government replace the Chinese government's program of authoritarian modernization and expressly linked its demands to the approaching 20th anniversary of the 1989 crackdown on the Tiananmen Square pro-democracy demonstrators. The Chinese government's response was swift. Liu Xiaobo, a well-known writer who helped write and circulate the charter, was detained around the time of the manifesto's initial release, and he remained in custody throughout 2009, though his formal arrest on charges of subversion was not approved until June. He was found guilty on December 23 and on December 25 was sentenced to 11 years' imprisonment. Many of the original 303 signatories of Charter 08 were questioned by the police, and Chinese media outlets were ordered to suppress coverage of the document.

Most dissent in China was, however, based on specific grievances. In the aftermath of the May 2008 earthquake in western Sichuan province that killed about 80,000 people—including up to 5,000 schoolchildren—a local activist, Huang Qi, attempted to investigate accusations that shoddy school construction had led to a disproportionate number of deaths. Huang was arrested and in November received a three-year prison sentence for possessing state secrets. Ai Weiwei, a prominent artist and activist, was severely beaten by police in August before he could testify at the trial of Tan Zuoren, another activist who had been arrested after having attempted to investigate the student deaths in Sichuan. Among other cases, the new general manager of the Tonghua Iron & Steel Group was murdered in July by workers angry over plans by a privately

Capital: Beijing

Chief of state: President Hu Jintao

Head of government: Premier Wen Jiabao

owned steel conglomerate to take over and modernize the Jilin province steel plant. In August rioters in central China clashed with public security officials after more than 2,000 children whose schools were in close proximity to smelting facilities were found to have elevated levels of lead in their blood.

In addition to demonstrating decreased tolerance for dissent, the Chinese government also cracked down on lawyers who defended dissidents. Human rights lawyer Gao Zhisheng was arrested in February. Despite appeals by his wife to U.S. Pres. Barack Obama as the president paid a state visit to China in November, Gao's whereabouts remained unknown. Another blow was dealt to the emerging legal profession in July when the Beijing city government revoked the licenses of 53 lawyers who had taken on various cases against the state.

In early June the anniversary of the Tiananmen Square incident passed largely uneventfully as a massive police presence patrolled the site of the student demonstrations and popular Internet services such as Twitter were blocked. Wu'er Kaixi, a student leader during the Tiananmen protests who eventually resettled in Taiwan, attempted to return to China for the anniversary, but his effort was unsuccessful. On October 1 China's leadership celebrated the 60th anniversary of the founding of the People's Republic of China with a mass celebration featuring the weaponry of the country's modernizing armed forces and an affirmation by Pres. Hu Jintao of China's continued official commitment to socialism.

Despite this display of power, the CPC suffered a number of challenges to the legitimacy of its rule. In May the memoirs of former premier and CPC general secretary Zhao Ziyang were published posthumously in Hong Kong. In his memoirs, Zhao—a party insider who nonetheless spent years under house arrest after the Tiananmen Square incident—called for a reevaluation of Tiananmen and for China to become a parliamentary democracy. The government's handling of Tibet was also criticized publicly in a report authored by some 200 Chinese legal professionals and issued in June. The report concluded that the deadly riots that occurred in Tibet in March 2008 were caused by Chinese government policies that had disrupted the Tibetan economy, culture, and religion.

By far the most serious challenge to the CPC's authority, however, was the

Entertainers perform a dance routine during China's first public gay pride week, which took place in Shanghai in June.

unrest that was sparked by the ethnically motivated killings of two migrant Uighur workers in late June at a factory in southern Guangdong province. Dissatisfied over the investigations in Guangdong, Uighurs began rioting in the streets of Urumqi, the capital of the Uygur Autonomous Region of Xinjiang in western China. Attacks by Uighurs on ethnic Han Chinese and reprisals by mobs of Han left nearly 200 people dead in the worst ethnic violence that China had experienced since the founding of the People's Republic. Authorities moved quickly to restore order, but the secretary of the CPC Urumqi City Committee, Li Zhi, was removed from office in early September for his failure to protect the provincial capital's citizens. Exiled Uighur activist Rebiya Kadeer (see BIOGRAPHIES) was accused by authorities of having stoked the unrest.

In November nine men who took part in the Urumqi rioting were executed in Xinjiang. On December 3, death sentences were handed down by the Intermediate People's Court of Urumqi to five other individuals involved in the violence. That same month Xinjiang party secretary Wang Lequan was replaced by Meng Jianzhu, China's minister of public security, who had distinguished himself with his management of security at the Beijing Olympics.

In deference to the sensitive anniversaries of Tiananmen and the founding of the republic, Chinese politics during 2009 was even more carefully scripted than usual. When the National People's Congress (NPC) met in March, talks focused on ensuring economic growth of at least 8% for the year; the legislature

also endorsed the government's ongoing security clampdown in Tibet and affirmed the subordination of the NPC to the CPC. In particular, Wu Bangguo, the country's top-ranking legislator, said that the NPC's core value was to uphold the leadership of the party and that China's political system did not and should not adopt separation of powers between the executive, legislative, and judicial branches of government.

In areas other than politics, Chinese society continued its remarkable opening. In June China's first public gay pride week took place in Shanghai. Another historic development in Shanghai was the cautious steps made toward loosening the one-child policy that had been in place in China since the late 1970s; under new rules some couples in Shanghai would be allowed to have two children.

Internet censorship appeared to advance with the announcement that all new PCs would need to be loaded with filtering software, known as Green Dam, that would block certain types of objectionable content, such as pornography. Nonetheless, public outrage forced a delay in universal implementation of the policy. After the disturbances in Xinjiang, however, the Internet was blocked throughout China's vast western frontier and remained largely so through the end of the year.

Economy. The strength of China's economy was credited with helping stave off a worldwide economic collapse. In the face of the global downturn, China succeeded in its objective of maintaining the country's economic expansion, with year-on-year GDP growth estimated at 8.2%. The year began painfully as some

20 million migrant workers found themselves unemployed after tens of thousands of factories closed in 2008 in the Pearl River Delta. By the end of 2009, however, 10 million new urban jobs had been created.

Much of the economic growth and job creation was driven by a massive \$586 billion stimulus package and the extension of easily available credit, especially to state-owned or state-affiliated enterprises. Despite China's accelerating economic growth as the year progressed, cumulative annual exports, which were dominated by the private sector, were just \$113.7 billion—some \$20 billion less than in 2008.

China's efforts to secure more access to vital mineral resources in developed countries did not fare well. Chinalco attempted to buy the Australian-based mining conglomerate Rio Tinto for \$19.2 billion in February, but by June the deal had collapsed under political pressure from the Australian public not to sell control of strategic minerals to China. In July Chinese authorities arrested and detained four Rio Tinto employees on charges of espionage and theft of Chinese state secrets; Australian officials maintained that the arrests were in retaliation for the aborted Rio Tinto deal. The four employees remained in custody at year's end and were awaiting trial.

In the spring, though, Chinese concerns successfully acquired stakes in two Australian mining companies, investing \$438 million in Fortescue Metals Group and \$1.2 billion in Oz Minerals. In December President Hu celebrated another remarkable Chinese engineering feat when he helped to open a pipeline that would transport natural gas some 1,835 km (1,140 mi) from Turkmenistan to China.

On December 26, the \$17 billion Wuhan-Guangzhou railway opened to create a high-speed link through 20 cities. Running at speeds of 350 km/hr (217 mph), the train reduced travel time from Wuhan, an industrial city along the Yangtze River, to the southern port city of Guangzhou from 10 or more hours to about 3.

Foreign Relations. China's relations with the U.S. got off to an inauspicious start in 2009 when the U.S. lodged a protest with Beijing in March about what it claimed was harassment of a U.S. naval intelligence vessel, the USNS *Impeccable*, by five Chinese ships in international waters. China argued that the vessel was within its territorial waters and had no right to be there.

Throughout the year the U.S. cautiously pressed China to allow its currency, the renminbi, to appreciate. Despite this pressure, the renminbi did not appreciate significantly. In September the U.S. announced higher tariffs on Chinese tires, and in November it placed higher tariffs on Chinese steel pipes. At the same time, the administration of President Obama carefully avoided the kinds of open conflicts that had characterized his two predecessors' early months in office. In particular, neither Obama nor the secretary of state, Hillary Clinton, publicly rebuked China on human rights.

In November Obama visited China on an official state visit. An image of the president stepping off his plane in Shanghai holding his own umbrella impressed many ordinary Chinese citizens, who were used to the Chinese leadership's practice of having aides carry their umbrellas. At a town hall meeting with students from local Shanghai universities, Obama also struck a chord with his statement that "the more freely information flows, the stronger the society becomes, because then citizens of countries around the world can hold their own governments accountable." Obama's speech was carried over the Internet but not on Chinese television. Many critics, however, called the Obama visit largely unsuccessful because he failed to extract commitments from China on issues of importance to Washington, such as sanctions against Iran, policy toward North Korea, or cooperation on global warming.

The failure to achieve consensus on global warming became evident in December at the UN Climate Change Conference in Copenhagen. China's representatives argued that the U.S. and other developed countries should subsidize less-developed countries such as China in the effort to reduce carbon dioxide emissions. The U.S. maintained that China was in a special category among less-developed countries and had the resources to pay for cuts itself. Intensive last-minute discussions resulted in the signing of the Copenhagen Accord, under which China agreed to work with other nations to limit any rise in global temperatures to 2 °C (3.6 °F).

Relations with Japan improved significantly after the historic victory of the opposition Democratic Party of Japan in the Japanese general election on August 30. Chinese Vice Pres. Xi Jinping visited Japan in December and met with the new prime minister, Yukio Hatoyama (see BIOGRAPHIES), and Em-

peror Akihito. In response to North Korea's long-range ballistic missile test in April and its nuclear test in May, China joined the other permanent members of the UN Security Council in imposing sanctions on North Korea. Premier Wen Jiabao followed up on the sanctions by visiting North Korea in October for talks on nuclear disarmament with North Korean leader Kim Jong Il. China's defense minister, Li Guangjie, also visited Pyongyang in November to promote defense exchanges between the longtime allies.

China joined Russia in continuing to urge that no sanctions be placed on Iran for its nuclear activities, although China did agree to the International Atomic Energy Agency's censure of Iran in November. For a time in the first half of 2009, Iran was the leading exporter of oil to China, sending 700,000 bbl of oil a day in the month of May alone.

Tensions increased between China and India over India's Himalayan province of Arunachal Pradesh, which China claimed as part of Tibet. In June India increased its troop levels along the Chinese border in Arunachal Pradesh, and the Indian government in November permitted the Dalai Lama to make a visit to the province—a move that prompted diplomatic protests by China.

China's relations with France recovered slightly after diplomatic tensions over Tibet in 2008. French Pres. Nicolas Sarkozy met with President Hu twice at international summits in 2009. In February Wen visited the U.K., where he signed three economic agreements with the government of Prime Minister Gordon Brown. Wen's lecture at the University of Cambridge was interrupted, however, when a protester hurled a shoe at him. China and the EU held an inconclusive summit in Nanjing in November at which the EU pressed China to appreciate its currency and Wen asked the EU to remove trade barriers. (MICHAEL R. FAHEY)

COLOMBIA

Area: 1,141,748 sq km (440,831 sq mi)

Population (2009 est.): 44,972,000

Capital: Bogotá

Head of state and government: President Álvaro Uribe Vélez

Luis Robayo—AFP/Getty Images

Three years into his second four-year term, Colombian Pres. Álvaro Uribe remained very popular in 2009. The constitution had been revised once to allow him to run for a second term, and a movement was under way to permit him to run for a third term in 2010. The constitutional reform required popular approval via a referendum. Before the referendum could be held, however, it had to be approved by Congress and reviewed by the Constitutional Court. The referendum received congressional approval in September (after much bargaining) and was passed to the Constitutional Court. If the court took the maximum time allowed to make a decision, Uribe would be prevented from running. The delay put Uribe's allies in limbo as they refused to declare their candidacies until his status was decided. Meanwhile, the opposition Liberal Party and Alternative Democratic Pole held primaries in late September to winnow their fields of prospective presidential candidates to a single official candidate each.

Uribe's popularity appeared generally impervious to a number of government scandals. In the so-called parapolitics scandal, more than 70 members of Congress—most of them supporters of the president—were placed under investigation for alleged connections to right-wing paramilitary groups. A second scandal involved allegations that soldiers had killed innocent citizens and—in an attempt to boost the soldiers' chances for promotion—had recorded those killed as guerrillas or drug traffickers. In yet another scandal, the Department of Administrative Security (DAS), a secret police unit, was accused of having tapped the phones of human rights workers, journalists, judges, and opposition politicians. Uribe responded to the latter scandal by proposing to liquidate the DAS and replace it with a new intelligence unit.

The president and the Supreme Court were in conflict on several fronts. It was the court's duty to investigate charges that the legislators who supported the referendum to allow Uribe's reelection bid had acted illegally because the proposal did not have the prior approval of the National Electoral Council. The court also investigated whether the country's inspector general, who was closely tied to the Uribe administration, had behaved wrongfully when he cleared government officials of charges of vote buying during previous congressional deliberations in 2006 on whether to allow Uribe to seek reelection that

A university student in the Colombian city of Cali rests beneath a wall painted with graffiti in which a wolf, representing the U.S., remarks, "Grandma, I come to help you fight against drug trafficking."

year. In an unprecedented move, the Supreme Court in July rejected as unfit all three of the candidates put forward by Uribe for consideration for the office of attorney general.

The government's close relations with the U.S. continued to cause trouble for it in the region. The announcement that the U.S. military would be allowed to use seven Colombian military bases as part of the battle against drug trafficking (and related armed groups) met with varying levels of opposition from other governments in the region. Venezuelan Pres. Hugo Chávez and Ecuadorian Pres. Rafael Correa were the most vociferous critics. Venezuela suspended relations with Colombia. More alarming to Colombia, however, was the fact that Venezuela borrowed \$2.2 billion from Russia to buy arms, including tanks and antiaircraft missiles. Brazil also announced major arms purchases from France, including jet fighters and attack submarines. The spectre of an arms race in the region loomed large.

The Centre for Human Rights and the Displaced estimated that 4.6 million Colombians had been displaced since 1985 by the armed conflict between the government, left-wing guerrillas, and right-wing paramilitaries. The violence pushed more than 380,000 Colombians from their homes in 2008 alone. In 2009 the government began compensation payments to 220,000 victims of the violence, offering families about \$9,500 each.

The global economic downturn was felt deeply in Colombia. Urban unem-

ployment reached 13%, and industrial production was down. Two quarters of negative growth put the economy, technically, into recession. The government statistics agency, however, said that it was standing by its estimates of very modest growth for the year as a whole—from 0.5% to 1.5%. Particularly hard hit were the victims of fraudulent investment firms. As many as four million people in Colombia lost their savings when such firms closed or collapsed in late 2008. Curfews were imposed in several cities in an effort to control protesters seeking the return of their money. Many felt the government moved too slowly in response to the crisis.

COMOROS

Area: 1,862 sq km (719 sq mi), excluding the 374-sq-km (144-sq-mi) island of Mayotte, a de facto dependency of France since 1976
Population (2009 est.): 676,000 (excluding 196,000 on Mayotte)

Capital: Moroni

Chief of state and head of government:
 President Ahmed Abdallah Mohamed Sambi

In 2009 Comoros faced referenda that had significant impact on the political future of the country. On May 17

Comorans voted in a controversial referendum to modify the framework of the power-sharing government that had been in place since 2001. The constitutional change pared down the governmental structure; federal presidents became governors of the semiautonomous Grande Comore, Anjouan, and Moheli islands, and the term of the union presidency was extended (from four) to five years. More than 95% of Mayotte balloters taking part in a referendum held on March 29, 2009, on Mayotte (the only one of the four Comoros islands that remained a dependency of France), approved a change of status with France from that of a departmental collectivity to an overseas department. (See *Dependent States*, above.) Both the African Union and Comoros, which viewed Mayotte as occupied by France, rejected the outcome of the vote.

On June 30 an airplane carrying 153 people crashed off the coast of Grande Comore as it attempted to land at Moroni, the capital. In the worst air disaster in Comoros's history, a lone survivor was rescued from wreckage in the Indian Ocean. (MARY EBELING)

CONGO, DEMOCRATIC REPUBLIC OF THE

Area: 2,344,858 sq km (905,355 sq mi)

Population (2009 est.): 66,020,000

Capital: Kinshasa

Head of state: President Joseph Kabila

Head of government: Prime Minister Adolphe Muzito

The situation in the Democratic Republic of the Congo (DRC) remained grim throughout 2009. Despite vast mineral wealth, mining production severely declined owing to mismanagement, corruption, endemic civil unrest, the global recession, and a lack of new investment. In March 2009 the IMF lowered its projection of GDP growth in the DRC for the year to 2.5% from 6% in 2008.

Early in 2009 significant changes in the political-military scene occurred in eastern DRC. Desiré Kamanzi led a faction of the National Congress for the Defense of the People (CNDP) to break away from its ruthless leader,

During her August visit to the Democratic Republic of the Congo, U.S. Secretary of State Hillary Clinton purchases a shirt from patients at a clinic in the eastern city of Goma.

Gen. Laurent Nkunda, and transform the militia movement into a political party. The new leadership agreed to integrate its soldiers into the Armed Forces of the Democratic Republic of Congo (FARDC). Smaller armed groups followed suit. Meanwhile, the government forged an unexpected alliance with Rwanda to conduct a joint military operation in the DRC's North Kivu province to eliminate the influence of the Democratic Forces for the Liberation of Rwanda (FDLR); the FDLR had been a major factor in destabilizing the area for 12 years. Though the five-week campaign (January 20–February 25) had limited success, it forced Nkunda to flee into Rwanda, where he was arrested and faced possible charges for war crimes. Pressure exerted by the DRC for his extradition failed.

On March 23 the government signed separate peace agreements with the CNDP, the North Kivu armed groups, and the South Kivu armed groups; as part of the pact, each group committed to converting its organizations into political movements in return for the integration of rebel soldiers and officials into the FARDC, national police, and other administrative units. The rebels, however, continued to fight intermittently. To quell FDLR rebellion in Kivu, in March the FARDC, supported by UN peacekeeping forces, launched Operation Kimia II, which, like the January–February operation, failed. In a

joint operation with the Ugandan government, the DRC forces engaged Lord's Resistance Army (LRA) insurgents near the border, but that mission also met with limited success.

Unfortunately, the national army, which incorporated former rebels, did little to reduce antigovernment rebel activity or improve the situation. It became part of the problem. Human rights violations by the FDLR and by undisciplined FARDC elements increased during Kimia II. In North and South Kivu, 800,000 civilians were displaced by internecine fighting in the first half of the year. The UN estimated that the number of internal refugees reached two million. By 2009 the use of rape as a war tactic against women, children, and men by all armed forces had doubled or tripled in nine eastern conflict zones. According to Human Rights Watch, 65% of known rape cases in North Kivu were committed by the FARDC soldiers. In recognition of his work in treating thousands of victims of sexual abuse, Congolese gynecologist Denis Mukwege was awarded several international prizes in 2008. (See BIOGRAPHIES.)

In August, U.S. Secretary of State Hillary Clinton visited the DRC as part of her African tour. She urged the government to do more to protect civilians and to bring military offenders to justice and announced a \$17 million plan to help achieve these efforts.

(LARAY DENZER)

CONGO, REPUBLIC OF THE

Area: 342,000 sq km (132,047 sq mi)

Population (2009 est.): 3,683,000

Capital: Brazzaville

Head of state and government: President Denis Sassou-Nguesso, assisted until September 15 by Prime Minister Isidore Mvouba

The reelection of Republic of the Congo Pres. Denis Sassou-Nguesso in the July 12, 2009, presidential poll took place amid considerable controversy. Sassou-Nguesso, who had ruled for much of the past 30 years, took 78% of the vote. The government claimed that 66% of the 2.2 million eligible voters cast ballots, but many international observers considered that figure to be grossly exaggerated, especially because the major opposition parties boycotted the election and many people entitled to vote had not been issued voting cards. In September, Sassou-Nguesso named a new government and abolished the post of prime minister, which he had created in 2005 in violation of the constitution.

On February 10 the government launched a program to purchase and

destroy weapons from the former rebels known as "Ninjas" in the southern Pool region. The operation was considered a success when on March 2 officials in the city of Kinkala burned nearly 3,000 guns turned in by former Ninja fighters. Those still possessing illegal arms were given another week to sell their guns to the government for as much as \$200.

A vaccination campaign began in February to inoculate children and pregnant women in the northern Enyellé district against such diseases as diphtheria, tetanus, polio, meningitis, and whooping cough. In addition, 2,000 treated mosquito nets were to be distributed as part of efforts to control malaria, which was the primary cause of death of children under age five. On March 7 ground was broken for a water purification plant, financed by China, in Brazzaville. Water supplies in the capital remained a major problem.

On a positive note, a food and nutrition security program was initiated in February, designed to provide new incentives for farmers to increase production for the market. Notwithstanding various development projects in the past, only 5% of the country's arable land was currently under cultivation. Negotiations with South African farmers to lease some 200,000 ha (about 494,200 ac) of Congolese farmland for

the production of food and fibre crops were successfully concluded in October. (NANCY ELLEN LAWLER)

COSTA RICA

Area: 51,100 sq km (19,730 sq mi)

Population (2009 est.): 4,509,000

Capital: San José

Head of state and government: President Óscar Arias Sánchez

The year 2009 in Costa Rica was highlighted by natural disaster, preelection fever, a weak economy, and international mediation efforts. On January 8 a major earthquake struck the country, with its epicentre 6.5 km (4 mi) east of the Poás Volcano in Alajuela province. The shock waves were felt throughout the country, and 23 persons were killed, with another 13 missing. More than 800 homes were damaged or destroyed, and more than 2,000 people took refuge in government-supplied shelters. International emergency assistance and special government funding were quickly appropriated to deal with the aftereffects of the disaster.

National elections were set for Feb. 7, 2010, and the political parties spent 2009 in nominating conventions. The governing National Liberation Party (PLN) held an open primary on June 7, and the PLN claimed that nearly one-fifth of the electorate turned out for the event. The winner, Laura Chinchilla Miranda, had served in the incumbent government as vice president and minister of justice; she defeated Johnny Araya, former mayor of San José. On May 31 the opposition Citizen Action Party (PAC) selected Ottón Solís in a closed primary with a much smaller turnout.

In line with the worldwide economic downturn, the Costa Rican economy contracted sharply, with manufacturing, construction, exports, and imports especially affected. Rising government expenditures and shrinking revenues increased the current-account deficit and caused the government to seek a standby loan from the IMF.

Nobel Peace Prize-winning Pres. Óscar Arias turned his negotiating talents to the political crisis in neighbouring Honduras, where Pres. Manuel Zelaya

Supporters of Republic of the Congo Pres. Denis Sassou-Nguesso attend an election rally in Brazzaville on July 10.

Houses lie destroyed in Cinchona, Costa Rica, after a major earthquake in early January triggered deadly landslides in the area.

was ousted in June by that country's military and exiled to Costa Rica but returned to Honduras in September. On October 5 former Costa Rican president Rafael Calderón (1990–94) was sentenced to five years in prison for having embezzled \$520,000 in 2004.

(MITCHELL A. SELIGSON)

CÔTE D'IVOIRE

Area: 320,803 sq km (123,863 sq mi)

Population (2009 est.): 20,617,000

De facto capital: Abidjan

Chief of state: President Laurent Gbagbo

Head of government: Prime Minister Guillaume Soro

Seven years after the civil war that divided Côte d'Ivoire in half (the rebel-held north and the government-con-

trolled south), preparations were under way in 2009 for the long-awaited presidential elections, which were contingent on the reunification of the country. Progress was marked by the redeployment of 4,000 police to the north. Prime Minister Guillaume Soro announced on May 14 that the poll would occur on November 29. Soro's New Forces party accused Pres. Laurent Gbagbo and his ruling Ivorian Popular Front of having conspired to delay the electoral process. On May 18, Gbagbo met with leaders of the major opposition parties to discuss the voter-registration program and to seek confirmation that no boycott would take place. When the registration process was completed on June 30, more than six million names were on the lists. On August 8, Gbagbo appointed his associate Paul Yao N'dré as head of the Constitutional Council, which would have primary responsibility for conducting and validating the election. On October 30, however, Gbagbo announced that the vote would be postponed.

On March 29, just prior to the start of a World Cup qualifying match between Côte d'Ivoire and Malawi at Houphouët-Boigny Stadium in Abidjan, stampeding fans caused a wall to collapse. Nineteen people died. An official inquiry concluded that poor security efforts and the provision of many more tickets than the stadium's capacity would allow were the major factors in the tragedy. Four people, including the organizer of the match, were charged with involuntary manslaughter. On June 13 the Ivorian team beat Cameroon in a charity match designed to raise funds for the victims' families.

On January 15, Sotra, the state-owned engineering branch of the country's transport corporation, placed the first three commuter buses built entirely in Côte d'Ivoire into service in Abidjan. In other economic news, on April 1 the IMF agreed to cancel one-quarter of the country's \$12.8 billion national debt, and in May the Paris Club restructured the country's foreign debt and wrote off some of its scheduled loan repayments.

French journalist Jean-Paul Ney, imprisoned in Abidjan for 16 months, was released on May 6. Accused of having been involved in an attempted coup planned for Christmas 2007, Ney was never tried but was arrested following the appearance on the YouTube Web site of his video that appeared to support former rebel Ibrahim Coulibaly, the leader of several earlier attempted coups.

(NANCY ELLEN LAWLER)

CROATIA

Area: 56,542 sq km (21,831 sq mi)

Population (2009 est.): 4,431,000

Capital: Zagreb

Chief of state: President Stipe Mesic

Head of government: Prime Ministers Ivo Sanader and, from July 6, Jadranka Kosor

Difficulties in Croatia's accession negotiations with the European Union dominated the political scene in 2009. In December 2008 Slovenia had begun blocking Croatia's bid owing to an ongoing dispute over the countries' shared border, particularly the maritime boundary in the bay of Piran. Croatia had submitted to the EU accession documents that Slovenia charged were prejudicial to the settlement of the border issue. Slovenia was particularly concerned about losing direct access to the high seas, and as an EU member it was entitled to veto Croatia's accession talks.

Croatia's EU bid was also criticized by the Dutch government, which was concerned that Zagreb was not cooperating fully with the International Criminal Tribunal for the Former Yugoslavia (ICTY). Croatia was accused of having failed to hand over documents needed in the trial of a Croatian general indicted for war crimes allegedly com-

Newly installed Croatian Prime Minister Jadranka Kosor arrives for a meeting at the European Commission headquarters in Brussels in July.

Dominique Faget—AFP/Getty Images

mitted during Operation Storm, a 1995 battle in which Croatia reclaimed land occupied by Serb rebels. The Croatian government claimed that certain documents had been stolen and that it had sent all the relevant papers it had.

By midyear Croatia had made progress on only one of the thorny issues hindering its EU accession bid: the reform of its shipbuilding industry. The government in June set out its program for restructuring and privatizing the six state-owned shipyards. The EU accepted the plan and thereby allowed Croatia to open accession talks on competition policy. The privatization of the shipyards got off to a bad start, however, when the government received only two bids, both from Croatian companies, in its first international tender.

July brought an unexpected political shake-up when Ivo Sanader announced his resignation as prime minister and retirement from politics. He had garnered support from 83 parliamentarians for his chosen successor, Jadranka Kosor, and her nomination was approved on July 6. Kosor, a former journalist, had entered politics in 1995 and had stood as the Croatian Democratic Union (HDZ) candidate in the 2005 presidential elections, winning 34% of the vote to incumbent Stipe Mesic's 66%.

The change of leadership kick-started the stalled EU accession process. By mid-September Kosor had agreed to Slovenian demands that Croatia treat the documents it had submitted to the EU as irrelevant to the border dispute, and Ljubljana lifted its veto. The border issue was no longer an obstacle to Croatia's accession. In fact, the European Commission announced in October that Croatia could complete its accession talks in 2010. In November Croatia and Slovenia signed an agreement to send the border dispute to international arbitration.

The year was difficult, however, for the Croatian economy. Exports declined in Croatia, as they did elsewhere in Europe, owing to the global recession, although the country's critical tourism sector did not suffer as badly as expected. The Finance Ministry projected that GDP would contract by 5% in 2009. Facing a major drop in revenues, the government revised the budget three times and also increased the value-added tax, introduced a "crisis tax" on higher earners, and levied a luxury tax on yachts, cars, and villas. Planned spending on infrastructure was also postponed, a measure that was expected to increase unemploy-

ment. The jobless rate had already hit 14% by June.

Moreover, the government's fiscal package was criticized for purportedly making it harder for businesses to operate and for failing to address the long-term burden on the budget posed by the public administration and social support systems. Greater political courage, however, was unlikely from Kosor's fragile minority government. Political parties were also increasingly in campaign mode owing to the approach of presidential elections in January 2010. (LIZ DAVID-BARRETT)

CUBA

Area: 109,886 sq km (42,427 sq mi)

Population (2009 est.): 11,235,000

Capital: Havana

Head of state and government: President of the Council of State and President of the Council of Ministers Raúl Castro Ruz

On Jan. 1, 2009, Cuban Pres. Raúl Castro visited the eastern city of Santiago to commemorate the 50th anniversary of the Cuban Revolution of 1959. (See Sidebar.) Fidel Castro issued a brief note to "congratulate our heroic people," but he was otherwise absent from the anniversary celebrations. During the course of the year, however, he appeared to be recuperating from the serious stomach illness that forced him to relinquish power in 2006; he wrote weekly newspaper columns and occasionally appeared in photographs and video clips looking healthier and rested.

The Cuban economy slid into a period of dire crisis that halted the process of tentative reform that Raúl Castro had initiated upon assuming the presidency. The global economic slowdown, triggered by the collapse of the U.S. real-estate and financial markets, sharply dimmed the island's future growth prospects, and Cuba struggled to recover from damaging hurricanes that struck the island in 2008. Official predictions that Cuba would achieve 6% growth in 2009 were later slashed to 2%, and several academic economists predicted that growth could turn negative.

The Cuban government began to distribute land grants to workers seeking to harvest agricultural lands, but other

key aspects of the reform agenda stalled. In the summer the Cuban government rolled out emergency measures to conserve energy in an effort to prevent electricity blackouts, a problem that had been the scourge of the Cuban population in the 1990s. Air conditioning was rationed to five hours a day; amusement parks and office buildings scaled back their hours of operation; and electric baking ovens and cold storage units were required to be given mandatory power time-outs. Cuba's heavy dependence on imports led to a shortage of foreign exchange, forcing layoffs across many state enterprises while others closed outright.

Cuba's economic downturn contributed to simmering tensions within the government. President Castro summarily fired Vice Pres. Carlos Lage and Foreign Minister Felipe Pérez Roque; the dismissals came amid the most dramatic cabinet shake-up in years. In all, at least 10 cabinet officials were replaced and the Ministries of Foreign Trade and Foreign Investment were merged, as were the Ministries of Fishing and Food. Castro later postponed the sixth Communist Party congress, a major leadership conference that had been scheduled for the second half of 2009.

U.S.-Cuban relations began to experience a greater degree of openness after

Colombian pop singer Juanes performs during the "Peace Without Borders" concert in Havana on September 20.

The 50th Anniversary of the Cuban Revolution

On Jan. 1, 2009, the Cuban Revolution that brought the regime of Fidel Castro to power marked its 50th anniversary. A half century had passed since Castro led a small band of rebels to triumph during the 1959 revolution that ousted the unpopular and corrupt regime of Fulgencio Batista. Castro's embrace of communism and his alliance with the Soviet Union soon provoked conflict with the U.S. In response to Castro's actions, U.S. Pres. Dwight D. Eisenhower imposed economic sanctions on Cuba in 1960 and broke off diplomatic relations with the country in January 1961. Three months later Eisenhower's successor, Pres. John F. Kennedy, backed the Cuban exile-led Bay of Pigs invasion, which backfired badly when Castro's forces easily repelled the assault. In early 1962 Kennedy placed a wide-ranging U.S. embargo on the island that remains the central element of U.S. policy toward Cuba. That October the Cuban missile crisis was set in motion when Kennedy learned that Castro had entered into a secret agreement with then Soviet premier Nikita Khrushchev to install nuclear missiles in Cuba. The incident brought the world to the brink of nuclear war before it was peacefully resolved.

The dramatic events of the 1960s proved to be only the beginning of decades of tensions in U.S.-Cuban relations. In the years that followed, the Cuban Revolution reshaped U.S. priorities in Latin America. During much of the Cold War, the Castro government promoted wars of liberation in Latin America and Africa and established itself as a significant global actor. Castro faced off against a succession of American presidents, including Lyndon Johnson, Richard Nixon, and Gerald Ford. In the late 1970s efforts by Pres. Jimmy Carter to normalize relations with Cuba ultimately failed to bear fruit, and during the 1980s Pres. Ronald Reagan forcefully embraced sanctions against Cuba as a means of containing communism in Latin America. The collapse of the Soviet Union and the end of the Cold War appeared to create a brief moment of opportunity in the early 1990s for the U.S. and Cuba to set their relationship on a new path. By 1992 the Cuban economy was reeling owing to the loss of nearly \$4 billion in annual Soviet subsidies, and the country descended into a severe economic crisis. Instead of extending an olive branch to Cuba, however, the U.S. passed legislation to ratchet up the sanctions, including the Cuban Democracy Act of 1992 and the Helms-Burton Act in 1996. The administration (2001–09) of Pres. George W. Bush further tightened the embargo on Cuba, and most diplomatic contacts were frozen. Despite the occasional

opportunities to reconcile their estranged relationship, the U.S. and Cuba never seized on them and instead littered their history with diplomatic failures.

When Fidel Castro fell ill with a serious stomach ailment in the summer of 2006, there was ample speculation that his death was finally at hand and that this would pave the way for a restoration of democracy and a subsequent rapprochement in U.S.-Cuban relations. Instead, Fidel lived on, though he was forced to pass power to his younger brother, Raúl Castro, on a provisional basis before formally resigning Cuba's presidency in February 2008. Raúl, who had served as Cuba's minister of defense for more than 45 years, implemented a limited number of economic reforms and repeatedly stated his willingness to engage in dialogue with the U.S. Fidel's continued presence and his frequent writings on domestic and international topics, however, served to check Raúl's power and inevitably slowed the pace of change.

In the early 21st century, Cuba strengthened its ties with other Latin American countries and established a major alliance with Hugo Chávez's Venezuela, agreeing to send tens of thousands of doctors to serve in Venezuela's poor neighbourhoods in exchange for nearly 100,000 bbl of oil a day at discounted prices. Cuba also enjoyed warm relations with Argentina, Brazil, Chile, Bolivia, and Ecuador—countries each led by left-leaning politicians. In 2009 Costa Rica and El Salvador both reversed their Cold War-era policies and extended full diplomatic relations to Cuba; as a result, the island now boasted normal ties with every country in the Western Hemisphere except the U.S.

The inauguration in January 2009 of Barack Obama as the 44th U.S. president initially generated renewed optimism about setting U.S.-Cuban relations on sounder footing, but there was a lack of boldness on both sides. Although the U.S. and Cuba initiated low-level diplomatic discussions on issues related to migration and direct postal service, the Obama administration vowed to maintain the embargo, and the Castro government rebuffed American requests to free political prisoners and hold competitive multiparty elections. Perhaps the greatest legacy of the Cuban Revolution was the impressive ability demonstrated by its leaders to survive and to adapt during the tumultuous decades since its inception. Obama was the 11th U.S. president to confront the foreign policy challenges posed by the Cuban Revolution, and if history was any guide, he would not be the last.

(DANIEL P. ERIKSON)

Barack Obama was inaugurated in January as president of the U.S. In April the U.S. repealed all restrictions on the ability of Cuban Americans living in the U.S. to visit Cuba or send money to their relatives living on the island. In June the U.S. joined with the other countries in the Western Hemisphere to approve a path for Cuba's entry into the Organization of American States, but the Castro administration rebuffed the measure. Still, diplomatic contacts between the U.S. and Cuba increased. Bi-

lateral migration talks that had broken down in 2003 were restarted, as were negotiations on the resumption of direct postal service between the two countries. The Obama administration's outreach to Cuba was backed by a majority of Cuban Americans, whose support for the embargo had dramatically waned, according to a number of opinion polls. Vehement anti-Castro voices remained prominent, however, and ensured that Obama would not move to overturn the embargo, although the

U.S. Congress debated several bills that would allow all Americans to travel to Cuba without restriction.

According to the nongovernmental Cuban Commission on Human Rights, the number of political prisoners in Cuba increased slightly during the year, from 205 to 206, marking the first year that the number of political prisoners had not fallen since Raúl Castro took power in 2006. Still, several prominent dissident groups praised the government's decision to allow Colombian

pop singer Juanes to organize a major concert dubbed "Peace Without Borders." The concert, which provoked controversy in Miami—where some exiles denounced it as a propaganda coup for the Cuban government—drew more than one million Cubans to Havana's Plaza de la Revolución and was widely hailed as a landmark cultural event.

Former Cuban vice president Juan Almeida Bosque died on September 11. (See OBITUARIES.) Almeida had been one of the leading figures of the Cuban Revolution. (DANIEL P. ERIKSON)

CYPRUS

Area: 9,251 sq km (3,572 sq mi) for the entire island; the area of the Turkish Republic of Northern Cyprus (TRNC), proclaimed unilaterally (1983) in the occupied northern third of the island, 3,355 sq km (1,295 sq mi)

Population (2009 est.): island 1,084,000; TRNC only, 276,000 (including Turkish settlers and Turkish military)

Capital: Nicosia (also known as Lefkosa/Lefkosa)

Head(s) of state and government: President Dimitris Christofias; of the TRNC, President Mehmet Ali Talat

In 2009 Cyprus remained a divided island, though the open, if controlled, border allowed significant movement of people crossing in both directions, whether to work, shop, or attend school or for tourist or entertainment purposes. The two Cypriot presidents met during the year under the aegis of the UN to discuss a range of issues that included power sharing and governance, land tenure arrangements, security, and the future of the Turkish force in Northern Cyprus. The first round of meetings ended in August; a second round of talks scheduled for September was postponed for several days following a border-crossing incident in which hundreds of Greek Cypriots on a religious pilgrimage were reportedly delayed by Turkish Cypriot authorities. Although talks between the two leaders resumed, both expressed disappointment that their meetings had not produced more concrete results.

While the presidents dealt with the island's political future, opinion polls on both sides of the dividing line showed

Cypriots more concerned with economic matters than politics. The economy presented a mixed picture. Greek Cyprus had a slight increase in GDP, while all other EU members showed decreases. Turkish Cyprus experienced a drop in tourism, most notably a decline in the numbers of visitors from Turkey. Turkish Cyprus's five universities also experienced lower enrollment from Turkey. Other economic problems in Turkish Cyprus were the large number of houses for sale—approximately 10,000—and a negative trade balance with Greek Cyprus. These problems were somewhat offset by subsidies from Turkey. To assuage the island's chronic water shortage, Turkish Cyprus planned to construct a pipeline from Turkey, while Greek Cyprus planned to build a desalination plant; both projects were expected to go on line in the following several years. (GEORGE H. KELLING)

CZECH REPUBLIC

Area: 78,867 sq km (30,451 sq mi)

Population (2009 est.): 10,504,000

Capital: Prague

Chief of state: President Vaclav Klaus

Head of government: Prime Ministers Mirek Topolánek and, from May 8, Jan Fischer

The year 2009 was disruptive politically in the Czech Republic, as the government collapsed in March and the Constitutional Court rejected plans for early elections. The cabinet's dismissal was especially embarrassing, since it occurred during the Czech Republic's first-ever term holding the rotating presidency of the European Union. On the economic front, the country performed relatively well, despite the global recession; however, automobile manufacturing, a key industry, suffered, and fiscal deficits increased because of an increase in expenditures used to avert a financial crisis.

The dismissal of Prime Minister Mirek Topolánek's cabinet was not surprising; the government had been on shaky ground ever since its appointment in January 2007. Indeed, the cabinet was formally supported by only half of the 200-seat parliament, relying on the backing of several members who had quit the opposition Czech Social

Democratic Party (CSSD). In advance of the no-confidence vote held on March 24, growing conflicts within Topolánek's Civic Democratic Party (ODS) and its two junior coalition partners—the Christian and Democratic Union–Czech People's Party (KDU-CSL) and the Green Party (SZ)—finally set the stage for the government's collapse. That vote, which followed several unsuccessful attempts by the CSSD to bring down the cabinet, was encouraged by Czech Pres. Vaclav Klaus, a long-standing rival of Topolánek.

After the government's collapse, the ODS and CSSD rallied together to support a nonpartisan consensus candidate as interim prime minister. Jan Fischer, who had previously headed the Czech Statistical Office, was sworn in as prime minister on May 8.

The ODS and CSSD had also called for early parliamentary elections (to be held in October), and several opinion polls gauged the contest as neck and neck. Nonetheless, the gap between the two parties was unexpectedly wide in the June elections to the European Parliament (EP); the ODS won 31.5% of the vote and 9 of the country's 22 seats, compared with 22.4% and 7 seats for the CSSD. Still, the results were hardly representational, since voter participation reached just 28.2%. The only other parties to surpass the 5% threshold were the opposition Communist Party of Bohemia and Moravia (with 14.2% of the vote and four seats) and the KDU-CSL (with 7.6% and two seats).

In early September the country received a shock when the Constitutional Court declared the parliamentary law and presidential decree on early elections invalid. That decision was sparked by a complaint by an unaffiliated parliamentary deputy, who claimed that the early polls violated his right to serve a full term in office. Responding to the court's verdict, deputies approved a constitutional amendment allowing the parliament to dissolve itself, and elections were planned for November. The CSSD suddenly changed its position in mid-September; however, arguing that the polls should be held in line with the original schedule, in May 2010. The official justification for the shift was that the new constitutional amendment could be subjected to legal questions, causing further deadlock and delay. Analysts suspected that the change of course was based on the party's desire for more time to secure a higher approval rating as well as concerns about competition from the new

conservative Tradition Responsibility Prosperity 09 (TOP 09) party, which split from the KDU-CSL shortly after the EP elections and rose unexpectedly in opinion polls.

The election delay gave Fischer's interim government the responsibility to move forward with highly unpopular but necessary decisions, particularly relating to the 2010 budget deficit, which was projected to rise sharply if no action was taken. The parliament unexpectedly backed a package of austerity measures on September 25 and thereby strengthened the mandate of Fischer, who had threatened to resign if they were not approved.

From an international perspective, Czech relations with Brussels were damaged not only by the country's political instability during its EU presidency but also by its delay in approving the Lisbon Treaty to reform EU institutions. Klaus initially refused to sign the treaty, even after it was backed by the Czech lower and upper houses in February and May, respectively. He finally backed down in early November, however, allowing the treaty to take effect throughout the EU on December 1. In relations with the United States, Prague received a much-publicized visit from U.S. Pres. Barack Obama in early April. In September the Obama administration canceled the controversial missile defense shield that was to have been built in the Czech Republic and Poland.

DENMARK

Area: 43,098 sq km (16,640 sq mi)

Population (2009 est.): 5,523,000

Capital: Copenhagen

Chief of state: Queen Margrethe II

Head of government: Prime Ministers Anders Fogh Rasmussen and, from April 5, Lars Løkke Rasmussen

After months of unsettling media speculation—and persistent denials by Danish Prime Minister Anders Fogh Rasmussen that he was in the running for a top international position—Rasmussen was appointed secretary-general of NATO on April 4, 2009. He took office in August, becoming the first Dane to hold the post. Turkey had ini-

Dominique Faget—AFP/Getty Images

New Danish Prime Minister Lars Løkke Rasmussen appears at a press conference in Brussels on May 13.

tially opposed Rasmussen's candidacy, largely over his handling of the Prophet Muhammad cartoon scandal in 2006. The objections were ultimately lifted, however, reportedly after Turkey was promised top positions within the alliance. Back home, Lars Løkke Rasmussen, finance minister in the centre-right Liberal-Conservative minority government, took over as prime minister on April 5. The new prime minister (who was not related to his predecessor) was intent on garnering public support in a country that had been hard hit by the recession.

Elections in June to the European Parliament produced a mixed result: the opposition Social Democrats won 4 of Denmark's 13 seats; the Liberal and Conservative government parties captured 4; anti-EU parties of the left and right secured 3; and the Green Party won 2. The unusually high turnout of 60% was attributed to the inclusion on the ballot of a referendum on granting women equal rights in the succession to the Danish throne. The measure passed; Danes voted 45% in favour of allowing the monarch's firstborn child the rights of accession regardless of its gender.

In June the number of Danish troops killed in Afghanistan since 2001 reached 25—one of the highest per capita death tolls among coalition forces. Some 700 Danish soldiers were stationed in the country as part of NATO's International Security Assistance Force.

Denmark was sharply criticized by both the UN High Commissioner for Refugees and Amnesty International for the government's plan to forcibly repatriate rejected Iraqi asylum seekers. In August police ousted about 20 such Iraqis from the crypt of the Copenhagen church where they had been living for three months. Violent clashes broke out between protesters and the police as the Iraqis were arrested and bused to an asylum centre, where they faced deportation. The refugees then staged a hunger strike. Iraq, which called on Denmark to temper its repatriation policy until conditions for the refugees' voluntary return improved, dismissed Danish Immigration Minister Birthe Rønn Hornbech's claim that an agreement had been reached with Iraq to return 250 Iraqi citizens, regardless of their volition.

In a rare visit to Copenhagen by an incumbent U.S. leader, Pres. Barack Obama met in early October with Danish political leaders and the royal family. Obama was in Denmark during a hectic five-hour stopover while (unsuccessfully) lobbying the International Olympic Committee for Chicago to host the 2016 Games.

By far the most important event of the year was Copenhagen's hosting on December 7–18 of the 15th Conference of the Parties to the UN Framework Convention on Climate Change, also known as COP15. The gathering, which was attended by some 15,000 participants from 170 countries, conducted crucial international negotiations on a successor plan to the Kyoto Protocol on global warming. (See also ENVIRONMENT.)

(CHRISTOPHER FOLLETT)

DJIBOUTI

Area: 23,200 sq km (8,950 sq mi)

Population (2009 est.): 864,000

Capital: Djibouti

Chief of state and head of government:

President Ismail Omar Guelleh, assisted by
Prime Minister Dileita Muhammad Dileita

The dispute that started in 2008 between Djibouti and its northern neighbour Eritrea continued to be a source of heightened tension for the two countries for most of 2009. The skirmish

began in April 2008 when Eritrean troops occupied the Ras Doumeira area just over the border in Djibouti. In January 2009, after months of stalemates, the UN Security Council passed Resolution 1862, which ordered both countries to engage in negotiations and called for an immediate withdrawal of Eritrean troops from Djibouti. In late September, Djibouti petitioned the UN Security Council to enforce its earlier resolution; meanwhile, Eritrea refused to acknowledge that it was encroaching on Djibouti land.

Djibouti entered into separate agreements with the European Union and Japan to help stave off pirate attacks. The EU agreement, the Atalanta mission, was mandated by the UN World Food Programme to protect food-aid shipments into Somalia; EU forces would be based in Djibouti. Food prices on the continent had spiked, owing in large part to the increased number of pirate attacks on ships off the coast of Djibouti and Somalia. Djibouti relied almost exclusively on imported food. The crisis deepened as a result of continuing drought as well as the global increase in food prices. By October more than 23 million people in the Horn of Africa were in need of food assistance, an increase of some 4 million since early in the year. (MARY EBELING)

DOMINICA

Area: 751 sq km (290 sq mi)

Population (2009 est.): 71,900

Capital: Roseau

Chief of state: President Nicholas Liverpool

Head of government: Prime Minister Roosevelt Skerrit

The International Monetary Fund in March 2009 urged Dominica to prioritize capital spending and to broaden its tax base in order to maintain an overall fiscal surplus in a tougher global environment. The government indicated that it would aim for a target of 3% of GDP, which was not an easy goal to achieve under current conditions.

Opposition parties protested in March in the capital, Roseau, demanding electoral reform, including what they called a “clean” voters list. The United Workers Party claimed in June that Prime

Minister Roosevelt Skerrit was stalling efforts to implement voter identification cards prior to the general election that was due in October 2010. On November 19, however, during Skerrit’s address to the country, he announced that the elections would be held on December 18. In the balloting the Dominica Labour Party scored a landslide, with 16 seats in the parliament, while the United Workers Party secured only 4 seats.

Following several years in which Dominica and other smaller Caribbean states had voted alongside Japan to overturn the International Whaling Commission’s (IWC’s) ban on commercial whale hunting—which had caused critics to suggest that Japan was “buying” their vote with aid—Prime Minister Skerrit insisted that he was a convert to environmental preservation. In 2008 Dominica had abstained from the vote at the IWC’s annual meeting, and Skerrit announced in March 2009 that Dominica would no longer support Japan’s efforts to reestablish commercial whaling. (DAVID RENWICK)

DOMINICAN REPUBLIC

Area: 48,671 sq km (18,792 sq mi)

Population (2009 est.): 9,749,000

Capital: Santo Domingo

Head of state and government: President Leonel Fernández

For a country whose economy was heavily dependent on trade with the U.S., remittances from the U.S., nickel mining, tourism, and duty-free industrial zones, the Dominican Republic weathered the financial storms of 2009 better than expected. Economic indicators declined significantly when contrasted with previous years—as in 2006, when GDP reached 10.7%—but at the midpoint of 2009, GDP was still in positive territory at approximately 1.4%. Inflation closed out the year at 5%, and tourism numbers were resilient, with figures similar to those in 2007.

The almost unassailable image of Pres. Leonel Fernández was shaken, however, by his perceived failure to address debilitating social and infrastructure crises. Government commitments to tackle endemic corruption, the ero-

sion of educational standards, increasing drug addiction, and lingering extreme poverty rang hollow. A low minimum daily wage of \$2.52—which was lower by 10 cents than that of Nicaragua, the second poorest country in the Western Hemisphere—exacerbated labour tensions. Polls taken during the year showed Fernández’s ruling Dominican Liberation Party trailing its principal adversary, the Dominican Revolutionary Party (PRD).

A constitutional reform package negotiated by Fernández and PRD leader Vargas Maldonado was passed that eliminated consecutive presidential reelection. Also in the package was a provision that criminalized abortion, including therapeutic abortions (those performed in cases of rape or incest or when a pregnancy threatened the life of a mother); the measure was considered highly draconian.

The Dominican Republic’s chronically fragile relations with neighbouring Haiti were jarred by strong Haitian reaction to a new Dominican policy that stipulated that children born to Haitian parents residing illegally in the Dominican Republic were not entitled to Dominican citizenship. In other areas of foreign affairs, there was success. In March Fernández demonstrated exceptional skill when he brokered negotiations that cooled an incendiary dispute involving Ecuador, Venezuela, and Colombia that arose following an attack by the Colombian military on a rebel base located within Ecuador.

(JOHN W. GRAHAM)

EAST TIMOR (TIMOR-LESTE)

Area: 14,919 sq km (5,760 sq mi)

Population (2009 est.) 1,110,000

Capital: Dili

Chief of state: President José Ramos-Horta

Head of government: Prime Minister Xanana Gusmão

East Timor celebrated 10 years of independence in 2009 with an international bicycle ride, Tour de Timor, which was designed to show the world that Dili was safe and welcoming and had returned to normal life after the attempted assassination in 2008 of Pres. José Ramos-Horta. Vice Prime Minister

Kyodo/AP

Some 290 bicyclists assemble in front of the presidential palace in Dili to begin the inaugural Tour de Timor bicycle race on August 24.

Mario Carrascalao thanked the international community for creating peace in his country and underscored that East Timor had one of the lowest per capita crime rates in the world. He added, however, that the country's roads remained in the same condition that they had been in when Indonesia left East Timor. Luta Hamutuk, an organization that monitored foreign aid given to East Timor since independence, estimated that most of the roughly \$8 billion donated to the country since that time had been spent on the salaries of foreigners and on administration and imports, while only 10% of foreign aid ended up in the local economy. President Ramos-Horta was equally concerned that too little aid money was going to the people of East Timor.

A ceremony was held in Dili to celebrate the independence anniversary and was attended by representatives of East Timor's most important neighbours, Australia and Indonesia. Among those at the festivities were Indonesian Foreign Minister Hassan Wirajuda and Australian Gov.-Gen. Quentin Bryce. (See BIOGRAPHIES.) President Ramos-Horta reassured Indonesia of his opposition to the establishment of an international tribunal to bring to justice those said to be responsible for human rights abuses during the struggle for independence. Ramos-Horta called on the United Nations to disband its serious crimes unit. He also awarded retired Australian general Peter Cosgrove the Order of East Timor in recognition

of Cosgrove's leadership of the multinational peacekeeping mission that had kept order in the country at the time of independence. (A.R.G. GRIFFITHS)

ECUADOR

Area: 272,045 sq km (105,037 sq mi), including the 8,010-sq-km (3,093-sq-mi) Galapagos Islands

Population (2009 est.): 14,005,000 (Galapagos Islands, about 22,000)

Capital: Quito

Chief of state and head of government: President Rafael Correa Delgado

Ecuadoran Pres. Rafael Correa was re-elected handily in April 2009, winning 52% of the vote; former president Lucio Gutiérrez garnered 28%, and banana tycoon Alvaro Noboa received 11%. Vowing to push ahead with his vision of "21st century socialism," Correa expanded programs aimed at improving life for the poor and challenged foreign resource companies and investors to accept new terms of engagement with Ecuador.

A new mining law that imposed minimum royalty rates and limited the scope of exploration concessions was generally welcomed by foreign compa-

nies, but some Indian groups opposed it. A clash in late September between Shuar Indians and police seeking to break up an antimineral road blockade left at least one Indian dead. In the petroleum sector, the government seized the assets of the French firm Perenco in a dispute over taxes and pressed foreign firms to exchange joint production-sharing agreements for service contracts with state-owned Petroecuador. As a result, some firms put investment plans on hold, and the output of crude oil, Ecuador's chief export, declined. Meanwhile, the judge hearing a \$27 billion oil-pollution lawsuit against the U.S. multinational corporation Chevron was forced to step aside after the company produced evidence that he had discussed the eventual verdict with government officials.

Ecuador expected economic growth to slow to 2% in 2009, mainly because of weaker oil prices and a decline in remittances from Ecuadorans living abroad. To compensate, the government imposed new tariffs and import restrictions, said that it would double the tax on capital outflows, and negotiated advance payments from China for crude oil. It also repurchased, at 35 cents on the dollar, nearly \$3 billion in defaulted bonds that it said had been illegally issued under a former administration.

Relations with the United States and neighbouring Colombia continued to be strained in 2009. Colombia maintained that Ecuador provided tacit support to

After meeting with Ecuadoran Pres. Rafael Correa in Quito on October 5, Indian leaders review the draft of a proposed agreement that addressed many of their concerns over new water and mining laws in the country.

Dolores Ochoa/AP

guerrillas of the Revolutionary Armed Forces of Colombia (FARC). In July Colombian authorities released a video in which a senior FARC commander said that Correa's reelection campaign had received funds from the rebel army. FARC leaders denied the allegation. In September the last U.S. personnel left the military base at Manta on the Pacific coast after Ecuador declined to renew a lease allowing them to conduct antidrug operations; these were then shifted to Colombian bases. Two U.S. diplomats were expelled in February after the government said that they had threatened to suspend U.S. aid in an attempt to influence local police appointments. Despite these irritants, the U.S. renewed a long-standing package of duty exemptions and other trade benefits for Ecuador.

(PAUL KNOX)

EGYPT

Area: 1,002,000 sq km (386,874 sq mi)

Population (2009 est.): 82,999,000

Capital: Cairo

Chief of state: President Hosni Mubarak

Head of government: Prime Minister Ahmad Nazif

During 2009 Egypt shared in several global crises, including the financial downturn and the H1N1 flu epidemic. These crises were exacerbated within Egypt by local issues, including a spate of strikes, human rights concerns, and disagreement with the Nile River basin countries over the management of water resources. There were also mass arrests of senior members of the banned Muslim Brotherhood organization.

The impact of the international financial crisis on the Egyptian economy was harshest during the first half of the 2008–09 fiscal year. By September, inflation was estimated at 10.8%, remittances by Egyptian expatriates had declined by 23% between April and July, and tourism revenues had declined by 7.3%. GDP growth for 2009 was projected to reach 4.5%.

Panic struck as cases of H1N1 flu (a respiratory disease caused by an influenza virus) were reported in Egypt. Precautionary measures by the government included the slaughter of the

Nasser Nouri/AP

Slaughtered pigs are heaped onto a pile in Egypt following the government's order that the country's estimated 350,000 pig population be killed in an effort to prevent the spread of the H1N1 virus.

country's estimated 350,000 pig population, a one-week delay in the start of the school year, and the installation of fever-detecting instruments at ports of arrival. Barring a major global outbreak, however, Egyptian health authorities decided that pilgrims could proceed to Mecca and Medina for the hajj in late November as scheduled. By December 20 there were more than 7,300 reported cases of infection and 89 deaths.

In early February 2009, four newspaper editors who had been sentenced to jail in 2007 on charges of having libeled the state and the ruling National Democratic Party had their sentences commuted to fines. The former chairman of al-Ghad ("Tomorrow") party, Ayman Nour, was released from jail the same month and pledged to continue his political activism. Meanwhile, the government-appointed Political Parties' Committee denied, for the fourth time in nine years, a request to authorize a "centrist" party.

In a wave of protests launched in mid-February, pharmacists, truck drivers, public transport bus operators, real-estate-taxation employees, and other workers initiated strikes or sit-in protests over financial incentives and other grievances. A call to declare civil mutiny on April 6 failed to materialize.

In September the government-sponsored National Council for Human Rights delivered its five-year report on Egyptian human rights practices to the Geneva-based UN Human Rights Council. The Egyptian council called for reconsideration of the electoral system and its electoral supervisory mechanism in expectation of the 2010 parliamentary elections, pointing to irregularities in the past presidential and parliamentary elections that had put into question the integrity of the process. It also highlighted the rise in the rates of poverty and called for measures to ensure transparency, combat corruption, and strengthen antitorture measures. In addition to urging an end to the state of emergency, it also called for guarantees to check interference by the executive with the judiciary. It noted improvements in the military justice system that tries civilians under the state of emergency law, including the right to appeal.

In mid-August some 31 leaders of the Muslim Brotherhood were detained on charges of funding an international organization of the group, while 26 Egyptians and other nationals went on trial in August on charges of having organized a cell of Hezbollah to carry out subversive activities in the Suez Canal zone and attacks on Israeli targets in Egypt.

In July ministers of irrigation and water resources of the Nile River basin countries met in Alexandria to discuss a legal framework agreement regulating the distribution of water and conditions for future projects. Egypt, one of the downstream countries, had several conditions that needed to be met prior to signing the agreement: full recognition of its historical water rights, an annual quota of 55.5 billion cu m (1.96 trillion cu ft), and prior notification of any projects by the Nile basin countries that could affect the resources of the downstream countries. Cairo also insisted that future amendments to the agreement be approved unanimously (or, if accepted by a majority, that Egypt and The Sudan be among that majority).

Despite persistent campaigning and intense lobbying, in September Egypt's candidate for the post of UNESCO director general, Minister of Culture Farouk Hosni, narrowly failed to secure the required 30-member majority vote of the 58-member Executive Board. He lost to Bulgarian Irina Bokova, the first woman to hold the post.

(AYMAN M. EL-AMIR)

EL SALVADOR

Area: 21,041 sq km (8,124 sq mi)

Population (2009 est.): 6,192,000

Capital: San Salvador

Head of state and government: Presidents

Elías Antonio Saca González and, from June 1, Mauricio Funes Cartagena

Following a hard-fought campaign, television journalist Mauricio Funes (*see* BIOGRAPHIES) of the Farabundo Martí National Liberation Front (FMLN) won the presidential election in El Salvador on March 15, 2009. Funes, who was the first FMLN presidential candidate not to have participated in the guerrilla warfare of the 1980s, defeated the National Republican Alliance (ARENA) candidate, Rodrigo Ávila, by a margin of 51.3%–48.7%, ending ARENA's long control (since 1989) of the Salvadoran government.

Although sympathetic to other leftist governments in the hemisphere, especially that of Luiz Inácio Lula da Silva in Brazil, Funes emphasized that he did not want ideological confrontation with the U.S. and that he was not a part of the more extreme left represented by Venezuelan Pres. Hugo Chávez. One of Funes's first acts upon taking office was to restore relations with Cuba. In July the Salvadoran government also announced its support for Honduran Pres. Manuel Zelaya, following his overthrow in Honduras. In the realm of domestic policy, Funes began implementing dramatic improvements in education and children's health benefits, especially for the poor; he provided not only free education, but also meals and uniforms for poor public-school students. He also launched new aid programs for the elderly poor and moved against widespread corruption in the government.

The global recession exacerbated already-serious economic difficulties for the new government, with widespread unemployment and a sharp decline in exports and imports. In addition, remittances from Salvadorans in the U.S. dropped more than 10% during the first seven months of 2009. Standard & Poor's Ratings Services in May lowered its credit ratings for El Salvador to BB, two levels below investment grade. Funes promised considerable economic

advancement, and his social programs maintained his support. According to a CID Gallup poll, by September he enjoyed an 86% approval rating, even though poverty and underemployment stood at 40%.

Violence and crime remained a serious problem. French filmmaker Christian Poveda, whose 2008 film *La Vida Loca* reflected the hopeless lives of members of the Mara 18 street gang, was killed in September as he drove back from filming in La Campanera, a poor suburb of San Salvador. The Mara 18 and rival Mara Salvatrucha gangs represented part of a huge criminal network in both Central America and the U.S.

EQUATORIAL GUINEEA

Area: 28,051 sq km (10,831 sq mi)

Population (2009 est.): 633,000

Capital: Malabo

Chief of state and head of government:

President Brig. Gen. Teodoro Obiang Nguema Mbasogo, assisted by Prime Minister Ignacio Milam Tang

In 2009 few outside Equatorial Guinea's ruling circle celebrated the 30th anniversary of the coup d'état that brought Teodoro Obiang Nguema Mbasogo to power in August 1979. While Equatorial Guinea was one of the largest oil producers in sub-Saharan Africa, and Obiang was one of the world's richest men, the majority of the country's population remained very poor and without access to any social services. While Obiang spent a fortune on cars and houses, infant and child mortality increased. A Human Rights Watch report released in July detailed the misappropriation of oil revenue by Obiang, and two months earlier a French judge agreed to launch a formal investigation into issues raised in a lawsuit filed by the global anticorruption organization Transparency International, which accused Obiang and two other African presidents of having misused public funds, embezzled, and engaged in money laundering.

Amid allegations of vote rigging, Obiang was overwhelmingly reelected president on November 29. Earlier that month Obiang had made headlines by pardoning British mercenary Simon Mann, who in 2008 had received a 34-year prison sentence for plotting a 2004 coup attempt against Obiang.

Equatorial Guinea remained involved with the Extractive Industries Transparency Initiative (EITI), which it had joined in 2008, though transparency in the country's oil revenue was not immediately forthcoming. The maritime border dispute with Gabon over the island of Mbanie in the Gulf of Guinea, where oil had been discovered, remained unresolved.

(CHRISTOPHER SAUNDERS)

ERITREA

Area: 121,144 sq km (46,774 sq mi)

Population (2009 est.): 5,073,000

Capital: Asmara

Head of state and government: President Isaias Afwerki

Eritrea was beset with immense political, economic, and social problems in 2009, its 16th year of independence from its neighbour and archenemy, Ethiopia. The small and impoverished

country also earned the distinction of being one of the world's most militarized countries.

Pres. Isaias Afwerki continued to rule with the hard-line stance he had adopted upon the country's independence in 1991. He attracted scorn at home and abroad as his government persisted in detaining without trial opposition figures and critics, including several politicians and journalists who had been arrested in 2001.

The Afwerki regime also stuck to a strict program of military conscription aimed at maintaining high troop levels at its disputed border with Ethiopia. Eritrea ended the year with an active army of about 200,000 soldiers. Tensions remained high at the frontier, over which the country had fought a two-year war with Ethiopia that ended with a shaky cease-fire in 2000.

During the year Kenya and Western countries, including the U.S. and the U.K., accused Eritrea of having aided Islamist insurgents involved in a civil war in Somalia. In May the African Union asked the United Nations to impose sanctions on Eritrea, alleging that the country was destabilizing the Horn of Africa. The UN Security Council voted to impose sanctions on Eritrea in December.

Eritrea's economy remained stagnant. Drought and high food prices abroad exacerbated the situation and particularly hurt the approximately 1.3 million people—nearly 30% of Eritrea's population—who were living below the international poverty line. The dire economic and political situation forced many of its citizens to undertake perilous and sometimes fatal journeys to flee the country. In August about 70 such refugees perished at sea near the Italian coast when their small boat ran out of fuel and capsized.

In efforts to alleviate the suffering in Eritrea, the European Commission in May allocated about \$4.1 million to the country. The amount was part of about \$71.6 million in humanitarian aid that the organization granted to five African countries. In September the European Commission approved about \$174 million in development funding for Eritrea for the 2010–13 fiscal years. That month the country also completed consultative talks with the International Monetary Fund. The organization concluded that the Eritrean economy would continue to be hampered by debt and inflation, despite some gains from new mining industry construction.

(PATRICK L. THIMANGU)

ESTONIA

Area: 45,227 sq km (17,462 sq mi)

Population (2009 est.): 1,340,000

Capital: Tallinn

Chief of state: President Toomas Hendrik Ilves

Head of government: Prime Minister Andrus Ansip

The distressing state of the economy dominated Estonian political life during 2009. Disagreements over proposed budget cuts led to the decision by Prime Minister Andrus Ansip in May to dismiss the Social Democratic Party from the ruling coalition—a move that reduced the three-party coalition to a minority government. In elections to the European Parliament in June, Ansip's Reform Party was bested by its main rival, the Centre Party, led by Tallinn Mayor Edgar Savisaar, as well as by Indrek Tarand, an independent candidate. In local government elections in October, the Centre Party won an absolute majority in Tallinn and nearly a third of the vote in the entire country, though the Reform Party retained its leading position in Tartu. Turnout in both elections reached record levels.

All of the important economic indicators were negative in 2009. There was a massive decline in GDP and real-estate values, while unemployment rose to double digits during the first quarter of the year. In addition, state revenue, wages, retail sales, and foreign direct in-

vestment all fell considerably. The government sought to take advantage of the drop in inflation to move closer to adoption of the euro, making painful budget cuts—including politically sensitive ones in social services—in an effort to keep the budget deficit below 3% of GDP as required by the EU for euro adoption.

Estonia continued to be an active participant among the NATO forces in Afghanistan, but its reputation in the alliance was blemished by the revelation that Herman Simm, a senior Estonian defense official, had spied for Russia for more than a decade. Simm was convicted of treason in an Estonian court in February. Despite the Simm case, relations with Russia thawed slightly, though for both environmental and political reasons, Estonia remained critical of the Russian-German Nord Stream pipeline project—a gas pipeline that was to be built across the Baltic Sea.

ETHIOPIA

Area: 1,127,127 sq km (435,186 sq mi)

Population (2009 est.): 82,825,000

Capital: Addis Ababa

Chief of state: President Girma Wolde-Giyorgis

Head of government: Prime Minister Meles Zenawi

Domestic politics in Ethiopia were relatively calm throughout 2009 when

Estonian trade union members stage a demonstration in Tallinn on June 3 in opposition to government-mandated changes to labour laws and unemployment benefits.

Timur Nisametdinov—NIPA/AP

compared with the years of political turmoil that followed the disputed 2005 national and regional elections. One of the leaders of the main political opposition party, however, Birtukan Mideksa, was rearrested in December 2008. The government accused her of having violated the conditions of the 2007 political pardon, and her life sentence was reinstated. There also were several arrests of Oromo leaders in late 2008 accused of having involvement with the banned party the Oromo Liberation Front (OLF), and nine were convicted in September of raising funds and buying weapons for the OLF. In April, 32 military and former military leaders were arrested and accused of having planned illegal acts in the name of the party Ginbot 7, which was headed by opposition leader Berhanu Nega from exile. The main legal opposition parties repeatedly accused the government of harassment and intimidation.

The Ethiopian economy was expected to grow at a rate of about 6.5% in 2009, down from 8% in 2008, with most of its exports coming from the agricultural sector, particularly coffee, tea, spices, and cereals. The decline in global demand for important exports had a negative impact on the Ethiopian economy, as did rising prices for fuel. Furthermore, the combination of high inflation and rising food prices—together with stagnant wages and employment opportunities, decreases in remittances from the Ethiopian diaspora, and increasing internal migration to Ethiopian cities—meant that urban citizens faced increasing economic hardships in 2009. Meanwhile, more than 47% of the country's rural population lived below the poverty line. Power rationing and critical supply shortages in items such as cement were persistent problems, as were periodic droughts and food insecurity. At least 6.4 million Ethiopians were in urgent need of food assistance during the year, with a total of 12.5 million people in need of some type of food aid.

A highly controversial law that severely limited the actions of civil society organizations was passed in January. In particular, it prohibited foreign organizations and those that received more than 10% of their funding from foreign sources from participating in activities such as conflict resolution and human rights-related work. It also empowered a government agency to closely monitor all organizations and impose extremely harsh penalties for violation of the law's provisions. In ad-

dition, new antiterrorism legislation was passed in July.

The border dispute with Eritrea largely remained at a stalemate in 2009. Neither country had taken steps to demarcate the border in line with the 2002 ruling of the Eritrea-Ethiopia Boundary Commission, which Ethiopia had rejected. In August the Hague-based Eritrea-Ethiopia Claims Commission ruled that compensation should be paid by each country to the other for damages inflicted during the 1998–2000 war.

In early 2009 Ethiopia formally withdrew its armed forces from neighbouring Somalia, where they had been serving since December 2006 in support of the Transitional Federal Government of Somalia, but reports of Ethiopian troop activity inside the country continued throughout the year. (LAHRA SMITH)

FIJI

Area: 18,272 sq km (7,055 sq mi)

Population (2009 est.): 845,000

Capital: Suva

Chief of state: Presidents Ratu Josefa Iloilovatu Uluivuda and, from July 30 (acting), Ratu Epeli Nailatikau

Head of government: Prime Minister Voreque Bainimarama (interim)

In early April 2009, Fiji's Court of Appeal ruled that under the 1997 Constitution, Pres. Ratu Josefa Iloilovatu Uluivuda did not have the power to dismiss the previous government in 2007 or to install the interim government that had seized power in 2006 and that the latter move was therefore invalid. President Iloilo immediately abrogated the 1997 constitution, dismissed the judges, and appointed himself head of state with power to rule by decree. With the backing of the military, he announced that he would install an interim government for a five-year period, during which time the reforms contained in the People's Charter for Peace, Change and Progress would be implemented, and the country would be prepared for elections under a new nonracial electoral system by September 2014. The president reappointed the interim prime minister, Commodore Voreque Bainimarama, who in turn reappointed his interim ministers.

Members of Fiji's pro-democracy movement hold a kava ceremony in front of the venue for the Pacific Islands Forum summit meeting held in Cairns, Australia, in August.

These moves created international tensions for Fiji; on May 1 the Pacific Islands Forum suspended the country's membership, and in September, Fiji's membership in the Commonwealth was also suspended. On July 28, Bainimarama announced that the ailing 88-year-old Iloilo was retiring from office; he was succeeded as acting president by Vice Pres. Ratu Epeli Nailatikau.

Tourism, a mainstay of Fiji's economy, was assisted by a 20% devaluation in the Fijian dollar as the country continued to open new hotels and to attract visitors from Australia and New Zealand. In April, Fiji filed claim with the UN for recognition of an extended continental shelf in the hope of securing rights to seabed minerals in the South Fiji Basin.

(CLUNY MACPHERSON)

FINLAND

Area: 338,425 sq km (130,667 sq mi)

Population (2009 est.): 5,339,000

Capital: Helsinki

Chief of state: President Tarja Halonen

Head of government: Prime Minister Matti Vanhanen

The Finnish economy took a further plunge in 2009. The economy was heavily dependent on exports, which had accounted for 44% of GDP in 2008. The value of exported goods alone dropped a historic 35% in the first quarter of 2009 from the same period a year earlier. At the same time, the value of imports, most notably raw materials and other items needed in manufacturing, decreased by 31%. Accordingly, industrial production was at its lowest in 10 years, registering a 37.3% drop in August year-on-year. GDP was 9.2% lower in July than it had been a year earlier; the unemployment rate grew to 8.8% in August; and inflation dropped to -1% in September.

In June, Finns elected five men and eight women to the European Parliament. Timo Soini, chair of the tiny True Finns, garnered the most votes (130,715) and secured a seat for his party, which was sharply critical of immigration. The True Finns gained the most proportionately, capturing 9.8% of the vote, up from 0.5% in 2004. The Greens also increased their number of members, from one to two. In absolute terms, the winner was the Conservative Party, followed closely by the Centre Party, each of which won three seats, down from four. The Social Democratic Party won two seats, down from three, thanks largely to the sympathy votes collected by Mitro Repo, a Finnish Orthodox priest who had been effectively defrocked for his political aspirations. Repo received the most votes after Soini and Anneli Jäätteenmäki of the Centre Party, a former prime minister who had resigned after less than three months in office in 2003. Voter turnout increased slightly from the previous European Parliament elections, from 39.43% to 40.3%.

The 2008 scandal over unannounced campaign contributions unraveled further in 2009. The Centre Party agreed to return about \$75,000, or two-thirds of the funding it had ultimately received from Nova Group, a real-estate company, to the company's bankruptcy estate. The company had donated money mainly to the Centre Party but also to many candidates of other parties in hopes of securing favours. Several state-owned or publicly funded entities chaired by politicians were found to have donated funds to the campaigns of said politicians. Prime Minister Matti Vanhanen of the Centre Party was implicated for the \$29,000 he had received for his 2006 presidential campaign from Nuorisosäätiö, a youth housing foundation he had formerly chaired

that was close to the Centre Party. The foundation had received funding from the state gambling monopoly RAY (Raha-automaattiyhdistys), whose rules prohibit it from giving aid for political purposes. Vanhanen survived a parliamentary vote of confidence 117 to 27 with the help of the Greens, who exacted stricter regulation of campaign contributions as a quid pro quo for their support. (SUSANNA BELL)

FRANCE

Area: 543,965 sq km (210,026 sq mi)

Population (2009 est.): 62,596,000

Capital: Paris

Chief of state: President Nicolas Sarkozy

Head of government: Prime Minister François Fillon

Like almost everywhere else, France felt the global recession of 2009, but in ways that reflected its political strengths and weaknesses. The downturn's impact was softened by the French state's traditionally large role in the economy of spending and providing welfare. Yet with only a weak parliamentary opposition to air their complaints, many French took part in national street demonstrations to protest the government's inability to do even more to protect jobs and wages. The French model of regulated capitalism

was hailed for steering the country clear of the excesses of Anglo-Saxon lending and borrowing. Pres. Nicolas Sarkozy discarded the 43-year-old Gaullist model of semidetachment from NATO, however, and brought France fully back into the Atlantic alliance.

Domestic Affairs. The popularity of Sarkozy, who had been elected in 2007 to a five-year presidential term, had increased by the beginning of 2009, partly owing to the stabilization of his personal life through his marriage to singer and model Carla Bruni. His very active governing style, however, invited people to lay the blame for most problems at his door rather than that of the government of his centre-right Union for a Popular Movement (UMP), led by Prime Minister François Fillon. The year's big concern was the economy: GDP was expected to fall by more than 2%. Although this decline was smaller than that in many other countries, it was the first drop in France's annual GDP since 1993.

As the unemployment rate began to increase toward the 10% mark, both the government and workers began to adopt unorthodox tactics to stem its rise. Days before authorizing loans to Renault and Peugeot-Citroën to sustain their car businesses, Sarkozy urged Peugeot to close its factories in the Czech Republic or Slovakia rather than in France. This caused a minor furor among his European Union partners and led the Czech Republic, which held the presidency of the EU in the first part of 2009, to convoke a special EU summit that condemned such job protectionism. For their part, some French workers revived the practice of "boss-

Former employees of a Sony plant in the French village of Pontonx-sur-l'Adour protest in front of the factory in April by symbolically planting crosses that bear the names of workers whose jobs had been eliminated.

Bob Edme/AP

napping,” or detaining their bosses, usually just overnight, to try to get them to alter settlement deals. About 10 such boss-nappings occurred, including at plants owned by Molex of the U.S. and Sony of Japan. This practice declined somewhat, however, as the economy improved in the second quarter, partly as a result of the French government’s relatively small but swift stimulus program of about \$33 billion. Sarkozy also planned a “national bond” issue for investment of more than \$50 billion in long-term research projects and the national infrastructure.

The financial issue of the year was the regulation of banks and bankers’ bonuses. Sarkozy took a stand with German Chancellor Angela Merkel in EU and Group of 20 negotiations for tougher international controls on bonuses. At home he persuaded French bankers to agree to a code of practice linking bonuses to the longer-term performance of their banks. Despite having been the only Western country to nationalize banks in the postwar period as a deliberate policy, in 2009 France avoided the emergency quasi-nationalization of banks as was carried out in the U.S. and the U.K. The French government did, however, provide banks with \$56 billion in fresh capital and guaranteed \$450 billion of their lending.

Elected on a promise to allow people to “work more to earn more,” Sarkozy finally persuaded Parliament, after nearly two years of debate, to pass legislation easing the Sunday trading laws. The new law allowed all retail stores (not just small shops such as bakeries) in certain areas to open for business on Sundays. It was to take effect in 20 commercial zones around Paris, Lille, and Marseille and in hundreds of smaller cities and towns that were often visited by tourists—but not in Lyon, the country’s second largest urban area, where UMP deputies objected.

Sarkozy also returned to the issue concerning the veiling of Muslim women. In 2004 he had been instrumental as interior minister in passing a measure forbidding students in French public schools to wear ostentatious religious symbols, such as Muslim head scarves. In a June 2009 speech to Parliament, Sarkozy attacked the wearing of burkas by Muslim women as being a symbol of servitude unsuited to a republic dedicated to equal rights, though he proposed no legislation to ban the garments.

In the June 7 European Parliament elections, the UMP became the first po-

litical party of a sitting French president to win since elections to that parliament started in 1979. The UMP won 27.8% of the vote, and the Socialists secured 16.5%, only a whisker ahead of the Greens, who received 16.3%. This result confirmed the splintering of the Socialists that began when Ségolène Royal, their presidential candidate in 2007, lost the election to Sarkozy and then lost her bid to become the party’s leader to Martine Aubry, the mayor of Lille. Sarkozy continued to foster this splintering by giving cabinet jobs to Socialists, including in 2009 the nephew of François Mitterrand, the last Socialist president. A few months after Frédéric Mitterrand was appointed culture minister, a controversy erupted over his confession in a 2005 autobiography to having engaged in sex tourism in Asia. An important rift remained evident in Sarkozy’s own centre-right bloc: Dominique de Villepin, a former prime minister and Sarkozy’s rival within the neo-Gaullist movement, went on trial in September, accused of having slandered Sarkozy in the so-called Clearstream affair. The trial lasted a month, and the verdict was due in January 2010. Of still greater political, even constitutional, importance was the October 2009 decision by a judge that former president Jacques Chirac should stand trial on charges of embezzlement for having allegedly used, during his long tenure as mayor of Paris, the city payroll to pay national political party operatives. The trial of Chirac, who had enjoyed immunity from prosecution during his 12 years (1995–2007) as president, was expected to take place in 2010.

Foreign Affairs. Carrying on the momentum of his very active EU presidency in 2008, Sarkozy started 2009 by attempting to mediate a cease-fire in Israel’s offensive in the Gaza Strip. His reasons for trying to broker peace were partly domestic. In the past, Mideast tensions had reverberated in France—which has the biggest Muslim and Jewish communities in Western Europe—and they did so again in 2009. During the Gaza conflict, several synagogues and other Jewish sites in France were attacked or vandalized. In contrast to some of his predecessors, Sarkozy had no desire to displace the diplomatic role of the U.S., particularly under Pres. Barack Obama, though in 2009 France did establish its first permanent military installation in the Gulf, a base in Abu Dhabi, U.A.E.

In a historic move, Sarkozy reversed Gen. Charles de Gaulle’s 1966 decision

to leave NATO’s integrated military command. France fully rejoined the alliance at the April 2009 NATO summit, held in the French city of Strasbourg. The immediate military significance of this move, involving the dispatching of a few more French officials to NATO committees and commands, was limited; France had always sent troops to NATO operations. It ended, however, the long-running “European” versus “Atlanticist” political tension in the alliance and constituted French acceptance of NATO as a European institution.

Nonetheless, Sarkozy was criticized from several quarters for purportedly throwing away France’s freedom of diplomatic maneuver. The Socialists attacked him; in 1966 it had been their party that rounded on de Gaulle for his nationalist gesture in stiff-arming NATO. Sarkozy was also criticized, however, by some in his own UMP ranks as “Sarko the American,” a charge that could pose him some difficulty, depending on events, in the presidential elections of 2012. (DAVID BUCHAN)

GABON

Area: 267,667 sq km (103,347 sq mi)

Population (2009 est.): 1,475,000

Capital: Libreville

Chief of state: Presidents Omar Bongo Ondimba, Didjob Divungi Di Ndinge (acting) from May 6, Rose Francine Rogombé (interim) from June 10, and, from October 16, Ali Ben Bongo Ondimba

Head of government: Prime Minister Jean Eyeghe Ndong and, from July 17, Paul Biyoghé Mba

Gabonese Pres. Omar Bongo died on June 8, 2009, after he suffered a fatal heart attack while abroad for cancer treatment. In power for 41 years, at the time of his death he was Africa’s longest-serving head of state. His body was flown to Gabon on June 11, and the state funeral took place in Libreville on June 16. French Pres. Nicholas Sarkozy, in attendance, was jeered by crowds protesting a French government investigation launched in May into Bongo’s finances.

On June 10 Rose Francine Rogombé, the speaker of the Senate, was sworn in as interim president. A presidential

election was scheduled for August 30, and the ruling Gabonese Democratic Party selected Defense Minister Ali Ben Bongo, son of the late president, as its candidate. Official results gave Bongo the victory, with 41.7% of the vote. His nearest rivals, former interior minister André Mba Obame and longtime opposition leader Pierre Mamboundou, each took approximately 25% of the poll. Calling the election fraudulent, demonstrators took to the streets in Port-Gentil, Libreville, and other cities; violent protests ensued. In October the results of a recount requested by the opposition were released; the results upheld Bongo's victory, and he was inaugurated on October 16.

On April 19 Gabonese activist Marc Ona Essangui was awarded a share of the 2009 Goldman Environmental Prize. He was honoured for his battle to save the rainforest of Ivindo National Park.

(NANCY ELLEN LAWLER)

GAMBIA, THE

Area: 11,632 sq km (4,491 sq mi)

Population (2009 est.): 1,705,000

Capital: Banjul

Head of state and government: President
Col. Yahya Jammeh

In 2009 The Gambia continued to receive bad publicity for suppressing freedom of expression and for arbitrary kidnappings and beatings of citizens by state agents. The editor of *The Point*, a privately owned daily, was charged for having reported the arrest of a Gambian diplomat. The fate of Ebrima Manneh, a journalist who had been arrested in 2006, remained unknown, though the African Commission on Human and Peoples' Rights, which was based in Banjul, urged the Gambian government to release him. In March, Amnesty International reported that approximately 1,000 Gambians had been detained and tortured in state-sanctioned witch hunts. Though these were halted and the prisoners released, the government did not condemn what had happened. In May Pres. Jammeh warned a prominent critic to shut up or be jailed. The Community Court of the Economic Community of West African States heard a case of torture

brought by a Gambian journalist against operatives of The Gambia's National Intelligence Agency. Several journalists were arrested in June and put on trial for having criticized President Jammeh's smear campaign against Deyda Hydara, an editor brutally killed in 2004, and for having suggested that the government was responsible for his murder. They received two-year jail sentences in August, but after international criticism, they were given a presidential pardon in September. Whether the Coalition for Human Rights in The Gambia, formed by Gambians living in Senegal with international connections, could exert any influence on the Gambian government remained to be seen.

(CHRISTOPHER SAUNDERS)

GEORGIA

Area: 57,612 sq km (22,244 sq mi), excluding the disputed areas (from the early 1990s) of 8,640 sq km (5,336 sq mi) in Abkhazia and 3,900 sq km (1,506 sq mi) in South Ossetia

Population (2009 est.): 4,368,000, excluding the populations of Abkhazia and South Ossetia

Capital: Tbilisi

Head of state and government: President
Mikheil Saakashvili, assisted by Prime Ministers Grigol Mgaloblishvili and, from February 6, Nika Gilauri

Political tensions intensified in Georgia in 2009. In late January, 11 opposition parties called on Pres. Mikheil Saakashvili to resign and appealed for free and fair preterm parliamentary and presidential elections. On April 9 the opposition launched a series of demonstrations, but Saakashvili still refused to step down. On May 11 Saakashvili met with opposition representatives and, as a compromise, offered to hold early local elections in May 2010 and to form commissions tasked with electoral and constitutional reform. On May 18 the opposition responded with further demands, which Saakashvili rejected. On May 5 some 40 military personnel were arrested and charged with plotting a coup d'état; their trial began on August 21.

After three months of service, on January 30 Grigol Mgaloblishvili resigned as prime minister owing to health problems. Saakashvili named his first deputy, Finance Minister Nika Gilauri, to succeed Mgaloblishvili.

Tensions also continued concerning Abkhazia and South Ossetia. In July Russia blocked an extension of the mandate of the UN Observer Mission in Georgia, and the mission's 130 members were constrained to leave Abkhazia. Several rounds of talks in Geneva failed to yield a breakthrough on the deployment of international observers in Abkhazia and South Ossetia. In May opposition parties were barred from participating in South Ossetia's parliamentary elections, and in August Russian businessman Vadim Brovtsev

A Georgian opposition protester stands in a makeshift jail cell outside the official residence of Pres. Mikheil Saakashvili in Tbilisi on May 2.

Vano Shlamov—AFP/Getty Images

was appointed South Ossetian prime minister.

In violation of the previous year's armistice agreements, on September 15 Russia signed military cooperation pacts with Abkhazia and South Ossetia. On September 30 an international group tasked with evaluating the events that had culminated in the August 2008 war concluded that Georgia had begun the hostilities but condemned Russia's disproportionate response and its failure to prevent ethnic cleansing by South Ossetian forces. One positive sign came in late December when Georgia and Russia struck a deal to reopen their main border crossing, which had been closed since 2006.

On January 9 Georgia and the U.S. signed the Charter on Strategic Partnership, which envisaged U.S. assistance for Georgian democratization. In July U.S. Vice Pres. Joe Biden visited Tbilisi to reaffirm Washington's support for Georgia's territorial integrity.

Georgia's GDP fell by 11.6% during the first half of 2009, and foreign direct investment fell by 80%. Prime Minister Gilauri forecast overall contraction of at least 1.5%. (ELIZABETH FULLER)

GERMANY

Area: 357,114 sq km (137,882 sq mi)

Population (2009 est.): 82,000,000

Capital: Berlin; some ministries remain in Bonn

Chief of state: President Horst Köhler

Head of government: Chancellor Angela Merkel

The year 2009 was dominated in Germany by national and state elections. Although the year's NATO summit was held jointly by Germany and France, the German women's association football (soccer) team won the European championships for the fifth time running, and a German economic recovery was predicted, all paled against the backdrop of the elections. The intense concentration on the battle between the parties was forcefully disrupted, however, by such events as failing businesses, violence in schools, and political as well as religious scandals.

Domestic Affairs. Possibly the most tragic events of the year were the attacks at two secondary schools: in

March a 17-year-old gunman shot and killed 15 people, most of them female students, in a rampage that began in Winnenden, and in September an ax-wielding 18-year-old man set off two firebombs in a classroom in Ansbach, wounding 10 people. These assaults were the latest in a series of six attacks at German schools over eight years. In a country in which violence in schools was virtually unheard of prior to 2000, the incidents led to a reconsideration of the role of guns in society and the pressures placed on teenage boys. The increase in violence by teenagers of both genders had been much lamented in recent years, but the Winnenden shooter's apparent targeting of females and the seemingly easy access that both teenagers had to weapons gave the discussion new fuel. Proposals to restrict the types of guns that hunters could own, to limit young people's access to violent computer games, and to reduce violence on television were debated. None of those measures was realized, though some gun-control laws were tightened.

On a more positive note, the year brought success in Germany's fight against age discrimination in the workplace. According to EU guidelines, all references to age had to be removed from job applications and advertisements. Reports in 2009 from both employers and unemployment agencies showed an increase in employment of those aged 50 and above.

The slight increase in the fertility rate in 2007 and 2008 was attributed to a new measure that encouraged fathers as well as mothers to take time off from work to care for their newborns. Statistics released in 2009 indicated that about 20% of new fathers were choosing to remain at home for a time so that the mothers could return to work sooner. This trend was expected to have long-term impacts on the German economy, because it was hoped to increase the likelihood that working women would have children. A rise in the number of births would also require the expansion of the day-care system, which was underdeveloped in many German regions. The policy encouraging the greater involvement of men in the upbringing of their children was the product of the minister for family matters, Ursula von der Leyen of the Christian Democratic Union (CDU), who had also increased funding and expanded facilities for child care. All these policies were historically atypical for the conservative CDU and were symptomatic

of the broad identity struggle that had been occurring within the party for a few years. This identity crisis was highly visible in the election campaign and diminished the CDU's lead over the other parties in opinion polls.

Elections. Prior to the general elections, elections were held for five state parliaments. The state elections were staggered throughout the national legislative period and were therefore thought to be good indicators for the national election. The first vote of the year took place in January in Hessen, where early elections had been called after coalition-building negotiations collapsed. The state's 2008 election had created a situation in which only a grand coalition would have been viable. The main parties, the CDU and the Social Democratic Party (SPD), however, could not find common ground. This was inauspicious, since these parties were ruling together in a grand coalition at the national level. The Social Democrats suffered a loss in the 2009 Hessen elections, which allowed the Christian Democrats to form a coalition with one of the smaller parties. This seemed like good news for Chancellor Angela Merkel and her Christian Democrats, who began the election year anticipating a win.

This optimism was shaken on various occasions throughout the following nine months. Many of the CDU's policies relating to the economic crisis and to gender and social politics seemed to be more in keeping with the traditional political philosophy of the Social Democrats. This led to the impression, among voters as well as parliamentarians, that the Christian Democratic political program was diffuse and undefined, even that close to the election. Additionally, the party had to weather strife and mishap in the months leading up to September 27, the day of the national election.

Traditionally, the Christian Democrats were linked at the national level with a Bavarian state party, the Christian Social Union (CSU). Over the previous decade this connection had become less comfortable. While the CSU slipped farther toward the social conservative side of the spectrum, the Christian Democrats increasingly moved in the opposite direction. In its desire to raise its profile, the CSU was more than vocal in its protest and critique of its sister party—a tactic that the CDU did not appreciate in a year when it was standing for national reelection while the CSU did not have to face any elections in Bavaria.

Johannes Eisele—Reuters/Landov

Angolan-born politician Zeca Schall, a member of Germany's ruling Christian Democrats who was threatened during the year by supporters of the extreme-right National Democratic Party, poses for a portrait in front of an election poster in the state of Thuringia.

Saarland, Saxony, and Thuringia did, however, hold state elections one month before the national election, which gave them national importance. In two of the three states, the ruling Christian Democrats lost percentage points in the double digits and were therefore forced to consider forming grand coalitions. This seemed to throw into question the party's expected win in the national election, and national opinion polls showed the Social Democrats gaining ground.

Of all the election campaigns, the one in Thuringia proved to be the most turbulent. The state's minister president had suffered a serious skiing accident, and though his party insisted that he would be ready to stand for election in August (and he ultimately was), many doubted as late as May that he would be able to do so. International attention was drawn to the election when a black Christian Democrat, Zeca Schall, was threatened by supporters of the extreme-right National Democratic Party (NPD).

Traditionally, the national election campaigns had almost always been carefully neutral and nonconfrontational until after the state elections, and this held true in 2009. Even the so-called "TV duel" between Chancellor Merkel and the SPD candidate, Frank-Walter Steinmeier, was not highly antagonistic. Differences other than in rhetoric emerged mainly in relation to the minimum wage and to nuclear energy, which the SPD opposed vehemently and the

CDU embraced as an intermediate measure. It was the smaller parties—the neoliberal Free Democratic Party (FDP), the environmentalist Green Party, and the social democratic Left Party—that advertised with concrete and clear policy proposals. This was reflected in the results of the national election.

The CDU and CSU together captured 33.8% of the vote, and Merkel was reconfirmed in her role as chancellor, while the SPD received 23% of the vote. Both the CDU-CSU and the SPD lost percentage points relative to the 2005 election, however, even if the CDU-CSU's loss was small (1.4%) compared with the 11.2% loss of the SPD. The winners were the smaller parties; the FDP increased its share by 4.7% (to 14.6%), the Left by 3.2% (to 11.9%), and the Greens by 2.6% (to 10.7%). This result allowed the CDU to form a coalition with the FDP, its traditional coalition partner, rather than being forced back into an uncomfortable grand coalition with the SPD. The success of the Christian Democrats could be at least partially attributed to the first signs in August that the German economy was improving. The election was again notable for the poor turnout, which at 71% was the lowest in the history of the Federal Republic of Germany.

The state elections in Brandenburg and Schleswig-Holstein, held on the same day as the national election, passed almost without notice. Nevertheless, the Brandenburg result was notable, because for the first time a coali-

tion between the SPD and the Left Party would be in power in that state. Schleswig-Holstein had to undergo early elections because its grand coalition had failed in July. As a result of these elections, a government of the CDU and the FDP was formed, mirroring that of the national government.

Foreign Affairs. International affairs were largely ignored in Germany because of the elections. While 2008 had been dominated by international climate change summits and economic accords, 2009 was marked by a withdrawal of attention to the domestic front, except in the few instances when the magnitude of global affairs forced the country to take heed.

One such instance centred on German disillusionment with the pope. The country had for 30 years registered a steady decrease in believers; the percentage of adherents in the Roman Catholic and Protestant faiths each dropped from about 50% of the population to only some 30%, and atheists and the nonreligious accounted for about 30% of the population by 2009. This decline halted with the election in 2005 of a German pope, and the resulting short-lived euphoria even led to an increase in Catholic church attendance. The scandal surrounding the pope's decision in January 2009 to withdraw the excommunication of a bishop who openly denied the Holocaust shattered this euphoria, however, and drove people from the churches again.

The Constitutional Court's decision on the Lisbon Treaty did not come as a large surprise. In the spring both houses of the German parliament voted to ratify the treaty, which would reform certain EU institutions. The court ruled in June, however, that the ratification process could not proceed until the country passed new legislation giving the German parliament more oversight over and greater participation in the implementation of EU treaties in Germany. This ruling could be seen as a continuation of its decision on the Maastricht Treaty, which established the EU. In its Maastricht decision, the court had ruled that as long as the fundamental makeup of the Federal Republic was not violated, EU treaties did not violate the country's Basic Law. It had warned, however, that if Germany's democratically elected bodies did not have more oversight over and input into EU treaties, there could come a time when the treaties would become unconstitutional. The court recognized this danger in the Lisbon Treaty. In

September the German parliament passed the new legislation required by the court, and the country completed its ratification of the treaty.

While the Group of 20 summit held in April in London escaped the country's attention almost entirely, the NATO summit held that same month in Strasbourg, France, and Kehl, Ger., did intrude on German introspection. The NATO summit was noticed mainly because the protests against the alliance, which turned 60 years old in 2009, were smaller and generally less intense than expected. At the Group of Eight summit in Heiligendamm in 2007, record numbers of protesters had arrived—why not in Strasbourg? The economic crisis, preoccupation with domestic affairs, and widespread admiration of U.S. Pres. Barack Obama could be named as reasons. It was hard for most Europeans to protest against the man who had replaced U.S. Pres. George W. Bush, whom many Germans perceived as “public enemy number one.”

The Economy. In February the German government approved a second economic stimulus package of more than \$65 billion. (The first had been passed in November 2008.) Many parliamentarians criticized their government for this action, which they thought pushed Germany too far into debt and would be of dubious efficacy. Later decreases in unemployment and reports from economic research institutes that the German economy was emerging from recession seemed to prove the doubters wrong. It could be argued, however, that it was too early to judge the matter, because the second round of governmental measures could not yet have had any real influence.

At the end of 2008, the car manufacturer Opel had been suffering because of the economic difficulties of its owner, General Motors (GM). In early 2009 Opel requested financial aid from the government because it was facing the possibility of plant closures. The government granted the aid, and the CDU then had to address doubts about the coherence of its political philosophy. Traditionally, the party was opposed to national subventions of failing businesses, but the loss of Opel would have cost thousands their jobs. The government's decision to provide funding and to involve itself in the negotiations with GM was one instance in which traditional CDU voters did not recognize their party. Another such instance was the nationalization of the Hypo Real Estate bank. In both cases the CDU ar-

gued that the companies were vital to the health of the economy and therefore had to be supported for the greater financial good of the country. In the case of Hypo Real Estate, this might not have been the end of the debate. Its nationalization opened the door to a number of court cases relating to the legalities of the German government's dispossession of the shareholders—court battles that would have to be fought over the following few years.

GHANA

Area: 238,533 sq km (92,098 sq mi)

Population (2009 est.): 23,832,000

Capital: Accra

Head of state and government: Presidents

John Agyekum Kufuor and, from January 7, John Atta Mills

On Jan. 7, 2009, the inauguration of John Atta Mills as president of Ghana took place amid a carnival atmosphere as thousands of people converged on Independence Square in Accra to watch Pres. John Agyekum Kufuor hand over power, marking the second time in the country's history that the presidency had been transferred to an opposition

politician. The outgoing president had warded off potential violence by persuading his party to accept the electoral results. This welcome sign of political stability and democracy in a region beset by armed conflict, political turmoil, and corruption underscored Ghana's status as a model of democracy and civil society.

Six months later U.S. Pres. Barack Obama highlighted Ghana's importance as an emergent democracy when he decided to make it the destination for his first official state visit to sub-Saharan Africa. Deliberately bypassing other influential African states, notably Kenya and Nigeria, he made it clear that he chose Ghana because it promoted democratic principles, transparency, and sustained prosperity. In his address to the Ghanaian parliament, he contended that “Africa doesn't need strongmen, it needs strong institutions.” He also emphasized the importance of African initiative in development policy as well as the need for global “partnership grounded in mutual responsibility and mutual respect.”

The International Monetary Fund (IMF), concerned about possible negative consequences of the world economic crisis on new democracies, approved a \$600 million three-year loan in July to Ghana. The funds were designed to reduce its budget deficit and to protect its currency. Ghana's two leading exports, cocoa and gold, maintained their value in world commerce.

GREECE

Area: 131,957 sq km (50,949 sq mi)

Population (2009 est.): 11,285,000

Capital: Athens

Chief of state: President Karolos Papoulias

Head of government: Prime Ministers
Konstantinos Karamanlis and, from
October 6, Georgios Papandreou

In 2009 the government of Greek Prime Minister Konstantinos (Kostas) Karamanlis struggled with eroding public trust due to a series of corruption scandals, the effects of the global economic crisis, and fallout from the riots in Athens in late 2008. On January 7 Karamanlis reshuffled his cabinet; the most notable change was the removal of Georgios Alogoskoufis, who was replaced as finance and economy minister by Ioannis Papathanassiou. Former foreign minister Antonis Samaras returned to the government as culture minister. On May 4–5 the opposition failed to muster the required parliamentary majority to indict former Aegean minister Aristotelis Pavlidis, who was accused of having solicited bribes in return for granting subsidized shipping contracts.

In the June 7 elections to the European Parliament, the Panhellenic Socialist Movement (PASOK) won 36.7% of the vote, while the ruling centre-right New Democracy (ND) party garnered 32.3%. PASOK and the ND secured eight parliamentary seats each. The Communist Party of Greece (KKE), with 8.4% of the vote, earned two seats, as did the right-wing Populist Orthodox Rally (LAOS), with 7.2%. The Coalition of the Radical Left (SYRIZA) and the Ecologists Greens, which won 4.7% and 3.5%, respectively, each claimed one seat.

Early parliamentary elections took place on October 4—only halfway through the Greek parliament's term. PASOK prevailed at the polls, winning 43.9% of the vote and 160 of the 300 seats. The ND turned in its worst-ever performance in parliamentary elections, taking 33.5% of the vote and 91 seats. The KKE won 7.5% (21 seats), LAOS 5.6% (15 seats), and SYRIZA 4.6% (13 seats). The Ecologist Greens failed to reach the 3% threshold required for holding seats in the parliament, managing to win just 2.5%. On election night Karamanlis announced his resignation as ND president. He was succeeded by Antonis Samaras.

On October 6 PASOK president Georgios Papandreou was inaugurated as Greece's new prime minister. His cabinet was sworn in the following day. Several ministries were merged or re-

structured, and an Environment, Energy, and Climate Change Ministry was created. Theodoros Pangalos was named deputy prime minister. Other key posts went to Georgios Papakonstantinou (finance), Louka Katseli (economy, competitiveness, and shipping), Ioannis Ragoússis (interior), and Evangelos Venizelos (defense). Papandreou himself took over the Foreign Ministry.

In foreign affairs Greek relations with Turkey remained cool as Turkish military planes and warships repeatedly violated Greek airspace and territorial waters throughout the year. There was no breakthrough in the UN-mediated negotiations with Macedonia over that country's name, as several proposals by UN mediator Matthew Nimetz failed to secure the approval of both sides. In 2009 Greece held the rotating chairmanship of the Organization for Security and Co-operation in Europe.

The global economic crisis seriously weakened the Greek economy, in particular two of its key sectors—tourism and shipping. GDP was estimated to shrink by 0.8%. Inflation was expected to drop to below 2%, while unemployment increased to more than 9%. On the social front, the influx of illegal immigrants continued, but there was no consensus among the political parties on how to address the issue. In December the government announced tough measures to deal with the country's high deficit, including major cuts in government spending.

In a high-profile case involving German electronics giant Siemens AG, which apparently paid large bribes over an extended period of time to secure Greek government contracts, former senior PASOK official Theodoros Tsoukatos admitted to having received some \$600,000 in 1999 on behalf of his party. A Greek request to the German authorities to extradite former Siemens Hellas CEO Michalis Christoforakos was approved by several German courts, but Germany's Federal Constitutional Court overturned such rulings on two occasions.

A number of terrorist attacks occurred, including one bombing attack in early September on the Athens Stock Exchange, for which elusive urban guerrilla groups, including the so-called Revolutionary Struggle and the Conspiracy of the Cells of Fire, claimed responsibility. In late September four alleged members of the latter group were arrested, and warrants for another six suspects were issued.

GRENADA

Area: 344 sq km (133 sq mi)

Population (2009 est.): 107,000

Capital: Saint George's

Chief of state: Queen Elizabeth II, represented by Governor-General Sir Carlyle Glean

Head of government: Prime Minister Tillman Thomas

In 2009 the government of Grenada continued to emphasize its determination to relaunch the country's offshore financial sector seven years after the entire sector had been shut down. Offshore banking was suspended in 2002 after a massive fraud scheme led to the collapse of a major financial institution. As a result, investors lost more than \$170 million. As part of its efforts to reopen offshore banking, the government instituted a number of reforms aimed at increasing oversight of the sector, including the creation of a new regulatory financial agency.

In March the World Bank's International Centre for Settlement of Investment Disputes ruled in favour of the Grenadan government in a dispute with RSM Production Corp., a small U.S. oil company. RSM claimed that it was denied an offshore oil exploration license because it had refused to bribe a government minister in 1996.

In June Grenadan Prime Minister Tillman Thomas defended a proposed union between Trinidad and Tobago and the nine members of the Organisation of Eastern Caribbean States. The proposal called for the establishment of an economic and political union by 2013.

On September 5 the government released Bernard Coard and the remaining 13 imprisoned leaders of the 1983 military coup that resulted in the death by a firing squad of then prime minister Maurice Bishop along with several of his cabinet ministers and supporters. This event had triggered the U.S.-led invasion of the island.

(DAVID RENWICK)

GUATEMALA

Area: 109,117 sq km (42,130 sq mi)

Population (2009 est.): 14,027,000

Capital: Guatemala City

Head of state and government: President Álvaro Colom Caballeros

The murder of prominent attorney Rodrigo Rosenberg in May 2009 brought a severe challenge to the Guatemalan government when shortly after his death a video appeared in which the victim declared, "If you are hearing or seeing this message, it is because I was assassinated by President Álvaro Colom." In the video, Rosenberg also claimed knowledge of Colom's involvement in two other killings as well as in money laundering and corruption. Colom denied the accusations, refused to resign, and invited the UN and the U.S. to assist in the investigation of the murder.

Guatemalan attorney Rodrigo Rosenberg, who was murdered in May, appears in the video in which he accuses Pres. Álvaro Colom of ordering his assassination.

Gang violence continued to plague Guatemala. The murder of bus drivers and kidnappings, especially in the capital, prompted President Colom in June to launch a new campaign to reduce criminality and increase security in schools. Violence in the country increased in part because of the Mexican crackdown on drug traffickers. As a result, heavily armed Mexican drug gangs moved south and began to operate in Guatemala, especially in the border area. One group in particular, "Los Zetas," described as a hit squad for the Mexican drug cartels, made several death threats against President Colom.

GUINEA

Area: 245,836 sq km (94,918 sq mi)

Population (2009 est.): 10,069,000

Capital: Conakry

Head of state and government: Presidents Capt. Moussa Dadis Camara and, from December 5, Sékouba Konaté (acting); assisted by Prime Ministers Ahmed Tidiane Souaré and, from January 2, Kabiné Komara

Within hours of Pres. Lansana Conté's death on Dec. 22, 2008, a military coup led by Capt. Moussa Dadis Camara dissolved Guinea's civilian government. On Jan. 6, 2009, the newly formed National Council for Democracy and Development (CNDD) officially took over all functions of the state. Despite Camara's promise to hold elections within a year, Guinea was suspended from both the African Union and the Economic Community of West African States.

On March 16 a coalition of political leaders met with the military rulers, offering a plan for a return to civilian rule and a plea that both legislative and presidential elections be scheduled. On August 17 Camara announced that the presidential poll would be held on Jan. 31, 2010, and that members of the junta had agreed not to stand. Despite this, rumours that Camara planned to run for president sparked a massive demonstration on September 28, when 50,000 opposition supporters took to the streets. Soldiers fired directly into the crowds, reportedly killing more than 150 people and wounding hundreds; the government, however, put

Seyllou—AFP/Getty Images

Guinea's military ruler, Capt. Moussa Dadis Camara, appears in Conakry on October 2 as Guinea marks its 51st anniversary of independence.

the death toll at 57. In a television speech on September 30, Camara warned that rioters would be severely punished, and all further opposition meetings were banned.

On January 22 the CNDD called 14 former government ministers and business leaders to appear at televised hearings investigating corruption. Three of the former ministers, including former prime minister Ahmed Tidiane Souaré, were arrested on March 23 and charged with having embezzled \$5.3 million of state funds. They were released in April after agreeing to repay the money.

Camara was shot and wounded in Conakry on December 3 in an assassination attempt that was blamed on one of his top aides, Lieut. Abubakar Toumba Diakité. Camara was reportedly taken to Morocco for medical treatment while authorities launched a search for Diakité. Guinea's vice president, Sékouba Konaté, took over as acting president on December 5. According to government officials, Camara's injuries were not life-threatening.

GUINEA-BISSAU

Area: 36,125 sq km (13,948 sq mi)

Population (2009 est.): 1,534,000

Capital: Bissau

Chief of state: Presidents João Bernardo Vieira, Raimundo Pereira (interim) from March 3, and, from September 8, Malam Bacai Sanhá

Head of government: Prime Ministers Carlos Correia and, from January 2, Carlos Gomes Júnior

Guinea-Bissau remained politically unstable in early 2009. Hours after a bomb blast killed Gen. Batista Tagme Na Waie, the head of the armed forces and longtime rival of Pres. João Bernardo Vieira, Vieira himself was shot dead on March 2 by renegade soldiers in an apparent revenge attack. No one was arrested for the assassination, but the expected political chaos did not follow, and the military did not seize power. Under a transitional government headed by National Assembly Speaker Raimundo Pereira, who was appointed interim president, and Prime Minister Carlos Gomes Júnior of the dominant African Party for the Independence of Guinea and Cape Verde (PAIGC), the country organized a presidential election. It was postponed to

Supporters of Malam Bacai Sanhá display a poster of the candidate two days before Guinea-Bissau's presidential runoff on July 26.

Seyllou—AFP/Getty Images

allow for voter registration to be completed, and during the campaign one of the candidates running for president was shot dead by security forces; nevertheless, the election took place on June 28, followed by a runoff on July 26. Malam Bacai Sanhá of PAIGC—who campaigned on the slogan “The time is now!”—defeated the other leading candidate, former president Kumba Ialá, and was inaugurated as the new president of a country ranked third from last on the United Nations 2008 Human Development Index and one that remained a transit point in the cocaine trade for shipments sent from South America en route to Europe. (CHRISTOPHER SAUNDERS)

GUYANA

Area: 214,999 sq km (83,012 sq mi)

Population (2009 est.): 769,000

Capital: Georgetown

Chief of state: President Bharrat Jagdeo

Head of government: Prime Minister Sam Hinds

In 2009 Guyana faced setbacks in its plan to expand its renewable energy capacity through the addition of hydroelectric power. Synergy Holdings, the Florida-based developer of the proposed 154-MW Amaila Falls hydroelectric power plant, was having difficulty raising (by the October deadline) the \$450 million required for the company to hold on to its 35-year BOOT (build, own, operate, transfer) agreement with the government. Synergy, which missed its first-quarter deadline for starting work on the project, blamed the global financial crisis for its problems.

In party elections held in August by the main opposition People's National Congress Reform (PNCR), Robert Corbin was reelected party leader. Also in August, the PNCR stepped up its demands for an independent investigation into alleged links between the ruling People's Progressive Party (PPP) and Guyanese drug trafficker Shaheed (“Roger”) Khan. Khan had pleaded guilty to drug-related charges in a U.S. federal court in March.

Janet Jagan, the American-born former president of Guyana, died in March at the age of 88. (See OBITUAR-

IES.) She was South America's first elected female president and was credited with helping the PPP maintain its hold on power. (DAVID RENWICK)

HAITI

Area: 27,700 sq km (10,695 sq mi)

Population (2009 est.): 9,521,000

Capital: Port-au-Prince

Chief of state and government: President

René Préval, assisted by Prime Ministers

Michèle Pierre-Louis and, from November 11,

Jean-Max Bellerive

Despite Haiti's having entered 2009 in precarious condition as a result of its battering the previous year by skyrocketing food costs, political turmoil, and tropical storms, by late 2009 cautious optimism about the country's future had returned. This was a result of stability within Haiti, intensified international attention to the country, and hiatus from another year of devastating natural disasters.

Within Haiti, Pres. René Préval and Prime Minister Michèle Pierre-Louis effectively managed resources at their disposal toward recovery from storm devastation. Transportation and communications networks were largely restored; disaster-mitigation planning increased; and the number of those suffering from food insecurity diminished from roughly one-third to one-fifth of the population. Kidnappings and crime declined precipitously. Elections to renew more than one-third of Haiti's 30-member Senate were held in April—albeit with only 11% voter turnout—and fiscal-reform legislation enabling Haiti's eligibility for debt relief was passed. More problematic was legislation to raise Haiti's daily 70 gourde (about \$1.80) minimum wage. A law pushing it to 200 gourdes (about \$5) provoked concern from manufacturers that the increase would harm Haiti's ability to attract investment and thereby to expand jobs desperately needed to reduce the estimated 70% unemployment rate. Political negotiations, unpopular among students who led street demonstrations in favour of the full increase, ultimately yielded a compromise of 125 gourdes (about \$3.25). Haiti's parliament initiated

steps toward constitutional reform, following recommendations of a nonpartisan presidential commission.

Stability and recovery received a large boost from intensified international attention. Responding to the Haitian government's proposal for a “new paradigm for cooperation,” donors met in mid-April and pledged \$353 million toward government-identified priority needs, enhancing significant bilateral and private aid flows. Former U.S. president Bill Clinton, UN special envoy to Haiti, initiated efforts to coordinate donors, nongovernmental organizations, and the Haitian government and to attract international investment. Priorities also focused on energy, environmental rehabilitation, and increased food production and rural investment. Other actions included another year-long extension of the UN Stabilization Mission in Haiti (MINUSTAH).

Despite these developments, social and economic conditions among Haitians—56% of whom survived on less than \$1 a day—did not improve significantly. In late October, parliamentarians voted to remove Pierre-Louis from office, citing a lack of economic progress. Her successor, Jean-Max Bellerive, promised greater foreign investment and job creation. Despite 9.7% inflation and declining remittances, the economy grew by 2.4% largely owing to disaster-recovery funding. (ROBERT MAGUIRE)

HONDURAS

Area: 112,492 sq km (43,433 sq mi)

Population (2009 est.): 7,466,000

Capital: Tegucigalpa

Head of state and government: Presidents

Manuel Zelaya and, from June 28, Roberto Micheletti

In Honduras the year 2009 began with leaders of the country's business community angry at Pres. Manuel Zelaya for raising the minimum wage during the global economic crisis. Zelaya came in for further criticism when Congress accused the executive branch of having attempted to illegally influence its appointment of new Supreme Court justices. A constitutional crisis almost resulted because the justices were not

Supporters of ousted Honduran president Manuel Zelaya clash with security forces near the presidential palace in Tegucigalpa on June 29.

selected until January 25, the day mandated for the new court to take office.

In March Zelaya publicly announced his desire to continue in office, which was not possible under the current constitution. He issued an order to hold a referendum on June 28 to ask whether voters when casting ballots in the general elections in November also wanted the government to convoke a constituent assembly to reform the constitution. The Supreme Court, Congress, and the country's electoral tribunal declared the referendum illegal. Zelaya dismissed the head of the military for refusing to distribute the ballots, but the court overturned the dismissal. Zelaya then rallied his supporters to seize the ballots. The election was ready to take place on June 28, but that morning military and police officers arrested Zelaya and transported him by plane to Costa Rica. Although Honduras's constitution lacked clear means for impeaching a president, Congress appointed its leader, Roberto Micheletti, to complete Zelaya's term, and the Supreme Court charged Zelaya with having violated the constitution.

The international community opposed the coup. The Organization of American States, after demanding that Zelaya be restored to office, suspended Honduras. U.S. Pres. Barack Obama resisted cutting off humanitarian aid to the country, fearing harm to Honduras's poor population. U.S. Secretary of State Hillary Clinton eventually per-

suaded Zelaya and Micheletti to accept Costa Rican Pres. Óscar Arias as a mediator. Arias proposed a plan that would return Zelaya to the presidency but also would require him to form a national unity government and abandon efforts to change the constitution, but this proposal failed. Zelaya returned to Honduras on September 21, taking refuge in the Brazilian embassy in Tegucigalpa. He did not participate in the November 29 general elections, in which Porfirio Lobo of the opposition National Party won the presidency. On December 2, Congress voted against restoring Zelaya to office for the final two months of his term.

(MICHELLE M. TAYLOR-ROBINSON)

HUNGARY

Area: 93,030 sq km (35,919 sq mi)

Population (2009 est.): 10,021,000

Capital: Budapest

Chief of state: President Laszlo Solyom

Head of government: Prime Ministers Ferenc Gyurcsany and, from April 14, Gordon Bajnai

Public discontent with Socialist Prime Minister Ferenc Gyurcsany's management of the economic crisis and wide-

spread unease about a \$26 billion IMF-led rescue package triggered major changes in Hungarian politics in the spring of 2009. Gyurcsany announced in March that he would stand aside, and Economy Minister Gordon Bajnai became prime minister in mid-April. Bajnai accepted only a symbolic salary of 1 forint (the Hungarian currency) for taking on this crisis-management role but said that he would step down after the general elections in the spring of 2010. Gyurcsany initially remained the leader of the Socialist Party but later resigned from that post too.

Bajnai inherited an economy on the verge of collapse, a public debt standing at 77% of GDP, and a set of strict IMF conditions. The forint had lost 20% of its value against the euro, which made it difficult for the government to service its foreign-currency-denominated debt. The financial crisis also directly affected the 1.7 million citizens—more than a sixth of the population—who had taken out foreign-currency mortgages and loans.

A nonparty technocrat himself, Bajnai created a government of experts, cut ministerial salaries by 15%, and announced an austerity program, which included radical cuts in all areas of public spending and a reform of the health care, pension, and education systems. He overhauled the tax system by cutting personal income tax rates and employers' social security contributions and by increasing the value-added tax (VAT) and excise and business taxes. His government also introduced a new "wealth" tax on property and luxury items. Although Hungary's credit ratings were downgraded in the spring, Bajnai's achievements later eased investors' fears about the country's prospects for riding out the global financial crisis.

In the June European Parliament elections, the opposition Fidesz–Hungarian Civic Alliance (widely known as Fidesz), which was critical of the new government, secured a sweeping 56% of the vote. As in other European Union countries, voter turnout was low, at 36%. The governing Socialists received only 17% of the vote, while the SzDSz–Hungarian Liberal Party captured only 2% in the balloting and thus no seats, which signaled a likely end to that party's 20-year history.

The biggest election surprise was the success of the far-right fringe party Jobbik, which had campaigned on an anti-Jewish and anti-Roma (Gypsy) platform. Supported by a mix of far-right

Protesters in Budapest demand the holding of new elections in Hungary following Prime Minister Ferenc Gyurcsany's offer of resignation on March 21.

and disillusioned Socialist voters, Jobbik won 15% of the vote and became the most popular extremist party in Hungary since the fall of communism in 1989, even though no powerful politicians or public figures were associated with it.

A disconcerting shift toward extremism in Hungary was also indicated by a string of attacks on the country's Roma community and growing public support for the Jobbik-allied paramilitary organization known as the Hungarian Guard. The black-uniformed group was banned during the summer by a Budapest court but was later reconstituted under a different name.

In the autumn bilateral relations between Slovakia and Hungary hit rock bottom after the Slovak parliament approved amendments to its state language law that criminalized the use of minority languages, including Hungarian, in public. All of Hungary's parliamentary parties condemned the law, and Bajnai's government turned to Brussels for help in defending the rights of Slovakia's Hungarian-speaking community, which made up some 10% of the population.

As exports to the European Union collapsed and industrial production plummeted, GDP contracted by 7%. Unemployment rose to more than 10%. Though no banks collapsed, the Bajnai government spent more than 3% of GDP on bank bailouts and loan-guarantee programs. (ZSOFIA SZILAGYI)

ICELAND

Area: 103,000 sq km (39,769 sq mi)

Population (2009 est.): 318,000

Capital: Reykjavik

Chief of state: President Ólafur Ragnar Grímsson

Head of government: Prime Ministers Geir H. Haarde and, from February 1, Jóhanna Sigurðardóttir

In 2009 Iceland's economy continued to struggle following the collapse of the country's banking system a year earlier. Real GDP contracted by an estimated 8–10%; unemployment increased to more than 10%; and the country became heavily indebted abroad. A \$2.1 billion line of credit was extended to Iceland by the IMF and was supplemented by additional loans from the other Nordic states as well as from Poland and the Faroe Islands. In July the Icelandic government announced a plan to recapitalize the country's three largest banks—Landsbanki, Glitnir, and Kaupthing—which the government had seized after the failure of those institutions in October 2008. Landsbanki's situation posed particular problems for Iceland, since more than \$3 billion in deposits in the bank's branches in the

U.K. and The Netherlands could not be withdrawn following the bank's collapse. The U.K. and The Netherlands responded by compensating depositors for most of their losses; in return, Iceland agreed to assume up to \$5.5 billion of debt from Landsbanki and to repay the sum over the next 7–15 years.

In the wake of the banking crisis, Iceland's coalition government of the Independence Party and the Social Democrats, under the leadership of Prime Minister Geir H. Haarde, came under severe criticism. Street demonstrations outside the Althingi (parliament) took place that eventually led to the government's downfall. On February 1 a new coalition government of the Social Democrats and the Left-Green Party came into office under Jóhanna Sigurðardóttir, Iceland's first female prime minister. (See BIOGRAPHIES.) New elections were held on April 25, in which the Social Democrats and the Left-Greens captured a total of 34 seats in the 63-seat legislature, while the Independence Party managed to take only 16 seats. The new government decided to apply for EU membership and filed Iceland's formal application on July 17.

INDIA

Area: 3,166,414 sq km (1,222,559 sq mi)

Population (2009 est.): 1,198,003,000

Capital: New Delhi

Chief of state: President Pratibha Patil

Head of government: Prime Minister Manmohan Singh

Like most countries around the world, India entered 2009 worried about the impact of the global economic downturn on its own growth prospects. Anxiety about the economy was compounded by renewed concern about terrorism in the region, sparked by the vicious terrorist attacks in Mumbai (Bombay) in late November 2008. Despite these problems, the ruling coalition, the United Progressive Alliance (UPA), succeeded in returning to power in the general elections of May 2009, improving its seat tally in the Lok Sabha, the lower house of parliament. (See Sidebar.) Paradoxically, a stronger ruling coalition might find itself under

The Indian Elections of 2009

India's 15th general elections to the lower house of parliament, the Lok Sabha (House of the People), were conducted over a four-week period from April 16 to May 13, 2009. In India's parliamentary system, the country's prime minister is elected by a simple majority of the Lok Sabha's 543 elected members. No single political party had been able since 1984 to secure a majority in the parliament. As a result, the country's oldest and largest party, the Indian National Congress, had led a coalition known as the United Progressive Alliance (UPA) to form governments since May 2004.

In May 2009 the UPA won a near majority, with 262 seats, and the Congress Party improved its own tally from 145 in the 2004 election to 206. The president of the Congress Party and chairperson of the UPA, Sonia Gandhi, widow of slain former Indian prime minister Rajiv Gandhi, had once again nominated Manmohan Singh as prime minister. Because Singh was elected to the parliament as a member of the Rajya Sabha, the upper house, the party's seniormost leader, Pranab Mukherjee, continued as leader of the party in the Lok Sabha. While the triumvirate of Sonia Gandhi, her son, Rahul, and Manmohan Singh ran the party, the government was headed by Gandhi, Singh, and Mukherjee. Mukherjee, a longtime cabinet member, became finance minister in 2009 and remained the government's principal troubleshooter and problem solver.

More political parties contested the election than in previous years, and some newly founded parties, such as the Praja Rajyam (in the state of Andhra Pradesh), registered their presence; in most constituencies the battle was fought mainly between three or four major contenders. The opposition to the ruling alliance was divided largely between the National Democratic Alliance, a coalition led by the main opposition party, the Bharatiya Janata Party (BJP), which won 157 seats, and the so-called Third Front, a shifting alliance of left-wing-, regional-, and caste-based parties led by the Communist Party of India (Marxist), which captured 80 seats.

The Congress Party named Singh its candidate for prime minister, and the BJP selected Lal Krishna Advani; the Third Front had no candidate. Among its several leaders, the main contenders for the prime ministership were thought to be the Uttar Pradesh (UP) chief minister, Mayawati Kumari; the former UP chief minister, Mulayam Singh Yadav; and the former Andhra Pradesh chief minister, Chandrababu Naidu.

The ideological platforms of Indian political parties were traditionally trifurcated into left, right, and centre. The Congress Party always occupied the ideological centre in Indian politics, while the opposition BJP was the party of the right. The communist parties constitut-

ed the core of the left. Such sharp distinctions based on Western political thought tended to break down in India, however, with parties often adopting diametrically opposite policy platforms while in opposition and in government. A growing number of regional- and caste-based parties also tended to adopt shifting platforms.

In the 2009 elections as well, it was difficult to classify the election manifestos of the three major coalitions neatly along this left, right, and centre axis, however apparent the nature of the political divide. Many regional parties did not provide a manifesto. The Congress Party sought support on the basis of its good record of economic management, improvement in relations with major powers, especially the United States (with which India had signed a historic agreement for cooperation in the development of civil nuclear energy), and the promise of a "youthful" leadership under Rahul Gandhi.

For its part, the BJP focused on what it called the Congress Party's inability to deal with the challenge of terrorism and labeled Singh as a weak prime minister who had ceded much political clout to the party president, Sonia Gandhi. The left had a more traditional political platform, echoing its favourite political positions on domestic and global affairs.

Most opinion polls and several exit polls had forecast a "hung" parliament, with no coalition capable of forming a stable government. The results, however, favoured the ruling coalition, with the Congress Party performing impressively in the states of Uttar Pradesh and Andhra Pradesh (in the latter the party held on to power in the state assembly with a thumping majority). While the media credited Prime Minister Singh with securing the victory on the basis of his impressive leadership on the economic and foreign-policy fronts, traditional Congress Party supporters preferred to credit Rahul Gandhi's leadership.

The BJP and the parties of the left were dealt a severe blow, with the left facing particularly ignominious defeats in West Bengal and Kerala. The BJP found itself engaged in a prolonged fratricidal war, with party leader Advani facing severe criticism; his position remained unchallenged, however, owing to internal divisions on the naming of his successor. As the year drew to a close, neither the BJP nor the left had yet recovered from the defeat of 2009, but the Congress Party had not yet been able to articulate an agenda for its new term. As a result, the government completed its first 100 days in office with neither much fanfare nor much to show for its improved strength in the parliament.

(SANJAYA BARU)

less pressure to perform, or at any rate to undertake difficult government and economic reforms. Although government reform was not a key issue in the elections, government failures lay at the root of many of India's problems with law and order, civil strife, and insurgency.

The Economy. After an unprecedented five-year run of a nearly 9% average an-

nual rate of growth, the Indian economy slowed to a growth rate of 7.1% in 2008–09 and was expected to record an even lower rate of 6.3–6.5% in 2009–10. This slowdown was only partly caused by the global downturn. An equally important factor was the poor monsoon rains in 2009, the weakest in more than 35 years, which had a negative impact on agricultural output.

The Indian banking and financial system had virtually no direct exposure to American subprime-mortgage assets or to the financial institutions in the U.S. that were at the heart of the crisis. The Indian central bank took care to ensure that Indian banks had limited "off-balance-sheet" activities and securitized assets and had adhered to the so-called Basel norms, standards set by the Bank

for International Settlements for managing financial risk. The early prudent and risk-averse regulation of the financial system helped to limit the impact of the trans-Atlantic financial crisis on the Indian financial sector.

The economy was negatively affected, however, by various other channels. First, the downturn in global trade reduced export growth. Second, Indian corporations' access to foreign commercial loans was curtailed, and this resulted in the cost of credit going up, since interest rates were higher in India. Finally, reduced portfolio investment in Indian equities by international institutional investors pushed Indian stock market indexes down.

To counter the impact of the slowdown, the government unveiled fiscal stimulus packages in late 2008 and in the first quarter of 2009. This additional public spending contributed to an increase in the government's fiscal and budgetary deficits. A liberal fiscal policy along with insufficient monsoon rains and an expected downturn in agricultural production contributed to inflationary pressures. By the end of 2009, inflation had emerged as a major policy concern.

Foreign Policy. Managing relations with Pakistan in the aftermath of the 2008 terrorist attacks in Mumbai emerged as a major foreign-policy challenge in 2009. Equal attention had to be paid to India's relations with the United States, where a new administration took charge, and with China. India officially accused Pakistan's chief spy agency of

having conspired to stage the terror attacks in Mumbai. The Indian government provided information to Pakistan showing links between the terrorists who attacked Mumbai and militants based in Pakistan, claiming the latter were "clients and creations" of Pakistan's Inter-Services Intelligence agency. Pakistan denied the charge, initially refusing to accept any link to the Mumbai attacks and later conceding that some "nonstate actors" based in Pakistan might have been involved in planning them. The action taken against those identified by India and the United States as coconspirators also became a contentious issue.

Partly to stem this deterioration in the bilateral relationship and partly to pick up the threads of an earlier dialogue with then president of Pakistan Pervez Musharraf, Indian Prime Minister Manmohan Singh met in July 2009 with Pakistani Prime Minister Yousaf Raza Gillani on the sidelines of the Non-aligned Movement summit at Sharm el-Sheikh, Egypt. The joint statement issued after the meeting was criticized in India both by opposition political parties and by sections of the Congress Party (the leader of the ruling coalition) for being too soft on Pakistan and for bringing up, for the first time ever in such a joint statement, the issue of insurgency in Pakistan's Balochistan province. Pakistan had charged India with having aided Baloch rebels, while India maintained that the Baloch nationalist movement was an entirely homegrown resistance movement.

Even as Pakistan dominated the headlines, renewed differences between India and China on the border issue, especially regarding the status of the Indian state of Arunachal Pradesh, caused some friction between the Asian giants. China continued to claim Arunachal Pradesh as its territory. India consistently rejected this claim, having held regular elections to the provincial government, including in October 2009. India's plans to step up infrastructure development in the state met with strong Chinese disapproval on the board of the Asian Development Bank, which India had approached for a loan to fund this investment. Although China tried to block the loan, it was ultimately approved. India-China trade and business relations continued to flourish nonetheless; China emerged as India's biggest trade partner, despite Indian allegations of dumping and nontransparent pricing of Chinese goods. India and China continued to work together in international forums, such as the World Trade Organization, the World Bank, and the IMF, and tried to coordinate their positions in the negotiations on climate change.

The summit of the Group of 20, of which India was a member, emerged as a major global decision-making body in 2009; this was a high point of Indian diplomacy during the year. India remained concerned, however, about the slowing of the pace of its interaction with the United States under the administration of Pres. Barack Obama. While Prime Minister Singh enjoyed a cordial meeting with Obama during Singh's state visit to the U.S. in late November, Obama's preoccupations with domestic economic issues and U.S. relations with China and the Muslim world reduced India's salience in U.S. foreign policy, compared with what it had been under his predecessor, Pres. George W. Bush. India also concluded free-trade agreements with the Association of Southeast Asian Nations and South Korea. (SANJAYA BARU)

INDONESIA

Area: 1,860,360 sq km (718,289 sq mi)

Population (2009 est.): 229,965,000

Capital: Jakarta

Head of state and government: President Susilo Bambang Yudhoyono

In 2009 Indonesia consolidated its reputation as Southeast Asia's most democratic country. Simultaneous elections were held in April for the national, provincial, and district legislatures, and those were followed by direct presidential elections in July. The elections were largely peaceful and, in the opinion of most observers, reasonably fair, despite some administrative bungles by the Election Commission.

In the general elections the Democrat Party (PD) of Pres. Susilo Bambang Yudhoyono (commonly known as SBY) dominated with 21% of the vote. The PD's two major rivals, the Indonesian Democratic Party of Struggle, led by former president Megawati Sukarnoputri, and the Golkar Party of Vice Pres. Jusuf Kalla, each garnered 14%. In their worst-ever election result, Indonesia's Islamic parties together gathered just 29% of the vote, down from the roughly 37% that the parties had received in both the 1999 and 2004 elections. The only Islamic party to improve on its performance in previous elections was the Prosperous Justice Party, which earned 7.8%. Two new political parties, Gerindra and Hanura, led respectively by prominent former generals Prabowo Subianto and Wiranto, returned vote totals of less than 5%, despite expensive advertising and voter-mobilization campaigns. Only 9 of the 38 parties contesting the general elections cleared the 2.5% threshold required for

holding seats in the 560-member national parliament.

The presidential elections were concluded in one round after SBY and his vice presidential running mate, Boediono, won 61% of the vote, inflicting a crushing defeat on Megawati and her running mate, Prabowo, who tallied 27%, and the team of Kalla and Wiranto, who managed only 12%. The election results represented a major political turnaround for SBY. After trailing Megawati in opinion surveys in mid-2008, the president was able to regain the ascendancy, and polls from early 2009 consistently showed him to be by far the most popular and trusted politician in Indonesia. SBY's revival was due in large measure to voter approval of his government's economic policies, which were credited with offsetting the worst effects of the global financial crisis. Indeed, Indonesia had one of the strongest-performing economies in the region, with an annual growth rate of 4.2% that ranked behind only China and India. Robust domestic consumer demand and high export commodity prices were chief drivers of Indonesia's economic expansion. What proved particularly popular with voters was a range of direct government payments to lower-income families to compensate for the effects of rising prices. The commencement of these payments coincided with the rally in the president's support.

Corruption continued to command public and media attention during

2009. Numerous high-level officials were convicted and jailed for graft, including Aulia Pohan, the father-in-law of SBY's son and a deputy governor of Bank Indonesia, the country's central bank. The most sensational case of all, however, was a scandal that surrounded the Corruption Eradication Commission (KPK). In May KPK chairman Antasari Azhar was arrested and charged with graft and with having ordered the murder of an executive at one of Indonesia's state-owned enterprises. Prosecutors allege that Antasari wanted the executive killed because he had threatened to expose Antasari's affair with the executive's wife and his protection of high-level officials involved in corruption. Antasari went to trial in October. His case rendered great harm to the standing of the KPK, previously Indonesia's most respected institution, according to opinion surveys. The commission suffered further damage to its reputation after another two of its five commissioners were forced to stand down after becoming the focus of corruption investigations. The KPK's critics used these events to argue for a reduction in the commission's powers.

On July 17 Indonesia experienced its first terrorist attack in almost four years when two suicide bombers struck the luxury JW Marriott and Ritz-Carlton hotels in Jakarta, killing 9 people and injuring 50 others. Responsibility for the bombing was claimed by Noordin Top, a former member of the Jemaah Islamiyah terrorist organization. Two weeks later police raided a house on the outskirts of Jakarta and discovered a large car bomb possibly intended for an attack against SBY. A string of arrests followed, culminating in the shooting of Noordin and several of his top associates at their hideout in Central Java. Noordin's death was a heavy blow for violent jihadism in Indonesia; he had been a key figure in all of the major terrorist bombings in the country since 2003.

In late September and early October, several earthquakes struck western Indonesia, causing devastation and heavy loss of life in the Padang region of West Sumatra. The confirmed death toll exceeded 600, with estimates that more than 1,000 people may have perished. The collapse of many public buildings prompted calls for tighter construction standards, particularly given that scientists were warning of more severe quakes over the next two decades.

IRAN

Area: 1,648,200 sq km (636,374 sq mi)

Population (2009 est.): 74,196,000

Capital: Tehran

Supreme political and religious authority:

Rahbar (Spiritual Leader) Ayatollah Sayyed Ali Khamenei

Head of state and government: President Mahmoud Ahmadinejad

As the 2009 presidential election approached, Iran faced a period of intense political turmoil. In the run-up to the election, a power struggle developed between key individuals critical of Pres. Mahmoud Ahmadinejad and those who supported him. Ahmadinejad, aligned with the country's Revolutionary Guards, was confronted by an array of reformists, clergy, conservatives, and progressive intellectuals who hoped to ensure his defeat in the election scheduled for June 12. As the election drew closer, Ahmadinejad's opposition coalesced around one main challenger, Mir Hossein Mousavi. (See BIOGRAPHIES.) For the first time, the hierarchy of the Islamic Republic was split in public on the course of future action.

As a result, the election outcome was expected to be close. The announcement on June 13 that Ahmadinejad had won outright was therefore greeted by many with surprise. Official results indicated that the turnout was 85% but that only 34% of the vote was won by Mousavi, who demanded that the results be investigated. The failure of Supreme Leader Ayatollah Ali Khamenei to respond to election irregularities led to a week of unrest among those frustrated by Ahmadinejad's dubious success.

On June 19 Khamenei issued a public call for unity but also increased police and Basij militia antiriot action against demonstrators. In July the riots gradually abated, but agitation for a new election remained. Nevertheless, Ahmadinejad was sworn in as president on August 5 with Khamenei's blessing. The rupture caused by the disputes damaged the cohesion of the ruling elite, making Iran politically less stable in spite of declarations that no erosion had occurred in regard to the principles of the Islamic republic.

Supporters of Iranian opposition leader Mir Hossein Mousavi rally in front of the Azadi ("Freedom") tower in Tehran to protest the outcome of Iran's June presidential election.

Political maneuvering continued after the midyear unrest with neither side entirely dominant. Ahmadinejad won control of most ministries in the new cabinet, although there were areas that were taken over by opponents. Among these were the judiciary, which was headed by Sadeq Larijani, the brother of Majles (parliament) speaker Ali Larijani. Talks between Khamenei and former president Hashemi Rafsanjani in August brought relief from overt infighting within the regime.

The unity of the regime was again severely tested when the death of Grand Ayatollah Hossein Ali Montazeri, who had opposed the election results, was announced on December 19. (See OBITUARIES.) The event sparked further uprisings in Tehran on December 27 in which five protesters were killed. The government was much taken aback by this recurrence of violence and by the size of the opposition clustered around Mousavi, whose nephew was among those killed during the riots. There was no sign at any stage that the regime would change the decision concerning the legitimacy of the election, however.

The political unrest in June and July interrupted a slight easing of relations with the U.S. Although U.S. Pres. Barack Obama had sent a Noruz (New Year) message to the Iranian people and had offered wide-ranging diplomatic dialogue with the regime, the harsh treatment of peaceful demonstrators following the elections evinced a sharp rebuff from Obama.

The U.S. also claimed a direct role in negotiations over Iran's nuclear program. Secretary of State Hillary Clinton

responded to Iran's continuing failure to desist from developing nuclear capacity and promised U.S. protection to the Arab states of the Persian Gulf against any Iranian threat. The meeting of the UN General on September 24 endorsed Obama's proposals for an end to the proliferation of nuclear weapons.

Nevertheless, Iran pressed on with its nuclear program, including plans to inaugurate the Bushehr atomic power station, expand capacity at Natanz, and secretly create a new underground facility near Qom. Negotiations with the EU toward external monitoring of the nuclear program made little progress. Ahmadinejad's government continued its support for militant groups such as Hamas and Hezbollah, adding to friction with the U.S., the EU, and Israel.

Discontent with the Ahmadinejad government, caused partly by its poor economic performance, contributed to the June rioting. Economic growth registered about 6% but was declining. GDP stood at \$344.8 billion in March, with per capita income about \$4,837. Inflation ran at some 25% during the year. Meanwhile, the oil sector's earnings totaled \$81.2 billion but were scheduled in the 2009–10 budget to decrease to about \$30 billion–\$36 billion as the oil price dipped on the international market. The unemployment rate exceeded 10%.

The annual budget expenditure was reduced to \$298 billion. A key reform expected to be introduced in the 2010–11 budget was a contentious plan to gradually eliminate subsidies on fuel, food-stuffs, and medical equipment. (KEITH S. MCLACHLAN)

IRAQ

Area: 434,128 sq km (167,618 sq mi)
Population (2009 est.): 30,747,000 (including about 2,000,000 Iraqi refugees, of which about 1,200,000 are in Syria and about 450,000 are in Jordan)
Capital: Baghdad
Head of state: President Jalal Talabani
Head of government: Prime Minister Nuri al-Maliki

Iraq's provincial elections of Jan. 31, 2009, produced some unexpected results with significant implications. Prime Minister Nuri al-Maliki's State of Law coalition list emerged as the big election winner. Maliki, who campaigned on behalf of a stronger central government, made substantial gains against Shi'ite and Kurdish blocs, mainly the Shi'ite Islamic Supreme Council of Iraq (ISCI). Arab Sunnis participated broadly for the first time since the national elections of 2005. The results revealed a turn by Iraqis away from sectarianism and indicated approval of Maliki's tilt toward the political centre. The provincial elections, however, did not include the three Kurdish provinces in the north or the disputed city and province of Kirkuk. All parties were quick to absorb the theme of the election results—a popular desire for reconciliation—and to reflect this message in their campaign programs in preparation for the national parliamentary elections of 2010.

After repeated delays, on November 8 the Iraqi Council of Representatives adopted the long-awaited new election law. The law had been held up largely by the explosive dispute over the oil-rich province of Kirkuk, where Arabs, Kurds, and Turkmen each claimed a majority. The parliament resolved the contention, temporarily, by agreeing to use voter rolls from 2009 and not 2005; although national elections had been last held in 2005, many displaced Kurds had not yet moved back into the region by that year. The new election law provided for an open list, in which voters could choose candidates by name, rather than a closed (party) list, in which voters would not know the names of individual candidates. The number of deputies was increased from 275 to 325 to accommodate population growth.

Parts of this election law were vetoed, however, by Vice Pres. Tariq al-Hashimi, a Sunni. He sought more seats in the parliament for some 2.6 million Iraqi refugees, most of whom were Sunni. A new amendment, backed by Shi'ite and Kurdish members, shuffled the new distribution of seats by reverting to the 2005 voter rolls and adding seats for a 2.8% annual increase in the population. This result gave more seats to Kurds than to Sunnis. Finally, after more negotiations, on December 6 lawmakers, pressured by the U.S. and the UN, reached a compromise on seat distribution, which gave a slight increase to the Sunni provinces. The date for the 2010 elections was rescheduled from January 16 to March 7.

Although Iraq still suffered from a lack of security, the year saw an improvement in that situation compared with previous years. The reduction in violence helped the U.S. to withdraw its troops from Iraqi urban areas by June 30 and to regroup in less-visible camps in the countryside. A Status of Forces Agreement concluded in 2008 between Iraq and the U.S. specified that the Iraqi army and police would assume the responsibility for manning checkpoints and patrolling city streets in Baghdad and elsewhere. Some joint U.S.-Iraqi military operations continued against al-Qaeda and other insurgents, especially in and around Baghdad and the northern province of Nineveh.

Iraq continued to face many problems: high unemployment (18–20%), low standards of living, and a lack of potable water and electricity. Corruption remained very high, as did common crime—robbery, murder, and kidnapping for ransom. All those social ills created a deep sense of discontent and unease among Iraqis and prevented many Iraqi emigrants from returning from neighbouring Syria and Jordan.

On August 26 'Abd al-'Aziz al-Hakim (see OBITUARIES) died of lung cancer. Hakim had been the most powerful Shi'ite political figure in Iraq and the leader of the ISCI, the main Shi'ite political party. His death created a political vacuum and some turmoil in the party, which prompted the election, on September 1, by the party leadership of his son, 'Ammar al-Hakim, to replace him as head of the ISCI.

In the semiautonomous Kurdish region of northern Iraq, the Kurds continued to build their own institutions. On July 25 parliamentary and presidential elections were held in the three provinces that constituted the Kurdistan Regional Government—Al-Sulaymaniyah, Arbil, and Dahuk. Twenty-four lists competed for 111 parliamentary seats, and five candidates stood for the presidency. The Kurdistan list, comprising the Kurdistan Democratic Party (KDP) and the Patriotic Union of Kurdistan (PUK), came in first, winning 57.3% of the vote. A new party, Change, which had split from the PUK, came in

Iraqis gather at the site of a massive bomb attack near the Ministry of Justice in Baghdad on October 25.

Hadi Mizban/AP

second with 23.8%, and a reform list was third, with 12.8%. In the presidential elections Mas'ud Barzani, head of the KDP, won with 69.6% of the vote. A coalition government, dominated by the KDP and the PUK and headed by Barham Salih (PUK), was formed.

Despite repeated delays by the parliament in approving a new oil law, the Iraqi government signed an important agreement on November 3 with a consortium of BP and the China National Petroleum Corp. to develop the giant oil field of Al-Rumaylah in southern Iraq, a step forward for the Iraqi oil industry. BP had been expelled from Iraq in 1972 when the former Ba'th regime nationalized the oil industry.

Water shortages continued to be a major problem in Iraq. The government worked with neighbouring countries Syria, Turkey, and Iran to increase the amount of water they allowed to flow into Iraqi rivers. Water shortages and water pollution were particularly felt in Basra and elsewhere in southern Iraq.

On October 13 the Iraqi parliament approved an Iraqi-British security pact, despite the protest of some lawmakers. The agreement allowed the British to help develop Iraqi naval forces.

Relations with Syria deteriorated when Iraq accused the Syrian government of tolerating al-Qaeda militants and former Ba'thists living in Syria whom Iraqi officials blamed for major explosions in Baghdad. These explosions, on August 19 and October 25, killed hundreds of Iraqis and severely damaged several government buildings. Syria denied any involvement in the bombings, but Iraq insisted on a UN investigation and rejected any mediation by Arab or other countries.

Iraq's relations with Kuwait remained tense. Iraq had been hoping for the cancellation of some \$25 billion in UN-required reparations for Iraq's 1990 invasion of Kuwait. Those requests had been systematically rejected by Kuwait, which insisted on full payment. By fall 2009 Kuwait had become more inclined to accept a UN-sponsored solution suggesting that Kuwait invest those reparations in diverse development projects in Iraq. Iraq had also asked other Arab countries, including Saudi Arabia, to cancel its outstanding debts. Settling the Kuwaiti reparations issue was essential to removing Iraq from obligations imposed under Chapter VII of the UN Charter after the country's failed invasion of Kuwait, which in turn was vital to Iraq's ability to trade freely with the rest of the world. (LOUAY BAHRY)

IRELAND

Area: 70,273 sq km (27,133 sq mi)

Population (2009 est.): 4,553,000

Capital: Dublin

Chief of state: President Mary McAleese

Head of government: Prime Minister Brian Cowen

In Ireland a very difficult 2009 ended without firm solutions to many problems posed by the global financial crisis, though government efforts to impose pay cuts, increase taxes, and reduce public spending signaled that the task of rebuilding the economy had begun. The scale of the damage caused by the crisis would previously have been unimaginable. Early in the year Ireland's two major financial institutions, Allied Irish Banks and the Bank of Ireland, were on the brink of default; lending had stopped, unfinished construction sites were boarded up, and drastic job cuts occurred as businesses slashed expenses. In February the government agreed to provide Allied Irish Banks and the Bank of Ireland each approximately \$5.25 billion in recapitalization funds, and in September it proposed legislation to set up a state-run "bad bank"—known as the Na-

tional Asset Management Agency—to absorb nonperforming loans from a number of domestic commercial banks and thereby enable those institutions to resume normal commercial lending.

A government advisory committee, the Special Group on Public Service Numbers and Expenditure Programmes, chaired by economist Colm McCarthy, published a report in July that identified \$7.5 billion in possible public spending cuts, including a 5% reduction in social welfare payments and the elimination of more than 17,000 public-sector jobs. In setting out a menu of options for the 2010 annual budget, the McCarthy report included numerous measures that would be politically difficult to implement. Among the more controversial suggestions were cuts in health care spending, the closure of half of all police stations, and sharp reductions in payments to farmers. As the December deadline for the annual budget approached, tensions emerged in the coalition government led by Fianna Fáil and the Green Party, with a number of backbench members of Fianna Fáil withdrawing their support for the government and the Green Party threatening to withdraw support until it had secured concessions on protecting education spending and in other areas.

Prime Minister Brian Cowen had a torrid first 18 months in office, receiving blame for the country's economic problems and for squandering the budget surplus. Local government and

In Dublin, supporters of the EU's Lisbon Treaty celebrate the overwhelming passage of the measure by Irish voters in a referendum held in October.

Julien Behal—PA Wire/AP

European Parliament (EP) elections held in June gave no comfort to the ruling coalition. Both Fianna Fáil and the Greens lost seats in county and city council elections, while the opposition Fine Gael and Labour Party made gains. Sinn Féin, however, was unable to capitalize on the economic travails, losing its sole EP seat and failing to make expected gains elsewhere. The recently formed pan-European Libertas party, which had campaigned against the Lisbon Treaty on EU organization, also disappointed its supporters, failing to win a single EP seat. After having initially rejected the Lisbon Treaty in a 2008 referendum, Irish voters passed the measure by a margin of 67% to 33% in a new referendum held in October.

Not all of Ireland's woes were political or economic. The Commission to Inquire into Child Abuse, which was established in 2000 to investigate the abuse of children in Catholic-run residential institutions in Ireland from the 1930s onward, published its final report in May. The report concluded that beatings and neglect were routine and that sexual abuse was "endemic" in many institutions and also that church authorities were often aware of the abuse and made efforts to protect offenders from legal charges. In a leading editorial, the *Irish Times* described the report as a "map of an Irish hell." A separate inquiry into child-abuse allegations against clergy members in Dublin ended in July; the inquiry focused on allegations made against 46 priests between 1975 and 2004 and on how those complaints were handled by the archdiocese of Dublin. The inquiry's findings caused considerable public disquiet over the role of senior churchmen, who were criticized for not pursuing allegations of child sex abuse by clergy with sufficient vigour. By year's end four of the five serving bishops cited in the report had resigned.

Consumer prices in Ireland continued to fall. In November the Consumer Price Index showed prices down 5.7% over a 12-month period. In the first 10 months of the year, housing prices fell by 12.7% (this figure referred only to completed home sales). Unemployment continued to rise throughout the year. From January to November the seasonally adjusted rate was 12.5%—almost double that of a year earlier. Net emigration resumed, with an estimated 65,100 people emigrating during the 12 months ended in April—an increase of more than 40% over the previous 12-month period—while the number of

immigrants declined from 83,800 to 57,300. The number of births reached 74,500 during 2009, the largest figure attained since 1896. (KIERAN FAGAN)

ISRAEL

Area: 21,643 sq km (8,357 sq mi), including the Golan Heights and disputed East Jerusalem, excluding the Emerging Palestinian Autonomous Areas

Population (2009 est.): 7,128,000, excluding 305,000 Jews in the West Bank

Capital: Jerusalem is the proclaimed capital of Israel (since Jan. 23, 1950) and the actual seat of government, but recognition has generally been withheld by the international community

Chief of state: President Shimon Peres

Head of government: Prime Ministers Ehud Olmert and, from March 31, Benjamin Netanyahu

The Emerging Palestinian Autonomous Areas (the West Bank and the Gaza Strip)

Total area under disputed administration: West Bank 5,900 sq km (2,278 sq mi); Gaza Strip 363 sq km (140 sq mi)

Population (2009 est.): West Bank 2,787,000, including 2,482,000 Arabs and 305,000 Jews; Gaza Strip 1,492,000

Principal administrative centres: Ramallah and Gaza

Head of government: President Mahmoud Abbas, assisted by Prime Minister Salam Fayad

In 2009 three major developments dominated the Israeli political scene. The election of Benjamin Netanyahu to a second term as prime minister, a more vigorous U.S. Middle East peace policy, and the international fallout from Israel's 22-day military operation in the Gaza Strip from late December 2008 to mid-January all had potentially far-reaching consequences.

Netanyahu's victory in the February election was far from clear-cut. Although his right-wing Likud party won one seat fewer than former foreign minister Tzipi Livni's centrist Kadima, the right-wing bloc of parties allied to Likud garnered a majority of 65 seats in the 120-member Knesset (parliament). This enabled Netanyahu to form a stable 74-member coalition composed of Likud (27 seats), right-wing Yisrael

Beiteinu (15), three right-tending religious parties (Shas [11], Torah Judaism [5], and Jewish Home [3]), and, controversially, the centre-left Labour Party (13), whose leader, Ehud Barak, retained the defense portfolio and became one of Netanyahu's closest confidants.

After taking office on March 31, Netanyahu distanced himself from the internationally accepted two-state model for peace with the Palestinians but, under heavy pressure from Washington, soon backtracked. In a major policy speech at Bar-Ilan University on June 14, he committed himself to an independent Palestinian state alongside Israel. "In my vision of peace, there are two free peoples living side by side in this small land, with good neighbourly relations and mutual respect, each with its flag, anthem, and government, with neither threatening its neighbour's security and existence," he declared. Netanyahu's offer, however, was not unconditional: the Palestinian state would have to be demilitarized; the Palestinians would have to recognize Israel as a "Jewish state"; no Palestinian refugees would return to Israel-proper; and no part of Jerusalem—which would not be divided—would serve as the capital of the Palestinian state. The Palestinians, who had been offered far more by outgoing prime minister Ehud Olmert, were reluctant to engage on this basis and demanded that Netanyahu first freeze Jewish settlement construction in the West Bank as a sign of good faith.

In 2009 Pres. Barack Obama led a dynamic U.S. resolve to promote comprehensive Israeli-Arab peace, which he saw as the key to stability and the restoration of U.S. standing in the region. In a seminal speech made at Cairo University on June 4, he set down conditions for the resumption of Israeli-Palestinian negotiations, including a freeze on the construction of Jewish settlements in the West Bank, and urged the Arab world to encourage peacemaking by taking initial steps toward normalization with Israel. But the mooted freeze-for-normalization deal failed to materialize, and in late October, after months of intensive shuttle diplomacy, special U.S. Middle East envoy George Mitchell acknowledged that little progress had been made.

Promising peace negotiations under the previous Israeli government had broken down in December 2008 when Israel launched a major military operation against the radical Hamas government in the Gaza Strip. Determined to put an end to eight years of Hamas

Demonstrators in Jerusalem hold up cardboard cutouts of Gilad Shalit, a captive Israeli soldier, during a December protest held outside Prime Minister Benjamin Netanyahu's office to demand Shalit's release. Shalit had been held prisoner by Hamas militants since June 2006.

rocketing of Israeli towns and villages in the Gaza periphery, the Israeli Defense Forces (IDF) struck with overwhelming power, first bombing Hamas military and government targets from the air and then sending in ground forces and using heavy fire to advance in booby-trapped urban areas.

According to Palestinian sources, 1,417 Palestinians, 926 of them non-combatants, were killed in the 22 days of fighting; Israel put the Palestinian death toll at 1,166 and claimed that at least 709 were militiamen. Although Hamas fighters launched hundreds of rocket attacks during the operation, Israel lost only 10 soldiers and 3 civilians.

The disparity between the death tolls and the widespread destruction in Gaza led to claims that the IDF's response had been disproportionate and indiscriminate. Israel argued that its soldiers, faced with the problem of fighting militants who were embedded in heavily populated urban areas and deliberately using civilians as human shields, had operated strictly within the laws of war and had made strenuous efforts to warn civilians to move out of harm's way before impending attacks.

In early April the UN Human Rights Council established a fact-finding commission under South African judge Richard Goldstone to investigate violations of human rights and humanitarian law in the Gaza fighting. The commission heard testimony mainly from Palestinians, as Israel—charging that the commission's mandate was inher-

ently biased—refused to cooperate. On September 15 the commission issued a 575-page report stating that it had found evidence that international human rights and humanitarian law had been seriously violated. It also concluded that Israel had “committed actions amounting to war crimes, and possibly crimes against humanity.”

Netanyahu accused the commission of having applied “twisted standards” and of having played into the hands of radicals who hoped to defeat Israel by delegitimizing it on the international stage. He warned that if Israel was denied the right to defend itself against future rocket attacks, it would not be able to take risks for peace. The U.S. characterized the Goldstone report as biased and deeply flawed, but it urged Israel to conduct an independent investigation of its own, partly as a means of removing the report from the international agenda and paving the way for renewed Israeli-Palestinian peacemaking.

Although the Gaza operation hurt Israel's international image, it also seemed to establish a strong deterrent balance, at least in the short term. Nine months after the war, there was virtually no rocket fire from Gaza. Behind the scenes Israel and Hamas—through German mediation—were negotiating a deal for the release of Gilad Shalit, the Israeli soldier held prisoner by Hamas militants since June 2006.

Although both Hamas and Hezbollah used the lull to build up huge rocket ar-

senals, Israeli leaders were far more concerned by the strategic threat posed by Iran. Addressing the UN General Assembly on September 24, Netanyahu urged the international community to prevent the “tyrants of Tehran” from acquiring nuclear weapons. In late October Barak expressed Israel's concern that Iran would exploit talks with the Western powers to gain time while continuing to pursue a clandestine nuclear weapons drive.

Nevertheless, despite differences over the efficacy of diplomacy with Iran, Israel and the U.S. continued to coordinate defensive measures in the event of a military showdown with Tehran. In the Negev desert in late October, in by far the largest and most sophisticated joint exercise of its kind, the IDF, the U.S. European Command, and the U.S. Missile Defense Agency tested the interoperability of four state-of-the-art defense systems against incoming ballistic missiles: the U.S. high-altitude THAAD, the ship-based Aegis, the lower-altitude Patriot (PAC-3), and the Israeli high-altitude Arrow 2.

On the economic front, 2009 saw Israel emerging from the global economic crisis relatively unscathed. The government passed a two-year budget with increased spending to counteract growing unemployment, and the Bank of Israel lowered interest rates to encourage business activity. By the beginning of the fourth quarter, Israel seemed to have turned the corner. The Tel Aviv Stock Exchange had gained more than 60% over the lows of December 2008; the Composite State-of-the-Economy Index had risen for a fourth consecutive month; and the Bank of Israel was optimistically forecasting growth of 3% for 2010. Nevertheless, there were two main concerns: a weak U.S. dollar was hurting Israeli exports, and the national debt-to-GNP ratio for the end of 2009 was projected to top 84%. (LESLIE D. SUSSER)

ITALY

Area: 301,336 sq km (116,346 sq mi)

Population (2009 est.): 60,325,000

Capital: Rome

Chief of state: President Giorgio Napolitano

Head of government: Prime Minister Silvio Berlusconi

Tiziana Fabi—AFP/Getty Images

A devastating earthquake and allegations of sexual impropriety leveled against the country's billionaire prime minister, Silvio Berlusconi, riveted Italians in 2009. On April 6 an earthquake with a magnitude of 6.3 devastated a mountainous stretch of the Abruzzi region. The tremor severely damaged the 13th-century city of L'Aquila, located only about 100 km (60 mi) northeast of Rome. Aftershocks from the country's worst earthquake in 30 years rippled through central Italy for more than a month, fraying both public and political nerves. In all, at least 294 people died, and an estimated 60,000 were left homeless.

Two days after the quake, Prime Minister Berlusconi seized the media limelight by visiting homeless victims and promising a swift and thorough reconstruction of the affected areas. At Berlusconi's insistence, the Group of Eight summit that had been scheduled to take place on Maddalena Island, off the coast of Sardinia, was moved to L'Aquila. The summit was held there in July under makeshift conditions to focus global attention on the catastrophe. U.S. Pres. Barack Obama, visiting Italy in an official capacity for the first time, toured the city's rubble-strewn neighbourhoods, shaking hands and rallying local residents. By September vigorous assistance efforts had succeeded in moving some of the dispossessed into new homes, though thousands remained housed in temporary facilities.

Scientists remained concerned about the high potential for future seismic activity along Italy's geologically vulnerable eastern spine, the Apennine Mountains, where the quake had occurred. Though seismologists reiterated the need for stricter adherence to building codes, there was little immediate evidence that their counsel was being heeded. Italy had thousands of centuries-old structures that were difficult to modify.

Politically, Berlusconi's dominant centre-right People of Freedom Party endured a variety of controversies in its first full year of rule. Subject to numerous corruption and conflict-of-interest probes over the years, the 72-year-old Berlusconi, a longtime business and media tycoon, suddenly found himself embroiled in corrosive sex scandals.

In May, Veronica Lario, Berlusconi's wife of 19 years, announced that she

Facing allegations of sexual impropriety, Italian Prime Minister Silvio Berlusconi (left) speaks with a television presenter on May 5 following the announcement that his wife, Veronica Lario (pictured in the background), had filed for divorce.

would file for divorce, after having found out that her husband had attended the 18th birthday party of Naples model Noemi Letizia. He allegedly had given Letizia a gold and diamond necklace as a birthday gift. Noting that her husband rarely attended his own family's festivities, Lario said that she could not remain with a man "who consorts with minors." Letizia responded by saying that Berlusconi was merely a friend and benefactor whom she knew as "Papi," a version corroborated by an unapologetic Berlusconi. He insisted that he had attended Letizia's celebrations as a favour to her father, a businessman friend.

Soon after the Letizia controversy, 42-year-old escort Patrizia D'Addario publicly announced that she had been recruited by a middleman to spend the night with Berlusconi. She also alleged that the prime minister had later promised that she could stand for election to the European Parliament as one of his party's candidates. This time an enraged Berlusconi blamed unnamed political enemies for spreading malicious rumours and invading his privacy, dismissing D'Addario's account as defamatory gossip. In a remarkable series of rebuttals, Berlusconi also declared that, while he was "no saint," he was still "the best prime minister" Italy had ever had and a man whose status and character most Italians sought to emulate, though dips in public opinion polls suggested otherwise.

These tawdry scandals also damaged Berlusconi's already shaky reputation

among the country's Roman Catholic leaders, producing a rare public skirmish between the government and the Vatican. Essays critical of Berlusconi's moral judgment by Dino Boffo, the editor of *Avvenire*, the newspaper of the Italian Bishops' Conference, led to a fierce counterattack by *Il Giornale*, a daily owned by Berlusconi's brother, pointing out that Boffo was once embroiled in a sexual harassment case. The embittered Boffo eventually resigned, and Berlusconi met hastily with Pope Benedict XVI in an effort to mend the growing rift.

Berlusconi experienced a major setback in October when the Constitutional Court ruled that a 2008 law granting the prime minister and other leading officials immunity from prosecution while in office was unconstitutional. Although he had threatened to resign if the law was overturned, Berlusconi pledged instead to continue as prime minister and to defend himself in court, where he was expected to face trial in a few outstanding corruption and tax-fraud cases. The trials were expected to last into 2010 and beyond.

A September suicide bombing that killed six Italian paratroopers stationed in Afghanistan intensified the debate over Italy's participation in NATO-led efforts to pacify that country. The government, however, said that it would honour its commitments. In October Berlusconi angrily denied reports that Italy had paid Taliban leaders and other warlords in order to keep the peace in areas of Afghanistan where Italian soldiers were deployed.

Meanwhile, a rift between two key Berlusconi allies became nearly unbreachable. The recommendation of Gianfranco Fini, president of the lower house of parliament, to make legal immigrants eligible for Italian citizenship and to grant them voting rights was bitterly rejected by Umberto Bossi, the leader of the Northern League, a party that had been outspoken in its resentment of immigrants. Bossi replied that so-called easy citizenship would never happen.

The ongoing government debate over immigration policy came as Italian naval patrols continued to turn away new waves of would-be arrivals on Italian shores. Over the course of the year, several rickety vessels packed with migrants were intercepted and forced

away, despite protests from the European Union and humanitarian officials. Most of these vessels came from Libya and Morocco. In March, Berlusconi traveled to Tripoli to mark Libyan ratification of a 2008 cooperation deal that had called for the widening of business ties between the two countries in exchange for Libya's promising to help reign in Italy-bound migrants. In June, Libyan leader Col. Muammar al-Qaddafi paid his first visit to Rome, where the two nations agreed on further measures to police immigration.

The immigration controversy was fueled by the poor performance of Italy's economy, which was in recession partly because of the global economic crisis. In September the European Commission dampened hopes of an immediate recovery by announcing that it expected a 5% drop in Italy's 2009 GDP rather than the 4.4% decrease forecast earlier in the year. The Commission could not foresee a recovery before mid-2010. The IMF's assessment was similar; it predicted a 5.1% drop in GDP in 2009, followed by a marginal 0.1% recovery in 2010. Meanwhile, on its business-confidence index for April, the Rome-based Institute for Studies and Economic Analyses recorded a level of 59.8 for Italy, the lowest for the country since the institute was founded in 1986.

Unemployment also continued to loom large. The Organisation for Economic Co-operation and Development (OECD) predicted that Italy's jobless figures would reach into the double digits if the economy failed to regain momentum. What most troubled the OECD was rising unemployment among 15- to 24-year-olds, which had increased by 5% in 2008 to 26.3%, meaning that more than a quarter of the country's youth were out of work.

Some social critics suggested that Letizia's alleged affair with Berlusconi represented the revival of a trend for young women to seek dalliances with successful men in the political, sports, and entertainment worlds as a means to escape poor job prospects. Others blamed Italian television for objectifying women.

Despite the precarious economy, Italian politics appeared all but bereft of a functional opposition. Walter Veltroni, the centre-left leader of the Democratic Party who had once been anointed as a future prime minister, resigned from his post in February after the party suffered heavy defeats in Sardinian local elections. His successor, Dario Franceschini, made little immediate impact

and was soon replaced by political veteran Pier Luigi Bersani. This turmoil in the ranks of the opposition seemed to leave Italy's fate even more squarely in the hands of Berlusconi's People of Freedom Party and its allies.

Melancholy was echoed even in the sports world, where rabid soccer fans were forced to reckon with a national team whose performances, while successful, were generally lacklustre. Fans also watched the exodus of some of the top soccer league's best players. Zlatan Ibrahimovic of Sweden, the star of Serie A titleholder Inter Milan, explained his defection to FC Barcelona of the Spanish La Liga in terms of salary and his belief that Spain offered the opportunity for more creative play. Kaká of Brazil, AC Milan's hallmark midfielder, said much the same, though more diplomatically, as he packed his bags for Real Madrid. Owners also acknowledged that they had reduced spending as a result of the poor economy, and no Italian team made it past the quarter-finals in the European championships. In Formula 1 auto racing, Italy's best-known international brand, Ferrari, was repeatedly humbled by teams with far less know-how and cash.

JAMAICA

Area: 10,991 sq km (4,244 sq mi)

Population (2009 est.): 2,702,000

Capital: Kingston

Chief of state: Queen Elizabeth II, represented by Governors-General Kenneth Hall and, from February 26, Patrick Allen

Head of government: Prime Minister Bruce Golding

In January 2009, Jamaica's Office of Utilities Regulation (OUR) announced that at least 600 MW of additional power would be required over the next 10 years to meet the country's growing energy needs. The Jamaica Public Service Co., an electric utility in which the government held a 20% stake, and independent power producers currently supplied about 817 MW to the national grid. The OUR hoped that at least 15% of the total power required by 2020 could be derived from renewable energy sources.

The hijacking in April of a chartered Canadian plane at Sangster international airport in the resort town of Montego Bay ended without injury after police stormed the aircraft and arrested a local man who had taken over 160 passengers and crew members hostage. The hijacker said that he wanted to be taken to Cuba. Local officials described him as a "mentally challenged" youngster.

Jamaica reaffirmed in June that it was not averse to going against the grain of international opinion by retaining the death penalty as part of the country's judicial system. In late 2008 both houses of Parliament had voted in favour of hanging as the method of execution. There were nine people on death row at midyear.

In July the Jamaican government confirmed that it had made a formal application to the IMF to borrow \$1.2 billion under a stand-by agreement. The IMF and Jamaica agreed on "key elements" of a \$1.3 billion loan in December.

JAPAN

Area: 377,930 sq km (145,920 sq mi)

Population (2009 est.): 127,556,000

Capital: Tokyo

Symbol of state: Emperor Akihito

Head of government: Prime Ministers Taro Aso and, from September 16, Yukio Hatoyama

Domestic Affairs. In Japan's general election held on Aug. 30, 2009, the Liberal Democratic Party (LDP) was forced from office for only the second time in 54 years as the opposition Democratic Party of Japan (DPJ) ascended to power under the leadership of Yukio Hatoyama. (See BIOGRAPHIES.) The DPJ achieved an even greater landslide victory than political forecasters had predicted, increasing its seat total in the 480-seat lower house of the Diet (parliament) from 115 to 308 while the LDP slid from 300 seats to just 119.

Politics during 2009 revolved almost completely around the election. Taro Aso, who began the year as prime minister, had initially hoped to call an election soon after he was chosen to replace Yasuo Fukuda as LDP leader in

Yoshikazu Tsuno—AFP/Getty Images

September 2008. Before he could do so, however, the global financial crisis hit Japan hard, causing a sharp contraction of economic activity that saw GDP shrink by 8.4% year-on-year in the first quarter of 2009. Aso's government responded to the crisis with three stimulus packages amounting to roughly \$275 billion, but this stimulus failed to reverse the unemployment rate, which crept steadily upward from 4% in mid-2008 to a postwar high of 5.7% in July 2009.

Aso postponed plans for the election while waiting for an economic turnaround to commence. The announcement in March that prosecutors were investigating a violation of the Political Funds Control Law involving DPJ leader Ichiro Ozawa gave Aso hope that the opposition might be so distracted by the scandal that it could not take advantage of the weak economic situation. Indeed, the DPJ's approval rating dropped to 18% in April as Ozawa considered how to respond. His chief secretary, Takanori Okubo, had been arrested and then prosecuted for having directed a donor, Nishimatsu Construction, to circumvent the ban on corporate donations to individual politicians by funneling money to Ozawa's fund-raising organization via a pair of political front groups. Ozawa claimed ignorance and refused for two months to resign, even as his party continued to slip in the polls. Ozawa himself was never charged, but on May 11 he announced his resignation as party leader—just two days before he was scheduled to debate Aso in the Diet.

This turned out to be the nadir in the DPJ's poll standings; the party quickly began to recover once it had put the scandal behind it. Just five days after Ozawa's resignation, the DPJ held a leadership vote, in which Hatoyama bested Katsuya Okada. Both men had served as party leader before, with Okada presiding over the DPJ's defeat in the previous lower house election in 2005 and Hatoyama serving as leader from 1999 to 2002. Although Hatoyama was closely associated with Ozawa, he was able to prevail in part because the party's rank-and-file members realized that they still needed Ozawa, who continued to lead the DPJ's efforts to plot election strategy.

The DPJ defeated the combined forces of the LDP and the New Komeito party

On July 27, Democratic Party of Japan (DPJ) leader Yukio Hatoyama displays the cover of his party's manifesto for the upcoming general election. After leading the DPJ to a landslide victory on August 30, Hatoyama took office as Japan's prime minister in September.

in the Tokyo assembly elections on July 12. With Tokyo voters having demonstrated that they were willing to elect little-known DPJ candidates over veteran LDP assemblymen, it was clear by July—when Aso finally announced that the general election would be held on August 30 (by law the election had to be held by September)—that the LDP would be facing an uphill battle. Projections published in late July by *Aera*, one of Japan's leading weekly news magazines, indicated that the DPJ was on track to win 247 seats—7 more than needed for a majority in the lower house.

As the election campaign got under way, however, the DPJ's appeal for a "change of government"—the slogan plastered on every campaign poster—attracted many more supporters than expected. Particularly popular were the DPJ's promises to fix the country's pension system and to increase the child allowance payment to \$276 per month for every child under the age of 13. The DPJ proposed to pay for these measures by slashing what it characterized as pork-barrel spending by the LDP on public-works projects.

The DPJ's ensuing triumph in the general election was truly historic. Although in the previous 54 years the LDP had been pushed out of office once before—for 11 months in 1993–94—that brief interlude had been brought about by a split in the party. Almost all

LDP incumbents had held onto their seats in the 1993 election. This time, voters cast out more than 150 LDP and New Komeito incumbents to hand the opposition party its commanding win.

Hatoyama officially took office on September 16. He named Okada as foreign minister and found places in his new cabinet for representatives of all of the various groups that made up the DPJ, including former Socialists who had helped form the party in 1996. He named Naoto Kan as national strategy minister, a new cabinet post in which Kan would have the responsibility for establishing policy priorities; the creation of this post was part of the DPJ's efforts to streamline a policy-making process that it argued had been inefficient under the long rule of the LDP. Ozawa was not offered a portfolio but was instead named DPJ secretary-general.

While most of the portfolios went to DPJ leaders, Hatoyama reserved two spots in his cabinet for members of the People's New Party and the Social Democratic Party—two small political parties that had joined the DPJ in a coordinated campaign to oust the LDP. Hatoyama chose to do so even though those parties' votes were not needed to pass legislation in the lower house; their votes were, however, needed in the upper house, where the two parties held nine seats. If the DPJ did well in the upper-house elections scheduled for July 2010, Hatoyama would have the leeway to form a new DPJ-only cabinet.

The new government wasted no time before taking decisive actions. Land, Infrastructure, Transport, and Tourism Minister Seiji Maehara announced on September 17 that he was suspending construction already under way on the \$5.2 billion Yamba Dam in Gunma prefecture. Because the LDP had many political backers in the construction industry and in rural areas who had long been involved in dam building, Maehara's announcement was viewed as a direct assault on the LDP's old patronage system. The ministry later suspended work on another 47 central-government-funded dams.

The government also announced that it would be trimming the third stimulus package from \$147 billion to \$115 billion, cutting back on what it considered to be wasteful spending, and signaled a

similar commitment to restraint as it turned to the fiscal 2010 budget process. Finance Minister Hirohisa Fujii indicated that he would be asking the ministries to reduce their spending requests from \$995 billion to \$963 billion and vowed to keep debt issuance at a level of \$461 billion (7.9% of GDP). The government did increase spending in certain areas. In October, Health, Labour, and Welfare Minister Akira Nagatsuma announced that he would be increasing the child-allowance budget from \$11.2 billion to \$30.2 billion, a move that would enable monthly child-allowance payments to be raised to \$141. The government maintained that it would take additional steps in 2010 to boost the allowance payments to the sum promised by the DJP during the campaign.

The Economy. Of the world's major economies, Japan's was most deeply affected by the global recession. The economy took its biggest hits in the final quarter of 2008, when GDP contracted by 3.3%, and the first quarter of 2009, when it shrank by another 4%. By the second quarter of 2009, however, the economy had begun to show some signs of life, posting a positive growth figure of 0.7% that raised hopes that the country had put the worst behind it. Adding to the cautious optimism was a downtick in the unemployment rate from a record 5.7% in July to 5.5% in August.

Nevertheless, most economists continued to worry about the ability of the Japanese economy to return to robust growth. The recession was stanchied with the help of massive deficit spending, which was projected to total \$521 billion in fiscal year 2009 (9% of GDP), but with Japan's public debt already totaling 170% of GDP, there was tremendous pressure on the DPJ government to move toward greater fiscal restraint. The decision to trim the third fiscal stimulus package and put a limit on bond issuance in the 2010 budget suggested that the government was responding to that pressure.

Also working against a resumption of robust growth was the steady strengthening of the yen. The currency's value went from ¥105 to the dollar for most of 2008 to ¥90 to the dollar by November 2009. With the Chinese renminbi pegged to the dollar throughout most of this period, the strengthening of the yen against the dollar meant that the Japanese currency was also strengthening against the renminbi. The combination of the economic crisis and adverse currency movements severely

weakened Japanese exports, which fell by 26% in the first quarter of 2009. Although Japan was able to recoup some of that decline in the second quarter—when exports were up 6.3%—the currency environment gave little reason to expect exports to become the engine of sustained growth for Japan.

Japanese monetary policy remained unchanged in 2009 after the Bank of Japan (BOJ) lowered the uncollateralized overnight call rate to 0.1% in late 2008 to deal with the onset of the economic crisis. Despite the signs that some growth had resumed in 2009, the BOJ decided at its October 30 meeting to keep the rate at 0.1%, stating that it would “maintain the extremely accommodative financial environment for some time by holding interest rates at their current low levels and providing ample funds sufficient to meet demand in financial markets.”

Japanese firms were also hit hard by the recession. Toyota Motor Corp. reported multibillion-dollar losses in the early part of the year, projecting at one point that it would lose \$5 billion for the year. By the third quarter, however, Toyota reported that it was earning profits again and reduced its projected losses for the year to \$2.2 billion. Improvements of this kind helped the benchmark Nikkei 225 index recover from a crisis-induced trough of just above 7,000 in early March to levels of around 10,000 between August and October.

Foreign Affairs. On the foreign policy front, developments continued to revolve around Japan's relations with the U.S. During the first half of the year, the Japanese adjusted to the transition in the U.S. from the administration of Pres. George W. Bush to that of newly inaugurated Pres. Barack Obama, while later in the year the U.S. was forced to accommodate the priorities of a new party in power in Japan.

As the year began, Prime Minister Taro Aso remained frustrated with the U.S.'s decision in 2008 to remove North Korea from its list of state sponsors of terrorism despite the absence of progress on a major subject of Japanese concern—the fate of Japanese citizens who had been abducted by North Korean agents during the 1970s and '80s—and continuing concerns regarding North Korea's nuclear weapons program. With Obama announcing his intention to move U.S. foreign policy away from a confrontational approach to one that placed an emphasis on engagement with countries that had been accused of human rights abuses, Japan

made efforts early in the year to ensure that the new administration understood its worries over North Korea. In February, U.S. Secretary of State Hillary Clinton made Japan her first overseas destination, and Obama hosted Aso in his first meeting with a foreign leader in Washington, D.C. During her visit Clinton met with families of the Japanese abductees and pledged to push North Korea “to be more forthcoming with information” regarding the kidnappings.

Subsequent decisions by the North Koreans to detain two American journalists in March, launch a long-range missile in April, and conduct a second nuclear test on May 25 (the first test had occurred in October 2006) led Japan and the U.S. to agree to work more closely together to pressure the North Koreans to change their behaviour. The two countries pushed for a new UN resolution following the missile launch but faced opposition to such a move from Russia and China; initially the UN Security Council issued only an official statement condemning the launch, but in the wake of the second nuclear test, the Security Council unanimously passed a resolution on June 12 that imposed additional sanctions on North Korea. In response to the earlier condemnation by the UN, North Korea in April announced its withdrawal from the six-party talks on denuclearization. In July, Japanese diplomat Yukiya Amano (*see* BIOGRAPHIES) was elected director general of the International Atomic Energy Agency (IAEA). Amano expressed his hope that the six-party talks would be revived and that North Korea would allow IAEA inspectors to return to the country.

The DPJ victory on August 30 posed other challenges for the U.S.-Japan alliance. The DPJ had campaigned on a platform that called for improved relations with China and a “more equal” partnership with the U.S. In its early days in office, Hatoyama's administration declared its intention to end Japan's naval refueling mission in the Indian Ocean, which involved the use of Japanese vessels to refuel U.S. ships engaged in the war in Afghanistan. The new administration also indicated its desire to renegotiate a deal on relocating a U.S. military base in Okinawa that the two governments had reached earlier in the year. When the leaders of the two countries met during Obama's visit to Japan on November 13–14, they signaled agreement on the refueling mission. Japan would indeed suspend the mission, but it would at the same time offer \$5 billion in aid to

Afghanistan. The Okinawa base relocation dispute proved too difficult to resolve, so the two leaders announced that they would set up a "high-level working group" to reconcile their differences. (LEONARD SCHOPPA)

JORDAN

Area: 88,778 sq km (34,277 sq mi)
Population (2009 est.): 5,981,000 (including about 2,000,000 Palestinian refugees, most of whom hold Jordanian citizenship; excluding roughly 450,000 Iraqi refugees)
Capital: Amman
Head of state and government: King 'Abdullah II, assisted by Prime Ministers Nader Dahabi and, from December 14, Samir al-Rifai

The spectre of Jordan's becoming an alternative homeland for Palestinians from the Israeli-occupied West Bank returned to trouble the kingdom's political scene throughout 2009. In early January, amid Israel's 22-day war on Hamas militants in the Gaza Strip, King 'Abdullah II voiced concern over the future of the Palestinians and spoke of a "conspiracy" against the Palestinian people. His statements were interpreted as a warning against an earlier Israeli scenario that entailed passing administrative control of the Gaza Strip to Egypt and forcibly transferring Palestinians in the West Bank to Jordan, thus achieving a purely Jewish state. Concern over this prospect was triggered anew by the victory of the right-wing Likud party leader Benjamin Netanyahu in Israel's February elections. An estimated 60% of Jordan's population was of Palestinian origin, and a transfer of the West Bank's 2.3 million Palestinians to Jordan by force posed a daunting prospect.

In May members of the Knesset (Israeli parliament) presented a draft law proposing Jordan as the alternative homeland for Palestinians. This sparked protest demonstrations in Amman, while the Jordanian government summoned the Israeli ambassador to convey its rejection of the proposal. Tension continued as rumours circulated that the Jordanian government had approved a secret U.S. plan to rescind the rights of Palestinian refugees to return

Salah Malkawi/Getty Images

During a visit to Jordan in May, Pope Benedict XVI prays on the bank of the Jordan River, believed to be the site where John the Baptist baptized Jesus.

to their homeland. This coincided with the Jordanian government's adoption of a decentralization plan to divide the kingdom into three administrative regions, a plan that was associated—in the rumours—with a political scheme to create an alternative Palestinian state in Jordan. At a speech in August, King 'Abdullah denied the rumours and warned unnamed parties against their "private and suspicious agendas," emphasized Jordan's commitment to and support of Palestinian rights, and denied bowing to external pressure.

Jordan's economy continued to suffer the effects of the global financial crisis, with the budget deficit climbing to \$534.2 million, compared with the \$103.1 million budget surplus in the first eight months of 2008. Economic growth fell by half. In September Jordan signed grant agreements with the U.S. Agency for International Development (USAID), bringing U.S. economic assistance to Jordan for 2009 to \$513.5 million. Jordan likewise received substantial economic assistance from the EU. Reportedly dissatisfied with the pace of economic reforms, King 'Abdullah on November 23 dissolved the parliament midway through its term and called for new elections, and in December he replaced the country's prime minister, Nader Dahabi, with a former palace aide, Samir al-Rifai.

In May Pope Benedict XVI visited Jordan in an effort to improve ties with the Muslim world; there he was boycotted by Islamists for refusing to apologize for previously quoting a text criticizing Islam. In September Jordan announced plans to embark on an ambitious \$2 billion project to build a canal that would replenish the dwindling Dead Sea with water from the Red Sea.

(AMIRA HOWEIDY)

KAZAKHSTAN

Area: 2,724,900 sq km (1,052,090 sq mi)
Population (2009 est.): 15,881,000
Capital: Astana
Head of state and government: President Nursultan Nazarbayev, assisted by Prime Minister Karim Masimov

As the Central Asian state whose economy was most closely integrated into the world financial system, Kazakhstan in 2009 directly experienced the negative effects of the global financial crisis. As an anti-crisis measure, in early February the national currency, the tenge, was devalued; according to Kazakh media, prices in the country immediately rose by 20%. In March, Kazakh Pres. Nursultan Nazarbayev called for acceleration of the two-year anti-crisis program adopted by the government in October 2008; the program emphasized support for the country's financial sector, including mortgage restructuring, and higher priority for the construction industry. In late August the former CEO of the Alyans Bank was arrested on a charge of having embezzled \$1.1 billion; the former chief of another major bank had fled the country in February to avoid prosecution on a similar charge. Some political observers suggested a link between the actions against the bankers and the financial crisis.

In addition to coping with an economy weakened by the economic downturn, in 2009 Kazakhstan's government prepared to assume the annual chairmanship of the Organization for Security and Co-operation in Europe (OSCE) in 2010. Kazakhstan would be the first Commonwealth of Independent States member—and the first Asian state—to assume the position. In

spite of Kazakhstan's promise to strictly adhere to its OSCE commitments, however, questions arose during 2009 about specific actions taken by Kazakh authorities. In June the OSCE representative on freedom of the media called on Nazarbayev to veto a bill that would restrict Internet freedom (and limit media freedom in general) by expanding the list of justifications for suspending the operations or distribution of any media outlet. In spite of the protest and recommendations for revisions that would have brought the draft law in line with international standards, Nazarbayev signed the law. A survey published by an international group monitoring freedom of religion (Forum 18) found that Kazakhstan continued to violate its human rights commitments by placing legal restrictions on freedom of belief, expression, and association.

On September 3, leading human rights activist Yevgeny Zhovtis, who had been convicted for vehicular manslaughter as a result of a July traffic accident, was sentenced to four years of detention in a resettlement colony. The sentence caused an outcry in domestic and international human rights communities, and even the former head of the national traffic police asserted that the sentence was too harsh.

(BESS BROWN)

KENYA

Area: 582,646 sq km (224,961 sq mi)

Population (2009 est.): 39,802,000

Capital: Nairobi

Head of state and government: President

Mwai Kibaki, assisted by Prime Minister

Raila Odinga

Kenya made little progress in breaking free from political stalemate in 2009. Prime Minister Raila Odinga had only limited success in pushing forward his reform agenda and in April accused Pres. Mwai Kibaki of attempting to undermine the coalition government made up of Odinga's Orange Democratic Movement (ODM) and Kibaki's Party of National Unity. Claiming that cabinet ministers belonging to the ODM were being left out of decision making—particularly with regard to

Drought-stricken cows lie in a paddock at a slaughterhouse east of Nairobi, Kenya, in September.

Thomas Mukoya—Reuters/Landov

setting the legislative agenda in the parliament—Odinga announced a boycott of cabinet meetings. Two weeks later the Women's Development Organisation, backed by the prime minister's wife, Ida Odinga, launched a unique strategy to protest the political deadlock by declaring a weeklong boycott on sex. In July there were signs of rapprochement between the factions when Kibaki toured Nyanza province, Odinga's political stronghold, and met with Odinga at the prime minister's home. In November the Kenyan government published a new draft constitution that would curtail presidential powers and allow the prime minister to oversee routine government business; the draft constitution was to be subjected to a referendum, which was expected to take place in March 2010.

Calls for judicial and electoral reform were largely ignored, despite strong prodding by the UN and other international agencies as well as by U.S. Secretary of State Hillary Clinton during her visit to Kenya in early August. Corruption scandals mounted, with numerous government officials facing accusations of graft in connection with the grain, oil, and tourism industries. Human rights violations were also rampant. In February the UN special rapporteur on extrajudicial killings, Philip Alston, issued a hard-hitting report that condemned Kenya for not reining in police death squads responsible for killing an estimated 200 members of the outlawed Sabaot Land Defence Force militia and some 500 members of the banned Mungiki sect. Alston also called on Kibaki to dismiss Kenya's police commissioner, Mohammed Hussein Ali, for permitting systematic police violence and urged the resignation of Attorney

General Amos Wako, whose 18 years in office had yielded few prosecutions of suspects in extrajudicial killings.

Efforts to investigate and prosecute cases stemming from the widespread violence that followed Kenya's disputed December 2007 presidential election were halfhearted, largely because some perpetrators occupied key positions in the government. In February the parliament voted against a special tribunal composed of Kenyan and international judges. In July the cabinet also decided against a special tribunal, opting to use local courts instead. National and international civil rights organizations campaigned for the International Criminal Court (ICC) to intervene. Meanwhile, former UN secretary-general Kofi Annan submitted to the ICC a list of names of persons suspected of having instigated the postelection violence.

The global recession impeded export growth and reduced tourism receipts, remittances, and private capital flows. GDP growth dropped from 6% in 2004–07 to 2.5% in 2009. Crop production declined steeply as Kenya suffered from the worst drought to hit East Africa since 2000; production of corn (maize), the country's staple food crop, dropped by nearly 28%. The UN World Food Programme estimated that nearly four million Kenyans—some 10% of the population—required emergency assistance, which was slow to materialize. In the northern pastoral districts, massive cattle deaths caused widespread hunger and spawned interethnic hostilities. Throughout the drought-affected areas, rising prices of food and water bred antigovernment sentiments, which led many observers to fear the possible resurgence of armed militias.

(LARAY DENZER)

KIRIBATI

Area: 811 sq km (313 sq mi)

Population (2009 est.): 99,000

Capital: Government offices on three islets of South Tarawa

Head of state and government: President Anote Tong

Predictions by the Asian Development Bank of economic deterioration in Kiribati proved correct in 2009. The worsening situation led to large drawdowns from the Revenue Equalization Reserve Fund to finance budget deficits. The fund was already shrinking; its investments in offshore financial markets posted negative returns, and this led to warnings that government expenditures would need to be cut to ensure that the fund could continue to finance development in Kiribati. One bright spot was the performance of Kiribati Shipping Services Ltd., which signed an agreement to provide much-needed and profitable regular shipping services for its small neighbours, including Tuvalu, Nauru, and the French collectivity of Wallis and Futuna.

In June, Pres. Anote Tong signed into law an act creating the Phoenix Islands Protected Area (PIPA), which covered more than 400,000 sq km (about 150,000 sq mi) and was the largest marine reserve in the world. The PIPA was largely uninhabited, and its remote location ensured that the unique marine wilderness had one of the most unspoiled coral reefs in the world. The government was hoping to secure a United Nations Educational, Scientific and Cultural Organization World Heritage site listing for the pristine area.

In another environmental success story, Kiribati's waste-recycling program, begun with funds from non-governmental organizations, eliminated large amounts of garbage along roads around the capital and reached the point at which it was to be spun off as a sustainable private business. The government appointed a four-person committee to review a series of immigration permit decisions that had resulted in rapid growth of the immigrant business community and had begun to create some domestic political tension. (CLUNY MACPHERSON)

KOREA, DEMOCRATIC PEOPLE'S REPUBLIC OF

Area: 122,762 sq km (47,399 sq mi)

Population (2009 est.): 24,162,000

Capital: Pyongyang

Head of state and government: Supreme Leader/Chairman of the National Defense Commission Kim Jong Il

Despite leadership uncertainties and growing hardship for the average North Korean, the regime struck a provocative and defiant pose toward the world in 2009. The country's leader, the reclusive 68-year-old Kim Jong Il, who had recovered from a suspected stroke, made up for lost time with a record 150-plus public appearances during the year. He also seemed to be grooming his third son, Kim Jong-Un (believed to be about 27), to be his successor, but Chang Song-Taek, Kim Jong Il's brother-in-law, appeared poised to serve as a caretaker if the younger Kim was not ready to rule.

Kim Jong Il celebrated his renewed vigour with a long-range missile test and satellite launch in April; the effort failed. The following month North Korea appeared to conduct its second underground nuclear test, which seemed to have been more successful than its first test, in 2006. Most analysts believed, however, that it would be at least a decade before the country could marry its missile and nuclear programs. North Korea also began rebuilding a nuclear reactor that it had partially dismantled as part of a 2005 nuclear accord and resumed plutonium production. In December a U.S. envoy visited the country bearing a letter from U.S. Pres. Barack Obama in an attempt to revive the moribund nuclear talks, but North Korea appeared to be in no hurry to return to the negotiating table. Days later Thai authorities interdicted a 35-ton North Korean arms shipment believed to have been bound for the Middle East. Under UN Security Council Resolution 1874 (2009), North Korea was prohibited from exporting heavy weapons.

Meanwhile, North Korea undertook the first reform of its currency in almost 20 years by ordering on November 30 that old currency be exchanged for new at the rate of 100 to 1, a move that reportedly resulted in widespread

anger and confusion. Not only did the denominations mostly stay the same and the designs look somewhat similar, but the total amount of the old currency that each person could exchange for the new was severely restricted.

Despite promises of a "strong and prosperous nation" by 2012, haphazard reforms and a recent sharp decline in humanitarian assistance suggested the real possibility of renewed famine. North Korea appeared before the UN Human Rights Council for its first "universal periodic review" on December 7. The council made 167 recommendations, and the country agreed to respond to many of them, including better monitoring of food distribution. (PETER M. BECK)

KOREA, REPUBLIC OF

Area: 99,678 sq km (38,486 sq mi)

Population (2009 est.): 48,333,000

Capital: Seoul

Head of state and government: President Lee Myung-Bak, assisted by Prime Ministers Han Seung-Soo and, from September 29, Chung Un-Chan

By the end of 2009, South Korea had come through the global economic downturn in surprisingly good shape, but the deadlock and retribution prevalent in the country's politics remained unaffected by national mourning over the deaths of two previous presidents. Relations with the United States continued to warm, while ties with North Korea remained frosty. Meanwhile, two South Korean athletes made their mark on the world stage.

After three straight quarters of year-on-year decline, the South Korean economy came back to life in the second half of the year. Unemployment peaked at a modest 4% in June. The Hyundai-Kia Automotive Group led the way in economic growth, with the partners expanding their global market share from 6.5% to 7.8% in the first nine months of 2009.

Hyundai-Kia and South Korea's three other biggest conglomerates—Samsung, LG, and SK—also made preparations for power to be passed to the next generations of their founding families. Hyundai Group chairwoman Hyun Jeong-Eun groomed her daughter to

Korean Central News Agency—Korea News Service/AP

North Korean leader Kim Jong Il (seated centre) is flanked by Hyundai Group chairwoman Hyun Jeong-Eun (left) and her daughter, Chung Ji-Yi. The two women met with Kim in August.

take over in what was anticipated to be Korea's first mother-daughter corporate succession. The two met with North Korean leader Kim Jong Il in August to discuss North-South cooperative projects.

Koreans mourned the passing of two former presidents within three months of each other. Roh Moo-Hyun jumped from a cliff to his death in May, despondent over the widening corruption investigation that targeted his family members. Roh's predecessor in office, Kim Dae-Jung, succumbed to multiple organ failure in August. Both politicians were longtime democracy activists who also tried to promote reconciliation and cooperation with North Korea. (See OBITUARIES.)

International developments included the selection of South Korea to host the November 2010 Group of 20 summit and the decision of Pres. Lee Myung-Bak to redeploy several hundred troops and reconstruction personnel to Afghanistan. Lee also continued to improve relations with the United States. He paid a visit to the White House in June, and U.S. Pres. Barack Obama made a reciprocal visit in November. Meanwhile, Pyongyang gave Seoul the cold shoulder for much of the year, but rumours swirled that a North-South summit could take place in 2010.

Politics remained a blood sport in South Korea. Even though the ruling Grand National Party (GNP) enjoyed a clear majority in the National Assembly, the opposition parties physically pre-

vented several votes from taking place. In July the opposition blocked GNP members from the legislative chamber to prevent a controversial media-reform bill from coming to a vote, and the bill was passed only after GNP members sneaked into the chamber through a side door. Lawmakers also clashed over plans to relocate the central government from Seoul to the countryside and to revive four of Korea's major rivers in what would be the country's biggest hydro-engineering project. The GNP passed the annual budget in a last-minute vote on December 31, over opposition protests. Han Myung-Sook, who was the first woman to have served as South Korea's prime

minister (2006–07), was indicted for having received a \$50,000 bribe from a job seeker. The opposition Democratic Party insisted that the investigation was politically motivated.

Two South Koreans made waves in the sports world. In March, Kim Yu-Na (see BIOGRAPHIES) became the first South Korean to win a world figure skating title. Kim was favoured to win gold in the 2010 Winter Olympics in Vancouver. Golfer Yang Yong-Eun pulled off one of the year's greatest upsets, beating Tiger Woods at the Professional Golfers' Association championship in August. Yang became the first Asian-born male golfer to win a major tournament. (PETER M. BECK)

KOSOVO

Area: 10,908 sq km (4,212 sq mi)

Population (2009 est.): 1,805,000

Capital: Pristina

International Authority: Final authority resides with the UN interim administrator, Lamberto Zannier (Italy), in conjunction with the EU special representative in Kosovo, Pieter Feith (The Netherlands)

Chief of state: President Fatmir Sejdiu

Head of government: Prime Minister Hashim Thaci

In an annual assessment report, the European Commission in 2009 emphasized that Kosovo had made some progress in public administration and judicial reform but very little in fostering a market economy. The report noted that freedom of expression was not fully guaranteed and that efforts to provide an institutional framework for reconciliation between the majority Albanians and minority communities were lacking. Progress was reported in education; the first attempts were made to tone down nationalism and hate mongering in history schoolbooks.

Kosovo held its first elections since it declared independence from Serbia in February 2008. Some 45% of the 1.5 million registered voters cast ballots, electing mayors and members to city councils in 36 municipalities. Prime Minister Hashim Thaci's Democratic Party of Kosovo won the majority of votes, and its coalition partner, the Democratic League of Kosovo, won in the capital, Pristina.

By year's end 64 countries, including the United States and most European countries, had recognized Kosovo, but Serbia attempted to block further recognition by arguing before the International Court of Justice (ICJ). In December the ICJ heard testimony by Serbia, Kosovo, and 27 UN member states that either supported or opposed Kosovo's independence.

Kosovo joined the IMF and the World Bank in June. The country's trade deficit from January to July was about \$1.25 billion. Exports consisted mainly of scrap metal, beverages, and furniture. Remittances from Kosovo's diaspora fell 8%; these sums constituted 14.1% of Kosovo's GDP, 2.7% more than exports. Unemployment remained the highest in Europe, at 45%. The IMF forecast GDP growth of 3.8% for 2009, down from 5.4% in 2008.

(MILAN ANDREJEVICH)

KUWAIT

Area: 17,818 sq km (6,880 sq mi)

Population (2009 est.): 3,442,000

Capital: Kuwait

Head of state and government: Emir Sheikh Sabah al-Ahmad al-Jabir al-Sabah, assisted by Prime Minister Sheikh Nasir al-Muhammad al-Ahmad al-Jabir al-Sabah

Yasser Al-Zayyat—AFP/Getty Images

Aseel al-Awadhi (second from right) attends an orientation session on May 25 for new members of the Kuwaiti National Assembly. Al-Awadhi was one of the first four women ever elected to the 50-member legislative body and one of two who did not wear a Muslim head scarf.

On March 18, 2009, continued tensions in Kuwait between the parliament and the cabinet led the emir, Sheikh Sabah al-Ahmad al-Jabir al-Sabah, to dissolve the National Assembly—the third such dissolution since 2006—and call for new elections. The elections, which were held on May 16, resulted in a historic outcome; in the balloting four highly educated women won election to the National Assembly in spite of objections from conservative Islamists. Although Kuwaiti women were given the right to vote and to run for office in 2005, none had previously been able to win a National Assembly seat. Meanwhile, representatives from the Shi'ite community, which constituted about one-third of the Kuwaiti population, rose from five to nine; by contrast, Sunni Islamists (Salafists) saw their representation in the National Assembly decline significantly, from 21 seats to 11. The emir also reappointed his nephew, Sheikh Nasir al-Muhammad al-Ahmad al-Jabir al-Sabah, prime minister for the sixth time since 2006.

During 2009 some leading Kuwaitis were advocating for the appointment of a prime minister from outside the ruling family as a means of providing more stability. Since 1992 the role of the National Assembly had been slowly changing from a consultative body to a genuine legislature. A critical issue was the total accountability of the entire cabinet to the National Assembly; the prime minister had always been a member of the al-Sabah family, which, as the ruling family, was not held accountable.

Kuwait suffered the effects of the global financial crisis. The government was obliged to shore up Gulf Bank, the country's second largest bank, and fully guarantee all bank deposits. The Kuwait stock exchange and real-estate prices tumbled, but by the beginning of the third quarter of 2009, the Kuwaiti economy was showing signs of recovery.

Tense relations between Kuwait and Iraq continued over border issues, shared oil fields, and war reparations owed by Iraq to Kuwait. While Kuwait insisted upon fulfillment of Iraq's international obligations, including payment of reparations, Iraq sought the cancellation of about \$25 billion of the UN-mandated reparations for destruction wrought by Saddam Hussein's 1990 invasion of Kuwait. Efforts were made by the UN to help find a solution to the impasse; among the most promising plans was the proposal to let Kuwait invest the money owed to it within the Iraqi infrastructure. (LOUAY BAHRY)

KYRGYZSTAN

Area: 199,900 sq km (77,182 sq mi)

Population (2009 est.): 5,345,000

Capital: Bishkek

Head of state: President Kurmanbek Bakiyev

Head of government (appointed by the president): Prime Ministers Igor Chudinov and, from October 21, Daniyar Usenov

In 2009 the July 23 presidential election dominated the Kyrgyz political scene. Incumbent Pres. Kurmanbek Bakiyev won an overwhelming majority (official figures awarded him 86% of the vote) in spite of opposition efforts to unseat him by rallying behind a single candidate, Almazbek Atambayev. Bakiyev's victory was followed by opposition charges of massive electoral fraud, including claims that Atambayev had actually received 60% of the vote. Unsponsored protests and marches resulted in numerous arrests. At his inauguration Bakiyev appealed for tolerance and civil accord and promised broad political reform, starting with public administration. The reform process included the appointment of a new cabinet of ministers and prime minister in late October and the dismissal of a number of presidential advisers.

After a February 3 meeting with Russian Pres. Dmitry Medvedev, Bakiyev announced that the agreement that permitted U.S. and NATO forces fighting in Afghanistan to use Kyrgyzstan's Manas airfield would be terminated. At the same time, Bakiyev received a promise of \$2 billion in financial assistance from Russia, primarily to finance construction of the Kambarata hydropower station (a project strongly opposed by neighbouring Uzbekistan). The Kyrgyz parliament voted to end U.S. and NATO use of the base, but the promised Russian aid was slow to materialize. On June 22 an agreement was signed under which the U.S. would continue to use Manas as a transit shipment centre for nonmilitary deliveries to forces in Afghanistan. The Russian Foreign Ministry commented that such an agreement was Kyrgyzstan's sovereign right. Negotiations between Kyrgyzstan and Russia over the basing of a Russian battalion in southern Kyrgyzstan remained inconclusive.

Although Kyrgyzstan was affected by the global financial crisis, it was one of the few countries in the Commonwealth of Independent States to maintain a positive growth rate in 2009. In September, however, a mission from the IMF warned that the country was likely to face greater difficulties in 2010 because the Kyrgyz government was countering the effects of the crisis by devoting essential funds to supporting the national budget. Prime Minister Igor Chudinov noted in March that the country's capital inflow was down, along with the import of goods and the level of demand. As a result of the worldwide financial crisis, Kyrgyzstan faced

difficulties with both energy and food security. With no mortgage lending system, however, the main impact of the crisis on the Kyrgyz economy was generated by the effects of the crisis on neighbouring countries, particularly Kyrgyzstan's main trading partners, Kazakhstan and Russia. (BESS BROWN)

LAOS

Area: 236,800 sq km (91,429 sq mi)

Population (2009 est.): 6,320,000

Capital: Vientiane

Chief of state: President Choummaly Sayasone

Head of government: Prime Minister Bouasone Bouphavanh

In January 2009 a master plan for the economic development of Laos's nine northern provinces was handed over to the Lao government. This blueprint, commonly known as the Northern Plan, called for the development by 2020 of "backbone industries" in northern Laos; these industries included mining, energy, agriculture, and tourism. The plan was drafted by the Northern Laos Industrial Economic Development and Cooperation Planning Preparation Group in cooperation with authorities in China's Yunnan province and received substantial financial support from the Chinese government. It appeared likely that Chinese private and state companies would play a leading role in implementing many of the plan's proposals.

China continued to invest heavily in several of Laos's key economic sectors. Chinese investments in the country were valued at about \$3.5 billion by late 2008. The fast-growing Chinese presence, however, raised concerns among local residents and international organizations. In recent years the Lao government had granted a large number of land and mining concessions to Chinese companies. Many observers worried about the social, economic, and environmental impacts of these companies' activities on Laos's rural areas and urged the government to explore the implications of its policies—first and foremost, from the point of view of the residents who were most directly affected by them.

The global financial crisis was deeply felt in Laos. The Sepon copper and gold mine located in southeastern Laos laid off hundreds of workers in December 2008; the mine's heavily indebted owner, the Australian company OZ Minerals, Ltd., sold the mine in April 2009 to the Chinese state company China Minmetals Corp. The economic slowdown also affected the tens of thousands of Lao migrant workers in Thailand; in January the Lao Ministry of Labour and Social Welfare estimated that approximately 14,000 of these workers were at risk of losing their jobs because of the economic downturn.

Laos hosted the 2009 Southeast Asian Games, which were held in Vientiane on December 9–18. This event reflected the country's further integration into the Association of Southeast Asian Nations. (VATTANA PHOLSENA)

LATVIA

Area: 64,559 sq km (24,926 sq mi)

Population (2009 est.): 2,256,000

Capital: Riga

Chief of state: President Valdis Zatlers

Head of government: Prime Ministers Ivars Godmanis and, from March 12, Valdis Dombrovskis

The economic recession and its consequences at home and abroad were Latvia's principal concern in 2009. Though the Ministry of Finance estimated that GDP could fall by about 18% for the year and unemployment climbed to nearly 20%, there were signs that the decline was leveling off during the second half of the year.

The principal source of political discord and popular discontent was balancing the budget so as to avoid bankruptcy and to meet the preconditions for borrowing \$10 billion from the IMF, the EU, the World Bank, and other sources. This required restructuring the economy, including raising taxes, curbing spending, cutting welfare payments and public workers' salaries, systematically repaying loans, and meeting the requirements for the adoption of the euro by 2014.

Unable to cope effectively with mounting public dissatisfaction and political intrigues, the coalition government of Prime Minister Ivars Godmanis fell on February 20. Pres. Valdis Zatlers entrusted Valdis Dombrovskis of New Era, heretofore a vocal opposition party, to form the new government. Needing parliamentary support for the unpopular decisions that would have to be made, Dombrovskis opted for a coalition cabinet comprising members of some of the parties represented in the previous two governments. The result was an inharmonious government whose stability was tested not only by the opposition but

On June 18 fighting breaks out between women at a union-organized rally in Riga, Latvia, where demonstrators protested against government budget cuts that included a 10% reduction in old-age pensions.

Ilmars Znotins—AFP/Getty Images

also by the coalition parties, especially the People's Party, which focused more on refurbishing its tainted reputation than on solving the country's problems. After the 2010 budget was adopted on December 1, the chances that the government would last until the parliamentary elections in autumn 2010 seemed to improve.

On June 6, voters elected representatives to the European Parliament and members of the newly created regional governments. While the People's Party registered serious losses, the moderate left Harmony Centre coalition and the centre-right Civic Union enjoyed significant gains.

Latvia continued to fulfill its international obligations despite belt-tightening at home. It completed its peace-keeping mission in the Balkans in October and beefed up its forces in Afghanistan. In autumn Latvia successfully fielded Andris Piebalgs, a respected EU energy commissioner, for another term in the European Commission. (DZINTRA BUNGS)

LEBANON

Area: 10,400 sq km (4,016 sq mi)

Population (2009 est.): 4,224,000 (including registered Palestinian refugees estimated to number about 400,000)

Capital: Beirut

Chief of state: President Michel Suleiman

Head of government: Prime Ministers Fouad Siniora and, from November 9, Saad al-Hariri

On June 7, 2009, parliamentary elections took place in Lebanon; 71 deputies were elected from the pro-Western March 14 bloc, and 57 deputies were elected from the pro-Syrian March 8 bloc. Amal movement leader Nabih Berri was again chosen as speaker of the parliament.

In late June, Saad al-Hariri (*see* BIOGRAPHIES), son of former prime minister Rafiq al-Hariri, was nominated by a majority of deputies-elect to form a new cabinet. In mid-September, however, Hariri declared his inability to form a national unity government and stepped down as prime minister-designate, blaming Hezbollah and its Christian allies (Michael Aoun's bloc) for this failure. Shortly thereafter, however,

Pres. Michel Suleiman asked him to try again. Hariri was able to form a long-awaited national unity government on November 9.

In early August Druze leader Walid Jumblatt withdrew from the March 14 bloc and declared his independence from both major blocs. He stated that he regretted his previous animosity toward the Syrian regime and his alliance with the U.S. Analysts reasoned that the American opening toward the Syrian regime and Britain's dialogue with Hezbollah had reshuffled the local agenda and changed the orientation of some political actors.

Lebanon's external debt and fiscal deficits remained high at above \$50 billion, but the country reduced the debt-to-GDP ratio from 180% to 154% by the end of 2009. Budget deficit was 26.2% of spending (\$2.23 billion). Industrial exports decreased by 25% in July because of the global financial crisis. In spite of increased spending on electricity—which accounted for \$1.4 billion annually and continued to drain the budget—revenues in the first half of 2009 reached \$4.27 billion, up 23.4% from the same period in 2008. The main sources of revenue were customs duties, income taxes, and telecom services. Lebanon's defense and security spending was expected to increase by 22% in 2009. Defense spending, which accounted for 42% of total expenditures, was expected to drop from 15.7% of government spending in 2008 to 13.5% in 2009.

The banking sector continued to show significant resilience to the ongoing global financial crisis. Total assets increased by \$13 billion in 2008, up by 13%; bank profitability also went up by 10%. Primary liquidity stood at 51.5% at the end of 2008, against 28% in the Middle East and 30% globally.

The IMF revised its estimate of Lebanon's GDP growth in 2009 from 4% to 7% (other financial institutions put the inflation rate at 4%). An IMF report said that Lebanon averted a full-blown crisis because banks could resort to their large liquidity buffers to hold on to government debt. The IMF warned, however, that "the wrong set of circumstances could easily translate into severe financial troubles" and urged the government to reduce the public debt and impose fiscal discipline. The World Bank put the per capita income in 2008 at \$10,880, which made Lebanon ranked 94th among world countries and 6th among Middle Eastern and North African countries. (MAHMOUD HADDAD)

LESOTHO

Area: 30,355 sq km (11,720 sq mi)

Population (2009 est.): 2,067,000

Capital: Maseru

Chief of state: King Letsie III

Head of government: Prime Minister Bethuel Pakalitha Mosisili

In April 2009 gunmen opened fire on the Maseru home of Lesotho Prime Minister Bethuel Pakalitha Mosisili in what was clearly a botched assassination attempt. At least three assailants were killed by the police, and a South African and a Mozambican were arrested. Government officials accused the main opposition party, the All Basotho Convention, of having been behind the attack, but that remained unproved. It was clear that discontent continued in the small mountain kingdom over the way the multimember proportional voting system had been interpreted after the 2007 general election to give the alliance between the ruling Lesotho Congress for Democracy and the small National Independence Party the majority of the seats in the parliament. Though the Southern African Development Community was asked to review the system, its mediation did not solve the problem.

The South Africa-Lesotho Joint Bilateral Commission announced in April that the South African government had approved 7.4 billion rand (about \$950 million) for the second phase of the massive Lesotho Highlands Water Project, but the economic downturn in South Africa put this at risk, while a South Africa decision on textiles threatened to undermine Lesotho's clothing-manufacturing sector, which had employed almost 40,000 people in more than 20 factories. There were fears that the Southern African Customs Union might collapse—which seemed likely after Lesotho and other countries, but not South Africa, signed Economic Partnership Agreements with the European Union—and that presented the unsettling prospect that Lesotho's very fragile economy would be put under further pressure. In October Lesotho's Child Grants Programme was launched to supplement the income (\$48 quarterly) of households with orphaned children. (CHRISTOPHER SAUNDERS)

LIBERIA

Area: 97,754 sq km (37,743 sq mi)

Population (2009 est.): 3,955,000

Capital: Monrovia

Head of state and government: President Ellen Johnson-Sirleaf

In Liberia the year 2009 began inauspiciously with a massive plague of *Achaea catocaloides rena* caterpillars. Described as the worst pest infestation in the country in 30 years, the plague caused widespread panic among villagers in northern and central Liberia, many of whom fled their homes. On January 26 Pres. Ellen Johnson-Sirleaf declared a national emergency and invited assistance from international agencies. A team of agricultural experts concluded that while Dahoma trees had suffered severe damage, food crops such as corn (maize) and millet had survived mostly intact. A second infestation in March was contained. The slow disbursement of relief funds to the affected areas raised questions of corruption in government and led to the resignation of the minister of agriculture in April.

Liberia in early 2009 faced a massive infestation of Achaea catocaloides caterpillars, shown here devouring leaves in Shankpalai in January. Although the damage to food crops proved to be less severe than initially feared, the government declared a state of emergency to fight the devastating outbreak.

Zoom Dosso—AFP/Getty Images

Liberia's economy grew; public services noticeably improved; and progress was made in the regulation of the rubber, timber, and diamond trades. In its annual "Doing Business" survey, the World Bank named Liberia best global and regional reformer, citing it as a model for how other postconflict countries should use the private sector to rebuild markets. Nevertheless, more than 10,000 UN peacekeepers remained in the country—a constant reminder of the fragile political situation.

In February, Johnson-Sirleaf apologized to the Truth and Reconciliation Commission (TRC) "for being fooled" into providing financial support to now-imprisoned former president Charles Taylor at the beginning of the country's 14-year civil war in 1989. The TRC later recommended that she, along with influential former warlords and their supporters, be banned from holding elective office for 30 years. Immediate local and international response, however, demonstrated widespread support for the president. During the August visit of U.S. Secretary of State Hillary Clinton to Monrovia—the second to last stop on her seven-country African tour—she emphasized her unstinted support for Johnson-Sirleaf and praised her achievements in economic reconstruction.

(LARAY DENZER)

LIBYA

Area: 1,777,060 sq km (686,127 sq mi)

Population (2009 est.): 6,420,000

Capital: Tripoli (policy-making body intermittently meets in Surt)

Chief of state: (de facto) Col. Muammar al-Qaddafi; (nominal) Secretaries of the General People's Congress Muftah Muhammad al-Sanusi Kaiba and, from March 5, Mubarak 'Abd Allah al-Shamikh

Head of government: Secretary of the General People's Committee (Prime Minister) Al-Baghdadi 'Ali al-Mahmudi

Only a ruler such as Libyan Col. Muammar al-Qaddafi, who marked 40 years in power in September 2009, could have proclaimed himself "king of kings of Africa." The nationally celebrated anniversary was the subject of international media scrutiny, as it was also an occasion to mark the abortion of the reform narrative previously advocated by Qaddafi and his son Sayf al-Islam. Sayf al-Islam—viewed by the West as a possible heir-in-waiting or a catalyst for change—had previously campaigned for a Libyan constitution, which he said would pave the way for the country's first general elections before September 2009. These promises soon faded following his 2008 decision to withdraw from politics. While Qaddafi remained in power, he appeared to have abandoned his anticorruption, reform-driven discourse, including his promise to share the country's oil revenues with the Libyan population. In April Qaddafi nationalized the private al-Libiya satellite television station (and its two sister newspapers, *Oea* and *Cyrene*). Al-Libiya, affiliated with Sayf al-Islam, was nationalized after one of its shows criticized Egypt; Sayf al-Islam later moved the channel to London.

Sayf al-Islam's exit from politics was short-lived. In August Libya and Scotland reached a deal to release 'Abd al-Basit al-Megrahi, the convicted bomber of the 1988 Pan Am disaster over Lockerbie, Scot., which killed 270 people. Scottish officials said that Megrahi's release was arranged on compassionate grounds, as he suffered from terminal cancer. Sayf al-Islam, however, who appeared to be instrumental in Megrahi's release, told the Libyan media that

Ben Curtis/AP

A display by ceremonial horsemen was among the spectacles presented at a celebration of the 40th anniversary of the Sept. 1, 1969, coup that brought Libyan head of state Muammar al-Qaddafi to power.

Megrahi's case was repeatedly raised in talks with the British government pertaining to gas and oil. Although British officials denied this, the release and possible "deal" triggered speculations regarding the U.K.'s oil and gas interests in Libya.

In 2009 Libya produced 1.8 million bbl of oil daily, compared with 1.3 million bbl in 2003, the year before the U.S. lifted its sanctions on Libya. While international companies raced to explore investment opportunities in Libya, Qaddafi's visits to Rome in June and New York City in September—where he addressed the UN General Assembly for the first time—marked Libya's return to the international community. During his speech, which greatly exceeded the 15 minutes allotted to him, Qaddafi tore a copy of the UN charter, criticized the UN Security Council's veto-power system, and called for a one-state solution for Israelis and Palestinians. (AMIRA HOWEIDY)

LIECHTENSTEIN

Area: 160 sq km (62 sq mi)

Population (2009 est.): 35,700

Capital: Vaduz

Chief of state: Prince Hans Adam II

Head of government: Otmar Hasler and, from March 25, Klaus Tschütscher

In legislative elections held in Liechtenstein on Feb. 8, 2009, the two parties in the previous coalition government changed position; the Patriotic Union (VU), which had been the second largest parliamentary party, won 13 seats with 47.6% of the vote, while the Progressive Citizens' Party (FBP), formerly the largest party, won 11 seats with 43.5%. The remaining seat was taken by the green Free List. Voter turnout was 84.6%. The VU's Klaus Tschütscher was sworn in as prime minister on March 25.

Prince Alois—who in 2004 had assumed the day-to-day governing duties of his father, Prince Hans Adam II, the head of state—set a tone of moderation in offering to cooperate with other countries to combat tax evasion and fraud. He agreed to follow the rules of the Organisation for Economic Co-operation and Development and suggested a partial amnesty in which people holding funds in Liechtenstein's banks could repatriate the money to their home countries and face limited penalties. He signed separate agreements easing bank secrecy with Germany in July and with Britain in August.

In contrast, Hans Adam set off a furor on August 15, Liechtenstein's National Day, when he claimed that during World War II bank secrecy laws in Liechtenstein and Switzerland had saved the lives of German Jews who bought their safety with money they had deposited in the countries' banks. The Jewish community in Germany was outraged. Stephan Kramer, secre-

tary-general of the Central Council of Jews in Germany, responded that "this was not some search-and-rescue mission by the Liechtenstein banks or the Liechtenstein state. . . . This was [the German Jews'] money in their bank accounts." (ANNE ROBY)

LITHUANIA

Area: 65,300 sq km (25,212 sq mi)

Population (2009 est.): 3,339,000

Capital: Vilnius

Chief of state: Presidents Valdas Adamkus

and, from July 12, Dalia Grybauskaitė

Head of government: Prime Minister Andrius Kubilius

In 2009 Lithuania celebrated the 1,000th year of its first mention in historical records, the annals of a Benedictine abbey at Quedlinburg, Ger. Festivities marking the event were held on July 6, the anniversary of the 13th-century coronation of King Mindaugas, in Vilnius's newly rebuilt Palace of the Grand Dukes. Among the dignitaries in attendance were the papal legate Angelo Cardinal Sodano, Denmark's Queen Margrethe, Norway's King Harald, Sweden's King Carl Gustaf, the presidents of Poland, Ukraine, Georgia, Latvia, Finland, and Iceland, and the prime minister of Estonia.

On May 17 the country elected its first woman president; running as an independent, Dalia Grybauskaitė (see BIOGRAPHIES), former member of the European Commission, won 69.1% of the vote in an election with a 51.8% turnout. She was sworn in on July 12. In the European Parliament election held on June 7, the Homeland Union (Conservatives of Lithuania) won four seats (with 26.9% of the vote), including the reelection of Vytautas Landsbergis, former president of Lithuania. The Lithuanian Social Democratic Party captured three seats (18.6%); the For Order and Justice Party, two seats (12.2%); the Labour Party, one seat (8.8%); the Lithuanian Poles' Electoral Action, one seat (8.4%); and the Liberal Movement, one seat (7.4%).

Lithuania's economy was severely affected by the global banking crisis, particularly by the significant reduction in local businesses' access to credit. As a result, GDP fell 20.2%, exports plunged

32.2%, and unemployment soared to 13.8%. The output of the construction industry declined by about 48% in the second quarter compared with the corresponding period of 2008. The economy registered overall growth in the third quarter, however, with a gain of 13% over the second quarter. The conservative government continued to cut public spending and also sold \$1.5 billion in state bonds in the United States through the British banks Barclays and HSBC. This demonstrated growing confidence that the economic crisis might soon be over in Lithuania.

(DARIUS FURMONAVICIUS)

LUXEMBOURG

Area: 2,586 sq km (999 sq mi)
Population (2009 est.): 498,000
Capital: Luxembourg
Chief of state: Grand Duke Henri
Head of government: Prime Minister Jean-Claude Juncker

In legislative elections held in Luxembourg on June 7, 2009, Prime Minister Jean-Claude Juncker's Christian Social People's Party secured 26 seats in the 60-seat Chamber of Deputies by winning 38% of the vote. The Luxembourg Socialist Workers' Party took 13 seats with 21.6% of the vote, followed by the Democratic Party (9), the Greens (7), the Alternative Democratic Reform Party (4), and the Left party (1). The results of the elections ensured that Juncker would retain his position as head of government for another five years.

In October, however, Juncker expressed his interest in becoming president of the EU. This followed news that former British prime minister Tony Blair had decided to make a bid for the job. Juncker's announcement elicited criticism from some observers—particularly in Britain—who argued that the leader of such a tiny country as Luxembourg would not wield enough influence to serve effectively as EU president. In response, Juncker memorably declared, "I am not a dwarf." Belgian Prime Minister Herman Van Rompuy was ultimately selected for the post in November.

Luxembourg's economy continued to flourish during the year, owing in large

part to the banking and financial services sector, which accounted for roughly 28% of GDP. Diverse industries included chemicals and rubber as well as steel. Luxembourg's GDP per capita was the third highest in the world, trailing only that of Qatar and Liechtenstein.

(ANNE ROBY)

MACEDONIA

Area: 25,713 sq km (9,928 sq mi)
Population (2009 est.): 2,052,000
Capital: Skopje
Chief of state: Presidents Branko Crvenkovski and, from May 12, Gjorge Ivanov
Head of government: Prime Minister Nikola Gruevski

Unlike the 2008 parliamentary elections in Macedonia, the 2009 presidential and municipal elections were largely free of violent incidents. The country held elections on March 22 and runoffs on April 5. Of a total of seven presidential candidates, Gjorge Ivanov of the ruling Internal Macedonian Revolutionary Organization—Democratic Party for Macedonian National Unity (VMRO-DPMNE) and Ljubomir Frckovski of the Social Democratic Union of Macedonia (SDSM) contested the runoff, which Ivanov won with 63% of the vote.

Incumbent Pres. Branko Crvenkovski chose not to run for a second term in office. Instead he returned to lead the SDSM after the end of his mandate.

In the municipal elections VMRO-DPMNE won 55 of the 85 mayoral positions, including that of the capital, Skopje. The Democratic Union for Integration (DUI/BDI), an ethnic-Albanian party, won 14 mayoral races, and the SDSM won 9.

On July 10 Prime Minister Nikola Gruevski reshuffled his government following the resignations of Deputy Prime Minister for European Integration Ivica Bocevski, Education Minister Pero Stojanovski, and Agriculture Minister Aleksandar Spasenovski and the dismissal of Finance Minister Trajko Slaveski. Bocevski was succeeded by Vasko Naumovski; Nikola Todorov became education minister; Ljupco Dimovski took over as agriculture minister; and Deputy Prime Minister Zoran Stavrevski also became finance minister.

The UN-mediated talks between Macedonia and Greece over the former country's name continued in 2009. Several proposals by UN mediator Matthew Nimetz failed to secure the approval of both sides. The impact of the name dispute on Macedonia's Euro-Atlantic integration led to dissatisfaction among ethnic-Albanian politicians. Senior DUI/BDI members threatened that the party might leave the government if the dispute was not settled.

A major incentive for Macedonia to resolve the name issue came on October 14 when the European Commission recommended that the country begin negotiations in 2010 to join the EU. On November 30 the EU announced that, beginning on December 19, citizens of three Balkan countries—Macedonia, Serbia, and Montenegro—would be allowed to travel without a visa within the EU's Schengen zone.

Interethnic relations were strained following the publication in September of the *Macedonian Encyclopedia* by the Macedonian Academy of Sciences and Arts (MANU); ethnic Albanians considered its portrayal of their community to be provocative and insulting. Gruevski called for a dialogue about the controversial text, while the MANU withdrew the publication in order to amend it.

Owing to the global economic crisis, Macedonia's GDP was expected to shrink by up to 1% in 2009. Significant drops were probable in industrial output and foreign trade.

On April 6 former deputy prime minister Vasil Tupurkovski was sentenced

to three years' imprisonment. He had been convicted for having misappropriated nearly \$3 million of a Taiwanese grant in 1999.

On September 5 a tour boat sank on Lake Ohrid, resulting in the deaths of 22 people, including 15 Bulgarian tourists. Transport and Communications Minister Mile Janakievski's resignation later that day on "moral grounds" was rejected by Gruevski on September 9. (STEFAN KRAUSE)

MADAGASCAR

Area: 587,051 sq km (226,662 sq mi)

Population (2009 est.): 19,625,000

Capital: Antananarivo

Chief of state and head of government:

President Marc Ravalomanana, assisted by Prime Minister Charles Rabemananjara; President Andry Rajoelina, assisted by Prime Ministers Monja Roindefo from March 17, Eugène Mangalaza from October 10, Cécile Manoroanta from December 18, and, from December 20, Albert Camille Vital

The early months of 2009 in Madagascar saw more than 100 people killed in weeks of violent street protests against Pres. Marc Ravalomanana, who was ac-

cused of having ruled in an authoritarian way and having mispent public money. The protests culminated in what was widely regarded as a coup in March, when soldiers pledged their support to Andry Rajoelina, a former mayor of Antananarivo who had led the opposition to Ravalomanana. Ravalomanana resigned and handed power to the military; he then fled to the African mainland. The military transferred power in a matter of hours to Rajoelina, who was quickly sworn in as president. The international community refused to accept the new government because it had come to power illegitimately, and Madagascar was suspended from both the African Union and the Southern African Development Community. In August international mediators led by former Mozambican president Joaquim Chissano met with Rajoelina and Ravalomanana and their predecessors, Didier Ratsiraka and Albert Zafy, in Maputo, Mozam. An agreement was reached on a power-sharing government for a transitional period of 15 months, during which legislative and presidential elections would be held. Ravalomanana, who had been convicted of abuse of power in a judgment handed down in Madagascar in June, would be given amnesty from prosecution. The four met again to allocate positions in the new government but were unable to agree. Rajoelina then unilaterally appointed what he claimed was a national unity government, with himself remaining

president, but his actions were widely criticized. Additional talks were held, and on October 6 it was announced that an agreement had been reached on positions in the new government. Although an agreement was signed on November 7—under which Rajoelina was to remain as president but rule with two co-presidents—Rajoelina did not participate in the final round of power-sharing talks held in early December, and he formally abandoned the power-sharing deal altogether on December 20. (CHRISTOPHER SAUNDERS)

MALAWI

Area: 118,484 sq km (45,747 sq mi)

Population (2009 est.): 15,029,000

Capital: Lilongwe; judiciary meets in Blantyre

Head of state and government: President Bingu wa Mutharika

In Malawi's general elections held on May 19, 2009, Pres. Bingu wa Mutharika was reelected to a second five-year term in office, winning nearly 66% of the vote. He defeated six candidates, including opposition leader John Tembo, who finished a distant second in the polls with 30.69%. Mutharika's Democratic Progressive Party claimed 114 of the 193 parliamentary seats, while Tembo's Malawi Congress Party (MCP) earned 26 seats and the MCP-allied United Democratic Front won 17.

The political participation of women was by far the most significant ever. Mutharika's running mate, former foreign affairs minister Joyce Banda, became the first woman in Malawi to hold the office of vice president. The Ministry of Women and Child Development ran the 50/50 Campaign with the goal of attaining 50% female representation in the parliament. A record 220 women stood as candidates in the general elections, including one who ran for president, and although the ministry's campaign fell short of its goal, women secured 41 parliamentary seats, which represented 21% of the new legislature.

Under Mutharika, Malawi had become one of the world's fastest-growing economies. At the beginning of the year, GDP growth for 2009 was forecast to exceed 8%. Helping to boost the economy was the government's Agricultural

Joyce Banda, the running mate of Malawian Pres. Bingu wa Mutharika, campaigns in Lilongwe on May 14. Mutharika was reelected, and on May 22 Banda was sworn in as vice president, the first woman to hold that office.

Input Subsidy Program, which benefited two million small-scale producers of corn (maize), tobacco, coffee, and tea. In June the government announced a record corn harvest that was expected to more than meet internal consumption needs. (LARAY DENZER)

MALAYSIA

Area: 329,876 sq km (127,366 sq mi)

Population (2009 est.): 27,468,000

Capital: Kuala Lumpur; administrative centre, Putrajaya

Chief of state: Yang di-Pertuan Agong (Paramount Ruler) Tuanku Mizan Zainal Abidin ibni al-Marhum Sultan Mahmud

Head of government: Prime Ministers Datuk Seri Abdullah Ahmad Badawi and, from April 3, Datuk Seri Najib Tun Razak

Battered from without by global economic instability and from within by ethnic and political tensions, Malaysia on April 3, 2009, installed a new prime minister, Najib Razak, following the resignation of his unpopular predecessor,

Abdullah Badawi. Abdullah selected Najib, who had served as deputy prime minister from 2004, to succeed him after unprecedented electoral losses in 2008 led to severe pressure within his own party, the dominant United Malays National Organization (UMNO), for Abdullah to resign. The new prime minister quickly addressed several issues rending Malaysia's ethnically and religiously diverse population. One of his first actions was to free 13 prisoners held under the country's controversial Internal Security Act, including two ethnic Indians who had led mass protests against the government in 2007. In contrast to Abdullah, who disallowed public discussion of "sensitive" social and religious matters, Najib emphasized the necessity of such discussion to Malaysia's future peace and prosperity. That need was highlighted in August when Muslims protesting the construction of a Hindu temple in Shah Alam, Selangor state, paraded a severed cow's head through the city, offending many Hindus, to whom cows are sacred.

In another surprising move, Najib undertook to reform the New Economic Policy (NEP), the pro-Malay affirmative action program introduced by former prime minister Abdul Razak, Najib's father, in 1971. The NEP had long been criticized as discriminatory and obstructive to foreign investment, but UMNO-led governments had eschewed reform of the policy. In June Najib an-

nounced that public companies were no longer required to set aside a third of their equity for indigenous partners. In addition, foreign firms were permitted to hold major stakes in securities and fund management companies.

In parliamentary and state by-elections held during the year, the governing coalition mostly held its ground at the polls, though not without resorting to such familiar tactics as political patronage and the muzzling of opposition newspapers. Meanwhile, opposition leader Anwar Ibrahim awaited trial on a sodomy charge that observers suggested may have been trumped up as a means of slowing the opposition's advance.

Malaysia's economy was hit hard by the global recession. GDP shrank at a rate of 5% between January and June—a far slide from the 6.7% growth during the same period in 2008. In May the value of Malaysian exports posted a year-on-year decline of almost 30%; the drop was reflected in higher-than-average unemployment in manufacturing. Unemployment was expected to level off at about 5% nationally. Of the roughly two million foreign workers in Malaysia, the government planned to return 400,000 of them to their home countries by 2010. Malaysia's central bank predicted that the economy would strengthen in the second half of the year, buoyed by more stable global conditions and two economic stimulus packages amounting to more than \$18 billion. MALDIVES

Area: 298 sq km (115 sq mi)

Population (2009 est.): 315,000, excluding about 100,000 foreign workers employed on the resort islands

Capital: Male

Head of state and government: President Mohamed Nasheed

Efforts to consolidate democracy in Maldives continued throughout 2009. On May 9, in the first-ever multiparty elections to the People's Majlis (parliament) held under the new constitution, 211 candidates from 11 political parties and 254 independent candidates contested for 77 seats. The Dhivehi Rayyithunge Party, led by former president Maumoon Abdul Gayoom (who lost the 2008 presidential election), won 28 seats to become the single-largest group in the Majlis, followed by Pres. Mohamed Nasheed's Maldivian Democratic Party (MDP) with 25 seats. Ten seats were won by three other parties—the People's Alliance, the Dhivehi Qaumeey Party, and the Republican Party—and 13 seats went to independent candidates. No party could secure an absolute majority. In the absence of a majority for his MDP, President Nasheed faced parliamentary hurdles for implementing his policies and programs. The first three-month-long session of the Majlis ended in September without a single bill's being passed. Reiterating his commitment to uphold the people's right to dissent, Nasheed said that his government would not defend human rights abuses.

Privatization and decentralization dominated the government's agenda, and bills aimed at these objectives were introduced in the Majlis. As part of administrative restructuring, the government proposed merging 20 atoll units into seven provinces, a measure that some parties opposed. The privatization program sought to bring about \$500 million in foreign investment and technology for developing utility services and other infrastructure. The government, which inherited a budget deficit of about \$170 million, was unable to fund such projects, and negative growth was recorded for two consecutive quarters. Part of the government's austerity measures included cutting the salaries

At a Maldives cabinet meeting on October 17, Minister of Fisheries and Agriculture Ibrahim Didi, wearing scuba gear, signs a formal document calling for an international reduction in carbon dioxide emissions. The low-lying island country held the meeting underwater to draw attention to the risks of global warming.

Mohammed Seeneen/AP

of political appointees and reducing their overseas and local travels. Nasheed himself canceled many of his overseas trips, including one to a conference in Copenhagen on climate change.

President Nasheed used international forums to highlight the grave threat facing Maldives as a result of sea level rise. He considered climate change to be a human rights issue, because peoples' right to life was threatened. In March Maldives declared its intention to become the first carbon-neutral country in the world, a goal it planned to achieve within a decade. On October 17, in an effort to draw the attention of the world to the need to reduce global warming, Nasheed and his cabinet members donned wet suits and scuba gear and held a meeting underwater.

MALI

Area: 1,248,574 sq km (482,077 sq mi)

Population (2009 est.): 13,443,000

Capital: Bamako

Chief of state: President Amadou Toumani Touré

Head of government: Prime Minister Modibo Sidibé

Progress toward the peaceful reconciliation of the Malian government and the

Tuareg people continued in 2009. On January 21, however, the army claimed that it had destroyed the main base of a dissident Tuareg group led by Ibrahim Ag Bahanga in Tinsalak, near the Niger frontier. Spokesmen for the rebel group challenged the report, stating that they had left the base six months earlier. There was also reason to believe that many of Bahanga's men had, in fact, already joined other Tuareg bands who returned to the negotiating table on February 17. On that day an estimated 700 Tuaregs turned in their arms at a ceremony in the northeastern town of Kidal.

Pres. Amadou Toumani Touré called for regional cooperation in the fight against insurgents allied with al-Qaeda. In early May Algeria sent the first of several shipments of military equipment to be used in joint operations against the insurgents. On May 31 a Malian al-Qaeda group executed British hostage Edwin Dyer, who had been kidnapped in Niger four months earlier. The Malian army captured an al-Qaeda base on June 16 in an attack that killed more than a dozen militants and five soldiers. On July 20 the main Tuareg former rebel group, Alliance for Democracy and Change, announced that it would join with Mali's army to fight al-Qaeda.

On August 27 President Touré refused to sign the country's new family law bill after strong opposition to some of its provisions dealing with women's rights angered conservative Islamic leaders. The measure was sent back to the parliament for revisions.

(NANCY ELLEN LAWLER)

MALTA

Area: 316 sq km (122 sq mi)
Population (2009 est.): 414,000
Capital: Valletta
Chief of state: Presidents Eddie Fenech Adami and, from April 4, George Abela
Head of government: Prime Minister Lawrence Gonzi

The government of Malta inaugurated 2009 with the announcement of a \$110 million project for the capital, Valletta, in preparation for its becoming the European Capital of Culture in 2018. The City Gate project was entrusted to the world-renowned Italian architect Renzo Piano. His designs, which included a new parliament building, were unveiled on June 27.

On April 1 the parliament unanimously elected George Abela, a lawyer, as the eighth president of Malta. This was the first time the government had nominated a member of the party in opposition, in this case the Labour Party, for the presidency. The nomination was seen as a symbol of national unity.

Elections were held on June 7 for representation in the European Parliament. On a turnout of less than 80%, the Labour Party won a landslide 55% of the vote, electing three of the five seats allocated to Malta (and earning the right to elect an additional seat upon the ratification of the Lisbon Treaty). Interestingly, a hunters federation revealed that it had instructed its members to vote for the Labour Party, and 94% of those members voting had complied.

The influx of immigrants from Africa remained controversial. The Italian and Maltese governments engaged in a "war of words" in the summer after the few surviving migrants from a dinghy that had run out of fuel were rescued in Italian waters. The Italians insisted that Malta, which had earlier intercepted the dinghy, should give up some of its search and rescue (SAR) region. The Maltese government refused outright, saying that its SAR, inherited from British colonial times, was "not for sale." In other news, in January Charles Camilleri, the internationally renowned Maltese composer, died at age 77.

(ALBERT GANADO)

MARSHALL ISLANDS

Area: 181 sq km (70 sq mi)
Population (2009 est.): 53,800
Capital: Majuro
Head of state and government: Presidents Litokwa Tomeing, Ruben R. Zackhras (acting) from October 21, and, from November 2, Jurelang Zedkaia

The Marshall Islands Nuclear Claims Tribunal, which was established to compensate those who were made ill or whose property was damaged by the 67 nuclear weapons tested (1946–58) by the U.S. in the Marshall Islands (43 on Enewetak atoll, 23 on Bikini atoll, and 1 some 37 km [85 mi] from Enewetak), ran low on funds and stopped making payments in July 2009. The fund, established by the U.S. Congress in 1983 as part of the Compact of Free Association, underestimated the magnitude of claims that would be made. A public advocate who represented claimants noted that \$23 million in personal injury awards and \$2.2 billion in land-damage and nuclear-cleanup awards remained unpaid. Meanwhile, the Compact trust fund, which provided 60% of the country's budget, lost 25% in the global financial crisis.

Another area of tension between the U.S. and Marshall Islands governments was the amount of compensation provided to the Marshall Islands and the landowners at the missile-testing site at Kwajalein atoll. Though the U.S. agreed to provide to the Marshalls, in return for the use of land, some \$70 million annually until 2023 and free access to the U.S. for Marshallese nationals, the landowners—who had been receiving inflation-adjusted rental fees of \$15 million annually—were demanding a rise to \$19 million when the current agreement ended in 2016.

After having survived a no-confidence vote in October 2008 and another in April 2009, Pres. Litokwa Tomeing was ousted from office on October 21 by a narrow 17–15 margin in the 33-member Nitijela (parliament). Tomeing, who was elected president in January 2008, was criticized for his handling of the dispute with the U.S. Another traditional chief, Nitijela Speaker Jurelang Zedkaia, was named to succeed him on November 2.

(CLUNY MACPHERSON)

MAURITANIA

Area: 1,030,700 sq km (398,000 sq mi)
Population (2009 est.): 3,129,000
Capital: Nouakchott
Chief of state: Chairman of the High Council of State Gen. Mohamed Ould Abdel Aziz and Presidents Ba Mamadou dit M'Baré (interim) from April 15 and, from August 5, Ould Abdel Aziz
Head of government: Moulaye Ould Mohamed Laghdaf

In 2009 the African Union refused to lift sanctions imposed on the leaders of the August 2008 coup that overthrew Sidi Mohamed Ould Cheikh Abdallahi, Mauritania's first democratically elected president, until late June, when marked progress had been made toward the establishment of a civilian government. On June 4, 2009, opposition leaders signed an agreement with the government that called for an interim unity government until the July 18 presidential elections. Coup leader Gen. Mohamed Ould Abdel Aziz was declared the winner with an absolute majority of 52%, with 16% for his closest rival, Messaoud Ould Boulkheir. Members of the opposition immediately challenged the results (more than one-third of the ballots had been invalidated by government officials). Sid'Ahmed Ould Deye, chairman of the Electoral Commission, resigned on July 23 owing to serious doubts about the validity of the vote.

In February the government pledged to speed up the process of providing new identity cards for the thousands of Mauritanian refugees repatriated from Senegal. On March 25 Gen. Ould Abdel Aziz promised reparations to families of victims killed in the violence against black Mauritians 20 years prior.

On March 6 Israel was asked to close its embassy in Nouakchott. Relations had cooled since Israel's January offensive in the Gaza Strip. Mauritania was one of only three Arab League states to have formal diplomatic relations with Israel.

Following a series of attacks, Gen. Ould Abdel Aziz pledged to combat terrorism by strengthening the army. On August 17, U.S. Peace Corps officials said that they had withdrawn more than 100 volunteers from Mauritania.

(NANCY ELLEN LAWLER)

MAURITIUS

Area: 2,040 sq km (788 sq mi)

Population (2009 est.): 1,276,000

Capital: Port Louis

Chief of state: President Sir Anerood Jugnauth

Head of government: Prime Minister Navin Ramgoolam

In 2009 Mauritius began enforcing the Equal Opportunities Act (EOA), which was passed by the legislature in late 2008 and guaranteed universal protection under the law against all forms of discrimination based on gender, ethnicity, religion, sexual orientation, age, status and physical abilities. The EOA had been created in an effort to redress ongoing social inequalities faced by many ethnic and religious minorities, including Creoles, Tamils, and Muslims, in the employment sector and other areas of the Mauritian private sector.

A plan to preserve about 650,000 sq km (250,000 sq mi) of marine habitat surrounding the Chagos Archipelago was revealed in February. The plan included the habitat of the archipelago's largest island, Diego Garcia, a British protectorate from which some 2,000 residents had been displaced 40 years earlier to clear the island for use as a military base by the United States. In 2008 British lawmakers argued that islanders and their descendants should be allowed to return, and the reef conservation plan included the repatriation of Chagossians to serve as the nature reserve's wardens.

Amid the ongoing economic downturn and increased job losses in the textiles and manufacturing sectors, Mauritius deepened ties with China. In February the two countries cemented development deals amounting to more than \$270 million. (MARY EBELING)

MEXICO

Area: 1,964,375 sq km (758,450 sq mi)

Population (2009 est.): 107,551,000

Capital: Mexico City

Head of state and government: President Felipe Calderón Hinojosa

Mexico faced daunting economic and social challenges in 2009. The global financial crisis struck the country particularly hard. Although Mexico had in recent years somewhat reduced its heavy trade dependence on the U.S., the U.S. market was still the destination for approximately four-fifths of all Mexican exports. As a consequence, the country's manufacturing sector was badly affected by the sharp decline in U.S. import demand during the year. The automobile and auto parts sector, which constituted Mexico's most important source of manufactured exports, especially suffered because of the broader crisis in the North American automotive industry. Overall, Mexican exports declined by approximately one-third between 2008 and 2009.

The Mexican economy also suffered from a substantial falloff in foreign direct investment flows and from lower prices for petroleum and other (mainly mining) commodity exports. Oil and gas revenues had in recent years consistently funded 30–40% of the federal government's total budget and 25–35% of government revenues transferred to states and municipalities. Mexican officials successfully hedged the price of oil and gas exports for the 2008–09 fiscal year at a premium over prevailing international petroleum prices, but lower international prices (though partially offset by a significant devaluation of the peso) had a negative fiscal impact on all levels of government.

Mexican emigration to the U.S. was slowed by tougher U.S. immigration controls and by reduced demand for labour in sectors that typically employed large numbers of immigrant workers, such as construction. As a result, the flow of migrant remittances to Mexico (which, after petroleum, were the country's largest source of legal export earnings) fell by more than 10% between 2008 and 2009. The number of households reporting the receipt of remittances declined by approximately one-fifth between 2005 (when 1.41 million households reported receiving remittances) and 2009.

Mexico's economic woes were exacerbated during the year by the outbreak of H1N1 flu in early April. The world's first confirmed case of the H1N1 virus was reported in the state of Veracruz. In June the World Health Organization declared the H1N1 flu a global pandemic, and by late December it had claimed the lives of at least 12,000 people worldwide. (See Special Report on page 194.) The Mexican government responded aggressively to the threat by closing schools and universities, sports arenas, cinemas, museums, and churches nationwide, as well as all restaurants and other public venues in Mexico City. Although some experts judged that public health agencies had been slow in genomically identifying the new virus, the government generally received positive evaluations for its efforts to contain the crisis. Neverthe-

A woman in Mexico City protests the government's decision to disband one of Mexico's state-run power companies, Luz y Fuerza del Centro, in October.

Eduardo Verdugo/AP

less, disrupted production and a vertiginous drop in tourist revenues (the country's third largest source of foreign exchange) further damaged an economy already deep in recession.

For all these reasons, Mexico's GDP shrank by 5.3% between October 2008 and October 2009, the worst performance in the Americas. The decline in capital inflows sharply undercut the value of the peso, which fell by 25% between 2008 and April 2009. In early 2009 the country's central bank, Banco de México, was forced to use some \$15 billion in reserves to cushion the peso's drop. Consumer price inflation was 3.6% for the year. Government sources announced that the unemployment rate topped 6% and the underemployment rate jumped to 13%—the highest levels since Mexico's severe 1994–95 financial crisis.

The administration of Pres. Felipe Calderón took several steps to address the deteriorating economic conditions. First, the government undertook countercyclical spending (especially funding for transportation and energy infrastructure projects and for medical care, welfare benefits, and temporary employment schemes) amounting to approximately 3% of GDP. Second, it bolstered its existing international reserves by negotiating a \$30 billion currency swap with the U.S. Federal Reserve and a flexible credit line of \$47 billion with the International Monetary Fund. Third, the government sought to protect social spending by securing special loans from the Inter-American Development Bank and the World Bank to support two major social welfare programs: Seguro Popular, a government-subsidized voluntary health insurance program designed in part to provide coverage for Mexico's large number of informal-sector workers, and Oportunidades, a conditional cash-transfer program benefiting poor families. Finally, the Calderón administration proposed making substantial cuts in public-sector employment and emergency tax increases in order to protect social spending.

Despite these initiatives and Calderón's continued personal popularity, voters punished the governing National Action Party (PAN) in the July midterm elections. Their discontent reflected both the country's serious economic difficulties and continued high levels of drug-related violence, which claimed 3,247 victims between January and June. (See Special Report on page 176.) Although the Calderón adminis-

tration had since 2006 committed enormous financial and human resources (including approximately 45,000 army troops) to the battle against drug-smuggling cartels, the Mexican public had grown increasingly weary of the protracted struggle and the human rights violations that sometimes accompanied army actions. The administration retained broad support for its efforts, but only about half of respondents to public opinion surveys believed that the government would win the fight.

Of Mexico's three largest political parties, the centre-right PAN suffered the greatest reverse in the midterm elections. Its share of seats in the federal Chamber of Deputies dropped from 41.2% to 28.6%. The proportion of seats held by the centre-left Party of the Democratic Revolution, which had lost credibility because of the disruptive tactics its losing presidential candidate employed in 2006 and because of protracted internecine struggles, fell from 25.2% to 14.2%. The principal winner was the Institutional Revolutionary Party (PRI), which raised its share of seats to 47.4% and won five of six gubernatorial races as well as many important mayoralties. Among the other parties, the Mexican Green Ecologist Party (PVEM) secured 4.4% of the seats, the Labour Party 2.6%, the New Alliance Party 1.6%, and Democratic Convergence 1.2%. The PRI (allied with the PVEM) thus gained a majority in the Chamber of Deputies and greatly enhanced its political momentum.

(KEVIN J. MIDDLEBROOK)

MICRONESIA, FEDERATED STATES OF

Area: 701 sq km (271 sq mi)

Population (2009 est.): 111,000

Capital: Palikir, on Pohnpei

Head of state and government: President Emanuel Mori

A significant dispute emerged in the Federated States of Micronesia (FSM) between Pres. Emanuel Mori and the FSM Congress over the fiscal year 2010 budget, which commenced on Oct. 1, 2009. Mori argued that Congress had the right to disburse only local funds,

whereas Speaker Isaac V. Figir argued that to deny Congress the right to distribute all state funds (including those received under the U.S. Compact of Free Association) was "undemocratic" and tantamount to selling sovereignty for money. Mori's attempt to limit congressional oversight might have arisen from ineffective oversight of past external funding.

The FSM applied to the UN for recognition of its claim to an extended continental shelf boundary. The FSM sought rights to this additional territory in the hope that it might contain valuable submarine mineral resources. Faced with intensified environmental degradation from climate change, the FSM took an active role in environmental politics. As lead entity in the Alliance of Small Island States, it was pushing for a 45% reduction in greenhouse-gas emissions by 2020 and, with Mauritius, filed an application for an amendment to the Montreal Protocol to limit the use of hydrofluorocarbons.

(CLUNY MACPHERSON)

MOLDOVA

Area: 33,843 sq km (13,067 sq mi), including the 4,163-sq-km (1,607-sq-mi) area of the disputed territory of Transdniestria (Transnistria; Pridnestrovie)

Population (2009 est.): 3,604,000 (excluding about 750,000 Moldovans working abroad but including the more than 500,000 persons in Transdniestria)

Capital: Chisinau

Chief of state: Presidents Vladimir Voronin and, from September 11, Mihai Ghimpu (acting)

Head of government: Prime Ministers Zinaida Greceanii, Vitalie Pîrlog (acting) from September 14, and, from September 25, Vlad Filat

In 2009 Moldova endured its most tumultuous year since Soviet rule came to an end in 1991. As outgoing Pres. Vladimir Voronin neared the completion of his maximum two terms in office, he stated that he expected to retain political power after stepping down, publicly declaring that he saw himself as akin to a "Moldovan Deng Xiaoping." Voronin's efforts to control the choice of his successor were

Gleb Garanich—Reuters/Landov

In the wake of parliamentary elections held in Moldova on April 5, protesters upset over vote-fraud allegations march in Chisinau.

thwarted, however, in the parliamentary elections held on April 5, when his Party of Communists of the Republic of Moldova (PCRM) secured 60 of the 101 seats in the legislative body—one seat shy of the 61 it needed to meet the three-fifths majority required for a political party to select a new president. Riots occurred in the wake of the elections as protesters upset over vote-fraud allegations and police harassment of the opposition stormed the parliament building and presidential palace, causing major damage. Voronin eventually dissolved the legislature and called for repeat elections to be held on July 29.

A major breach in the Communist ranks occurred weeks before the new elections took place when Marian Lupu, a leading PCRM official and former parliamentary speaker, left the PCRM to lead the Democratic Party, which became allied with several pro-EU opposition parties. On July 29 the PCRM managed to win only 48 parliamentary seats, while the four main opposition parties—the Liberal Democratic Party, the Liberal Party, the Democratic Party, and Our Moldova Alliance—captured a total of 53 seats and subsequently formed a governing coalition known as the Alliance for European Integration (AIE). On September 25 the AIE's nominee for prime minister, Vlad Filat, was approved by Parliament and sworn into office. Because

the AIE had not won 61 seats, however, it was prevented from installing as president its preferred choice for the post, Lupu. After a second parliamentary vote on December 7 was boycotted by the PCRM, parliamentary speaker Mihai Ghimpu remained as acting president until the deadlock could be resolved.

(TOM GALLAGHER)

MONACO

Area: 2.02 sq km (0.78 sq mi)

Population (2009 est.): 35,400

Chief of state: Prince Albert II

Head of government: Minister of State
Jean-Paul Proust

The relationship between Monaco's Prince Albert II and former South African swimmer Charlene Wittstock continued in 2009. She appeared with him at charity galas, on vacation in Saint-Tropez, and at official functions. Despite reports in 2008 in the U.K.'s *Daily Mail* of plans for a royal wedding, by the end of 2009 no arrangements had been announced.

The prince actively pursued his mission as an advocate for the environment. In January he participated in a three-week expedition to visit several scientific bases in Antarctica. In September he gave a speech at the UN calling for international action to protect the Arctic from climate change, and Chicago's Field Museum of natural history announced that it had received a grant of nearly \$600,000 from the Prince Albert II of Monaco Foundation to preserve biodiversity and avoid deforestation in Amazonian Peru. In October the prince presented awards for "extraordinary efforts dedicated to preserving planet Earth." Later that month he was honoured by the Scripps Institution of Oceanography, La Jolla, Calif., where he was awarded the Roger Revelle Prize. Closer to home, in late 2008 he called off plans to expand the territory of Monaco by reclaiming more land from the sea. Citing concerns about possible negative effects on the marine ecosystem, Prince Albert said that it would be "irresponsible to go ahead without sufficient environmental safeguards."

(ANNE ROBY)

MONGOLIA

Area: 1,564,116 sq km (603,909 sq mi)

Population (2009 est.): 2,704,000

Capital: Ulaanbaatar

Chief of state: Presidents Nambaryn Enkhbayar and, from June 18, Tsakhiagiin Elbegdorj

Head of government: Prime Ministers
Sanjaagiin Bayar, Norov Altankhuyag (acting)
from October 28, and, from October 29,
Sükhbaataryn Batbold

Mongolian politics was dominated in 2009 by the May 24 presidential election, which was won by the Democratic Party (DP) candidate, Tsakhiagiin Elbegdorj. He received 51.2% of the vote, defeating the incumbent, Nambaryn Enkhbayar of the majority Mongolian People's Revolutionary Party (MPRP). Enkhbayar's defeat was an upset for the MPRP and its chairman, Prime Minister Sanjaagiin Bayar, who had served as Enkhbayar's campaign manager.

Meanwhile, in January the General Election Commission had released the results from the June 2008 election for three of the last four seats in the national assembly, the Mongolian Great Khural. Three of the "new" Great Khural members were then sworn in. The winner of the remaining seat, a DP candidate who was imprisoned in January on fraud charges and later acquitted on appeal, took the oath in October.

In January President Enkhbayar met Russian Prime Minister Vladimir Putin in Davos, Switz., and in March Prime Minister Bayar met Putin in Moscow. Putin's one-day visit to Mongolia on May 13 prompted hostile comments in the press; some accounts portrayed him as an "enemy of the people." The visit to Mongolia in August by Russian Pres. Dmitry Medvedev, to celebrate the anniversary of the Mongolian-Soviet victory over Japanese forces in the 1939 Battle of Khalkhyn Gol, was marred by Medvedev's claim that the "settlement" in 2003 of Mongolia's debt for aid from the Soviet Union was "only for 98%" with "some questions left over."

After five years of contention, in July the Great Khural authorized the government to conclude an agreement with the Ivanhoe Mines and Rio Tinto companies to exploit the rich gold and copper deposits at Oyuutolgoi. There had been serious disagreements about

windfall taxes and what Mongolia's stake in the mine should be, since the country was unable to invest in the project without borrowing funds. Government ministers signed the Oyuutolgoi contract in October.

Prime Minister Bayar discussed industrial investment schemes, including nuclear power projects, on visits in March to France, Belgium, and Germany and in April to Inner Mongolia, China. In July UN Secretary-General Ban Ki-Moon visited Mongolia, and Bayar went to Japan to seek aid for Mongolia during the economic downturn. In September President Elbegdorj visited India and the U.S.

In the first half of 2009, there was a budget deficit of about \$183 million, largely due to a 28.8% fall in tax revenue. The balance of trade in the first six months of the year was down nearly 40% compared with the same period in 2008, the value of mineral exports having suffered from the downturn in world prices. The consumer price index rose by 4.2% from January to June 2009.

At the end of October, ill health obliged Bayar to resign the prime ministership (but not the chairmanship of the MPRP). External Relations Minister Sükhbaataryn Batbold was named the new prime minister, and Gombojavyn Zandanshatar was appointed to succeed him as external relations minister.

(ALAN J.K. SANDERS)

MONTENEGRO

Area: 13,812 sq km (5,333 sq mi)

Population (2009 est.): 630,000

Capital: Podgorica (Cetinje is the old royal capital)

Chief of state: President Filip Vujanovic

Head of government: Prime Minister Milo Djukanovic

In the parliamentary elections of 2009, the second such elections held in Montenegro since it declared independence in 2006, the ruling Coalition for a European Montenegro, headed by Prime Minister Milo Djukanovic, won 48 of the 81 seats. The victory also extended the rule of Djukanovic, who had been in power for nearly 20 years (as either prime minister or president). Voter turnout in the March election was 66%.

Savo Prelevic—AFP/Getty Images

A supporter of Milo Djukanovic holds up a portrait of the Montenegrin prime minister during an election rally in Podgorica on March 27.

Parliament adopted more than 100 laws in an effort to build the country's legal framework, and it also worked toward achieving a political consensus on European integration issues. In December 2008 Montenegro had officially submitted its application for membership in the EU and was expecting admission in 2012. Several polls indicated that a majority of Montenegrins backed integration. In its annual report the European Commission noted that Montenegro had made progress in addressing the political criteria needed for EU membership but warned that the government needed to "intensify its efforts so as to consolidate the rule of law" and to "fight against corruption and organized crime." In November the EU lifted visa restrictions for Montenegro. In December NATO offered the country a formal plan to join the alliance, but only 30% of Montenegrins favoured joining NATO.

The global economic downturn significantly affected Montenegro. The IMF and the World Bank predicted that the country's GDP would contract by 2.7% in 2009 and that the economy would remain in recession through 2010. In June more than 11,000 businesses reported debts totaling a record-breaking \$188 million. Unemployment rose slightly over the 2008 rate of 11%.

Industrial production dropped by 20% in the first half of 2009. The country's largest employer, the aluminum

plant Kombinat Aluminijuma Podgorica (KAP), owed more than \$280 million to foreign and local banks and about \$50 million to the government and state companies. KAP was the republic's largest exporter, accounting for 40% of industrial production. In addition, more than 100 smaller companies directly depended on its operations.

Service-sector employment continued to increase; in 2009 more than 70% of the labour force worked in tourism, construction, or trade. A large portion of the nearly \$560 million in foreign investment made during the first half of the year was in services. Tourism continued to grow. The government passed legislation making the country more attractive to private investors and developers, and the World Travel and Tourism Council ranked Montenegro as a top tourism destination. (MILAN ANDREJEVICH)

MOROCCO

Area: 710,850 sq km (274,461 sq mi), including the 252,120-sq-km (97,344-sq-mi) area of the disputed Western Sahara annexation

Population (2009 est.): 31,690,000, of which Western Sahara 405,000 (excluding 90,000 Saharawi refugees living near Tindouf, Alg., from 1975)

Capital: Rabat

Head of state and government: King

Muhammad VI, assisted by Prime Minister 'Abbas al-Fasi

Although Morocco's economy reflected the effects of the global downturn, it was expected to grow by 2.6% in 2009. The number of tourists rose by 9% in the first half of 2009, and consumer prices fell by 3.4%. There was also a bumper harvest, which raised the agricultural GDP—itsself 16% of the overall GDP—by 23%. Nonetheless, with unemployment at 10.5% and migrants returning from Europe, popular discontent led public-sector unions to organize strikes in January and February in favour of a 20% wage increase. In July pilots in Royal Air Maroc, the national airline, went on strike over working conditions.

On June 12, Moroccans went to the polls to elect local councils. At 52%, the turnout was a great improvement over the 37% that was recorded for the 2007

legislative elections (although it was still down 2% from the 2003 local elections). The government coalition, led by Istiqlal, and Morocco's Islamist party, the Justice and Development Party (PJD), did poorly, being outpaced by the new Authenticity and Modernity Party, originally part of the government coalition and led by former deputy interior minister Fouad 'Ali al-Himma. It won 18% of the vote, compared with Istiqlal's 16.6% and the PJD's 5.5%. A major registration drive had swelled the electorate by 1.5 million, and 3,406 of the victorious candidates were women, compared with just 127 in 2003.

The government continued to encroach upon individual freedoms, with the sentences on those arrested for the 2003 bombings in Casablanca being increased on appeal. In August, copies of the political weeklies *TelQuel* and *Nichane* were seized and sales of the French newspaper *Le Monde* were banned after they reported the results of a public opinion poll on the monarchy, despite its favourable conclusions. Hundreds of Shi'ites were arrested in April, and the Iraqi School in Rabat, which was suspected of encouraging Shi'ism, was closed after Morocco broke off diplomatic relations with Iran in February over Tehran's threats to Bahrain. The government also attacked those who did not comply with standards of public morality, apparently arresting as many as 20 homosexuals.

In September a 24-member network that recruited militants to fight U.S. forces in Iraq and Afghanistan was arrested. In June the UN Security Council approved informal talks between Morocco and the Polisario Front, after four previous rounds of talks in 2007 and 2008 at Manhasset, N.Y., had been unsuccessful. (GEORGE JOFFÉ)

MOZAMBIQUE

Area: 799,379 sq km (308,642 sq mi)

Population (2009 est.): 22,894,000

Capital: Maputo

Head of state and government: President Armando Guebuza, assisted by Prime Minister Luisa Diogo

In January 2009 heavy floods in central Mozambique forced 50,000 people into

resettlement centres. Two months later low levels of rainfall raised fears that there would be a drought in the provinces of Tete, Gaza, and Sofala, but El Niño rains later alleviated the situation. A cholera epidemic began in late 2008, and from January to March 2009 serious outbreaks occurred in every province except one, resulting in 12,000 known cases of infection and 157 deaths. Government agencies moved more quickly to implement relief measures and restore normalcy than they had during the flood and cyclone seasons in the previous two years.

Despite the natural disasters and epidemic, the 2009 quality-of-life index published by the United Nations Development Programme (UNDP) indicated that Mozambique had made the most progress among less-developed countries, having scored nearly 50% higher than in 1990. Attendance in primary schools had risen more than 33% from 2000 to 2006, although gender disparities continued, especially in northern and central rural areas. UNICEF reported a significant reduction in mortality rates among children under the age of five.

The economy proved resilient to the world economic crisis; growth declined to 4.5%, and inflation dropped below 6%. The government received three large-scale loans from the IMF, the World Bank, and the European Union, Denmark, and The Netherlands for railway, port, and communications projects. On the negative side, Transparency International and the Ibrahim Index of African Governance agreed that government corruption was more pervasive than it had been during the previous five years.

Meanwhile, a note of serendipity was struck when a team of environmental scientists and bird experts reported the results of its expedition to a hitherto-unmapped forest area on the peak of Mt. Mabu that had been revealed by Google Earth. The team discovered three new species of butterfly, one new species of snake, and seven species of globally threatened birds.

Campaigning for the October 28 presidential and parliamentary election began in mid-September. The incumbent, Pres. Armando Guebuza, ran for reelection as the Mozambique Liberation Front (Frelimo) candidate against Afonso Dhlakama, leader of the opposition Mozambique National Resistance/Electoral Union (Renamo/UE), and Daviz Simango, who earlier in the year had led a splinter group from Re-

namo to found the Mozambique Democratic Movement (MDM). Bitter rivalry between Renamo and MDM leaders weakened their chances for electoral success. With 75% of the votes, Guebuza won by a landslide, but the low turnout of only 44.6% of the registered voters indicated a lack of popular enthusiasm for the ruling party. Frelimo took 191 of the 250 seats in the parliament, Renamo 51, and the breakaway MDM only 8. Guebuza was reelected to a second term, and it was widely believed that his decisive victory might be used as a mandate to amend the constitution to allow him to run for a third term. (LARAY DENZER)

MYANMAR (BURMA)

Area: 676,577 sq km (261,228 sq mi)

Population (2009 est.): 48,138,000

Capital: Naypyidaw (site near Pynmana)

Head of state and government: Chairman of the State Peace and Development Council Gen. Than Shwe, assisted by Prime Minister Thein Sein

The year 2009 was one of stasis for military-ruled Myanmar. The regime headed by Gen. Than Shwe announced no legislative preparations ahead of scheduled elections in 2010, and more than 2,100 political dissidents remained in prison. In May pro-democracy leader Aung San Suu Kyi was arrested and placed on trial for having breached the terms of her house arrest order, which had been in effect since 2003; the arrest occurred following an uninvited visit by an American man, John Yettaw, to Suu Kyi's residence in Yangon (Rangoon). After a three-month trial marred by flagrant breaches of judicial process, Suu Kyi was found guilty and sentenced to three years' hard labour in prison; Than Shwe immediately commuted the sentence to 18 months of additional home detention.

In July UN Secretary-General Ban Ki-Moon visited Myanmar but was refused permission to meet with Suu Kyi or other imprisoned dissidents. Months later U.S. Sen. Jim Webb visited the country and met with Than Shwe and other State Peace and Development Council (SPDC) leaders as well as with

Suu Kyi; he also secured the release of Yettaw, who had been sentenced to seven years' hard labour.

During the year the U.S. government concluded a policy review of Myanmar, began high-level engagement talks, and discussed the loosening of sanctions against the country. Fears of Myanmar's close ties with North Korea—and especially concerns about possible nuclear proliferation—were partly behind the thaw in U.S. policy.

In August the military attacked the ethnic Kokang enclave in northern Myanmar, causing 30,000 civilians to flee into China, which lodged a formal protest. Tensions with more than a dozen other armed groups increased as the SPDC called on the groups to disarm ahead of the elections.

Myanmar's economy continued to suffer as urgently needed reforms were postponed. The Economist Intelligence Unit estimated real GDP growth at 0.3%. Foreign exchange reserves grew to \$3.6 million, largely owing to continued strong natural gas sales to Thailand. According to the International Monetary Fund, the fiscal deficit declined to 3.4% of GDP. Inflation eased from 27% to 14%, although this was dependent on continued foreign supplies of food aid. Food security worsened, especially in the Irrawaddy Delta and western and northern Myanmar, leading to fears of major food shortages. China announced plans to construct two energy pipelines to transport natural gas and crude oil from western Myanmar to China's Yunnan province; the pipelines were to be completed by 2014. (DAVID SCOTT MATHIESON)

NAMIBIA

Area: 824,116 sq km (318,193 sq mi)

Population (2009 est.): 2,109,000

Capital: Windhoek

Chief of state and head of government:

President Hifikepunye Pohamba, assisted by Prime Minister Nahas Angula

In the run-up to Namibia's presidential and National Assembly elections in November 2009, there were numerous confrontations between supporters of the ruling South West Africa People's Organization (SWAPO) and those of the

breakaway Rally for Democracy and Progress (RDP). SWAPO remained the dominant party, while the RDP appeared to have made little impact on voters. Though Pres. Hifikepunye Pohamba was confirmed as SWAPO's candidate for the presidential election, he found himself challenged by members of his own party, some of whom were aligned with former president Sam Nujoma, who remained influential behind the scenes. The main opposition party, Congress of Democrats, remained divided into rival factions.

In two days of balloting on November 27–28, Pohamba was easily reelected with 76.4% of the vote. The second-place candidate, former foreign minister Hidipo Hamutenya of the RDP, garnered only 11.1%. The breakdown was similar in the vote for the National Assembly, with SWAPO taking 75.3% and 54 of the 72 seats, ahead of the RDP with 11.3% and 8 seats.

In June a SWAPO-backed communications bill proposed in the parliament was fought by the opposition, which claimed that the government was introducing "Zimbabwe-type" powers of intercepting electronic communications, but since SWAPO held a two-thirds majority, the bill was later approved. The government continued to be sympathetic to Zimbabwean Pres. Robert Mugabe and refrained from criticizing continued human rights abuses in that country. There were many allegations of corruption and fraud leveled at Namibian government officials throughout the year, the most notable of which involved a contract for Chinese-made scanning equipment intended for the Ministry of Finance.

In August, on the 10th anniversary of the attempt by people in the Caprivi region to secede from Namibia, there was considerable focus on the fact that more than 100 of those involved remained on trial a decade later.

(CHRISTOPHER SAUNDERS)

NAURU

Area: 21.2 sq km (8.2 sq mi)

Population (2009 est.): 9,800

Capital: Government offices in Yaren district

Head of state and government: President Marcus Stephen

Pres. Marcus Stephen declared Sept. 1, 2009, a national holiday in Nauru to mark the commencement of a cellular phone service in the world's smallest independent republic. Digicel became the island's first provider of GSM (global system for mobile) telecommunications. The event was very significant for the remote community, and Stephen spoke for many residents when he said that it was a "truly exciting time" to have a mobile phone and Internet service in Nauru.

Stephen assumed an important leadership role in the region when he was installed as the chancellor of the University of the South Pacific (USP) on September 11. The 12 member countries that supported the USP sent representatives to the event, which took place during the graduation ceremony at the university's main campus in Suva, Fiji.

On the world stage, in December Nauru established formal relations with Abkhazia and South Ossetia, reportedly in exchange for some \$50 million in aid from Moscow. Nauru joined Russia, Venezuela, and Nicaragua as the only governments to officially recognize the two breakaway Georgian republics. (A.R.G. GRIFFITHS)

NEPAL

Area: 147,181 sq km (56,827 sq mi)

Population (2009 est.): 28,563,000

Capital: Kathmandu

Head of state: President Ram Baran Yadav

Head of government: Prime Ministers

Pushpa Kamal Dahal (also known as Prachanda) and, from May 25, Madhav Kumar Nepal

Nepal's political course took a new turn in May 2009 when Pres. Ram Baran Yadav reinstated the chief of Nepal's army; Prime Minister Pushpa Kamal Dahal—the former Maoist insurgency leader known as Prachanda—had fired the army chief for having refused, in defiance of the 2006 peace agreement, to integrate former Maoist fighters into the armed forces. Prachanda resigned, accusing the president of having flouted the constitution. Later that month, with the support of 22 political parties in the parliament, Madhav Kumar Nepal, the

leader of the Communist Party of Nepal (Unified Marxist-Leninist), was elected the new prime minister. The Communist Party of Nepal (Maoist), the largest parliamentary party, joined the opposition bench, and political deadlock ensued. The Maoists resorted to a series of agitations demanding the restoration of what they called "civilian supremacy." The troubles culminated on December 20–22 in a three-day nationwide general strike, which was punctuated by violent clashes between Maoist protesters and police.

In July the tenure of the UN Mission in Nepal was extended to Jan. 23, 2010. The UN achieved a major breakthrough in July when Nepal began discharging the 4,008 former Maoist child soldiers and noncombatants who had been detained in military camps. (See also Special Report on page 180.)

Despite relative peace in most of the hill area, violence was increasing, along with the number of armed groups, in parts of the eastern hill area and in the southern plains. Although the government announced a special security plan in July, the situation had not improved by year's end.

Along with political disasters, natural disasters also caused heavy damages in Nepal. An outbreak of diarrhea from April to September killed 464 people, and in October landslides and floods affected more than 16,000 families and left 143 dead. (KESHAB POUDEL)

NETHERLANDS, THE

Area: 41,543 sq km (16,040 sq mi)

Population (2009 est.): 16,522,000

Capital: Amsterdam; seat of government, The Hague

Chief of state: Queen Beatrix

Head of government: Prime Minister Jan Peter Balkenende

In 2009 the worldwide financial crisis that began in 2008 continued to affect The Netherlands. The country experienced a rise in unemployment and a rapid increase in the number of bankruptcies. As the government faced substantial financial shortfalls, the national debt rose significantly; while the country had enjoyed a budget surplus of 1% of GDP in 2008, a deficit of more than

4% was anticipated for 2009. Having acted in the fall of 2008 to protect individuals' savings accounts and to secure commercial interests, the government continued its policy of economic intervention. Aiming to stimulate economic growth, it invested in education, the building of new homes, and the upkeep of schools and infrastructure; it also supported new energy-saving measures. In addition, the government instituted policies intended to make part-time work more widely available and to reduce unemployment among younger workers.

Violence marred the celebration on April 30 of the national holiday known as Queen's Day. While the royal family was being driven along a parade route in the town of Apeldoorn, an individual in a small automobile drove toward the royal vehicle at high speed. The automobile collided with traffic barriers and members of the public, causing the vehicle to veer off course and ultimately to crash into a monument. Eight people, including the assailant, were killed, and nine were seriously injured. The exact motives of the would-be assassin remained unclear.

In the area of foreign relations, the Dutch government found itself in the midst of controversy over treaties it had made with Belgium in 2005. One of the treaties' provisions concerned the Western Schelde estuary, which lies within The Netherlands but gives the Belgian city of Antwerp access to the North Sea. The 2005 agreement stipulated that the Dutch would deepen the estuary in order to accommodate the largest oceangoing vessels 24 hours a day. The dredging work was to begin in 2007 and to be completed in 2009. While the Belgian government had agreed to a two-year delay, patience ran thin when the Dutch Council of State blocked the start of the work, citing possible environmental consequences. The initial agreement had proposed to mitigate the negative environmental effects of dredging by returning polders (areas of reclaimed land) along the estuary to their natural flooded state; this strategy, however, was opposed by many local residents.

In early 2009 Geert Wilders, leader of the Dutch Party for Freedom (PVV), which enjoyed success in the European elections in June, was ordered to stand trial for allegedly inciting hatred and discrimination and insulting a group (Muslims) based on religion. The trial was scheduled to begin in January 2010. (JOLANDA VANDERWAL TAYLOR)

NEW ZEALAND

Area: 270,692 sq km (104,515 sq mi)

Population (2009 est.): 4,317,000

Capital: Wellington

Chief of state: Queen Elizabeth II, represented by Governor-General Sir Anand Satyanand

Head of government: Prime Minister John Key

Employment initiatives and fiscal policies to cushion the recession dominated the first full year of New Zealand Prime Minister John Key's fledgling government; its 2009 program included a multi-sector job summit to generate ideas on how to stimulate employment and a budget that addressed a "road to recovery." Unemployment reached 6% in June and was projected to peak at 7–8% in 2010. To preserve and create jobs, the government offered subsidies to businesses that adopted an average workweek of four and a half days, funded infrastructure projects, and initiated the construction of a bikeway network intended eventually to span the country.

With New Zealand facing reduced tax revenues and mounting welfare expenditures, Finance Minister Bill English's May 28 budget anticipated a deficit of some U.S.\$4.8 billion in 2009–10 and deficits exceeding U.S.\$5.5 billion in each of the following two years. Planned borrowing of about U.S.\$25 billion from 2009 to 2013 would effectively double government debt. Proposed tax cuts were deferred, and government contributions to a superannuation scheme initiated by the previous, Labour-led administration were suspended until 2020. Gov.-Gen. Sir Anand Satyanand and the members of Parliament voluntarily declined pay raises.

In April former prime minister Helen Clark resigned from Parliament, after having served as a member for 27 years, to lead the United Nations Development Programme. After 14 years as coleader of the Green Party, Jeanette Fitzsimons stepped down from her post in June and was succeeded by Metiria Turei.

Decisions in a few prominent criminal cases were major news items. Samoan-born Taito Phillip Field, who in 1993 had become the first Pacific Islander elected to the New Zealand Parliament, was sentenced in Auckland to six years'

imprisonment on bribery and corruption charges arising from his exploitation of Thai workers whom he had assisted on immigration matters. Field had been expelled from the Labour Party caucus in 2007 but remained in Parliament as an independent until he was defeated in 2008. A high-profile homicide retrial resulted in the acquittal of David Bain for the 1994 murders in Dunedin of his father, mother, sisters, and brother—murders for which he had been previously convicted. Bain had served 12 years in prison before the London-based Privy Council overturned his conviction in 2007. In New Zealand's biggest-ever fraud case, Michael Swann and Kerry Harford were each sentenced to several years in prison for defrauding the Otago District Health Board of U.S.\$10.5 million over six years; they had issued 198 fraudulent invoices for computer services that were never provided. Only U.S.\$4.3 million in assets was recovered.

New Zealand's military commitment in Afghanistan was increased in 2009. Joining the 150 New Zealand noncombatants already stationed there were 70 elite Special Air Service (SAS) combat troops, to serve in three rotations over 18 months. In the highest categories of the New Zealand Order of Merit, titular honours, which had been abolished in 2000, were reinstated. Former prime minister Jennifer Shipley became a "dame," but actor Sam Neill declined the title "sir." In response to a 2007 law on child discipline, a nonbinding citizen-initiated referendum was held on whether parents should be legally allowed to slap their children; 87.6% voted against considering a "smack" a criminal offense. The major political parties, however, declined to act on the matter.

Parliament approved a controversial measure reforming Auckland's government by creating a "super city" with a single mayor and council, effective in 2010. A Green Party proposal to legalize the use of marijuana for medicinal purposes was voted down 86–34. The use of handheld cell phones in motor vehicles was prohibited, and the city of Wanganui banned the wearing of gang insignia in public.

In other news, Cilla McQueen was appointed poet laureate for 2009–11. Maori singer Sir Howard Morrison (*see* OBITUARIES) died on September 24 at age

74. Although he had been a solo performer in later years, he had initially sung with a quartet, which in 1961 toured Australia as a support act for the Everly Brothers, Shelley Berman, and the Kingston Trio.

(NEALE MCMILLAN)

NICARAGUA

Area: 130,373 sq km (50,337 sq mi)

Population (2009 est.): 5,743,000

Capital: Managua

Head of state and government: President Daniel Ortega Saavedra

In 2009 the Sandinista National Liberation Front (FSLN) consolidated its rule in Nicaragua, taking advantage of continuing divisions between the country's opposition political parties. In January the Supreme Court overturned the 2003 corruption conviction of former president Arnoldo Alemán, who despite his conviction and subsequent house arrest had remained leader of the Constitutionalist Liberal Party (PLC); observers attributed the Supreme Court's decision to the long-standing pact between the FSLN and the PLC, noting that PLC members subsequently voted with the FSLN in electing a Sandinista

to lead the National Assembly. In October the Supreme Court ruled as unconstitutional the existing constitutional ban on consecutive presidential reelection, opening the way for Pres. Daniel Ortega to seek another term in office in 2011.

In the face of the global economic crisis, the government's decision to offset social expenditures with cuts to capital expenditures helped keep Nicaragua's budget within IMF parameters. Allegations of electoral fraud and corruption, however, resulted in reduced foreign assistance from the U.S. and Europe. Although polling showed strong public discontent with the leaders of every major political party, support for the Sandinistas' health, education, food, and housing initiatives had grown, particularly in the country's rural areas.

The worldwide economic downturn led to a contraction in Nicaragua's economy, with GDP estimated to decline by 3.7% in 2009 and exports projected to drop by 17%. Inflation stood at just 2.8%, down from a high of 13.8% in 2008. Lower inflation allowed for a loosening of monetary policy and increased access to credit.

In July the International Court of Justice at The Hague ruled in favour of Nicaraguan sovereignty over the disputed San Juan River border with Costa Rica, though the court permitted Costa Rica continued free commercial navigation on the river. Nicaraguans living along the Caribbean coast demonstrated growing disaffection toward politics with an unusually

high rate of voter abstention in the regional elections held in January. In April the Miskito Council of Elders in the North Atlantic Autonomous Region claimed independence from Nicaragua. A lawsuit brought before the Supreme Court by women's organizations—and supported by the Nicaraguan Centre for Human Rights and Nicaragua's Office of the Human Rights Ombudsman—sought to overturn the controversial 2006 ban on abortion, which prohibited even therapeutic abortions (those performed when a pregnancy threatened the life of a mother). The Vatican had signaled an interest in the decriminalization of therapeutic abortion, but the Roman Catholic Church in Nicaragua remained adamantly opposed to such a move.

(JUSTIN WOLFE)

On July 19, Sandinista supporters in Managua, Nic., celebrate the 30th anniversary of the revolution, led by the Sandinista National Liberation Front, that toppled the government of Anastasio Somoza Debayle in July 1979.

Miguel Alvarez/AP

NIGER

Area: 1,189,546 sq km (459,286 sq mi)

Population (2009 est.): 15,306,000

Capital: Niamey

Head of state and government: President Mamadou Tandja, assisted by Prime Ministers Seyni Oumarou, Albadé Abouba (acting) from September 23, and, from October 2, Ali Badjo Gamatié

The prevailing issue in Niger during 2009 was Pres. Mamadou Tandja's quest to extend his rule. The National Assembly had rejected President Tandja's request to hold a referendum on the issue, so he appealed to the Constitutional Court, which ruled on May 26 that the referendum would be illegal without the approval of the National Assembly. Within hours, the president dissolved the legislative body, and on June 5 a presidential decree was issued that called for a referendum on a new constitution to be held on August 4. The new constitution not only would provide for a three-year extension of President Tandja's rule but would also eliminate presidential term limits. On June 12 the Constitutional Court annulled the presidential decree; President Tandja urged the court to rescind its ruling, but it was upheld on June 26. Later that day Tandja assumed emergency powers, and three days later he dissolved the Constitutional Court. His actions were met with international condemnation and public demonstrations. Opposition parties called for a boycott of the referendum, which contributed to a massive win for the president. The legislative election to replace the National Assembly, held on October 20, was also boycotted by the opposition and resulted in victory for the ruling party. On the day of the election, Niger was suspended from the Economic Community of West African States for having ignored the organization's call to postpone the poll.

On April 6, Tuareg rebels of the Movement of Nigerians for Justice (MNJ) agreed to end their guerrilla war. The Niger government indicated that it would begin negotiations with the MNJ over shares in the northern region's mineral wealth.

In January the French mining company Areva was awarded the license to exploit Niger's uranium resources and

began work on the Imouraren mine in early May. On July 3, Algeria, Niger, and Nigeria signed a pact to build a pipeline to deliver Nigerian gas across the Sahara to Europe.

(NANCY ELLEN LAWLER)

NIGERIA

Area: 923,768 sq km (356,669 sq mi)

Population (2009 est.): 154,729,000

Capital: Abuja

Head of state and government: President Umaru Musa Yar'Adua

In late 2009 Nigeria experienced a constitutional crisis owing to Pres. Umaru Musa Yar'Adua's prolonged absence from the country. Yar'Adua left Nigeria on November 23 to seek medical treatment in Saudi Arabia for a heart condition. A campaign was launched by influential politicians and lawyers calling for more transparency about his ability to govern or his resignation, but at the end of the year, Yar'Adua remained secure in his post.

Nigerians interpreted U.S. Pres. Barack Obama's choice of Ghana for his first African state visit as a pointed rebuff to Nigeria's failings in the realms

of governance, transparency, and security. U.S. Secretary of State Hillary Clinton took up these issues during her two-day visit to Nigeria on August 12–13, challenging the country's leaders to intensify the fight against corruption, reform the electoral system, implement more equitable development, and end sectarian violence in the Niger delta. Clinton cited a World Bank report that concluded that corrupt practices in Nigeria had accounted for the loss of \$300 billion over the previous 30 years. Meanwhile, UN data showed that the country's poverty rate had risen from 46% to 76% over the previous 13 years.

Turbulence in the Niger delta remained a major stumbling block to internal peace. In May the government launched a sweeping military offensive against rebel groups in the region; though the operation killed and wounded hundreds, it failed to subdue the militants, who later in the year were able to strike beyond the delta, setting fire to an oil depot and several tankers in Lagos, the country's financial centre. On August 4 the government announced a 60-day amnesty for any militant who agreed to surrender his weapons in exchange for a daily stipend, education, and retraining. Estimates of the number of militants who accepted the amnesty varied from 7,000 to 15,000.

In July, Henry Okah, a leader of Nigeria's main militant organization, the Movement for the Emancipation of the Niger Delta (MEND), was released from

Bodies lie in a street in the northern Nigerian town of Maiduguri in July following days of intense fighting between Islamist militants and security forces that left between 800 and 1,000 people dead.

Gbenga Akinbule/AP

prison. Yar'Adua held a highly publicized meeting with Okah in October; the closed-door meeting, which Yar'Adua had requested, occurred after MEND had reportedly threatened to resume hostilities in the delta following the end of a 60-day amnesty. Details of the meeting were not immediately disclosed, though a government spokesman called the talks "fruitful" and a spokesman for MEND described them as "the beginning of the dialogue MEND has been advocating."

In the north a number of outbreaks of sectarian unrest occurred. In February and again in December, Christians and Muslims clashed in the city of Bauchi. The most serious conflict involved Muslim militants belonging to the group Boko Haram, a fundamentalist sect opposed to Western education. Authorities accused the militants of having attacked police stations and other sites in the states of Bauchi and Yobe. Intense fighting between militants and security forces spread to other neighbouring states, forcing thousands from their homes and leaving between 800 and 1,000 people dead—most of them members of Boko Haram. The sect's leader, Mohammad Yusuf, was taken into police custody but was later found shot to death. Human rights activists pointed out that extrajudicial executions by the police occurred frequently in Nigeria and said that Yusuf's killing demonstrated the urgent need for police reform. (LARAY DENZER)

NORWAY

Area: 385,179 sq km (148,718 sq mi), including the overseas Arctic territories of Svalbard (61,020 sq km [23,560 sq mi]) and Jan Mayen (377 sq km [145 sq mi])
Population (2009 est.): 4,828,000
Capital: Oslo
Chief of state: King Harald V
Head of government: Prime Minister Jens Stoltenberg

In 2009 Norway sought to insulate its economy from the effects of the global financial crisis. Relying on the country's \$400 billion Government Pension Fund-Global (the former Petroleum Fund of Norway), the Norwegian government was able to guarantee com-

mercial bank loans and implement an economic stimulus plan, which provided for increased spending on social welfare and infrastructure projects. Public spending was credited with securing many jobs and helping to keep the unemployment rate at about 3%. Citing higher inflation, the central bank raised its key interest rate to 1.5% in October. GDP declined by an estimated 1.9% in 2009. An initial government forecast of 0.7% GDP growth in 2010 was later revised upward to 1.4%.

The question of whether to allow oil drilling in the Arctic waters around Norway's Lofoten and Vesterålen islands was hotly debated during the year. Norwegian oil companies, facing dwindling North Sea reserves, were eager to start drilling in the area, where large deposits of oil and gas were thought to be located under the seabed. Seismic surveys to determine potential deposits were conducted in the summer, though the results were not to be released publicly until 2010. The surveys sparked strong protests from fishermen's organizations and environmentalists, who were adamantly opposed to opening the pristine region to exploration and drilling, citing the disruption that would be caused to the cod-fishing industry—on which generations of area residents had depended for their livelihoods—and the catastrophic environmental damage that could occur, particularly in the event of an oil spill. The oil companies countered by arguing that fisheries had thrived for decades in close proximity to drilling installations in the southern part of the North Sea and that new technologies would help to minimize the ecological impact. Environmentalists insisted, however, that the risk was too great to take.

The issue of drilling was a major political topic heading into the September 14 parliamentary elections, with the main opposition parties expressing support for drilling and the Socialist Left Party (SV)—one of the partners in Prime Minister Jens Stoltenberg's red-green coalition—standing firmly against it. The coalition government claimed a narrow victory at the polls, ensuring that it would remain in power for another four years by securing 86 of the 169 parliamentary seats. Stoltenberg's Norwegian Labour Party captured 35.5% of the vote and 64 seats, while the two other parties in the coalition, the SV and the Centre Party, each garnered 6.2% and 11 seats. The opposition was dominated by the pop-

ulist Progress Party (22.9% and 41 seats) and the Conservative Party (17.2% and 30 seats). In the aftermath of the elections, Stoltenberg indicated that the coalition government would wait to make a final decision on drilling near Lofoten and Vesterålen until more scientific evidence had been presented on the environmental consequences for the region. (HILDE SANDVIK)

OMAN

Area: 309,500 sq km (119,500 sq mi)
Population (2009 est.): 2,845,000
Capital: Muscat
Head of state and government: Sultan and Prime Minister Qaboos bin Said (Qabus ibn Sa'id)

Oman reached out to Iran in 2009; Sultan Qaboos visited Iranian Pres. Mahmoud Ahmadinejad in Tehran within weeks of Iran's June 12 election. To a greater extent than any of the five other Gulf Cooperation Council countries, Oman refrained from openly challenging or even criticizing Iran over that country's nuclear-development program or controversial foreign policies. Instead, Oman continued its long-standing approach of seeking to engage Tehran diplomatically, and the two countries entered into several memorandums of understanding. The more important ones pertained to increased bilateral cooperation in energy affairs, and Oman agreed for the first time to purchase Iranian gas exports.

Oman weathered the global economic slowdown better than most of its neighbours. The reasons were several: the cushion provided by the earlier robust level of revenues accrued from exceptionally high oil prices, increased oil production to about 805,000 bbl per day, sustained income from exports of natural gas, and conservative local practices of lending and investment. A new oil field was discovered off the Musandam Peninsula in an area straddling Oman's maritime border with Iran. Of particular importance was the continued vibrancy of spending by foreign tourists, especially other Gulf nationals, who were visiting the sultanate in far greater numbers than before because, for economic reasons, they were less willing

Behrouz Mehri—AFP/Getty Images

Sultan Qaboos bin Said of Oman (left) is formally welcomed to Tehran by Iranian Pres. Mahmoud Ahmadinejad on August 4. The sultan's three-day visit to Iran was his first in 30 years and the first by any head of state since Ahmadinejad's controversial reelection in June.

than in earlier years to vacation farther afield. The country's booming tourism industry was developing a variety of new tourist destinations. High-speed ferryboat service was inaugurated to transport vehicles and passengers to the remote but scenic Musandam Peninsula and to hitherto little-explored coastal sites and islands in the southeast.

PAKISTAN

Area: 881,889 sq km (340,499 sq mi), including the 85,793-sq-km (33,125-sq-mi) Pakistani-administered portion of Jammu and Kashmir

Population (2009 est.): 174,579,000 (including about 4,900,000 residents of Pakistani-administered Jammu and Kashmir as well as Afghan refugees)

Capital: Islamabad

Head of state and government: President Asif Ali Zardari, assisted by Prime Minister Yousaf Raza Gilani

Terrorism and counterterrorism dominated developments in Pakistan in 2009. (See Special Report on page 178.) In January, U.S. CIA drones struck South

Waziristan, killing two top al-Qaeda leaders, Usama al-Kini and Sheikh Ahmed Salim Swedan, who were on the FBI's most-wanted list in connection with the 1998 bombings of U.S. embassies in Kenya and Tanzania. Pakistan's government confronted the terrorist organization Lashkar-e-Taiba and its social arm, Jamaat-ud-Dawa, arresting 124 people and closing 20 offices, 94 religious schools, 2 libraries, and several relief camps.

In February the Supreme Court upheld a ban prohibiting opposition leader Nawaz Sharif from holding elected office and sustained decisions removing his brother as Punjab's chief minister. "Governor's rule" was imposed in Punjab, and in March police and military units thwarted an all-country protest calling for the reinstatement of judges who had been dismissed in 2007. Within days, however, Pres. Asif Ali Zardari, fearing intensified street violence, reinstated the judges, including Iftikhar Muhammad Chaudhry (see BIOGRAPHIES), who resumed duties as chief justice of the Supreme Court on March 22. Zardari also restored the provincial government of Sharif's brother in Punjab, and in May the Supreme Court overturned the electoral ban on Sharif.

A terrorist attack in Lahore in early March targeted Sri Lanka's cricket team, killing six police officers and wounding several players. Lashkar-e-Taiba took credit for the assault. Later in the month terrorists attacked a police centre in Manawan, near Lahore, killing eight.

In April the National Assembly approved the installation of Shari'ah (Islamic law) throughout the Swat valley of the North-West Frontier Province (NWFP)—a move that had been negotiated in February in the hopes of securing a lasting truce with militants in the area—and President Zardari signed the order. Encouraged, Swat-based Taliban forces moved into neighbouring Buner district, but Pakistani army units stemmed the advance. Troops also fought militants in nearby Dir district, and after peace efforts failed, a full-scale offensive was launched in Swat.

Zardari visited Washington, D.C., in May for trilateral meetings with U.S. Pres. Barack Obama and Afghanistan's Pres. Hamid Karzai, despite intense fighting in the NWFP. Hundreds of thousands of people fleeing the war zone required extraordinary assistance. In late May terrorists bombed the Lahore headquarters of the Inter-Services

Intelligence (ISI) agency, killing 35. Although the army declared victory in Swat, claiming to have killed 2,000 militants in the region, in June suicide bombers demolished Peshawar's posh Pearl Continental Hotel. Eleven people were reported dead. U.S. drones, active over South Waziristan, reportedly killed Taliban operatives Qari Hussain and Maulvi Sangeen Zadran. In July Islamabad arrested pro-Taliban cleric Sufi Muhammad in continuing Swat operations. More significant, in August CIA drone attacks in South Waziristan killed Baitullah Mehsud, the leader of Tehrik-i-Taliban (a coalition of Pakistani Taliban groups). Hakimullah Mehsud assumed leadership of the coalition.

In September, Tehrik-i-Taliban publicized its intention to wreak havoc everywhere in Pakistan, and the October bombing of the UN World Food Programme in Islamabad and a car bombing in Peshawar were traced to that threat. More brazen was the assault on army headquarters in Rawalpindi, in which 20 died. Still another suicide bombing in Shangla killed 41, and multiple, almost simultaneous mid-October assaults in Lahore, Peshawar, and Kohat targeted police and security installations.

The U.S. Congress in September approved a bill making available \$7.5 billion over five years to rebuild Pakistan's roads, schools, and democratic institutions. Pakistan's higher military officials, however, registered alarm at the bill's linkage of the funding to the country's war on terrorism, and Pakistan's political opposition claimed that accepting the aid would compromise Pakistan's sovereignty. The U.S. transfer of F-16 aircraft to Pakistan proceeded without interruption, despite concerns raised in the U.S. Congress over Pakistan's near completion of two additional nuclear weapons reactors.

A long-awaited invasion of South Waziristan commenced on October 17 when 30,000 Pakistani soldiers invaded Taliban strongholds in the area. A suicide bombing inside Islamabad's International Islamic University, however, forced the temporary closing of Pakistan's schools. Moreover, the assassination of an army brigadier and a suicide attack near the Kamra aeronautical complex in Attock, as well as repeated bombings (notably in Peshawar's Meena Bazaar), demonstrated the vitality of the terrorist campaign.

In November increasing weakness in the Zardari presidency added to Pakistan's instability. Despite withdrawing

At a checkpoint near Bannu, Pak., on October 19, a family of refugees escapes from Pakistan's South Waziristan region, where two days earlier government troops had attacked militant Taliban strongholds.

Ijaz Muhammad/AP

the National Reconciliation Ordinance of 2007, which had provided amnesty from prosecution to high officials and politicians, the government was unable to placate its opposition. Counterterrorist units moved aggressively in southern Punjab and Karachi, but the effort did little to shore up Zardari's fleeting popularity.

Militants, however, sustained their attacks. In November gunmen assaulted two more ranking members of the army, and suicide bombers killed a mayor from the NWFP, blew up the ISI regional headquarters in Peshawar, struck outside a bank in central Rawalpindi, targeted a police station in North Waziristan, and killed more than 30 people at a Charsadda market. A spate of seven bombings in a succeeding 10-day period killed numerous bystanders. The country's earlier acknowledgement of the Pakistani origin of the 2008 Mumbai (Bombay) terrorist attacks resulted in the late-November indictment of seven members of Lashkar-e-Taiba in connection with the attacks.

In December, Obama's decision to increase the number of U.S. troops in Afghanistan heightened debate in Pakistan. Intensification of the war in Afghanistan was rumoured to imply expanded drone attacks in Pakistan's tribal areas and possibly Balochistan. Pakistan's dissidents, however, were not deterred. Assaults on the naval headquarters in Islamabad and, once again, the army headquarters in Rawalpindi killed at least 38, including a major general and a brigadier. Militants also struck in Peshawar at a district and sessions court complex and a nongovernmental organization assisting the blind, while bombs

destroyed much of Lahore's Moon Market. The casualty toll rose still higher with the bombings of ISI headquarters in Multan, of the market in Punjab's Dera Ghazi Khan, and of Shi'ite religious processions in Karachi and Pakistan-administered Kashmir. Moreover, implementation of Obama's new strategy was demonstrated by the ratcheting up of drone attacks in Bajaur as well as in South and North Waziristan. Believed to have been among the casualties was senior al-Qaeda leader Saleh al-Somali. Given the public and official outrage in Pakistan over the intensified drone attacks, James Jones, Obama's national security adviser; Gen. David Petraeus, head of the U.S. Central Command; and Adm. Mike Mullen, chairman of the U.S. Joint Chiefs of Staff, made separate visits to Islamabad to try to ease deepening strains in U.S.-Pakistan relations.

(LAWRENCE ZIRING)

PALAU

Area: 488 sq km (188 sq mi)

Population (2009 est.): 20,400

Capital: Melekeok (on Babelthup)

Head of state and government: Presidents Tommy Remengesau, Jr., and, from January 15, Johnson Toribiong

Palau emphasized its close links to the United States in 2009. As a mark of Palau's recognition of the importance of its U.S. ties, Pres. Johnson Toribiong

agreed that several Chinese Uighurs detained at a U.S. military prison at Guantánamo Bay, Cuba, could be temporarily resettled on the islands. The plan was not universally popular in Palau. Fermin Nariang, editor of the Palau newspaper the *Island Times*, said that he had been stopped in the streets of Koror by citizens asking, "If the whole world does not want these folks, why are we taking them?" Palauans were also concerned that the Muslim Uighurs might face unacceptable culture shock and that the country's tourism might be harmed by the presence of former detainees on the islands.

Environmental issues remained important. President Toribiong told the UN General Assembly in September that Palau was creating a sanctuary to protect great hammerheads, leopard sharks, and oceanic whitetip sharks. The country acknowledged the difficulty, however, of patrolling waters the size of Texas or France with a single boat. An animal rights group asked Palau to remove fruit bats from local restaurant menus; after having been featured on an American reality TV show, the consumption of fruit bats cooked in coconut milk became so popular with tourists that the species' survival was said to be threatened.

(A.R.G. GRIFFITHS)

PANAMA

Area: 75,417 sq km (29,119 sq mi)

Population (2009 est.): 3,454,000

Capital: Panama City

Head of state and government: Presidents Martín Torrijos and, from July 1, Ricardo Martinelli

General elections consumed Panama during the first half of 2009. The elections, held on May 3, pitted Balbina Herrera, a former legislator and minister of housing, against wealthy businessman Ricardo Martinelli (see BIOGRAPHIES) in the presidential race. Herrera was the standard-bearer of the governing Democratic Revolutionary Party (PRD). Martinelli led a coalition of opposition parties headed by the Democratic Change party. The campaign was devoid of much substance and centred largely on personal attacks

between the candidates. Herrera was accused of being a radical leftist who had received support from Venezuelan Pres. Hugo Chávez. Martinelli exploited Herrera's past links to former Panamanian strongman Manuel Noriega, and his campaign emphasized the need for change after five years of PRD-led government. For her part, Herrera accused Martinelli of being mentally unstable (rumours had abounded for years that Martinelli was bipolar) and tried to use Martinelli's wealth and business practices against him. In the end the desire for change—despite the country's strong economic performance during the previous three years—led to a landslide victory for Martinelli, who captured 60% of the votes. His coalition also won a majority of seats in the legislature. Martinelli's victory ran counter to the recent leftist political trend in Latin America.

While Panama's economy was affected by the sharp decline in global trade, economists predicted that it would still post modest growth in 2009. Significant public spending helped boost the economy. The \$5.3 billion canal-expansion project was well under way, with completion slated for 2014. The government reported that GDP grew 2.4% during the first half of the year. Unemployment stood at 6.6% in August, up 1% from the same month a year earlier. The U.S.-Panama free-trade agreement remained unratified by the U.S. Congress, despite support from the administration of Pres. Barack Obama; some U.S. representatives insisted that Panama first tighten its banking laws to discourage tax evasion and money laundering.

(ORLANDO J. PÉREZ)

PAPUA NEW GUINEA

Area: 462,840 sq km (178,704 sq mi)

Population (2009 est.): 5,941,000

Capital: Port Moresby

Chief of state: Queen Elizabeth II, represented by Governor-General Sir Paulias Matane

Head of government: Prime Minister Sir Michael Somare

In 2009 Papua New Guinea (PNG) pressed forward with a plan to exploit its natural gas reserves. Two proposals were put forth to construct pipelines

from wells to liquefaction plants. One, by InterOil of Houston, would pipe gas from the upper Purari River to Port Moresby for conversion to liquefied natural gas (LNG). The other, by energy giant ExxonMobil, would pipe gas from the Southern Highlands to a liquefaction plant in the capital region. After debate between Prime Minister Michael Somare (supported by the energy minister, William Duma) and the prime minister's son, Arthur Somare (minister for public enterprises and chairman of the ministerial gas committee), the cabinet decided to adopt the scheme engineered by ExxonMobil, even though InterOil already operated an oil refinery at Port Moresby's Fairfax Harbour and was preferred by Prime Minister Somare. The LNG was then to be shipped to Chinese, Japanese, and Taiwanese customers already signed up under a \$15 billion deal.

Investigations continued into an airline crash in August in which a chartered Airlines PNG twin-engine plane crashed in the jungle near Kokoda. All 11 passengers and 2 crew members were killed in what was the worst civil air disaster in PNG history. The disaster was as important to Australia as to PNG, for large numbers of Australians walk the historic Kokoda Trail, site of decisive military campaigns during World War II. Following the crash, many Australians helped remove wreckage and assisted with the investigation of the accident. This collaboration was seen as furthering the close relationship between PNG and Australia.

(A.R.G. GRIFFITHS)

PARAGUAY

Area: 406,752 sq km (157,048 sq mi)

Population (2009 est.): 6,349,000

Capital: Asunción

Head of state and government: President Fernando Lugo

In 2009 extraordinarily high political expectations and challenges faced Paraguayan Pres. Fernando Lugo, the former Roman Catholic bishop whose inauguration on Aug. 15, 2008, ended 61 years of rule by the Colorado Party. Lugo had sworn to tackle such intractable issues as land reform (1% of

Paraguay's population controlled 77% of the arable land) and poverty relief (42% of Paraguayans lived in poverty), as well as fight corruption and crime and improve access to health care. His efforts to deliver on those promises, however, were hobbled during the year by the global recession, the fracture of his political alliance, and resistance from Colorado Party functionaries embedded in the government. In addition, Lugo was beset by a series of scandals. Two women filed paternity suits against him after he admitted to having fathered a child with a third woman while he was still a bishop. Allegations of nepotism on the part of his sister and Paraguay's acting first lady, Mercedes Lugo, also emerged, serving to undercut the president's reformist image.

Lugo did achieve three notable successes in 2009. On April 28 he and Bolivian Pres. Evo Morales signed an agreement ending a border dispute that dated from the 1932–35 Chaco War. In July Lugo finalized a deal with Brazilian Pres. Luiz Inácio Lula da Silva in which Brazil, after years of resistance, agreed to triple the annual revenue it paid to Paraguay for energy from the Itaipú hydroelectric dam, which was jointly operated by the two countries; a 1973 treaty had obligated Paraguay to sell power to Brazil at fixed far-below-market rates. The Lugo administration also succeeded in significantly increasing financial and medical assistance to Paraguayans in poverty, overcoming efforts in Congress to deny funding.

In September, however, Lugo suffered a setback when he was forced to rescind a decree limiting pesticide use by the soybean industry. The expanding industry had displaced many of the country's rural residents, which led to violent land disputes. Clashes had also occurred over pesticide contamination and pesticide-related illnesses.

The era of former dictator Alfredo Stroessner, who ruled Paraguay from 1954 to 1989, continued to haunt the country. In May Sabino Montanaro, who had served as Stroessner's interior minister, was extradited from Honduras to face six trials for the disappearances and killings of government opponents in the 1970s and '80s. In July the bodies of two victims from the 1970s were found buried outside a police barracks in Asunción. A truth commission reported that at least 336 people had disappeared under the regime, at least 59 had been extrajudicially executed, and 18,000 had been tortured.

(ROBERT ORTEGA)

PERU

Area: 1,285,198 sq km (496,218 sq mi)

Population (2009 est.): 28,887,000

Capital: Lima

Head of state and government: President Alan García

The year 2009 proved to be one of considerable challenges for Peru. The global recession had a marked impact on the country's economy, which was heavily based on the export of mineral and agricultural products. The economy slowed significantly during the final quarter of 2008 and the first half of 2009 as foreign demand for these commodities slumped. In an effort to counter the effects of the slowdown, the administration of Pres. Alan García worked to implement a financial stimulus package of up to \$13.2 billion. The central bank also slashed its benchmark lending rate during the year to a record-low 1.25%. These measures—along with the expectation that export demand would recover—led most analysts to conclude that Peru had weath-

Peruvian Prime Minister Yehude Simon (centre) poses with Amazonian Indians on June 17 after submitting a proposal to Congress to revoke two laws that had allowed the Peruvian Amazon region to be opened to development.

ered the financial crisis better than many other countries in Latin America and had positioned itself for a relatively rapid economic rebound.

In addition to the economy, much attention in Peru was focused on the numerous protests that occurred, many of them related to the issues of land use and indigenous rights. The most notable of these was an indigenous uprising in the Peruvian Amazon region near Bagua Grande, some 1,400 km (850 mi) north of Lima. During the first week of June, members of indigenous groups opposed to two recently enacted laws allowing the country's rainforest to be opened to exploration and development blockaded highways and became involved in deadly clashes with police. The fighting claimed the lives of at least 24 protesters and 10 policemen. The political fallout from the violence was considerable. García was forced to admit that his government should have carried on consultations with the indigenous groups before promulgating the laws. Yehude Simon, who had been appointed prime minister in October 2008, resigned his post, as did several other members of García's cabinet, and on June 18 Congress rescinded the laws that had sparked the uprising.

Protests were also staged by the local populations in other parts of the Peruvian Amazon and in the Andean highlands, where many complained of government indifference regarding the destructive environmental impact of mining, logging, and other activities on these areas. In recent years local inhabitants had increasingly turned to strikes and demonstrations as a way to force their concerns to be heard. Issues they demanded the government address included deforestation that was ruining tribal hunting grounds, numerous oil spills that had contaminated rivers and water supplies, and widespread pollution that had been caused by smelting operations, especially in the highland region near the city of La Oroya.

On February 1 a free-trade agreement between Peru and the U.S. came into force. The two countries had signed the agree-

ment in 2006, and García had pushed vigorously for its implementation. In addition to its pact with the U.S., Peru was also pursuing free-trade agreements with several other countries.

In April former president Alberto Fujimori, who had been extradited to Peru in 2007 to face a series of trials on charges ranging from corruption to human rights abuses, was found guilty of having authorized military death squads that carried out killings and kidnappings during his years in office (1990–2000). Fujimori was sentenced to 25 years in prison. In September he pleaded guilty to the remaining bribery and wiretapping charges against him and received an additional six years in prison. Many observers noted that by pleading guilty Fujimori avoided a trial in which some 60 witnesses—including many former government officials—were expected to testify against him and that the testimony could have proved politically damaging to his daughter, Keiko Fujimori, in Peru's upcoming 2011 presidential election. Keiko Fujimori, a member of Congress since 2006, had already declared herself a candidate and had stated publicly that she intended to pardon her father if she won the election. (HENRY A. DIETZ)

PHILIPPINES

Area: 300,000 sq km (115,831 sq mi)

Population (2009 est.): 91,983,000

Capital: Manila (some government offices and ministries are located in Quezon City and other Manila suburbs)

Head of state and government: President Gloria Macapagal Arroyo

In one of the worst examples of political violence in the Philippines, 57 people were killed in an ambush on Nov. 23, 2009, as they traveled in a convoy that had been sent to file the election papers of Ismael Mangudadatu, a candidate for governor of Maguindanao province on the island of Mindanao. A local mayor, Andal Ampatuan, Jr., was charged with multiple counts of murder. His father—a former governor of the province and the leader of a clan that had long ruled Maguindanao—and his brother were among 24 people charged with rebellion. Ampatuan, Jr.,

Martin Mejia/AP

Bullit Marquez/AP

Residents of the Philippine town of San Pedro, south of Manila, wade through floodwaters following the destructive storm that hit the area in late September.

was accused of having led the ambush. Mangudadatu indicated that Ampatuan, Jr., had threatened to kill him if he sought the governorship, so he had sent female relatives to file the papers for his candidacy, thinking that they—along with some lawyers and supporters and 30 journalists who accompanied them—would not be harmed. The victims were mutilated and buried in mass graves that had been dug in advance of the massacre.

Pres. Gloria Macapagal Arroyo declared a state of emergency and then martial law in the province, which was not lifted until December 12. Her political party expelled the Ampatuan clan, who had helped her in previous elections. Critics urged Arroyo to ban private political militias of the kind that dominated many parts of the Philippines.

In her state of the nation speech on July 27, Arroyo said that she had no desire to try to stay in power after her term ended in 2010. She touted the resilience of the country's economy in the midst of the global financial crisis, noting that the Philippines had enjoyed uninterrupted economic growth since she took office in 2001 and that Moody's Investors Service had recently upgraded the country's credit rating. She also trumpeted the fact that since 2001 GDP had expanded from \$76 billion to \$186 billion, while public debt dropped from 78% of GDP in 2000 to 55% in 2008 and foreign debt fell from 73% to 32%. An estimated 30% of the

country's nearly 92 million people still lived below the poverty line, however.

Corazon Aquino, who served (1986–92) as president of the Philippines and was credited with restoring democratic institutions in the country after the long dictatorship of Ferdinand Marcos, died on August 1. (See OBITUARIES.) More than 100,000 mourners marched in the rain during her funeral procession in Manila, the large crowds reminiscent of the "people power" demonstrations that had helped oust Marcos from power three years after the assassination of Aquino's husband, opposition leader Benigno Aquino, Jr., in 1983.

Fighting occurred sporadically throughout the year between government forces and two groups based in the southern Philippines. One was the Moro Islamic Liberation Front (MILF), which had long sought independence for Muslim areas of the predominately Roman Catholic country; the other group was the al-Qaeda-affiliated Abu Sayyaf. The deadliest battle in years occurred when on August 12 more than 400 military troops and policemen stormed two Abu Sayyaf camps on Basilan Island. MILF militants were also involved in the fighting, which claimed the lives of 23 government troops and 31 guerrillas. On September 21 government forces captured Abu Sayyaf's main camp on the island of Jolo, killing some 19 militants.

Manila experienced its heaviest rainfall in almost half a century—424.2 mm (16.7 in) within 12 hours—on September 26. The downpour flooded 80% of

the metropolitan area, displacing 380,000 people. This storm and two typhoons that hit the Philippines in October combined to kill more than 1,000 people. (HENRY S. BRADSHAW)

POLAND

Area: 312,679 sq km (120,726 sq mi)

Population (2009 est.): 38,146,000

Capital: Warsaw

Chief of state: President Lech Kaczynski

Head of government: Prime Minister Donald Tusk

In 2009 Poland's centre-right coalition government of the Civic Platform (PO) and Polish Peasants Party (PSL) continued to enjoy a high level of popular support. The coalition held a majority in the parliament with opposition split between the conservative Law and Justice (PiS) party and the centre-left Democratic Left Alliance. In spite of this, the government had difficulties passing its legislative agenda owing to its lack of sufficient votes to override a presidential veto. The continuing power struggle between Prime Minister Donald Tusk, who led the PO, and Pres. Lech Kaczynski of the PiS had become a dominant feature of the Polish political scene.

In May some tensions emerged between the coalition partners when Tusk neglected to consult Waldemar Pawlak, the deputy prime minister and PSL leader, on government policy concerning the global economic crisis even though Pawlak held the economic affairs portfolio. The PO also unilaterally proposed legislation to eliminate government funding of political parties despite an agreement with the PSL that only legislation that the coalition partners jointly supported would be introduced in the parliament. Despite these conflicts, the coalition survived and was expected to govern until the end of its term in 2011.

In preparation for elections to the EU Parliament in June, the PO attempted to broaden the base of its electoral support, particularly on the centre-left, by inviting politicians from other parties to run for EU seats as part of the PO's slate. The PO won 44% of the vote and gained 25 of the 50 seats allocated to

Poland. Another notable achievement for the PO—and for Tusk personally—was the party's successful campaign to elect former Polish prime minister Jerzy Buzek (*see* BIOGRAPHIES) as president of the European Parliament for a two-and-a-half-year term. In September, however, a scandal erupted that caused shock waves within the PO leadership. After allegations of corruption surfaced in connection with legislation pertaining to the country's casino gaming industry, three cabinet ministers, one deputy minister, and three other high-ranking government officials were dismissed from their posts.

On the foreign policy front, Poland continued to rebuild its relations with Germany during the year and finalized its ratification of the Lisbon Treaty on EU organization. The Polish parliament had approved the treaty in 2008, but President Kaczynski had refused to sign it until an Irish referendum on the treaty had passed. After Irish voters endorsed the treaty in October, Kaczynski finally initialed the document.

In June the EU's Eastern Partnership project was launched. This joint Polish-Swedish initiative was the first major EU proposal to be presented by Warsaw and accepted by all 27 EU member states. The goal of the project was to promote greater stability and security among countries on the EU's eastern border.

In September, U.S. Pres. Barack Obama announced that plans for the deployment of a missile-defense system in Poland and the Czech Republic had been canceled. The abrupt announcement was met with overwhelming criticism in Poland and sparked an extensive debate on the state of current and future Polish-U.S. relations. In October, U.S. Vice Pres. Joe Biden traveled to Warsaw, where he met with Tusk to discuss a new U.S. proposal that involved the possible stationing of a mobile antiballistic missile system known as the SM-3 in Poland by the year 2015.

Though slowed by the global recession, Poland's economy was expected to register GDP growth of 1%, making it one of the best-performing economies in the EU. Consumer price inflation stood at 3.7% in August and was projected to stabilize at 3.4% for the year. The country's unemployment rate during the second quarter was 10.8%—0.8% higher than during the same period the previous year. The government's 2012 target date for joining the euro zone was canceled, and at least one official suggested 2014 or

2015 as a more realistic goal for adopting the euro. Despite the economic slowdown, Poland was still perceived as a relatively safe haven in terms of economic development; this view was supported by the decision of the IMF to grant Poland a flexible credit line of \$20.5 billion.

(MICHAEL WYGANOWSKI)

PORTUGAL

Area: 92,090 sq km (35,556 sq mi)

Population (2009 est.): 10,639,000

Capital: Lisbon

Chief of state: President Aníbal Cavaco Silva

Head of government: Prime Minister José Sócrates

Portugal had a politically eventful year in 2009, starting with the European Parliament elections in June and culminating in municipal elections in October. The main event was the general election held on September 27, in which there was a shift in votes away from Prime Minister José Sócrates's ruling Socialist Party (PS) to the smaller, peripheral parties. The main opposition Social Democratic Party (PSD) essentially treaded water. The PS secured 38% of the vote, giving it 97 seats in the 230-seat parliament, while the PSD took 30% of the vote, winning 81 seats, up from 75. As predicted, the PS, which had controlled 121 seats in the previous parliament, lost its absolute majority. As a result, Sócrates would have to negotiate with at least one of the opposition parties to pass legislation, which could complicate the annual budget procedure and other complex legislative initiatives. Many observers suggested that this fragility could lead to early elections, a feeling intensified by the heightened friction during the election campaign between Prime Minister Sócrates and Pres. Aníbal Cavaco Silva. The president had the power to both veto legislation and call for early elections.

In the elections to the European Parliament, the PSD won handily, capturing 32% of the vote, compared with 27% for the PS. The PS, meanwhile, won the municipal elections, garnering 38% of the vote to the PSD's 23%. The PSD took Porto and Faro, but the PS won Lisbon and Leiria.

Meanwhile, the international economic crisis and its inevitable impact on the Portuguese economy continued to dominate the political and business scenes. While GDP collapsed in the first two quarters of the year, dropping 3.7% compared with the same period in 2008, by late summer there were increasing signs that the worst of the storm had passed. It helped that inflation eased steadily, thanks to lower energy prices, and that in the run-up to the elections the government unleashed a full slate of crisis-busting efforts—enough to increase the budget deficit to nearly 6% of GDP. This prompted the EU, which limits the budget gap to 3% of GDP, to subject Portugal (and several other EU countries) to a largely symbolic excessive-deficit procedure. On the downside, the unemployment rate rose steadily to levels that had not been seen in more than a decade, hitting 9.1% in August, and fears of continued economic turmoil led consumers to put off the purchase of durable goods and homes.

Against this backdrop, the government continued to invest in alternative- and renewable-energy projects in areas such as electric automobiles, solar energy, and wave power. For example, Sócrates announced a pilot project to equip Portugal's existing gas stations with a pioneering recharging system for electric vehicles. The equipment would be installed nationwide by 2011, when electric cars were expected to be broadly available. (*See* Special Report on page 188.) In the solar sector a group of investors was reportedly mulling the construction of a gigantic field of photovoltaic panels in the sun-drenched Alentejo region that would be capable of generating 2,000 MW of electricity, enough to be viable for sale to export markets. This monumental project, which would require an investment of up to about \$8.5 billion, would be funded with subsidies from the European Union and the Portuguese government, as well as private capital, but could take up to seven years to complete.

In the summer Portugal's reputation as a quiet, safe place for a family vacation was marred by a freak accident: five people were crushed to death by a rock slide that dumped tons of debris onto a crowded beach in the southern Algarve region. Officials blamed the accident on recent earthquakes in the region, which may have loosened the rocks. In the wake of the tragedy, security measures were heightened at all of the country's beaches with cliffs.

(ERIK T. BURNS)

QATAR

Area: 10,836 sq km (4,184 sq mi)

Population (2009 est.): 1,661,000

Capital: Doha

Head of state and government: Emir Sheikh Hamad ibn Khalifah Al Thani, assisted by Prime Minister Sheikh Hamad ibn Jasim ibn Jabr Al Thani

In 2009 Qatar continued its trajectory of economic growth. Despite high inflation, Qatar remained one of the world's fastest-growing economies and continued to rank as one of its richest, as measured by income per capita. The country's enhanced material well-being was buttressed by the growth of the government's sovereign wealth fund and ongoing fiscal surpluses. In addition, Qatar remained the world leader in natural gas exports, which for the first time exceeded its foreign sales of petroleum.

In November, at the 16th annual World Travel Awards convention in London, Qatar Airways was declared the World's Leading Airline-Business Class for the second consecutive year. The airline also received accolades for its role as a bridge between Qatar and the world's leading hydrocarbon fuel-importing countries.

Plans for the construction of the strategic Qatar-Bahrain Friendship Bridge continued throughout 2009. Touted as certain to become the world's largest transportation link over water, the causeway, upon its completion, was expected to greatly reduce transit time between the two countries.

Politically, Qatar maintained its efforts to serve as a bridge between the West and the Arab and Islamic worlds by hosting international conferences on issues such as democracy, free trade, and multifaith dialogue. It also continued to serve as a mediator in intraregional conflicts involving Chad, Lebanon, Palestine, The Sudan, and Yemen and entered into an agreement with Saudi Arabia that finally delineated the two countries' shared boundaries. Other than helping to end a dispute between Chad and The Sudan, however, the results of Qatar's mediatory efforts were mixed.

Qatar also continued its role in transnational education. In 2009 Qatar added branch campuses of Australian and Canadian institutions of higher

learning in Education City, located on the outskirts of Doha. In November Qatar hosted what was touted internationally as the world's first-ever education summit. (JOHN DUKE ANTHONY)

ROMANIA

Area: 238,391 sq km (92,043 sq mi)

Population (2009 est.): 21,481,000

Capital: Bucharest

Chief of state: President Traian Basescu

Head of government: Prime Minister Emil Boc

For the first nine months of 2009, Romania had a dysfunctional coalition government under two implacable rivals, the Democratic Liberal Party (PDL) on the centre-right and the Social Democratic Party (PSD), the successor of the former ruling communists. Twenty years after the 1989 revolution that saw communism replaced by a fragile democratic system, politics remained badly polarized. Personal rivalries were reinforced by disputes over what should be the pace and extent of moving toward a fully pluralist system that would be able to check the influence of powerful economic groups. Romania was also sliding into a deep recession. The economy contracted by about 7% in 2009. Facing an impending revenue crisis, Prime Minister Emil Boc negotiated a \$27 billion loan with the IMF and other lenders. The aid, which was approved in May, was conditional on Romania's making deep cuts in the public sector, which employed one-third of the labour force. The IMF also demanded that steps be taken to increase the efficiency of the bureaucracy. These and other reforms, however, became a casualty of worsening infighting between the government partners. In September, Boc dismissed the PSD interior minister from the government over disagreements about the

conduct of the presidential elections scheduled for November 22. After losing a vote of confidence in the parliament in October, Boc remained in the post of interim prime minister because the president failed to nominate a successor who was able to command a parliamentary majority.

The bitterly fought presidential election campaign centred on the record and character of the incumbent, Traian Basescu. A powerful set of opponents, extending beyond politics to include big business and much of the media, saw him as an abrasive figure intent on broadening the powers of the presidency to secure a personal ascendancy over the political process. They rallied around the PSD leader, Mircea Geoana, who believed that the president should act as an arbiter between different interests within the political elite. Basescu and his supporters, chiefly to be found in the PDL, argued that the PSD wished to entrench the privileges of an unaccountable elite, many of whose members had been intercepting state funds over a long period. He campaigned on an agenda of reforming state institutions; the changes included strengthening the representative role of the parliament and relaunching efforts to depoliticize the justice system.

Basescu's campaign was damaged by the open hostility of the major television stations, including the main state broadcaster. It is likely that he would have lost if Geoana had not turned out

Celebrating his reelection, Romanian Pres. Traian Basescu waves his country's flag in front of a crowd of supporters on December 6.

Vadim Ghirda/AP

to be a poor campaigner. Basescu trounced him in a television debate on December 3, 72 hours before the deciding second round of voting. A bigger-than-expected turnout of 58% saw Basescu win by 50.3% to 49.7%. But for the overwhelming backing of the Romanian diaspora, especially in Western Europe, he would have lost. Although the state electoral commission confirmed the result, the PSD claimed that there had been widespread vote fraud and appealed to the Constitutional Court, many of whose members it had appointed, to overturn the result. The court found no grounds for taking this action, however, and Basescu began his second term on December 16. The pro-Basescu PDL formed a coalition government with an ethnic Hungarian party and several independent lawmakers, and the parliament approved Basescu's renomination of Boc as prime minister.

Although the new government quickly approved a draft budget for 2010, it still needed parliamentary approval, and the IMF had refused to release the third tranche of the rescue loan without firm evidence that the next government would agree to carry out necessary austerity measures. The economic outlook appeared gloomy for many ordinary citizens unless politicians could put aside their deep-seated quarrels and turn their attention to the economy.

(TOM GALLAGHER)

RUSSIA

Area: 17,075,400 sq km (6,592,800 sq mi)

Population (2009 est.): 141,852,000

Capital: Moscow

Chief of state: President Dmitry Medvedev

Head of government: Prime Minister

Vladimir Putin

Domestic Politics. In 2009 Russia continued to be governed under the unorthodox arrangement popularly known as the “tandem.” In 2008 Vladimir Putin, having served the maximum of two consecutive presidential terms permitted by the constitution, had relinquished presidential power to his handpicked successor, Dmitry Medvedev, and himself assumed the notionally less-powerful role of prime minister. Press reports made much of occasional signs of ten-

sion or disagreement between the president and the prime minister, but in general the tandem appeared to be working smoothly. Putin was believed to have remained the main strategic decision maker. Assisted by First Deputy Prime Minister Igor Shuvalov, Putin oversaw the government and the economy; he was also believed to have retained the decisive voice in foreign and security affairs. Medvedev kept a high profile, but observers pointed to the fact that he remained surrounded by Putin appointees—he had virtually no team to call his own. In addition, Medvedev lacked the resources to sponsor any legislation that did not have Putin's blessing. This was because the United Russia party, which dominated the State Duma (the lower house of parliament), remained loyal to Putin. All this was taken as proof that Medvedev did not yet have a deciding voice in either foreign or domestic politics.

Medvedev issued a number of signals during the year suggesting that he might harbour hopes of steering Russia in a more liberal and reform-oriented direction. He spoke out repeatedly against corruption in public life, criticized bureaucratic mismanagement, and stated that although the state had sharply increased its role in the economy in recent years, this should be only a temporary phenomenon. In September Medvedev published an Internet article entitled “Forward, Russia!” in which he gave a brutally frank assessment of the challenges facing Russia's society and economy and identified modernization and technological innovation as key priorities of his presidency. He invited responses to his ideas from the general public, and he built on these in his annual address to the Russian parliament in November. In that speech Medvedev repeated his call for comprehensive and ambitious modernization.

Elections were held in October in 75 regions, and according to the official results, United Russia won an overwhelming victory. There were widespread allegations of vote rigging, and three opposition parties briefly walked out of the State Duma in protest, but popular support for both Putin and Medvedev remained high; in October 78% of those polled expressed approval of Putin's performance as prime minister and 72% of Medvedev's as president. Opinion polls indicated that while many members of the population were anxious about the fall in their living standards caused by the global finan-

cial crisis, they did not blame the tandem for their hardships. This, and the results of the October regional elections, suggested that the “social contract” that some believed had been struck by the Putin leadership—whereby the authorities supposedly guaranteed a steady rise in popular living standards in exchange for the people's political passivity—could be broken with impunity by the political leadership. Even so, the Kremlin continued to show signs of extreme nervousness about the possibility of political instability.

As the financial crisis appeared to recede, Putin showed signs of increasing confidence. There was already widespread speculation that he would return to the presidency in 2012, when Medvedev's first term in office ended. In September Putin declared that he and Medvedev would not run against one another in the 2012 election but would come to an agreement beforehand. This was the strongest hint Putin had thus far given that he might be considering returning to the Kremlin. Medvedev appeared to concur, echoing Putin's comments a few days later and speaking of the “common vision” uniting him and the prime minister.

The situation regarding human rights was disappointing. On the one hand, Medvedev professed his readiness to establish a dialogue with civil society. He revived the Presidential Human Rights Council (which had been established by Putin in 2004 but later had fallen into abeyance) and appointed several outspoken critics of the regime to it. On the other hand, threats and attacks against human rights activists and journalists increased in number in 2009. January saw the murder in Moscow, less than a kilometre from the Kremlin, of Stanislav Markelov, a human rights lawyer who had defended people who complained of having been beaten and tortured by Russian special police forces in the North Caucasus republic of Chechnya and elsewhere. Also shot dead was Anastasiya Baburova, a young journalist who had been accompanying Markelov and who had tried to come to his assistance. In March the well-known human rights campaigner Lev Ponomarev was beaten outside his home in Moscow. In July the courageous human rights defender Natalya Estemirova (*see* OBITUARIES) was abducted outside her home in Grozny, the capital of Chechnya. Her body was found later that day, with bullet wounds to the head and chest, in the neighbouring republic of Ingushetiya; she

Alexey Sazonov—AFP/Getty Images

Some 300 people march in Moscow on February 15 to protest the killings of human rights lawyer Stanislav Markelov and journalist Anastasiya Baburova, who were gunned down in broad daylight near the Kremlin in January.

was said to have been investigating human rights abuses by the Chechen authorities. Less than a month later, Zarema Sadulayeva, head of a Chechen children's charity, and her husband were abducted and murdered near Grozny. Russia remained a dangerous country for journalists; five were killed in 2009. The trial of four men accused of having helped to organize the 2006 murder of Russia's best-known opposition journalist and human rights defender, Anna Politkovskaya, ended in February with their acquittal; the man whom prosecutors accused of having carried out the assassination remained at large. Critics complained that the investigation and the trial had been botched, and in June the Supreme Court ordered a new judge and jury to hear the case. The November death in pretrial detention of Sergey Magnitsky, a lawyer who had been working on behalf of a Western investment fund, provoked an outcry both in Russia and abroad.

In April, 10 years after then president Putin sent troops into Chechnya, Medvedev officially ended the "counter-terrorism operation" against insurgents in the breakaway republic. The situation in the North Caucasus, however, showed little sign of normalizing. In January a former bodyguard to Chechen Pres. Ramzan Kadyrov was shot dead in Vienna; he had earlier accused Kadyrov of torture. In March, Sulim Yamadayev, one of Kadyrov's bitter foes, was shot dead in Dubai. Kadyrov denied involvement in these assassinations. Meanwhile, in the neighbouring republics of Dagestan and Ingushetiya, the violence increased. Suicide bombings once again became common, and shoot-outs were reported on an almost daily basis. In June the president of Ingushetiya, Yunus-Bek Yevkurov, was nearly killed by a suicide bomber. In November a bomb derailed an express train traveling between Moscow and St. Petersburg, killing at least 30 people.

In 2009 Russia recorded its first annual population expansion since 1995, with an increase to 141.9 million. This was the result of an increase in the birth rate, a decline in mortality rates, and an influx of immigrants.

Economy. Russia was severely hit by the global financial crisis; falling oil prices and the general economic slowdown both took their toll. In the first

half of 2009, GDP declined by more than 10%. Since this downturn followed a decade of rapid economic growth fueled by high and rising energy prices, however, Russia entered the crisis with a strong budget, balance of payments, and reserves. Policy makers were able to cover a budget deficit on the order of 8% of GDP, mainly by drawing down the reserve fund that had been built up from oil and gas revenues in preceding years.

The impact of the recession was exacerbated by Russia's structural vulnerabilities: a dependence on oil, gas, and metals, a narrow industrial base, and a limited small- and medium-sized business sector (accounting for about 13% of GDP). Even so, the scale of the recession in Russia was greater than many had expected. It appeared that many investors, both Russian and foreign, had reacted to the crisis by reducing their investment activity in Russia because they perceived underlying weaknesses in its economic institutions—in particular, the weak rule of law and the poor protection of property rights. A World Bank report ranked Russia 120th out of 183 countries in 2009–10 for the "ease of doing business." Corruption was endemic and, despite a number of high-profile initiatives, showed no sign of decreasing.

There was much hopeful speculation by liberal intellectuals that the economic crisis would force the leadership to liberalize both economically and politically. The most astute Russian analysts saw little prospect, however, of radical reform that would introduce

real competition into either the economy or the political system. Yet fears that the crisis would push the leadership toward more interventionist policies proved unfounded; the authorities did not—as many had predicted they would—exploit the crisis to take control of large deeply indebted companies. It also became clear that foreign creditors of cash-strapped Russian energy and metals companies had little appetite for taking assets offered as collateral into their own hands, and they restructured loans on a generous basis. This proved advantageous to tycoons such as Oleg Deripaska and Roman Abramovich, who, though relatively impoverished, were not as weakened as originally anticipated. In October

Putin announced that as in previous years, there would be some privatization in 2010 and 2011, partly to pursue the reform agenda and partly to raise funds for the budget, and that foreign investors would be able to take part.

Unemployment rose from less than 6% in the summer of 2008 to 10% in March 2009. The unemployment rate then declined somewhat, for two reasons. First, some workers who had lost their jobs (including a number of previously employed pensioners) dropped out of the workforce altogether. Second, the federal and regional governments pressured employers, including foreign firms operating in Russia, such as Renault, to halt sackings. Regional unemployment data showed that the crisis was affecting the regions in very different ways. Those hardest hit were the so-called metallurgical regions, where industry was dominated by steel and nonferrous-metals production. By contrast, gas- and oil-producing regions fared relatively well. Least hard-hit were the poorest regions that had traditionally relied on the federal centres for financial subsidies, including many parts of the North Caucasus.

Many workers suffered wage arrears or shortened workweeks or were forced to take unpaid leave. There were fears that "monotowns" (industrial settlements created in the Soviet period around a single industry or factory) would become a locus of social unrest. In fact, though there were protests in such towns, they remained quite small and isolated. Putin personally stepped

in to quiet things down in Pikalevo (near St. Petersburg) in June.

By the autumn there were signs that the Russian economy was emerging from recession. Although each month's output remained below the level of the corresponding month of 2008, the changes from one month to the next became positive in June and remained so, meaning that output in the third quarter was above that in the second quarter. Moreover, oil prices, which had fallen as low as \$35 a barrel in December 2008, had by October 2009 recovered to more than \$80 a barrel.

In August an accident at Russia's largest hydroelectric power station, Sayano-Shushenskaya, in which 75 people were killed, was seen as a worrying sign of the erosion of basic infrastructure and the state's failure to tackle it. In October, 185 senior Russian scientists working in universities and research centres outside Russia published an open letter drawing attention to the catastrophic condition of the fundamental sciences in Russia, which received significantly lower levels of funding than in other developed countries, and calling on Medvedev and Putin to take immediate steps to reverse the situation.

The clearest example of disagreement within the tandem came over the approach to Russia's accession to the World Trade Organization (WTO). In June Putin surprised U.S. and EU negotiators by announcing that Russia was withdrawing its application and would seek to join the WTO only together with its customs union partners Kazakhstan and Belarus. The following month, however, Medvedev appeared to reverse this position, and Russia returned to the negotiating table.

The severity of the economic crisis brought wide—if not universal—acceptance within the elite that economic modernization was an urgent necessity. This view was endorsed by Medvedev in his "Forward, Russia!" article. The elite was sharply divided, however, over what form the reforms should take. According to a conservative wing, the financial crisis had been provoked by Western financial mismanagement; it would eventually blow over, and oil prices would rise again. Russia should sit it out and then, when times were better, pursue modernization by investing in cutting-edge technology. Representatives of this group were believed to include Deputy Prime Minister Igor Sechin (who was responsible for the energy sector) and the director general of the Russian Technologies state corpo-

ration, Sergey Chemezov. At first Putin appeared also to belong to this camp. As the crisis deepened, however, he began calling for greater social spending and intervening personally to ward off social unrest. Meanwhile, the so-called pessimist wing believed that it would not be enough to wait for oil prices to rise again; Russia's economic problems were structural and required systemic reform. Medvedev himself appeared to subscribe to this view, as did Finance Minister Aleksey Kudrin, presidential economic adviser Arkady Dvorkovich, and First Deputy Prime Minister Igor Shuvalov. The pessimists themselves were deeply divided over whether political and judicial reforms were needed as well as economic modernization.

Foreign and Security Policy. The revelation of Russia's economic vulnerability did little to reduce the assertiveness with which the country approached the outside world and, in particular, the other former Soviet states on its borders. Relations with Georgia and Ukraine remained particularly tense. The year began with a Russian-Ukrainian dispute over gas prices. As a result, Moscow halted gas deliveries to Ukraine, and supplies to southeastern Europe were disrupted for two weeks in the middle of winter. The main focus of attention throughout the year was on efforts to improve the strained relations between Russia and the U.S. Russia had been gratified by NATO's decision, announced in December 2008, not to grant membership action plans to Ukraine and Georgia, and Moscow responded positively to the expressed desire of the administration of U.S. Pres. Barack Obama to "reset" relations between the two countries. In March U.S. Secretary of State Hillary Clinton met Foreign Minister Sergey Lavrov in Moscow (causing some amusement among Russian commentators when she presented Lavrov with a red button that was supposed to read "reset" but in fact read "overload"). After Presidents Obama and Medvedev met in London in April, the two countries began serious negotiations over renewing the Strategic Arms Reduction Talks I (START I) treaty. Although the treaty expired on Dec. 5, 2009, discussions between Russia and the U.S. on a new accord continued beyond year's end. When Obama visited Moscow in July, he and Medvedev signed an agreement by which Moscow would allow the transit of supplies across Russian territory to U.S. troops in Afghanistan. Russia also responded to Obama's September decision to halt

plans to establish ballistic missile defenses in Poland and the Czech Republic by announcing that Moscow would suspend its threat to deploy short-range nuclear missiles to its Kaliningrad exclave. In October Putin paid an official visit to China, during which Russia and China signed dozens of commercial deals and concluded a major framework agreement on the delivery of Russian gas supplies to China.

The August 2008 war with Georgia had brought home to Russia the seriousness of some of the technological problems besetting its military and prompted the Kremlin to launch an ambitious program of military reform; this provoked opposition from top military leaders. In May Medvedev approved a new national security strategy that recognized that Russian security was threatened as much by internal problems as by external challenges. (ELIZABETH TEAGUE)

RWANDA

Area: 26,379 sq km (10,185 sq mi)

Population (2009 est.): 9,998,000

Capital: Kigali

Head of state and government: President
Maj. Gen. Paul Kagame, assisted by
Prime Minister Bernard Makuza

By 2009—15 years after the 1994 genocide—Rwanda had become a model of postconflict recovery. In November the restoration of diplomatic relations between Rwanda and France (severed three years earlier) settled a dispute about responsibility for the genocide. The following month Rwanda was declared free of land mines; it was the first country to realize this status. Despite the global financial downturn, Rwanda's economy showed remarkable resilience, growing at an estimated rate of 8–9% during the year; growth was fueled mainly by an expanding industrial base and excellent crop harvests. Inflation fell from 22% to 5%. Even though the country's major exports (tea, coffee, and minerals) dropped by nearly 20%, the tourist industry yielded regular foreign exchange. Rwandans abroad, led by the Rwanda Diaspora Global Network, congratulated the government for its successful rebuilding efforts and for reducing corruption. On

November 28 Rwanda was admitted to the Commonwealth, becoming the second member country (after Mozambique in 1995) with no formal historical ties to Britain.

Reports by the World Bank and the IMF were optimistic. In September the World Bank ranked Rwanda as the top global business reformer for 2010. Improvements in coffee quality and production particularly reflected the country's socioeconomic recovery, with Rwandan brands making significant inroads in overseas specialty markets.

International and local courts continued hearings on crimes connected to the 1994 genocide, with the UN extending the term of the International Criminal Tribunal for Rwanda to December 2010. Several key perpetrators were sentenced to life imprisonment, including former justice minister Agnes Ntamabyiriro, former Kigali prefect Tharcisse Renzaho, and former speaker of the parliament Alfred Mukamazamunda (in exile in Belgium and sentenced in absentia). In two cases, courts in The Netherlands and Canada each handed down long prison sentences to Rwandans charged with war crimes, but Great Britain, Switzerland, and several other European countries refused to extradite genocide suspects on grounds that they would not receive a fair trial.

Meanwhile, the government, stung by tough international criticism that it had actively encouraged rebel militias involved in hostile operations in eastern Congo, carried out a five-week joint military operation with the Democratic Republic of the Congo (DRC), beginning in January. The operation resulted in the arrest of warlord Laurent Nkunda. In August, Rwandan Pres. Paul Kagame and DRC Pres. Joseph Kabila met in Goma to restore diplomatic relations between their countries, which had been severed in 1996. (LARAY DENZER)

SAINT KITTS AND NEVIS

Area: 269 sq km (104 sq mi)

Population (2009 est.): 51,900

Capital: Basseterre

Chief of state: Queen Elizabeth II, represented by Governor-General Sir Cuthbert Montraville Sebastian

Head of government: Prime Minister Denzil Douglas

Renewable energy made a major leap forward in Saint Kitts and Nevis when in April 2009 a company called West Indies Power started installing two 5.8-MW generators at a geothermal site at Spring Hill, Nevis. It was the first time that a geothermal source had been used to generate electricity in the Caribbean. The power was to be sold initially to a local utility, NEVLEC, and eventually exported to Saint Kitts and farther afield in the region.

In July, during a summit of the African Union held in Libya, Prime Minister Denzil Douglas announced that Saint Kitts and Nevis had been proposed as the headquarters of a Libyan Development Bank to be established in the eastern Caribbean. At the end of 2009, host Saint Kitts and Nevis led the Organisation of Eastern Caribbean States in signing the Treaty of Basseterre, which provided for the establishment of an OECS economic union.

A commission of inquiry established by Nevis Island Premier Joseph Parry to investigate the administration of former premier Vance Amory proceeded during the year, albeit with some hitches. On December 15, Prime Minister Douglas dissolved the National Assembly, paving the way for elections early in 2010. (DAVID RENWICK)

SAINT LUCIA

Area: 617 sq km (238 sq mi)

Population (2009 est.): 178,000

Capital: Castries

Chief of state: Queen Elizabeth II, represented by Governor-General Dame Pearlette Louisy

Head of government: Prime Minister Stephenson King

Saint Lucia experienced widespread industrial unrest when in May 2009 hundreds of public-sector workers, including teachers and prison officers, went on strike in support of a 7.5% pay hike. The work stoppage was organized by the umbrella Trade Union Federation. Prime Minister Stephenson King insisted that the most the government could afford was an increase of between 3% and 4%. The workers returned to work in early June following

the government's agreement to a 4.1% pay boost.

Like several other Caribbean states hit hard by the decline in the world economy, Saint Lucia was obliged to approach the IMF in July for access to about \$10.7 million under the rapid-access component of the Exogenous Shocks Facility (ESF). The program and its funds were designed to ease balance-of-payments pressures, shore up external reserves, and serve as a catalyst for further support from the international donor community. In July the IMF said that it expected Saint Lucia's GDP to contract by 2.5% in 2009 and unemployment to increase substantially.

Also in August, Prime Minister King announced that members of the former Saint Lucia Labour Party (SLP) administration could face legal action after a commission of inquiry found that the administration's mismanagement had cost taxpayers millions of dollars.

(DAVID RENWICK)

SAINT VINCENT AND THE GRENADINES

Area: 389 sq km (150 sq mi)

Population (2009 est.): 105,000

Capital: Kingstown

Chief of state: Queen Elizabeth II, represented by Governor-General Sir Frederick Ballantyne

Head of government: Prime Minister Ralph Gonsalves

In March 2009 local regulators took control of the Saint Vincent and the Grenadines-based Millennium Bank, which the U.S. Securities and Exchange Commission (SEC) accused of having defrauded more than 375 clients of \$68 million by promising high returns on certificates of deposit. The local authorities appointed accounting firm KPMG to assume control of the bank's affairs. The SEC alleged that the money placed by depositors was actually funneled into a U.S. bank account that was used as a personal "piggy bank" by the American principals.

In April, Saint Vincent and the Grenadines was accepted as a member of Venezuelan Pres. Hugo Chávez's Bolivarian Alliance for the Americas

group, promoted by Chávez as a more “socialist” path to development than U.S.-led free trade based on market principles. The move drew the ire of opposition leader Arnhim Eustace, who described it as “surprising” and “disappointing.” Saint Vincent and the Grenadines had been a member of the Caribbean Community (CARICOM) for decades, and fears were expressed that the aims of the two bodies might be contradictory.

On November 25 voters strongly rejected a proposed new constitution that would have removed the British monarch as chief of state. The prime minister had been an enthusiastic supporter of the proposal.

(DAVID RENWICK)

An injured Samoan man walks through the ruins of a village destroyed by the deadly tsunami that occurred in late September.

SAMOA

Area: 2,785 sq km (1,075 sq mi)

Population (2009 est.): 183,000

Capital: Apia

Chief of state: *O le Ao o le Malo* (Head of State) Tuiatua Tupua Tamasese Efi

Head of government: Prime Minister Tuila'epa Sailele Malielegaoi

Samoa's well-managed economy was hit by the global recession and, for the first time in 10 years, contracted; it shrank 7.6% during the first six months of 2009. Compounding the problem were falling revenues from declining imports, an inflation rate of 13%, a decline in tourism and in remittances from expatriate Samoans, and the closure of American Samoan tuna canneries. Some relief occurred when producers of the reality television show *Survivor* filmed two seasons of the program in Samoa.

On September 29 a shallow magnitude-8.0 earthquake near Samoa generated a tsunami that killed some 142 people and devastated the southeast coast of Upolu, where many of Samoa's tourist resorts were concentrated. The tsunami generated a major aid initiative from regional neighbours and diasporic Samoans.

Samoa's ruling Human Rights Protection Party (HRPP) government faced ongoing challenges over legislation designed to change the side of the road (from right to left) on which vehicles

were driven. Broad-based opposition led to the formation of a new political coalition and to ongoing legal challenges to the government. The final challenge was dismissed by courts in August, and the change occurred on September 7, without the predicted spike in road accidents.

The HRPP also faced challenges in the parliament. Shortly before the budget debate, nine independent members united to form Tautua Samoa, an opposition party; the speaker declared their seats vacant and scheduled by-elections in their electorates. The dismissed members took the matter to the Supreme Court, which ordered the members to return to the parliament and canceled the by-elections.

(CLUNY MACPHERSON)

SAN MARINO

Area: 61.2 sq km (23.6 sq mi)

Population (2009 est.): 31,500

Capital: San Marino

Heads of state and government: The republic is governed by two *capitani reggenti*, or coregents, appointed every six months by a popularly elected Great and General Council.

The global economic crisis did not spare San Marino in 2009. Tax rev-

enues fell as economic activities shrank; in a country heavily dependent on international trade, the decline in imports significantly hurt state revenues deriving from them.

While banking and manufacturing remained important sectors of the economy, the government was eager to invest more in tourism, a critical if troubled sector. The number of tourists had dropped sharply in recent years to little more than two million annual visits, a decline that was attributed in part to the republic's tarnished image in some of the international press. Tourism decreased by only 1.1% in the first half of 2009, however, after having dropped 17% in the first quarter. In response to the drop in tourism, the government earmarked new investments for the transport infrastructure, hospitality resources, the creation of new cultural events, and the revitalization of the historic centre, which, along with Mt. Titano, had been declared a UNESCO World Heritage site in 2008.

The year was also important in the normalization of the republic's standing with the Organisation for Economic Co-operation and Development. San Marino, long considered an international tax haven, was admitted to a “gray list” of countries working to achieve full compliance with international financial and banking standards. These countries were required to sign 12 bilateral agreements for economic collaboration with as many foreign partners, and San Marino reached that number by the end of the year. This

success notwithstanding, the republic's most important trading partner, Italy, still refused to sign an agreement of economic and fiscal collaboration.

(GREGORY O. SMITH)

SAO TOME AND PRINCEPE (SÃO TOMÉ E PRÍNCIPE)

Area: 1,001 sq km (386 sq mi)

Population (2009 est.): 163,000

Capital: São Tomé

Chief of state: President Fradique de Menezes

Head of government: Prime Minister Joaquim Rafael Branco

Despite a coup attempt in February 2009, the coalition government of Joaquim Rafael Branco, leader of the Movement for the Liberation of Sao Tome and Principe–Social Democratic Party, remained in power in Sao Tome and Principe with a clear majority in the legislature, though Patrice Trovada, the leader of the opposition Independent Democratic Action party, continued to claim that the coalition was unconstitutional. The government's decision in May to postpone regional and municipal elections (probably until 2010, when a legislative election was due), was much criticized, especially in Príncipe.

Though Nigeria remained Sao Tome and Principe's leading oil-production partner in the joint Development Zone, attempts were made to involve Angola, and the United States showed increasing interest in the potential for extracting oil from the Gulf of Guinea. Though allegations of corruption continued, some of them relating to the misappropriation of donor funding, in March 2009 the IMF approved a new poverty-reduction and growth facility program. Portugal remained the largest donor, and donor funding was expected to meet 80% of the country's budget. The amount of oil and gas that could be obtained from the waters off the archipelago, however, remained unclear. Additional payments of signature bonuses by the oil companies were expected, but there were disputes over the oil blocks that resulted in the delay of those payments.

(CHRISTOPHER SAUNDERS)

SAUDI ARABIA

Area: 2,149,690 sq km (830,000 sq mi)

Population (2009 est.): 25,316,000

Capital: Riyadh

Head of state and government: King 'Abd Allah

Saudi liberals were disappointed in mid-May 2009 when King 'Abd Allah canceled municipal elections that were scheduled for the year. Local elections, begun in 2004, had been considered a step toward reform. Efforts by Saudi Arabia to make the country a hub for scientific learning and research continued in 2009. In late September the state-of-the-art King Abdullah University of Science and Technology (KAUST) was opened north of Jiddah. Some conservatives criticized the coed university, which allowed men and women to take classes together.

Relations between Saudi Arabia and the neighbouring United Arab Emirates faced several challenges in 2009. In May the U.A.E. decided to pull out of the Gulf Cooperation Council monetary union after Saudi Arabia announced that Riyadh would be the centre of the GCC central bank. Riyadh also reportedly asked its neighbour to remove from its national identification card a map of the U.A.E. that included dis-

puted territory linking the U.A.E. with Qatar—land that Saudi Arabia recognized as part of its territory. In late August Saudi Arabia required U.A.E. nationals to exclusively use passports in order to enter the kingdom.

In early June, ahead of his Cairo speech addressing the Muslim world, U.S. Pres. Barack Obama briefly visited Saudi Arabia. In October, King 'Abd Allah visited Syria, the first trip to that country by a Saudi ruler since the 2005 assassination of Saudi-backed Lebanese statesman Rafiq al-Hariri, whose assassination was believed by some to have been orchestrated by Damascus.

In August, Deputy Interior Minister Prince Muhammad ibn Nayef survived an attempted assassination, the first time that a royal family member had been targeted. Al-Qaeda in the Arabian Peninsula, the Saudi arm of al-Qaeda, claimed responsibility. Some suggested that the incident might end speculation that al-Qaeda was evading direct confrontation with the royal family.

In 2009 the Shi'ite al-Houthi rebellion in northern Yemen spilled across Saudi borders and was met with Saudi air strikes and shelling. There were accusations that Iran was supporting the insurgents, and a Saudi naval blockage along Yemeni shores was meant to stop the supposed delivery of Iranian supplies to the rebels.

In April King 'Abd Allah attended the G-20 summit in London. The IMF ranked Saudi Arabia first among the Arab countries in economic position. In 2009 inflation subsided from around

Yemenis displaced by the Shi'ite al-Houthi rebellion in northern Yemen make their way toward a refugee camp in the southern Saudi province of Jizan in November.

AFP/Getty Images

9% to 5.2%. Saudi Arabia's non-oil sector expanded by 3.3%, while its oil revenue declined by 10.3%.

In June, Saudi Aramco and France Total agreed to invest \$9.6 billion to build the Jubayl oil refinery, expected to produce 400,000 bbl daily. The refinery was one of four planned refineries meant to boost domestic capacity from 2.1 million to 3.7 million bbl daily. The beginning of production from the Khurays oil field increased production capacity to 12 million bbl daily, amplifying Riyadh's leverage in OPEC. Saudi Arabia sacrificed billions of dollars in revenue in 2009 by cutting output to prop up the price of crude oil.

(MAHMOUD HADDAD)

SENEGAL

Area: 196,722 sq km (75,955 sq mi)

Population (2009 est.): 12,534,000

Capital: Dakar

Chief of state: President Abdoulaye Wade, assisted by Prime Ministers Cheikh Hadjibou Soumaré and, from April 30, Souleymane Ndéné Ndiaye

Despite fears of possible violence, calm prevailed on March 22, 2009, as voters cast their ballots to choose 20,000 councillors in Senegal's local elections, which were considered a test of the ruling Senegalese Democratic Party's (PDS) strength in the face of skyrocketing food prices and a stagnating economy. The PDS continued to dominate rural areas, but a coalition of opposition parties, Bennoo Siggil Senegaal (United to Boost Senegal), won control of councils in Dakar, Saint-Louis, and other large cities. The elections did see Pres. Abdoulaye Wade's son, Karim Wade, gain his first public position as a Dakar municipal councillor. Shortly thereafter he was appointed to a ministry post in his father's government, and many began to see him as a possible successor to his father. On June 2 Parliament voted to create the post of vice president, but President Wade did not sign it into law by year's end.

On April 24 Air Senegal International ceased operations after a dispute over control of the airline between the Senegalese government and the airline's majority stockholder, Royal Air Maroc,

had not been resolved. The demise of Air Senegal was a blow to tourism, which had already been hard-pressed by the global economic downturn.

The European Union announced in early August that it would give nearly \$16 million to Senegal to assist the estimated 460,000 people unable to afford adequate food. On September 7 the U.S. Millennium Challenge Corporation approved a five-year, \$540 million grant to Senegal for improvements in agriculture and infrastructure.

(NANCY ELLEN LAWLER)

SERBIA

Area: 77,498 sq km (29,922 sq mi)
(excluding Kosovo)

Population (2009 est.): 7,320,000

Capital: Belgrade

Chief of state: President Boris Tadic

Head of government: Prime Minister Mirko Cvetkovic

In December 2009 Serbia remained undecided on whether to open its mission to NATO, in accordance with its membership in the Partnership for Peace program. In April 2008 Serbia had signed the Stabilization and Association Agreement. Interim trade provisions in the agreement were initially blocked by The Netherlands, which demanded that Serbia first arrest two indicted war criminals: Bosnian Serb Gen. Ratko Mladic and Goran Hadzic, former leader of Croatia's Krajina Serbs. At the EU foreign ministers meeting in December, however, the Dutch government lifted its opposition after a report by the International Criminal Tribunal for the Former Yugoslavia's chief prosecutor, Serge Brammertz, stated that Serbia made "constant progress" in efforts to cooperate with the court. The move would thus enable Serbia to attract more foreign investment and expand trade with EU member states. Belgrade submitted an application for EU candidacy late in December.

In July the National Assembly passed the Act on Regional Development in an effort to equalize economic development by reducing the differences between developed and undeveloped parts of the country and to deal with

regional imbalances due to an aging population that had impact on revenue sharing and distribution. Government figures showed that average incomes in Belgrade were 19 times larger than those in the eastern town of Bor and that the amount of money that was in circulation in the capital was equal to that spent in more than 80 southern and eastern municipalities combined.

According to Eurostat, some food prices in Serbia were among the highest in southeastern Europe. The average family of three in Serbia spent more than 40% of its income on food. Gross monthly income per worker in October was about €465 (1€ = about \$1.45), a decrease of 1% year-on-year. The Serbian Chamber of Commerce reported that salaries were being paid 45 days late in the country's poorest areas, raising fears of potential social unrest.

The World Bank approved a \$400 million loan to assist the Serbian budget for 2009 and 2010. Russia approved a loan package amounting to about \$1 billion, of which \$200 million was earmarked for Serbia's budget. Part of an IMF arrangement called for a reduction in the number of national government employees (from 31,000 to 28,000) and local administrative cuts of some 10,000 workers.

Serbia's central bank reported a dramatic rise in the number of insolvent companies; some 13,000 company accounts were blocked in 2009, bringing the total to 63,000 businesses that owed €3 billion. Companies were also indebted to the government for about €655 million in unpaid taxes.

Little progress was achieved in reforming the education system in light of the increasing demands for a highly trained and diversified labour force needed to compete in the global economy. Only about 10% of the population had completed a postsecondary education.

The EU reported that civil and political rights improved and that minority rights were largely respected in Serbia. Observers expressed concern, however, over sporadic violence and deep divisions within the Muslim communities in the southwestern region of Sandzak. Tensions were also on the rise in the northern autonomous province of Vojvodina and in the predominantly ethnic Albanian region of the Presevo Valley, where activists were demanding autonomy and possible unification with neighbouring Kosovo. In December, Vojvodina's provincial assembly adopted

a statute giving the ethnically mixed region a new constitution. This would allow the province more legislative, diplomatic, and economic autonomy. The move, which was approved by Serbia's parliament, partially restored Vojvodina's autonomy, which it had lost in the late 1980s. (MILAN ANDREJEVICH)

SEYCHELLES

Area: 452 sq km (about 174 sq mi)

Population (2009 est.): 87,800

Capital: Victoria

Head of state and government: President James Michel

During a spate of piracy in the Indian Ocean and the Gulf of Aden in early 2009, which included the hijacking of two Seychellois vessels as well as several foreign vessels off the Seychelles coast, the Coast Guard arrested nine suspected Somali pirates. The accused pirates were subsequently tried in the archipelago country's courts as part of a global effort to crack down on piracy off eastern Africa, which accounted for 214 attacked ships in 2009. In support of the international effort to stem the increase in Indian Ocean piracy, the Coast Guard opened a monitoring and rescue centre in cooperation with the International Maritime Organization. In November Seychelles agreed to allow EU forces to police against pirates in waters off Seychelles.

The country entered into a joint agreement with neighbouring Mauritius concerning the continental shelf both island countries share. The agreement ensured that both countries would retain rights to deep-sea drilling, mining, and ocean-conservation efforts.

In August former Ugandan High Court judge Frederick Egonda-Ntende was sworn in as the chief justice of the Seychelles Supreme Court. Egonda-Ntende had been tapped by Pres. James Michel for the position. He replaced Justice Andrew Ranjan Perera, who had retired from the post earlier in 2009. The Seychellois government also entered into an agreement with the United Nations Development Programme to improve the transparency, accountability, and efficiency of its judiciary.

(MARY EBELING)

SIERRA LEONE

Area: 71,740 sq km (27,699 sq mi)

Population (2009 est.): 5,696,000

Capital: Freetown

Head of state and government: President Ernest Bai Koroma

Hampered by the global recession, Sierra Leone's economic growth slowed to 4% in 2009, down from 5.5% a year earlier. The country's economic outlook began to improve in the third quarter, however, with a gradual recovery in mining and agricultural exports. Two IMF missions to Sierra Leone commended the government's progress in staying on course with its monetary policies despite the challenging economic conditions worldwide.

Pres. Ernest Bai Koroma opened Parliament on October 9 with an upbeat account of his government's progress in implementing its Agenda for Change, an ambitious strategy for achieving economic diversification, boosting agricultural productivity, developing tourism, expanding education, overhauling the health care system, and increasing women's economic and political participation, among other goals. The discovery of a deepwater oil field off the coast

of Sierra Leone held the promise of relief from the country's dependence on the diamond industry. Meanwhile, former British prime minister Tony Blair visited the country in April to promote the revival of its once-vibrant tourist industry. Acknowledging UNICEF's findings that Sierra Leone had the world's highest rate of maternal and child mortality, the government had increased the number of health facilities in the country by 22% as well as recruited some 60 doctors from Nigeria to help meet a shortage of medical personnel. The government estimated that maternal mortality rates may have fallen by as much as a third in three years.

Koroma's intent to pursue an inclusive government was tested in March by outbreaks of violence in Pujehun district and in Freetown. Supporters of the main opposition Sierra Leone People's Party clashed with members of the governing All People's Congress. Government and paramilitary forces moved quickly to quell the disturbances. Following mediation that involved key political leaders and UN officials, the two parties reached an accord to seek non-violent conflict resolution.

The UN-backed Special Court for Sierra Leone concluded a trial in April with the sentencing of three leaders of the rebel Revolutionary United Front—Issa Hassan Sesay, Morris Kallon, and Augustine Gbao—to long prison terms for having committed atrocities "upon a massive scale," including the killing

An Amnesty International representative talks with women in a maternity ward in Sierra Leone's capital, Freetown, on September 20. Sierra Leone, which had the world's highest rate of maternal and child mortality, was taking steps to improve health care.

of four international peacekeepers and the sanctioning of mass rape. This was the first time that an international court had handed down sentences for attacks against international peacekeepers and held senior leaders accountable for crimes of sexual violence. The trial of former Liberian president Charles Taylor, which was expected to be the court's final trial, continued in The Hague. (LARAY DENZER)

SINGAPORE

Area: 710 sq km (274 sq mi)

Population (2009 est.): 4,954,000

Head of state: President S.R. Nathan

Head of government: Prime Minister Lee Hsien Loong

Like most other countries, Singapore was in recession in 2009, but government grants to subsidize the wage bills of employers managed to stave off some retrenchments, keeping unemployment under 5% for most of the year. The S\$20.5 billion (about U.S.\$13.8 billion) assistance package introduced in January included measures to encourage bank lending and spur employers to send workers for skills training. Thanks partly to these stimulus measures and to a faster-than-expected global recovery, economic contraction in 2009 amounted to only one-third of the level that had been feared at the beginning of the year. Still, the recession prompted a surge in the number of foreign workers applying for permanent residency in a bid to hang on to their jobs. On the property front, however, prices defied gravity, climbing back to near 2007 peaks and even setting new per-square-foot records in some districts. The price spiral, prompted by low interest rates, an influx of foreigners, and speculative buying, worried citizens and contributed to their unhappiness about the very visible increase in the foreign population in Singapore. More than one in three residents in the city-state were foreign-born in 2009. The government pledged to slow down the intake of foreigners, while at the same time it worked to raise labour productivity so that economic growth would not be overly compromised.

On the political front, Singapore witnessed a rare upheaval within its generally placid civil-society scene when a high-profile leadership tussle occurred at the Association of Women for Action and Research. A group of women, mostly hailing from the same church and apparently united in their opposition to homosexuality, ousted the incumbents, whom they accused of leading the organization away from its "original" purpose of advocating gender rights. Following weeks of strident accusations and the mass mobilization of supporters on both sides of the issue for an electoral showdown, the government finally stepped in to establish limits on civil-society activism. At the same time, the government reiterated that an existing law that criminalizes sex between men would not be repealed, although gays would be allowed to lead their private lives.

In April, in an operation that lasted 12 hours at the Singapore General Hospital, a team of doctors in Singapore became the first in Asia to perform a heart-liver transplant. A related issue involved the government's efforts to address a rise in the number of kidney-failure patients by introducing measures to reimburse organ donors for their expenses and lost income. These steps were carefully calibrated to ease the burden on donors while also discouraging organ trading. (CHUA LEE HOONG)

SLOVAKIA

Area: 49,034 sq km (18,932 sq mi)

Population (2009 est.): 5,418,000

Capital: Bratislava

Chief of state: President Ivan Gasparovic

Head of government: Prime Minister Robert Fico

The year 2009 in Slovakia was a more difficult one than expected; industrial production and exports fell dramatically amid the global economic crisis, and the unemployment rate soared to more than 12% in the second half of the year, a year-on-year increase of more than 4%. Domestic industry was also hit by a halt in January in gas supplies during the Russian-Ukrainian price dispute, which highlighted Slovakia's need for energy diversification.

Samuel Kubani—AFP/Getty Images

Slovaks show off their euros after collecting the bills from an automated teller machine in Bratislava's main square on January 1, the day that Slovakia formally joined the euro zone.

Despite the economic downturn, public support for Prime Minister Robert Fico and his Direction-Social Democracy (Smer-SD) party remained high, thanks partly to Slovakia's accession on January 1 to the euro zone. Slovakia was only the second Eastern European country—after Slovenia—to adopt the common currency. Exporters welcomed the move, particularly because it helped to promote stability amid the worldwide financial crisis. Politically, Smer-SD's popularity was demonstrated in two sets of elections: presidential polls in March and April and elections to the European Parliament (EP) in June. With Smer-SD support, Ivan Gasparovic was reelected as president, comfortably beating opposition candidate Iveta Radicova in the second-round runoff. In an effort to mobilize support, the Gasparovic campaign used anti-Hungarian rhetoric, goaded by Radicova's endorsement from the Party of the Hungarian Coalition (SMK), which represented Slovakia's largest ethnic minority.

In the EP elections, Smer-SD finished first, with 32% of the vote and 5 of the 13 seats. The three opposition parties—the Slovak Democratic and Christian Union (SDKU), SMK, and the Christian Democratic Movement (KDH)—each gained two seats. Meanwhile, Smer-SD's junior coalition partners—the Movement for a Democratic Slovakia (HZDS) and the Slovak National Party (SNS)—obtained one seat each. The latter's support appeared to be damaged by corruption scandals that led to

the replacement of several SNS ministers in 2009.

Already sore from the presidential election campaign, tensions between Slovaks and Hungarians reached a new high when on August 21 Bratislava banned Hungarian Pres. Laszlo Solyom from entering Slovakia. On that day Solyom was scheduled to travel to the Slovak border town of Komarno to attend the unveiling of a statue honouring a historic Hungarian king. The Slovak authorities found Solyom's planned visit offensive for several reasons, not least because it coincided with the anniversary of the 1968 invasion by Warsaw Pact troops (including Hungarian soldiers) that crushed Czechoslovakia's Prague Spring liberalization movement. Still, banning the president of another EU country was considered to be a major provocation, attracting international criticism and raising fears of further antagonism between the two countries.

(SHARON FISHER)

SLOVENIA

Area: 20,273 sq km (7,827 sq mi)

Population (2009 est.): 2,037,000

Capital: Ljubljana

Chief of state: President Danilo Turk

Head of government: Prime Minister Borut Pahor

Slovenia, the wealthiest of the Eastern European countries that had joined the European Union since 2004, fell into recession in the first quarter of 2009. Once the fastest-growing member of the euro zone, Slovenia became the worst-performing. Industrial production improved by August, which indicated that Slovenia was emerging from recession. It was expected that by year's end the economy would have contracted by 7.3% and unemployment would approach 10%.

On October 7 the European Commission initiated an excessive-deficit procedure for budgetary shortfalls above 3% of GDP for Slovenia and eight other EU countries. Slovenia's gap reached 5.5% by the end of 2009. Waning demand for Slovenian exports, which made up two-thirds of total GDP, lower tax income, and a government stimulus program swelled the deficit. The gov-

ernment had awarded some \$700 million in guarantees for bank loans to companies to improve liquidity.

Slovenia's long-running border dispute with Croatia neared resolution. The controversy had come to a head in December 2008 when Slovenia blocked Croatia's accession talks with the EU. Slovenia feared that documents submitted by Croatia prejudged the boundary between the two countries, which could have, among other points, restricted Slovenia's access to international waters and affected Koper, its busy Adriatic port. Slovenia ended its veto on Croatia's EU talks in September when an agreement on arbitration was announced. On November 2 a majority within the Croatian Parliament approved sending the dispute to international arbitration—a condition set by Slovenia. Two days later the countries' prime ministers signed an arbitration accord.

Slovenia led the Council of Europe from May through November. Slovenia's priorities for its presidency included bioethics, children's rights, the protection and integration into society of Roma and other minorities, and the promotion of democracy, the rule of law, and human rights in southeastern Europe. In August more than 400 politicians and economists from around the world addressed the economic crisis at the fourth Bled Strategic Forum, sponsored by the Slovenian government and the Centre for European Perspective.

On June 7, in an election with a record-low turnout (28%), voters selected seven representatives to the European Parliament and gave a boost to

the centre-right opposition. In Italy eight members of that country's native Slovenian minority were elected mayors in the Friuli-Venezia Giulia region.

Slovenia confirmed its first diagnosis of H1N1 influenza in June and its first death from the virus on November 3. More than 275 cases had been diagnosed by year's end.

Primož Kozmus, gold medalist in the hammer throw at the 2008 Summer Olympics, became the world champion in August. He was the first athlete from Slovenia to achieve both honours.

(JOSEPH VALENCIC)

SOLOMON ISLANDS

Area: 28,370 sq km (10,954 sq mi)

Population (2009 est.): 523,000

Capital: Honiara

Chief of state: Queen Elizabeth II, represented by Governors-General Sir Nathaniel Waena and, from July 7, Frank Kabui

Head of government: Prime Minister Derek Sikua

In 2009 the economy of the Solomon Islands began to derive significant benefits from the 2005 Foreign Investment Act, which allocated increased investment for fisheries, agriculture, mining, tourism, and engineering. This growth

South African Archbishop Emeritus Desmond Tutu helps to launch a Truth and Reconciliation Commission in the Solomon Islands on April 29.

George Merming/AP

offset significant declines in forestry revenues. The government granted a new gold mining license in central Guadalcanal, where significant reserves were identified. It also lodged claims with the UN for recognition of the Solomon Islands' extended continental shelf, where massive seafloor sulphide reserves were thought to exist.

The Regional Assistance Mission to Solomon Islands continued to guarantee the country's security and allowed the government of Prime Minister Derek Sikua to move forward with its reform program. A government white paper was created in an effort to generate debate on electoral reform, the development of stronger parties, and the creation of measures to limit "party hopping." A forestry bill was proposed to reduce the rate of logging to more sustainable levels.

In an attempt to confront parts of its recent past, the government released a report on the anti-Chinese riots of 2006. The Ministry for National Unity, Reconciliation, and Peace launched a Truth and Reconciliation Commission to heal some of the social divisions caused by the ethnic conflict that occurred between 1998 and 2003.

(CLUNY MACPHERSON)

SOMALIA

Area: 637,657 sq km (246,201 sq mi), including the 176,000-sq-km (68,000-sq-mi) area of the unilaterally declared (in 1991) and unrecognized Republic of Somaliland
Population (2009 est.): 9,133,000 (including roughly 3,700,000 in Somaliland); at the middle of the year, more than 500,000 refugees were in neighbouring countries and 1,300,000 were internally displaced
Capital: Mogadishu; Hargeysa is the capital of Somaliland

Head of state and government: Somalia's transitional government comprised Presidents Sheikh Aden Madobe and, from January 31, Sheikh Sharif Sheikh Ahmed, assisted by Prime Ministers Nur Hassan Hussein and, from February 14, Omar Abdirashid Ali Sharmarke

In 2009 fears that Somalia could become a breeding ground for terrorism escalated with the strengthening of al-Shabaab, an Islamist youth movement with ties to al-Qaeda. The Transitional

Federal Government (TFG), which had been shored up by support from the Ethiopian military, struggled to assert control over the country following the withdrawal of Ethiopian troops in January. The Ethiopians had originally entered Somalia in late 2006 to rout a fundamentalist Islamic movement known as the Islamic Courts Union (ICU). They remained to help Somalia's TFG battle a fierce insurgency, but many analysts said that their presence actually fueled support for hard-line Islamists. The Ethiopians left a contingent of 5,250 African Union (AU) peacekeepers in Mogadishu, the capital, who looked increasingly unable to halt the fighting. Though most analysts agreed that the peacekeepers were critical to the TFG's survival, many Somalis turned against the AU mission following an incident in February when a roadside bomb hit an AU truck and peacekeepers fired into the street, killing 39 civilians.

Following the Ethiopian withdrawal, moderate Islamist cleric Sheikh Sharif Sheikh Ahmed was elected president of the TFG. Sheikh Sharif was not a new face to Somalis—he was a top leader in the ICU, which in late 2006 brought Somalia its only window of peace in nearly 20 years—and many greeted his election with optimism. He was seen as a clear improvement over his predecessor, warlord Abdullahi Yusuf Ahmed, and he had the support of some moderate militia leaders. Yet al-Shabaab, believed to be several thousand fighters strong and in control of much of southern Somalia, opposed Sheikh Sharif.

In May Islamist groups, including al-Shabaab, battled the TFG for control of Mogadishu, raising fears that they would topple the TFG. After Sheikh Sharif appealed for help from international donors, the United States agreed to send 40 tons of weapons. U.S. Secretary of State Hillary Clinton met with Sheikh Sharif in Kenya in August and promised that additional support would be forthcoming.

In September a U.S. air strike, the latest in a series of targeted air strikes that had begun during the administration of Pres. George W. Bush, killed a top al-Qaeda operative, Saleh Ali Saleh Nabhan. He was suspected of having had a role in the 1998 bombings of U.S. embassies in Kenya and Tanzania. U.S. officials claimed that Nabhan was training al-Shabaab fighters in suicide bombing and served as a liaison to al-Qaeda in Pakistan. Days later, al-Shabaab suicide bombers killed 21 peo-

ple at an AU base in Mogadishu, including the deputy AU commander and 16 other peacekeepers. It was the deadliest attack on the AU force since 2007. In December a suicide bomber killed at least 15 people at a college graduation ceremony, including three TFG ministers.

Piracy continued to dominate international news stories on Somalia, with a record 214 attempted hijackings in 2009 (nearly twice the number reported for 2008), 47 of which were successful. The pirates were known to operate out of Puntland, in northeastern Somalia, an area with its own government thought to be complicit in piracy.

(STEPHANIE HANSON)

SOUTH AFRICA

Area: 1,220,813 sq km (471,359 sq mi)

Population (2009 est.): 49,321,000

Capitals (de facto): Pretoria (executive); Bloemfontein (judicial); Cape Town (legislative)

Head of state and government: Presidents Kgalema Motlanthe and, from May 9, Jacob Zuma

Following national and provincial elections on April 22, 2009, African National Congress (ANC) president Jacob Zuma was elected president of South Africa. In the elections the ANC won 65.9% of the national vote; the Democratic Alliance (DA), 16.66%; and the newly formed Congress of the People (COPE), 7.42%. The DA won the Western Cape with 48.78% of the vote, but the ANC took the remaining eight provinces, reducing the Inkatha Freedom Party in its former stronghold of KwaZulu-Natal to 20.52% of the vote. COPE became the major opposition party in five provinces.

In the election campaign the ANC promised to retain its targets of halving poverty and unemployment by 2014 and maintained that creating employment would be the core mandate for economic policy. The DA promised a basic income grant of 110 rand (about \$12) per month to all citizens earning less than 46,000 rand (about \$5,000) per year and that it would cut the tax on companies, support privatization, and review labour legislation. COPE concentrated mainly on what it claimed

were undemocratic practices in the ANC.

In February a framework agreement responding to the global economic crisis was reached between the government, labour, and business sectors, which reaffirmed a commitment to infrastructural spending as the core of a stimulus to growth and job creation. In his state of the nation address in June, Zuma committed the government to creating 500,000 job opportunities before the end of the year. Among changes in the postelection cabinet were the appointment of Pravin Gordhan, previously head of the South African Revenue Service, as finance minister to replace Trevor Manuel, who became head of the new National Planning Commission. By September the Congress of South African Trade Unions had become critical of Manuel's planning program, accusing him of wanting to become a "prime minister" and arguing that former trade unionist Ebrahim Patel, appointed minister of economic development, should have responsibility for macroeconomic policy. In November Gill Marcus, former chairperson of Absa bank and financial group, replaced Tito Mboweni as governor of the Reserve Bank.

The judgment that the National Prosecuting Authority (NPA) was politically motivated in its prosecution of Zuma (which catalyzed the recall of Pres. Thabo Mbeki in 2008) was overturned by the Supreme Court of Appeal in January, and charges of corruption, fraud, racketeering, and money laundering against Zuma were thus reinstated. On April 6, however, the NPA announced it was dropping the charges. It released transcripts of tape recordings between an NPA member and other parties that it said showed political interference in the decision to charge Zuma and errors of process. Zuma's supporters claimed that this vindicated their standpoint that Zuma was innocent of the charges, though the NPA made clear that the decision did not amount to an acquittal. Opposition parties subsequently protested the decision.

The Judicial Service Commission decided not to proceed with the charges raised by judges of the Constitutional Court against Western Cape Judge President John Hlophe of having improperly attempted to influence the Court. President Zuma appointed Sandile Ngcobo as chief justice to succeed Pius Langa, whose term had expired.

The contract of suspended commissioner of police Jackie Selebi was not

Construction workers strike outside the Soccer City stadium in Johannesburg after rejecting a wage deal offered by employers in July.

Karel Prinsloo/AP

renewed when it expired in July, and he was replaced by Bheki Cele, former minister for community safety in KwaZulu-Natal. Selebi's trial on charges of corruption began in October. In December 2008, Vusi Pikoli, suspended national director of public prosecutions, had been sacked for allegedly not paying enough attention to public security, though he claimed that his dismissal was related to his having charged Selebi with corruption. In August 2009, however, the North Gauteng High Court ruled that his dismissal was invalid. In November he was paid 7.5 million rand (about \$1 million) by the government to withdraw his court challenge contesting his dismissal.

Politician Helen Suzman (*see* OBITUARIES), the only Progressive Party MP from 1961 to 1974 and a veteran anti-apartheid campaigner, died on New Year's Day. Schabir Shaik, sentenced to 15 years in jail in 2005 after his conviction for fraud and corruption and accused by the judge of having a "generally corrupt" relationship with Zuma, was released from jail early in the year on the grounds that he was terminally ill, though the severity of his illness was widely doubted.

From midyear there were many strikes. These included a protracted strike by doctors over wages and conditions in hospitals, a weeklong strike over wages and benefits by construction workers involved in, among other things, building stadiums for the association football (soccer) World Cup games in 2010, and a weeklong strike by municipal workers over wages.

Economy. The economy was severely affected by the world recession. Having grown 0.2% in the third quarter of 2008, it shrank by 1.8% in the fourth quarter, 7.4% in the first quarter of 2009, and 2.8% in the second quarter,

recovering to 0.9% growth in the third quarter. Growth was 3.1% for 2008 as a whole. During 2009 nearly one million jobs were lost, and from July 2008 to July 2009, manufacturing production slumped by 13.7%.

Inflation, which had peaked at 13.6% in August 2008, fell during 2009 to 6.4% in August and was expected to average 5.9% through the year, inside the official target range. This permitted the Reserve Bank to make cuts of 5% in interest rates between December 2008 and August 2009. In 2008 the deficit on the current account of the balance of payments was 7.4% of GDP, a 36-year peak, but it eased during 2009.

Owing to the need for continued state spending in conditions of recession and lessened revenue, the 2009–10 budget deficit was projected in February to increase to 3.9% from an estimated 1% in 2008–09. By September the National Treasury was estimating a higher budget deficit due to a decline in revenue. The budget granted 13.6 billion rand (\$1.8 billion) in personal tax relief, and 12 billion rand (\$1.6 billion) was added over three years to social grants, expected to benefit some two million more people. Some 4 billion rand (\$535 million) was allocated to the expanded public works program, with a promise of more if necessary from a contingency fund. Total spending for 2009–10 was budgeted at 841 billion rand (\$109 billion).

Foreign Policy. Speaking to the UN General Assembly on September 23, President Zuma outlined a foreign policy in continuity with the Mbeki presidency and emphasized the importance of dealing with climate change. The South African government continued to monitor precarious situations in nearby countries, notably Zimbabwe. (*See Zimbabwe, below.*) (MARTIN LEGASSICK)

SPAIN

Area: 505,991 sq km (195,364 sq mi)

Population (2009 est.): 46,059,000

Capital: Madrid

Chief of state: King Juan Carlos I

Head of government: Prime Minister José Luis Rodríguez Zapatero

After officially entering into recession in the final quarter of 2008, the Spanish economy nose-dived in 2009. The year ended with GDP down by close to 4%, unemployment at nearly 18% (and at more than 27% among the country's immigrant population), and a budget deficit of almost 10% (compared with 3.8% in 2008). Spain not only was one of the worst-hit EU economies but also was expected to be one of the last to recover from the downturn; the Organisation for Economic Co-operation and Development predicted that the country would experience another year of negative growth and that unemployment would top 20% in 2010.

The ever-worsening economic reality shook the Spanish Socialist Workers' Party (PSOE) government out of its initial complacency. Prime Minister José Luis Rodríguez Zapatero opted for classic demand-side policies despite the skepticism of employers, the opposition Popular Party (PP), and some within

his own party (including respected Economy Minister Pedro Solbes, who was replaced in a major cabinet reshuffle in April). These policies included spending the equivalent of 2.3% of GDP in measures to stimulate the economy and create jobs, introducing subsidies for new car purchases, and extending welfare provision for the unemployed who had exhausted their entitlement to benefits. All this forced the PSOE into making a major U-turn on taxation; the 2010 budget approved in the fall included higher capital gains taxes, a 2% hike in the general value-added tax (VAT), and the elimination of a nearly \$600 across-the-board annual income-tax rebate that had been promised before the 2008 elections. In November the government unveiled a wide-ranging package of measures intended to transform the Spanish economy into one based on research and development, gender equality, and environmentally friendly and financially stable economic growth and competitiveness.

Given the perilous state of the economy, it was hardly surprising that the PSOE fared badly at the ballot box. The PP won an absolute majority in regional elections in Galicia in March and a convincing countrywide victory in the European Parliament elections in June, in which it took 42.2% of the vote as opposed to the Socialists' 38.5%.

These results provided a much-needed boost to the PP, which was reeling from the impact of the Gürtel case, a corruption scandal involving a network of companies that had obtained contracts amounting to more than \$25 million from PP-controlled administrations and the party itself since the late 1990s. Things only got worse for the party; by the end of the year, more than 60 PP members—including the party's former national treasurer (who had been forced to resign in July) and elected officials in four regions—were under investigation for offenses that included money laundering, bribery, and tax fraud. PP leader Mariano Rajoy's indecisive response to the scandal and inability to stamp his authority on regional party leaders undermined his

influence and electoral credibility. Another major corruption scandal was uncovered in Catalonia in October. This one involved both the PSOE and conservative nationalists, however, and showed that graft was by no means restricted to the PP. Opinion polls conducted that month showed that for the first time, corruption had overtaken terrorism in the ranking of citizens' concerns.

This result also reflected positive developments in the Basque Country and in the struggle against the armed separatists of Euskadi Ta Askatasuna (ETA). ETA remained active, causing small explosions in and beyond the Basque Country, injuring 65 people in a bomb attack on a Civil Guard barracks in July and killing three police officers in two separate incidents in the summer. The French and the Spanish continued to arrest dozens of suspected activists, including in April the suspected leader of the organization, the fourth person in that position to be captured in 11 months. Meanwhile, elections held on March 1 led to a historic change of government in the region. Although the ruling Basque Nationalist Party (PNV) received the most votes, it failed to win enough seats to reestablish its coalition government with other nationalist parties (not least because the radical nationalists linked to ETA were banned from standing for election, and their supporters cast almost 100,000 null votes). With the support of the other nonnationalist parties—above all the PP—the Basque Socialist Party was able to oust the PNV from power for the first time since Spain's return to democracy 30 years earlier. Many viewed this as a healthy sign of political normalcy in the divided region.

The year saw a marked improvement in Spanish-U.S. relations, which had been strained since Zapatero's unilateral decision to withdraw Spanish troops from Iraq in 2004. This new spirit of cooperation was reflected in Spain's positive and symbolically important response to U.S. requests for help in Afghanistan and in its bid to close the Guantánamo prison in Cuba. In October, in his first state visit to the United States since 2004, Zapatero informed U.S. Pres. Barack Obama that Spain would accept two prisoners from Guantánamo. Just a few days before, the Spanish parliament had approved the government's request to send a further 220 military personnel to join the 800 Spanish troops already serving in Afghanistan, and in December the

Pro-life demonstrators participate in a march held in Madrid on October 17 to protest proposed new legislation that would liberalize abortion laws in Spain.

Pedro Armestre—AFP/Getty Images

government again reacted positively to U.S. requests for further reinforcements from its NATO allies, despite polls showing that most Spaniards opposed increased military engagement in that country. (JUSTIN BYRNE)

SRI LANKA

Area: 65,610 sq km (25,332 sq mi)

Population (2009 est.): 20,238,000

Capitals: Colombo (executive and judicial); Sri Jayawardenepura Kotte (legislative)

Head of state and government: President Mahinda Rajapakse, assisted by Prime Minister Ratnasiri Wickremarajane

The year 2009 marked the end of Sri Lanka's civil war, which began in 1983 and caused up to 80,000 deaths and extensive suffering and displacement among the civil population. In May the Sri Lankan armed forces succeeded in capturing the final enclave of the rebel Liberation Tigers of Tamil Eelam (LTTE) in the north of the island. The LTTE's leader, Velupillai Prabhakaran, and other prominent figures died in the fighting, and surviving LTTE fighters were rounded up.

The armed victory and prospect of restored security throughout the country brought the United People's Freedom Alliance government of Pres. Mahinda Rajapakse tremendous popularity among the Sinhalese majority. This was reflected in subsequent victories in several provincial and local elections. Late in the year, however, President Rajapakse was challenged by Gen. Sarath Fonseka, former commander of the Sri Lankan military, in an election scheduled for Jan. 26, 2010. The war's conclusion left on the table the issues of whether and how to accommodate demands from the Tamil minority—major future challenges for the Sri Lankan government. There was, however, a clear commitment to promote economic development in the north and east in the hope of lessening resentment within the Tamil community.

Masses of civilians fled the final stages of fighting, and 280,000 were interned in government-run camps. Their treatment in the camps invoked criticism from international groups active in relief and resettlement as well as from governments and the press in the United States and Europe. While this criticism may have impinged on aid from the U.S. and the EU and affected trade preferences from the latter, ties with China and India continued to strengthen.

Ironically, economic growth, which had held up remarkably well during the long civil war, slumped in 2009 as the

global recession had a serious impact on the island. After growing at 6% in 2008, GDP was expected to rise by only 3% in 2009, although faster growth was expected in 2010. While the end of fighting engendered a national spirit of optimism and halted an outflow of private capital, Sri Lanka's garment and other industrial exports suffered badly as purchasing power in its principal markets dropped. The important tourist industry began to revive, however, as soon as the fighting ended. The government continued to run a large fiscal deficit, and foreign exchange reserves dropped to dangerously low levels. A \$2.6 billion loan from the International Monetary Fund that was agreed to in July helped to stabilize the country's economic position. (DONALD SNODGRASS)

SUDAN, THE

Area: 2,505,810 sq km (967,499 sq mi)

Population (2009 est.): 42,272,000, including about 250,000 refugees in Chad

Capital: Khartoum

Head of state and government: President and Prime Minister Lieut. Gen. Omar Hassan Ahmad al-Bashir

Government troops maneuver inside the war zone near the Sri Lankan town of Mullaittivu during a final offensive against the Tamil Tiger rebels in May.

Sri Lankan Government—Reuters/Landov

On March 4, 2009, the International Criminal Court (ICC) issued an arrest warrant for Sudanese Pres. Omar al-Bashir on seven counts of war crimes and crimes against humanity in Darfur—the first time that the tribunal had acted against a sitting head of state. Condemning the edict, Bashir expelled 13 international philanthropic organizations active in Darfur and throughout The Sudan, including Oxfam, Save the Children, and Doctors Without Borders. Later he announced the Sudanization of humanitarian work, which caught the government's own Humanitarian Aid Commission ill-prepared to take on relief responsibilities for Darfur and the transitional areas between north and south. In June, partly owing to U.S. Sen. John Kerry's intervention, the Sudanese government reversed its decision and allowed the return of philanthropic organizations on condition that they change their names and logos. Some analysts cynically observed that this tactic allowed the government to use international aid organizations to

limit Darfur fatalities while simultaneously curtailing further their already limited freedom of speech and action.

The African Union and the Arab League supported Bashir, arguing that the ICC's decision impeded peaceful settlement to the Sudanese crisis. Both organizations requested that the UN Security Council suspend the warrant, but to no avail. Meanwhile, Bashir continued to defy the ICC by frequent travels to friendly African and Arab countries, including Egypt, Eritrea, Ethiopia, Libya, Qatar, Saudi Arabia, and Zimbabwe.

Conflict, displacement, and insecurity persisted throughout the country. In Darfur hostilities continued between armed opposition factions, government armed forces, militias, and ethnic groups. The UN estimated that another 250,000 southern Sudanese had been displaced by interethnic fighting, bringing the total of internally displaced persons across the country to 4.9 million.

UN and local officials expressed apprehension that ongoing conflict could impede preparations for national elections, originally scheduled for July 2009 but postponed until April 2010. The elections were a crucial part of the 2005 Comprehensive Peace Agreement that ended more than two decades of civil war between the north and the south, but several hurdles would need to be overcome before polling day, the most important being the controversial results of the 2008 census. According to the director general of the Central Bureau of Statistics, the 10 states of southern Sudan now had only about 21% of The Sudan's total population. Thus, the allocation of assembly seats for southern Sudan dropped from 34% (based on the 1986 census) to 22%. These figures were rejected by leading Darfur movements and a number of political parties.

Although The Sudan's ruling party, the National Congress Party, and the southern Sudan People's Liberation Movement accepted the elections timetable, distrust permeated the political scene. With a record 68 political parties vying for positions, political dissension would surely escalate. Some southern officials claimed that their northern political rivals deliberately incited interethnic violence to obstruct national elections and represent the southern government as ineffectual. In November calls for the southern states to secede from The Sudan intensified as national First Vice Pres. Salva Kiir, the leader of southern Sudan, urged the south to split from the government.

Two significant deaths occurred. In February, The Sudan's most acclaimed author, Tayeb Salih, died in London. In May former president Gaafar el-Nimeiri (*see* OBITUARIES) died. He was head of state during 1969–85, a period book-ended by coups. (LARAY DENZER)

SURINAME

Area: 163,820 sq km (63,251 sq mi)

Population (2009 est.): 520,000

Capital: Paramaribo

Head of state and government: President Ronald Venetiaan, assisted by Prime Minister Ram Sardjoe

Suriname's president, Ronald Venetiaan, successfully held his fractious New Front Plus coalition together and provided overall stable governance in 2009. It was a trying year; buffeted by the global economic meltdown, the country's economic growth was expected to slow to 1.5%. The bauxite industry, a pillar of the economy and a major source of tax revenue, was especially hard-hit. Bauxite multinational corporation BHP Billiton's announcement in 2008 that it was proposing to pull out of Suriname further added to the gloom. The recession, the refusal of President Venetiaan, who was nearing the end of his third term, to contest another election, and the nonappearance of an appealing successor depressed the government's support.

At the close of 2009, some observers saw the political horizon darkening. The opposition Mega Combination, headed by the National Democratic Party (NDP), overtook the government coalition in the polls, and the NDP's leader, former dictator Dési Bouterse, announced his candidacy for president. Bouterse's prospects were complicated by a long-pending indictment for the murder of 15 political opponents in the 1980s. The same observers grumbled that if Bouterse's candidacy were to be blocked, the probable alternative, former president Jules Wijdenbosch (1996–2000), was almost as unattractive because of his past destabilizing management of the country.

Suriname continued to suffer the corrosive impact of organized crime and revenue losses resulting from illegal

gold mining. The year ended, however, with near-zero inflation.

(JOHN W. GRAHAM)

SWAZILAND

Area: 17,364 sq km (6,704 sq mi)

Population (2009 est.): 1,337,000

Capitals: Mbabane (administrative and judicial); Lobamba (legislative)

Chief of state: King Mswati III, assisted by Prime Minister Barnabas Sibusiso Dlamini

The beginning of 2009 was marked by economic uncertainty in Swaziland, which was experiencing the effects of the global recession. The recent shrinking of Southern African Customs Union benefits for the country had worsened the situation. Two major constitutional provisions were realized; a program of free primary education, which was to be introduced gradually beginning in 2010, was effected, and the Commission on Human Rights and Public Administration was appointed in September. The commission's fundamental role was to protect human rights and freedoms. It also constituted the Integrity Commission, to which politicians and top civil servants were required to declare their assets upon assumption of public office.

In October Jan Sithole, who had led the Swaziland Federation of Trade Unions since the mid-1980s, stepped down, and Mduduzi Gina was elected to succeed him as secretary-general. Mario Masuku, president of the banned People's United Democratic Movement (PUDEMO), who had been arrested under the Suppression of Terrorism Act soon after its promulgation in November 2008, was released from prison on September 22 on grounds of paucity of evidence. As chairman of the Southern African Development Community's politics, defense, and security committee, King Mswati played a prominent role in the attempt to facilitate dialogue between Madagascar's ousted president, Marc Ravalomanana, and his successor, Andry Rajoelina.

Official estimates put GDP growth at 1.9%. New antigraft legislation was being prepared because corruption continued to be a problem in both government and the private sector.

(NHLANHLA DLAMINI)

SWEDEN

Area: 450,295 sq km (173,860 sq mi)
Population (2009 est.): 9,290,000
Capital: Stockholm
Chief of state: King Carl XVI Gustaf
Head of government: Prime Minister Fredrik Reinfeldt

As a small, open, and export-oriented economy, Sweden suffered greatly from the global economic downturn in 2009. In fact, it was the most difficult year for the Swedish economy since World War II. The Finance Ministry estimated that GDP contracted by 5.2%, after having been at a virtual standstill the year before. The production of key Swedish exports, such as cars, trucks, specialty steel, household appliances, and forest products, diminished rapidly. Many companies, such as truck-making giant Scania, reduced both work hours and salaries to offset the sharply falling demand from abroad. The employees and unions reluctantly accepted these cuts to avoid job losses.

In spite of such measures, however, the most alarming feature of the Swedish economic crisis was rising unemployment. In a country where full employment had been the proud goal of all governments for decades, it was a significant defeat that the unemployment rate rose from 5.8% in July 2008 to more than 8% in the autumn of 2009. In its budget for 2010, the government projected that unemployment would reach more than 11% that year.

The government responded to the economic downturn by providing a massive fiscal stimulus package. The budget bill for 2010, moreover, included tax cuts on ordinary incomes as well as subsidies for municipalities and for the education and training of the unemployed. The Swedish central bank, the Riksbank, followed a highly expansionary monetary policy, reducing its benchmark interest rate, which had been more than 4% in the autumn of 2008, to a historically low 0.25%. The central bank also supported Swedish banks with generous lending facilities, although by autumn none of the banks had needed any formal state aid. Instead, the shareholders in three of the largest banks, Nordea, SEB, and Swedbank, approved capital increases.

Late in the year some indicators suggested that the worst of the Swedish economic crises was over and that the government might even have been overly pessimistic in its assumptions. Shares on the Stockholm stock exchange rose by almost 40% from January to October. The financial markets started to anticipate rising sales and profits in 2010 and beyond, after the "lost year" of 2009. Many economists believed that Sweden would be in a favourable position to resume growth once the international economy started to pick up. The European Commission recognized Sweden as one of the EU countries with the best public finances, with a deficit below the EU average, and the IMF predicted that it would be one of the few European economies to return to a growth of more than 1% in 2010.

Nevertheless, Prime Minister Fredrik Reinfeldt, leader of the Moderate Party, had won the 2006 election by promising to create more jobs, and he faced a clear risk of losing in the general elections of September 2010 if he did not deliver fully on his promises. His ruling four-party centre-right coalition was expected to face a united red-green opposition with Social Democratic leader Mona Sahlin as the candidate for prime minister. In autumn opinion polls, Sahlin and her coalition of the Social Democrats, the Greens, and the Left had a small but definite lead, receiving about 5% more supporters than the government alliance. Sweden's presidency of the EU in the second half of the year did not affect the government's position in the polls, although Sweden put a lot of effort into finishing the long-drawn-out process for concluding the EU's Lisbon Treaty, which was finally accepted by all EU member nations in the autumn.

In the winter it was announced that Sweden would celebrate a royal wedding in June 2010. The engagement of Crown Princess Victoria to her long-time boyfriend, Daniel Westling, was a major news item both nationally and internationally. Victoria was first in line to succeed her father, King Carl XVI Gustaf, to the throne.

A major disappointment for most Swedes in 2009 was the failure of the Swedish association football (soccer) team to qualify for the 2010 World Cup in South Africa. After this debacle the Swedish team received a new coach, Erik Hamrén, and concentrated on qualifying for the 2012 European championships to be held in Poland and Ukraine.

(MARTIN HAAG)

SWITZERLAND

Area: 41,285 sq km (15,940 sq mi)
Population (2009 est.): 7,739,000
Capital: Bern
Head of state and government: President Hans-Rudolf Merz

In 2009 Switzerland was forced to relax its banking secrecy for foreigners—though not for Swiss residents—under pressure from its European neighbours and the United States to clamp down on tax evaders. The small Alpine country was shocked to find itself on a "gray list" of uncooperative tax havens published in April by the Organisation for Economic Co-operation and Development (OECD) and protested that it had not been given prior warning and that the complaints were unjustified. Switzerland scrambled to have its name be removed from the list by signing double-taxation agreements in less than six months with the OECD's stipulated minimum of 12 countries, offering to share previously confidential bank documents.

The treaty with the United States stated that any request for administrative assistance had to clearly identify the person concerned, ruling out so-called fishing expeditions to net a wider range of potential tax fugitives. The signing of the treaty followed an agreement in August for Switzerland's biggest bank, UBS AG, to turn over information on 4,450 accounts of Americans suspected of holding undeclared assets. In return, U.S. tax authorities dropped demands for UBS to reveal the details of all 52,000 of its American clients and said that it would not enforce the "John Doe Summons" authorized by a U.S. court, which sought information on American customers of UBS. "This solution frees UBS and indirectly also our national economy from a sword of Damocles. At the same time, it respects our legal order and our sovereignty," Swiss Pres. Hans-Rudolf Merz told bankers.

Die-hard defenders of Swiss independence accused the government of buckling under U.S. pressure. Criticism intensified after Swiss authorities arrested filmmaker Roman Polanski on a 31-year-old U.S. arrest warrant stemming from his conviction for having had sexual intercourse with a 13-year-

A controversial campaign poster featuring minarets that resemble missiles standing on top of a Swiss flag flanked by a woman in a burka is displayed in Corseaux, Switz., in November; the poster was part of an effort by the right-wing Swiss People's Party to generate support for a referendum to ban the construction of minarets in Switzerland.

Fabrice Coffrini—AFP/Getty Images

old girl. Polanski was in Zürich to accept an award for his life's work when he was detained; his arrest prompted fury in France, where he resided.

Merz came under pressure to resign over his handling of a diplomatic spat with Libya. Relations between the two countries had soured in July 2008 when Geneva police arrested Hannibal al-Qaddafi, son of the Libyan leader, on allegations that he and his wife had beaten two servants. He was released several days later, but Libya cut economic and diplomatic ties to Switzerland and detained two Swiss businessmen, allegedly for immigration violations. The Swiss long resisted Libyan demands for an apology, but Merz ultimately traveled to Tripoli in August and apologized to Muammar al-Qaddafi, apparently without having consulted his cabinet colleagues. He returned without the Swiss businessmen, who were subsequently sentenced to 16 months' imprisonment.

Switzerland faced international condemnation after a November 29 referendum unexpectedly backed proposals by the right-wing Swiss People's Party to ban the construction of minarets. The 57% majority in favour of the ban was seen as an embarrassment for a country that hosts the European headquarters of the United Nations and where about 4% of the population was Muslim. On December 2 the Swiss parliament elected Economics Minister Doris Leuthard as president for 2010. She would be the third woman to serve as Switzerland's head of state.

Switzerland reluctantly ended the freezing of \$7 million in assets linked to Mobutu Sese Seko, the late president of Zaire (now the Democratic Republic

of the Congo), when a Swiss court ruled that the money had to be returned to his family. Switzerland stated that this was due to the inaction of Congolese authorities to recover the funds through the courts and the refusal of Mobutu's family to relinquish their claim to the assets, which allegedly had been pilfered from the mineral-rich African country. The Swiss government said that the ruling proved the need for changes in the law, scheduled for 2010, to allow the outright confiscation of illicitly gained assets held by "politically exposed people."

Switzerland was less affected by the economic recession than some other industrialized countries. A government expert group said that it expected GDP to shrink by 1.7% in 2009 and to recover slightly to 0.4% in 2010. It predicted that unemployment, hovering just under 4%, would rise.

(CLARE KAPP)

SYRIA

Area: 185,180 sq km (71,498 sq mi)

Population (2009 est.): 21,763,000 (including 1,200,000 Iraqi refugees)

Capital: Damascus

Head of state and government: President Bashar al-Assad, assisted by Prime Minister Muhammad Naji al-Otari

Global financial difficulties led to a sharp downturn in industrial activity in

Syria in early 2009. State officials responded by raising duties on cloth and thread imports and setting up a commission to encourage exports. In March a local stock market, the Damascus Securities Exchange, opened its doors. Six companies—four banks, a publishing and marketing group, and a transportation firm—were listed on the exchange, and four brokerage houses were authorized to trade shares. Prime Minister Muhammad Naji al-Otari announced at the end of March that no state employees or public-sector workers would be laid off as a result of the economic slump and that steps to expand agriculture along the Euphrates River were being planned. Nevertheless, growing unemployment sparked a jump in armed robberies and other violent crimes around Aleppo.

In April the Muslim Brotherhood pulled out of the opposition National Salvation Front (NSF), headed by former vice president 'Abd al-Halim Khaddam. The Muslim Brotherhood's London-based general supervisor, 'Ali Sadr al-Din al-Bayanuni, attributed the withdrawal to persistent criticism of the organization by liberals inside the NSF, as well as to disagreements over the best way to respond to Israel's 2008 invasion of the Gaza Strip. Sheikh Mahmud Kafaru, an influential religious figure with close ties to the regime, was arrested in early May on charges of having held unauthorized talks with Western diplomats. A month later the Islamic television station Mihrab al-Sham was ordered to cease broadcasting, despite its links to influential state-affiliated religious scholars. Controversy erupted in June over a proposed personal status law that would have mandated greater uniformity across religious communities on matters of marriage, inheritance, and child custody. Prime Minister Naji al-Otari quickly withdrew the draft law, calling it a "working paper." Pres. Bashar al-Assad in October issued a decree that prohibited smoking in restaurants, movie houses, schools, health centres, and other public places.

Relations with Saudi Arabia turned from icy to lukewarm as the year passed. President Assad met with the head of the Saudi intelligence service in February and then dispatched Foreign Minister Walid al-Mu'allim to Riyadh. Saudi Foreign Minister Sa'ud al-Faisal returned the visit in early March. President Assad traveled to Jiddah in September to attend the opening of the King 'Abdullah University of Science and Technology. King 'Abdullah then

capped the rapprochement by flying to Damascus in early October. During the visit Syria's minister of finance told reporters that taxes on Saudi imports would be eliminated as a way to stimulate bilateral trade.

Improvements in relations with Turkey were more pronounced. New economic protocols were signed throughout the year. In April unprecedented joint military exercises took place, and an agreement was signed to augment cooperation between the Syrian and Turkish defense industries.

Meanwhile, Syria's relations with Iraq took a nosedive. Iraqi Prime Minister Nuri al-Maliki discussed collaborative measures to improve border security with President Assad during a trip to Damascus in August, and the two leaders set up a council to oversee combined economic, cultural, and security projects. In early September, however, a cluster of bombings in Baghdad prompted Iraqi officials to accuse Syria of having provided safe haven for the Ba'thist militants responsible for the attacks. Iraqi Foreign Minister Hoshiyar Zebari infuriated Damascus by demanding that the United Nations look into the incident by forming a commission similar to the one that was investigating the assassination of former Lebanese prime minister Rafiq al-Hariri. (FRED H. LAWSON)

TAIWAN (REPUBLIC OF CHINA)

Area: 36,190 sq km (13,973 sq mi)

Population (2009 est.): 23,069,000

Capital: Taipei

Chief of state: President Ma Ying-jeou

Head of government: Presidents of the Executive Yuan (Premiers) Liu Chao-shiuan and, from September 10, Wu Den-yih

In 2009 Taiwan (Republic of China) continued its economic and political opening to China. After breakthroughs in 2008 that involved increasing Chinese tourism in Taiwan and expanding direct flights and trade between the two countries, the administration of Pres. Ma Ying-jeou announced in March that it intended to negotiate and sign the Economic Cooperation Framework Agreement (ECFA). This agreement, which would lower tariffs between Taiwan and China, was bitterly opposed

by the opposition Democratic Progressive Party (DPP) on grounds that it would harm Taiwan's economy and dilute its sovereignty. The DPP insisted that the ECFA be ratified only by a national referendum, while the Ma administration promised to consult with Taiwan's legislature.

While signing of the ECFA appeared to be delayed until 2010, Taiwan opened 192 sectors of its economy to direct Chinese investment in late June. Chinese investors were also permitted to purchase real estate in Taiwan, and institutional investors (known as Chinese qualified domestic institutional investors) were allowed to invest in Taiwan's stock market. Rounding out this series of economic breakthroughs, Taiwan and China's financial regulators in November signed a memorandum of understanding on financial services that would eventually allow Taiwanese securities firms, banks, and insurance companies to set up operations in China, and vice versa.

Domestically, the ruling Kuomintang (KMT) suffered political attrition as three of its lawmakers were forced from office. Longtime legislator Diane Lee resigned in early 2009 after it became clear that she had never renounced her U.S. citizenship. Two other KMT legislators stepped down after they were convicted of electoral fraud. While the KMT won the by-election to replace Lee in one of its Taipei strongholds, it did so by an unexpectedly low margin. Further signs of electoral weakness came when the KMT lost a by-election held in rural Yunlin county, where a DPP political newcomer achieved a landslide victory over a local factional candidate.

Meanwhile, Premier Liu Chao-shiuan was forced to resign in early September to take responsibility for the administration's much-criticized response to a devastating typhoon in August. Typhoon Morakot—the worst natural disaster to hit Taiwan since the massive earthquake of 1999—claimed the lives of more than 600 people, including nearly 500 plains aborigines in the village of Hsiao-lin. Liu was replaced as premier by Wu Den-yih, a former mayor of Kaohsiung and a Nantou county legislator.

In the aftermath of Typhoon Morakot, the Dalai Lama was allowed to make a rare religious and humanitarian visit to Taiwan despite objections from China. Although Uighur human rights activist Rebiya Kadeer (*see* BIOGRAPHIES) was not granted a visa to visit Taiwan, a doc-

umentary about her life, entitled *The Ten Conditions of Love*, was shown across Taiwan on October 1, China's National Day. To show their displeasure, Chinese tourists boycotted Kaohsiung because its mayor, Chen Chu, had invited the Dalai Lama to visit the city and had screened the Kadeer documentary at a city-sponsored film festival.

The corruption trial of former president Chen Shui-bian, which began in March, was the subject of much international and domestic criticism. Chen had been detained without bail since November 2008. Observers expressed concerns over the fairness of the trial, particularly after news emerged that prosecutors had performed a skit satirizing Chen at a Lunar New Year's party; many also raised objections over Chen's being held in solitary confinement throughout the trial. Chen labeled himself a victim of political persecution and, even before the court proceedings got under way, stated that the verdict and sentence had been "already determined." He was convicted and sentenced to life in prison in September. Chen's wife, Wu Shu-chen, was also found guilty of corruption and given a life sentence. Both Chen and Wu were appealing their convictions.

The Ma administration claimed a diplomatic victory in May when Taiwan, after reaching an agreement with China, was able to send observers to the World Health Assembly, the general policy-making body of the World Health Organization; the observers attended the assembly under the name "Chinese Taipei." The significance of this was that for the first time in decades, Taiwan was able to participate in the deliberations of a UN body, albeit not as a formal member.

In keeping with its new low-key diplomatic approach, Taiwan also abandoned its annual attempt to rejoin the UN. Relations with the U.S. improved in November as Taipei agreed to permit expanded imports of U.S. beef, despite widespread fears in Taiwan that such beef was unsafe.

Taiwan's export-oriented economy, which was severely affected by the ongoing global economic downturn, contracted 4.9% in 2009. Despite increased export orders in the second half of the year, the unemployment rate hovered above 6%. Consumers received some relief as the consumer price index declined by 1.84% and the Ma administration issued consumer vouchers amounting to more than \$2 billion. (MICHAEL R. FAHEY)

TAJIKISTAN

Area: 143,100 sq km (55,300 sq mi)

Population (2009 est.): 6,952,000

Capital: Dushanbe

Chief of state: President Imomali Rakhmon

Head of government: Prime Minister Akil Akilov

Though Tajikistan's financial structure was largely protected from the direct effects of the global economic crisis because of its weak integration into the international financial system, in 2009 the country experienced very severe secondary effects. Tajikistan's national economy was heavily dependent on remittances from labour migrants working abroad, and these sharply declined as migrants lost their jobs owing to the spread of the economic downturn in Russia and Kazakhstan. By the end of March, remittances were down an estimated 30%, with a 40% reduction expected by year's end.

The Tajik government drafted a package of anticrisis measures, but most of them, while highly beneficial if implemented, were designed for future needs. Among the long-term proposals was a revival of the vocational-technical education system, which could provide young people with much-needed technical skills. For immediate relief, Tajikistan turned for help to the international community, using the country's position on the front line with Afghanistan and the danger posed if the Afghan insurgency spread across the border. A number of major international financial institutions, including the International Monetary Fund, the World Bank, the Asian Development Bank, and the European Bank for Reconstruction and Development, provided additional assistance, including budget support. Tajik Pres. Imomali Rakhmon told the UN General Assembly in September that the wealthy and developed countries that had caused the financial crisis should help less-developed countries overcome its effects. Specifically, he asked that debts be partially written off that were accumulated as a result of the crisis. An IMF official visiting Tajikistan at the time retorted that it was the responsibility of the government of every country to manage its own economy.

Effects of the crisis became increasingly apparent as the crime rate rose. According to official law-enforcement sources, the crime rate increased 11.6% from January to August. September saw a wave of attacks on currency exchanges, some resulting in the killing of employees. In July a shoot-out between security officers and what was officially described only as an "armed band" took place near Tavildara in north-central Tajikistan, but the importance of this region to the Islamist opposition during the 1992–97 civil war led to speculation that the disturbance might have been connected to the possible return to the area of Mullo Abdullo, a prominent Islamist field commander. Members of the militant extremist Islamic Movement of Uzbekistan were believed to be crossing the border from Afghanistan into Tajikistan, raising fears that the influence of extremists in a society shaken by the effects of the economic downturn might grow. (BESS BROWN)

TANZANIA

Area: 945,090 sq km (364,901 sq mi)

Population (2009 est.): 41,049,000

De facto capital: Dar es Salaam; only the legislature meets in Dodoma, the longtime planned capital

Chief of state and head of government:

President Jakaya Kikwete, assisted by Prime Minister Mizengo Pinda

In 2009 Tanzania played an important role in regional diplomacy. In November the country hosted the 10th anniversary celebrations of the East African Community (EAC), which culminated in the signing of the Common Market Protocol and the laying of the foundation stone for the new EAC headquarters in Arusha.

In the October 25 elections for village leaders and local representatives, the ruling Revolutionary Party of Tanzania (CCM) won a landslide victory, gaining a colossal 93.7% of the vote. President Kikwete dismissed suggestions from the opposition that the elections were flawed.

Like other East African states suffering from the effects of the global economic downturn, Tanzania experienced weakened demand for exports of goods (cash

crops) and services (tourism) and a contraction of foreign investment. GDP growth dropped from 7.1% in 2008 to 4–5% in 2009. The country still ranked in the lowest 10% of the world's economies in terms of annual per capita income. According to Omar Yusuf Mzee, deputy minister for finance and economic affairs, at least 16.5% of the population lived in abject poverty, while a slightly better-off 35.7% lived in "average poverty." The government's poverty-reduction strategy prioritized the agricultural sector, which accounted for more than 40% of GDP, 85% of exports, and 80% of the workforce. In the industrial sector, gold mining was increasingly important; Tanzania became Africa's third largest gold producer. In June the World Bank approved a \$50 million loan for a mineral-resources project to improve the socioeconomic impact of mining and to enhance local and foreign investment.

While the government paid lip service to its war on corruption, leading officials examined the difficulties in curbing financial malfeasance. Prime Minister Mizengo Pinda conceded that corruption was a difficult problem to overcome. One analyst argued that the low incomes of many Tanzanians made it necessary for them to steal from the workplace to meet their basic survival needs. In his view the most effective remedy would be to provide better economic incentives. President Kikwete blamed foreign countries for the persistence of corruption in Tanzania and singled out the United Kingdom for failing to respond to his government's request for assistance in corruption cases involving U.K.-based companies. Nevertheless, the government registered some success in pursuing graft cases; two former ministers, Basil Mramba (finance) and Daniel Yona (energy and minerals), were tried on charges of abuse of office.

Throughout the year the government sought to mitigate the harm done to the country's image by the spate of murders of albinos, whose body parts were used in traditional medicine to make good-luck charms and potions. In January the government banned traditional healers, but this overlooked the fact that healers purportedly treated 30% of Tanzania's population. More than 90 people, including four police officers, were charged with killing albinos or trading in their body parts. Meanwhile, to fight prejudice against albinos, in 2008 Prime Minister Pinda had appointed an albino woman, Al-Shymaa J. Kwegyir, as an MP. (LARAY DENZER)

THAILAND

Area: 513,120 sq km (198,117 sq mi)
Population (2009 est.): 65,998,000
Capital: Bangkok
Chief of state: King Bhumibol Adulyadej
Head of government: Prime Minister Abhisit Vejjajiva

In Thailand the year 2009 began amid great political uncertainty following the December 2008 ruling by the Constitutional Court that dissolved the People's Power Party (PPP)—a reincarnation of former prime minister Thaksin Shinawatra's Thai Rak Thai Party (TRT)—on account of electoral fraud. The ruling forced PPP leader Somchai Wongsawat to resign as prime minister, and the parliament subsequently chose Abhisit Vejjajiva of the anti-Thaksin Democrat Party to succeed him. Abhisit, however, was unable to restore much-needed political stability to the country; in fact, his assumption of power as a nonelected prime minister made Thailand all the more polarized between the so-called yellow shirts—anti-Thaksin royalists who were mostly urban-based—and the pro-Thaksin, largely rural-based red shirts. The latter group

disputed the political independence of the Constitutional Court, which had dissolved the TRT in a 2007 ruling, and contested Abhisit's choice of Kasit Piromya, a strong supporter of the yellow shirts, as foreign minister.

The rising tensions erupted in March when the red shirts, who formed a populist movement called the United Front for Democracy Against Dictatorship (UDD), staged a massive protest in Bangkok. In April the protesters moved to Pattaya, south of Bangkok, where they forced the cancellation of a summit meeting of the Association of Southeast Asian Nations. Deeply embarrassed, Abhisit declared a state of emergency and used military force to quell the demonstrations; at least two people were killed during the crackdown. An assassination attempt on yellow-shirt leader Sondhi Limthongkul exacerbated the crisis. On September 19, which marked the third-year anniversary of the military coup that drove Thaksin from power, the UDD staged another large-scale demonstration in Bangkok and called on Abhisit to resign; troops were again deployed, but the protest ended peacefully.

In parliamentary by-elections held in April and June, the Phuea Thai Party—the main pro-Thaksin opposition party—gained two seats, and in October former prime minister and army chief Chavalit Yongchaiyudh, who was regarded by some as a proxy for Thaksin, joined the Phuea Thai. The yellow shirts, for their part, founded the New Politics Party and elected Sondhi its leader.

In September Thailand's 81-year-old King Bhumibol was hospitalized, reportedly with pneumonia. He was released the following month and declared to be in "satisfactory" health.

On the foreign relations front, Thailand faced international criticism in January following reports that its military had mistreated Muslim refugees from Myanmar (Burma) and Bangladesh. In April, Thai and Cambodian troops clashed near the Temple of Prear Vihear—a source of long-standing land disputes between the two countries; the skirmish left two Thai soldiers

dead. In November Thaksin was made an economic adviser to Cambodian Prime Minister Hun Sen. Thailand responded by recalling its ambassador. At the end of the year, Thailand again raised international ire when it forcibly repatriated 4,000 Hmong refugees to Laos.

The economy remained sluggish. The tourist industry, a major source of income for Thailand, was negatively affected by the persistent political unrest and by the rapid spread of the H1N1 flu, which by October had claimed more than 184 lives.

(YOSHINORI NISHIZAKI)

TOGO

Area: 56,785 sq km (21,925 sq mi)
Population (2009 est.): 6,032,000
Capital: Lomé

Chief of state: President Faure Gnassingbé, assisted by Prime Minister Gilbert Houngbo

Positioning for Togo's 2010 presidential election began in early 2009 when on January 29 the two main opposition parties, Gilchrist Olympio's Union of Forces for Change (UFC) and Yawovi Agboyibo's Action Committee for Renewal (CAR), announced that they would unite behind one candidate. They also agreed to boycott voting on changes to the electoral code. The bill was, however, passed by the National Assembly and signed into law by the president on June 30. On August 21 deputies from all parties unanimously approved a bill defining eligibility requirements for the election, stipulating that all presidential candidates were to be in good standing with tax authorities and were to have renounced any nationality other than Togolese.

Former defense minister Kpatcha Gnassingbé, brother of Pres. Faure Gnassingbé, was arrested on April 15 while he was attempting to seek refuge at the U.S. embassy. He was accused of having plotted a coup with several senior military officers. On April 17 police invited the public to see weapons allegedly found at Kpatcha's house. Police announced on May 1 that they had detained 10 civilians, as well as another Gnassingbé brother, Essolizam, for complicity in the alleged plot. On May

Demonstrators demand the resignation of Thai Prime Minister Abhisit Vejjajiva as they stage a protest outside the venue for the ASEAN summit held in Pattaya in April.

David Longstreath/AP

Xinhua/Landov

Police in Lomé, Togo, display weapons on April 17 that allegedly were found at the house of Kpatcha Gnassingbé, who was arrested for having plotted a coup against his brother, Pres. Faure Gnassingbé.

28 the president announced that a truth, justice, and reconciliation commission would be created to investigate the violence that gripped the country following the death of Pres. Gnassingbé Eyadéma in 2005.

On June 23 the National Assembly abolished the death penalty. Togo was the 15th state of the African Union to do so. (NANCY ELLEN LAWLER)

TONGA

Area: 748 sq km (289 sq mi)
Population (2009 est.): 103,000
Capital: Nuku'alofa
Chief of state: King Siaosi (George) Tupou V
Head of government: Prime Minister of Privy Council Feleti Sevele

The rebuilding of Tonga's capital, Nuku'alofa, which was destroyed during riots in 2006, continued in 2009 with funding from China, Australia, and New Zealand and additional civil and infrastructural work provided by the Asian Development Bank. Aid funding was offset by falls in revenue from overseas remittances, the amount of which typically totaled \$96 million an-

nually but had dropped by 10% owing to the global recession. In addition, government tax revenues were expected to plummet by 8% as a result of lower levels of spending and a decline in imports. Overall GDP growth was likely to fall to 0.5% for fiscal year 2008–09. Hopes were dashed when Nautilus Minerals experienced difficulty raising funds for the seabed mining of 10 massive sulfides systems.

To the delight of pro-democratic forces, the Commission on Constitutional and Electoral Reform produced its comprehensive and radical constitutional reform recommendations in mid-November. Under the proposals, Tonga would remain a constitutional monarchy; however, the king and Privy Council would no longer be part of the executive, the king would no longer independently appoint the prime minister or cabinet ministers, and elections would occur under a new single transferable voting system.

Tonga went into mourning on August 6 after an interisland ferry, *Princess Ashika*, carrying 127 people, sank; 74 passengers lost their lives. A Royal Commission appointed to consider the ferry's loss revealed that the ferry was not designed to operate in open seas, had not been inspected by qualified marine engineers, and was known to be in very poor structural condition when it was sent on its interisland journey.

(CLUNY MACPHERSON)

TRINIDAD AND TOBAGO

Area: 5,155 sq km (1,990 sq mi)
Population (2009 est.): 1,302,000
Capital: Port of Spain
Chief of state: President George Maxwell Richards
Head of government: Prime Minister Patrick Manning

In January 2009 Moody's Investors Service declared that Trinidad and Tobago's financial outlook was stable and that the country was well prepared to weather the global economic slowdown. The international credit-rating agency cited as strengths the country's net creditor position, diversified energy sector, prudent fiscal policies, and good debt ratios.

One victim of the economic slump was CL Financial Group, the largest conglomerate in Trinidad and Tobago; the government was forced to extend a bailout package to the group in January after the conglomerate fell into financial distress. CL Financial was involved in insurance, banking, real estate, and other businesses throughout the Caribbean and elsewhere. The group's main problem concerned its insurance subsidiary, the Colonial Life Insurance Co. (CLICO), which was said to be billions of dollars in arrears on its statutory fund to protect policyholders. In exchange for providing funds to CL Financial, the government took an equity interest in CLICO.

Trinidad and Tobago was in the international spotlight in April when it hosted U.S. Pres. Barack Obama and other heads of government at the Fifth Summit of the Americas, held in Port of Spain; the visit by Obama marked his first trip to the Caribbean as the U.S. head of state. In November, Trinidad and Tobago again hosted a gathering of world leaders when it presided over the biennial Commonwealth Heads of Government Conference. (DAVID RENWICK)

TUNISIA

Area: 163,610 sq km (63,170 sq mi)
Population (2009 est.): 10,272,000
Capital: Tunis
Chief of state: President Gen. Zine al-Abidine Ben Ali
Head of government: Prime Minister Mohamed Ghannouchi

In the Tunisian presidential and parliamentary elections held on Oct. 25, 2009, incumbent Pres. Zine al-Abidine Ben Ali was elected to a fifth term, as expected, and his party, the Democratic Constitutional Assembly (RCD), confirmed its hold over the Chamber of Deputies, the lower house of parliament. There was speculation that the 73-year-old president's fifth term might be his last, given the constitution's upper limit of 75 years of age for prospective candidates. Although there were three other candidates, the two who might have threatened Ben Ali's hegemony, Nejib Chebbi and Mustapha Ben Jaafar, had been ex-

Fethi Belaid—AFP/Getty Images

Supporters of Tunisian Pres. Zine al-Abidine Ben Ali hold placards as he arrives in the port city of Rades to give a speech at the beginning of his reelection campaign in October.

cluded by amendments to the constitution passed in 2008, changes that had ostensibly been made to ease the candidate registration requirement.

Although the political scene remained unmarred by violence during the year, there were reminders of what could happen: in early 2009 three men—a Tunisian, a German, and, in absentia, Kuwait-born Pakistani Khalid Sheikh Mohammed—were tried in Paris for the 2002 synagogue bombing in Jerba (Djerba). U.S. Gen. David Petraeus, head of the U.S. military's Central Command, told a U.S. congressional committee in April that four of the recent suicide bombers in Iraq had been Tunisian and that a network had been reactivated in Tunisia six months earlier to recruit militants for attacks in Iraq and Afghanistan. Tunisia also sought the repatriation of two Tunisian prisoners held in U.S. military facilities, one at Bagram, Afg., and the other at Guantánamo Bay, Cuba, who had been charged in absentia for terrorism offenses.

Despite objections from the European Court of Human Rights, European states persisted in returning illegal migrants to Tunisia. Italy sent back five migrants during the year, and all of them were subsequently sentenced to prison. Despite minor amendments, Tunisia's 2003 antiterrorism law continued to be used to imprison the regime's opponents, especially those who sympathized with Salafi jihadism. By 2009 as many as 1,200 persons had been sent to prison under the law. Sadok Chourou, the former leader of the banned Islamist political party Al-Nahdah, was sentenced to an addi-

tional year in prison for a new offense one month after his release in January from an 18-year sentence.

Outspoken Muslim cleric Sheikh Yusuf al-Qaradawi visited Kairouan in May, despite his past criticisms of the Tunisian government. In June the Tunisian journalists' union submitted to the government a memorandum complaining of official harassment. In Middle Eastern relations, Tunisia remained a member of the moderate Arab camp, standing with Saudi Arabia, Jordan, and Egypt in their confrontations with Iran. Tunisia also retained good relations with France, obtain-

ing support for a nuclear power station, to be completed by 2020.

(GEORGE JOFFÉ)

TURKEY

Area: 785,347 sq km (303,224 sq mi)

Population (2009 est.): 71,983,000

Capital: Ankara

Chief of state: President Abdullah Gul

Head of government: Prime Minister Recep Tayyip Erdogan

Turkey's international standing was enhanced when the country took its seat as a nonpermanent member of the UN Security Council on Jan. 1, 2009. Turkey was also a member state of the Group of 20 (G-20) and sent representatives to the G-20 summit meetings held in London and in Pittsburgh during the year. In spite of these successes, the ruling conservative Justice and Development Party (AKP) lost ground in the local government elections held on March 29. The AKP won 39% of the votes—down from its 42% total in the 2004 local elections and the 47% it won in the 2007 general elections—while the two parties of the Turkish nationalist opposition, the Republican People's Party and the Nationalist Action Party, each improved on its past performances. The Kurdish nationalist Democratic Society Party consolidated its

dominant position in the southeastern provinces. The local government elections were followed by a government reshuffle on May 1. Prime Minister Recep Tayyip Erdogan's foreign policy adviser, Ahmet Davutoglu, became foreign minister, replacing Ali Babacan, who was appointed deputy prime minister in charge of the economy.

Relations between the government and the military were strained by an expanding investigation into an alleged military plot to overthrow the government. In October 2008, charges had been brought against 86 defendants, including a number of high-ranking officers. While most of the officers arrested were subsequently released, 56 of the 86 defendants accused of having instigated the so-called Ergenekon plot remained in prison as new charges were added to the original indictment.

The National Security Council recommended in August that the government continue to implement its policy of strengthening the unity of the nation—i.e., of fulfilling at least some Kurdish aspirations. In a message released to the press in August, however, Gen. Ilker Basbug, the Turkish armed forces chief, declared that the military

Carrying a banner depicting the image of the founder of the Republic of Turkey, Kemal Atatürk, protesters march in Ankara on April 18, following new arrests in an alleged plot to overthrow the government; among the protesters were many university students and teachers, who were alarmed that a number of leading academics had been charged with involvement in the plot.

Adem Altan—AFP/Getty Images

remained opposed to any change in the constitution that would specify Kurdish rights and to a general amnesty for members of the militant Kurdistan Workers' Party (PKK). Although Erdogan announced in November a plan to allow the use of the Kurdish language in broadcast media, at the end of the year the Constitutional Court disbanded the Democratic Society Party, citing ties with the PKK.

On October 10, Turkish Foreign Minister Ahmet Davutoglu joined his Armenian counterpart, Edward Nalbandian, in signing two protocols that called for the establishment of full diplomatic relations and the opening of the frontier between the two countries. Achieving those goals remained problematic, however, even if the protocols were ratified by both countries' parliaments, as opposition to the protocols emerged on numerous fronts. Turkey's relations with Syria and Iraq were upgraded to "strategic partnerships," and visa-free travel between Turkey and Syria came into force in September. Relations with Israel deteriorated. On January 29, Erdogan quit a panel at the World Economic Forum in Davos, Switz., complaining that he had not been allowed to respond to a speech by Israeli Pres. Shimon Peres rejecting Turkish criticism of the Israeli operation in Gaza. In October, Turkey withdrew at the last moment an invitation to the Israeli air force to take part in joint maneuvers in central Turkey.

U.S. Pres. Barack Obama visited Turkey on April 6–7 and expressed support for Turkey's aspirations to join the EU. The EU annual report on Turkey's progress praised the government's Kurdish and Armenian initiatives while drawing attention to shortcomings in human rights. In response to the report, Egemen Bagis, Turkey's minister for EU affairs, outlined a program of legislation aimed at meeting some of the EU's demands.

The effects of the global recession were felt in Turkey throughout 2009. GDP contracted by 7% year-on-year in the second quarter; the volume of foreign trade fell by 36% in the first nine months; and the unemployment rate increased from 10% to 13% by the end of July. However, the index of the Istanbul Stock Exchange more than doubled from a low of 26,864 at the beginning of the year to 59,093 by November 5, which suggested that in Turkey the worst of the economic crisis was over. (ANDREW MANGO)

TURKMENISTAN

Area: 488,100 sq km (188,500 sq mi)

Population (2009 est.): 4,885,000

Capital: Ashgabat

Head of state and government: President Gurbanguly Berdymukhammedov

In March 2009, Pres. Gurbanguly Berdymukhammedov announced that the global financial crisis was affecting Turkmenistan (despite the country's lack of integration into the world financial system) because the volume of exports had been reduced. The steps the government had already taken to mitigate the effects of the crisis included issuing redenominated banknotes, creating a stabilization fund, and seeking to make the Turkmen economy even less dependent on the outside world. This last endeavour was being made easier, Berdymukhammedov noted, because Turkmenistan had no foreign debts. In June, however, the country received a \$3 billion loan from China to develop the South Yolotan natural gas deposit, from which gas would be exported to China through a new pipeline that opened in December.

Turkmenistan also expressed interest during the year in participating in the Nabucco pipeline project, an international scheme to export gas to Europe via Iran, bypassing Russia. Foreign observers suggested that Turkmen interest was at least partly intended to irritate the Russian state-owned energy giant Gazprom. In the first half of 2009, there were several disagreements between the two countries over gas deliveries from Turkmenistan to Russia, but by October the disputes had been resolved, and at the end of the year, deliveries were set to begin in January 2010.

In April Berdymukhammedov sought to defuse the dispute between Central Asian states over water use by offering gas and electricity to Turkmenistan's neighbours at a meeting of the International Fund to Save the Aral Sea. (See Map on page 237.) He angered Tajikistan, however, by supporting Uzbekistan in insisting that construction of any large hydropower projects in upstream states be subject to regional consent and approved by independent international experts. On April 13 Berdymukhammedov signed a decree

setting up an interdepartmental working group on energy diplomacy consisting of heads of the state agencies dealing with energy affairs, the Ministry of Foreign Affairs, and special scientific-research institutes to analyze the situation in the international energy sphere, including energy security issues, and promote Turkmenistan's cooperation with the international energy market.

The gradual dismantling of the legacy of Berdymukhammedov's predecessor Saparmurat Niyazov—the self-styled Turkmenbashi the Great—continued in 2009 with the gradual disappearance of more visible trappings of Niyazov's period in office. This included the pervasive influence of Niyazov's book *Ruhnama*, which had been given the status of holy writ and had caused incalculable damage to the education process. The Turkmen opposition in exile argued, however, that little had actually improved since Niyazov's death because the influence of the security services was still all-pervasive. (BESS BROWN)

TUVALU

Area: 25.6 sq km (9.9 sq mi)

Population (2009 est.): 11,100

Capital: Government offices in Vaiaku, Fongafale islet, of Funafuti Atoll

Chief of state: Queen Elizabeth II, represented by Governor-General Filoimea Telito

Head of government: Prime Minister Apisai Ielemeia

In 2009 Tuvalu, which was struggling to meet its Millennium Development Goals by 2015, received assistance from the United Nations Development Programme and the Australian Agency for International Development, which agreed to jointly fund an aid program that would help Tuvalu meet its goals efficiently. Investment returns from the Tuvalu Trust Fund shrank, and the fund lost an estimated 12.5% of its value as global financial markets contracted.

Following successful experiments with solar and wind energy, Tuvalu's minister for public utilities and industries announced the creation of a \$20 million plan to generate all of Tuvalu's energy from renewable sources by 2020. At the Copenhagen Climate Summit held in December, Tuvalu put

political pressure on those larger countries whose emissions were producing sea level rises that were starting to salinate hard-won cropping soil and king tides that continued to degrade coasts on Tuvalu's atolls, which were only 4.3 m (about 14 ft) above sea level at the highest point.

On April 4 the risks for the many Tuvaluans who serve as crew on merchant ships were highlighted when 12 Tuvaluans on the German-registered ship *Hansa Stavanger* were among 24 taken hostage by Somali pirates. In August all were freed after the ship's owner paid a \$2.75 million ransom.

(CLUNY MACPHERSON)

UGANDA

Area: 241,551 sq km (93,263 sq mi)

Population (2009 est.): 32,710,000

Capital: Kampala

Head of state and government: President Yoweri Museveni, assisted by Prime Minister Apolo Nsibambi

The Ugandan economy withstood the world financial crisis in 2009 better than expected. Growth declined slightly from 7.1% to 6.3%. The regional drought that devastated large areas in neighbouring countries initially led to

increased Ugandan exports of food, which offset diminished external demand for established exports such as coffee. The drought also hit Uganda hard, however, and after food shortages became severe in parts of the country, the government temporarily halted the export of key food commodities to regional markets. Although the government consolidated and expanded the gains of poverty-reduction efforts of recent years, the per capita GDP (\$440) still ranked among the lowest in Africa.

At the beginning of the year, two British oil companies announced "world-class" discoveries in the Lake Albert region. The finds were later estimated to hold 800 million to 2 billion bbl of oil, which was roughly comparable to the reserves of Chad or Equatorial Guinea. Oil production was expected to start in 2010. Tullow Oil signed nondisclosure production and revenue-sharing agreements that were rumoured to give 8 of every 10 bbl found to the Ugandan government. Mindful of endemic political instability in the oil-bearing area, the government was eager to avoid the mistakes of other African oil-producing countries in unplanned development and lack of transparency. Early discussions for future planning concerned the construction of a refinery and a pipeline to the coast to end the country's dependence on Kenya.

Throughout the first quarter of 2009, Uganda participated with the Democratic Republic of the Congo (DRC) and southern Sudan in a joint military operation, supported by U.S. advisers, in

the DRC against the Lord's Resistance Army (LRA), a Ugandan rebel group. The operation's objectives were to capture or kill LRA leader Joseph Kony and to destroy the organization's command structure. Poorly executed, the campaign failed. Kony escaped and was rumoured to be at large in the Darfur region of The Sudan under the protection of the Khartoum government, while the LRA scattered throughout the northeastern DRC and into The Sudan and the Central African Republic. Wherever the rebels went, they continued their reign of terror, raping and killing civilians and forcibly recruiting child soldiers. (See Special Report on page 180.) The Ugandan army pulled back from the DRC in March.

In a February cabinet reshuffle, Pres. Yoweri Museveni made two surprising new appointments: first lady Janet Museveni was named state minister for the district of Karamoja, and Syda Bbumba, who had served as gender minister, became Uganda's first woman finance minister. Challenged about his wife's appointment, Museveni replied that originally he had yielded to pressure from the elders in her constituency to allow her to enter politics and that then her parliamentary performance had been impressive. Besides, he said, "elite ministers did not want to work in Karamoja."

In September ongoing tension between the government and the traditional Buganda monarchy, in south-central Uganda, erupted in violence when the police prevented the Bugandan *kabaka* (ruler) from attending a function in a town near Kampala that the government claimed had seceded from his kingdom. The police used tear gas and live ammunition to quash the ensuing riots, in which some 20 people died and 50 were wounded. At the end of the month, inconclusive talks took place between the *kabaka* and President Museveni. (LARRY DENZER)

Population (2009 est.): 46,029,000

Capital: Kiev (Kyiv)

Chief of state: President Viktor Yushchenko

Head of government: Prime Minister Yuliya Tymoshenko

Sergei Chuzavkov/AP

Amid an ongoing gas dispute between Russia and Ukraine, demonstrators gather in front of the Russian embassy in Kiev in January, with one bearing a poster of Russian Prime Minister Vladimir Putin and a caption that reads, "Liars have always had their tongues cut out."

The year 2009 proved a difficult one for Ukraine as a result of a sharp economic downturn and an ongoing political crisis. The year began with a gas dispute with Russia after the breakdown of talks on Dec. 31, 2008, between Russia's Gazprom (the gas supplier) and Ukraine's national oil and gas company, Naftohaz Ukrainy. By January 7, Russia had halted all gas transit through Ukraine on the main pipeline to Europe. Slovakia, Bulgaria, and Moldova were especially affected. The dispute, over prices and back payments, ended after Prime Minister Yuliya Tymoshenko met with her Russian counterpart, Vladimir Putin, on January 18; gas transit through Ukraine resumed shortly thereafter.

The economic crisis in Ukraine, sparked by the worldwide financial crisis that began in 2008, deepened in 2009. Although the contraction of the economy had slowed by November, GDP still fell 15.9% in the third quarter of the year, compared with the same period in 2008. In the first nine months of the year the Ukrainian currency, the *hryvnya*, fell from 5 to 8 against the U.S. dollar. During that same period, output of crude steel declined by 31%, and pig iron production fell by 29%.

counter to Ukraine's agreement with the IMF, the president signed it into law. The IMF subsequently suspended further disbursement of the country's loan.

Tymoshenko's fiscal proposals in response to the economic crisis led to fractures within the government and ultimately resulted in the dismissal of several ministers: Minister of Finance Viktor Pynzenyk (February 12), Minister of Foreign Affairs Volodymyr Ohryzko (March 3), Minister of Defense Yuri Yekhanurov (June 5), and Minister of Transport Yosyp Vynskyi (June 23). The only permanent replacement was a close ally of President Yushchenko, Petro Poroshenko, who was appointed foreign minister on October 9.

The prime minister suffered a political setback in March when, in a regional council election in Ternopil, the Tymoshenko Bloc placed fourth, behind both the United Centre Party, led by Viktor Baloha (head of the presidential secretariat until his resignation in May), and Yanukovych's Regions Party. The right-wing Svoboda Party, led by Oleh Tyahnybok, was the unexpected victor, winning 50 seats in the 120-seat assembly. The Tymoshenko Bloc responded to Svoboda's victory by declaring the election results invalid.

The International Monetary Fund (IMF) released \$10.6 billion of its \$16.4 billion loan to Ukraine after Tymoshenko agreed to keep the country's budget deficit at less than 6% in 2009 and less than 4% in 2010. On March 18, as a cost-saving measure, she ordered a 50% cut in salary for all cabinet ministers, effective from April 1 until Jan. 1, 2010. Her budget nonetheless was criticized sharply by Pres. Viktor Yushchenko as being insufficiently austere. Conversely, in the Verkhovna Rada (parliament), the opposition Regions Party under Viktor Yanukovych responded to the economic crisis with a bill that proposed a substantial increase in both the minimum wage and pensions. The Rada passed the bill in October, and, despite warnings by the prime minister and her allies in the Tymoshenko Bloc that the bill ran

The Rada initially set the next presidential election for October 25, but after the Constitutional Court overturned that decision on May 17, the election was scheduled for Jan. 17, 2010. According to a poll taken in July by the Razumkov Centre, a Kiev think tank, the leading candidates at that time were Yanukovych (26.8%), Tymoshenko (16.3%), and Arsenii Yatsenyuk (13.4%). Trailing at 5.1%, Yushchenko was not expected to make an impact.

Just as Yushchenko's popularity among Ukrainians had plummeted, relations between the Ukrainian president and his Russian counterpart, Dmitry Medvedev, also deteriorated sharply. On August 11, Medvedev wrote an open letter to Yushchenko, denouncing him as "anti-Russian" and claiming that he had deliberately disrupted the supply of Russian gas to Europe. Yushchenko further angered the Russians by his continued efforts to have Ukraine's Great Famine of 1932–33 recognized as genocide engineered from Moscow, as well as by his recognition of Ukrainian nationalist insurgents who fought against the Soviets during World War II.

On July 21–22, U.S. Vice Pres. Joe Biden visited Ukraine, offering assurances that his country still supported Ukraine's NATO membership bid, despite delays in the admission process. Another visitor, from July 27 to August 10, was the new Russian Orthodox patriarch of Moscow and all Russia, Kirill I (see BIOGRAPHIES), in what was perceived to be a political mission.

UNITED ARAB EMIRATES

Area: 83,600 sq km (32,280 sq mi)

Population (2009 est.): 4,765,000, of whom about 900,000 are citizens

Capital: Abu Dhabi

Chief of state: President Sheikh Khalifah ibn Zayid Al Nahyan

Head of government: Prime Minister Sheikh Muhammad ibn Rashid al-Maktum

The global economic downturn of 2009 affected all the emirates composing the United Arab Emirates (U.A.E.). The formerly booming emirate of Dubai, however, suffered the most and had to be

Kamran Jebreili/AP

A Metro Dubai train passes through the formerly booming emirate of Dubai in October; the ultramodern rapid-transit line—the first of its kind in any Arab Gulf country—opened on schedule on September 10, though it was still incomplete and reportedly 80% over budget.

helped by the oil-rich Abu Dhabi. Dubai's stock exchange, real-estate values, and construction industry declined markedly, and thousands of residents and workers left the emirate. In November world markets were shaken when Dubai asked to delay interest payments for six months, and Abu Dhabi was forced to extend bailout funds. Nonetheless, in September Dubai inaugurated an ultramodern subway line.

Tensions between the U.A.E. and Saudi Arabia rose over border issues and the selection of Riyadh by members of the Gulf Cooperation Council (GCC) as the headquarters of its proposed central bank. The U.A.E. considered the decision to be both politically motivated and dismissive of the competitive advantages of locating the bank in the emirates. Subsequently, in May the U.A.E. decided to join Oman in withdrawing from the planned GCC monetary union.

The U.A.E. continued its efforts to build nuclear energy plants for peaceful purposes, to generate electricity. It entered into agreements with the United States and France to help develop its nuclear program and announced that it expected to have its first nuclear power plant operating in 2015. The U.A.E. also continued working to ensure its defense. In May France established a permanent military base in Abu Dhabi, a move that Iran strongly criticized as being directed against it. The U.A.E. and Iran continued their ongoing dispute over the ownership of three strategic islands located in the Persian Gulf (Abu Musa

and Greater and Lesser Tunb) that were under Iranian sovereignty.

(LOUAY BAHRY)

UNITED KINGDOM

Area: 243,073 sq km (93,851 sq mi)

Population (2009 est.): 61,855,000

Capital: London

Chief of state: Queen Elizabeth II

Head of government: Prime Minister Gordon Brown

Domestic Affairs. In the United Kingdom, the government—and politicians in general—had a difficult year in 2009, partly, but not only, because of the impact on the U.K. of the global recession. The governing Labour Party suffered its worst national election result on June 4, when it secured only 16% of the vote across the British mainland in elections to the European Parliament. The party's poor showing resulted in part from the proportional voting system used to elect members of the European Parliament. According to opinion polls, the Conservatives (with 28%) and Liberal Democrats (14%) also secured less support than they would have had in elections to the British Parliament, while smaller parties did well, with the ultranationalist, anti-immigration British National Party winning two European Parliament seats for the first time.

Labour's poor showing also reflected the unpopularity of Prime Minister Gordon Brown and his government ministers. Criticism of his leadership came to a head on the evening of June 4, immediately after the end of voting, when James Purnell, the secretary of state for work and pensions, resigned from Brown's cabinet. In his resignation letter, Purnell wrote: "I now believe your continued leadership makes a Conservative victory more, not less likely. . . . I am therefore calling on you to stand aside to give our party a fighting chance of winning." In the hours that followed, Brown's allies sought to ensure that no other ministers followed Purnell's example. None did, though Brown paid a price for securing the loyalty of two senior ministers. He had wished to switch Chancellor of the Exchequer Alistair Darling and Foreign Secretary David Miliband to new ministerial posts, but they refused to move. As Brown felt that he could not dismiss them, he left them where they were, and his authority was visibly weakened.

With a general election to be held no later than June 2010, one telling sign of the tide flowing away from Labour came with the decision of *The Sun*, the U.K.'s biggest-selling daily newspaper, to switch from Labour, which it had supported in the three previous general elections, to the Conservatives. *The Sun* announced its decision on September 29, just hours after Brown delivered his main speech to Labour's annual party conference. Media coverage of *The Sun*'s decision overshadowed that of Brown's speech, to the consternation of government ministers.

The opposition Conservative Party consolidated its lead over Labour and came to be seen by many as a government-in-waiting. At the annual conference in October, Conservative members sought to represent a moderate and responsible party that would neither return to the free-market ideology of the 1980s nor take risks with public finances. George Osborne (*see* BIOGRAPHIES), the party's shadow chancellor (finance spokesman), made it clear in a speech on October 6 that tough decisions would have to be made on both taxes and public spending. With growing public acceptance of the need for such measures, the Conservative strategy proved more popular than it might have been in a more clement economic climate.

British politicians as a whole suffered a sharp decline in public esteem during 2009 as allegations were made that

many members of both the House of Commons and the Lords had claimed expenses to which they were not entitled. Starting on May 8, after the *Daily Telegraph* newspaper had bought a pirated copy of a computer disk containing previously secret information, the paper devoted much of its news coverage for some weeks to disclosing the details of MPs' expense claims. This showed how many MPs had exploited the expenses system to use public money to make tax-free profits on property dealings and to fund spending that had nothing to do with their parliamentary duties. Examples included being reimbursed for building a duck house, maintaining a tennis court, and cleaning out a moat.

The disclosures led to resignations both of government ministers and of Conservative "shadow" ministers. A number of MPs announced that they would stand down at the next general election rather than risk the wrath of their local voters. The biggest casualty of the scandal was the speaker (or chairman) of the Commons, Michael Martin. He was criticized by some for not fighting what appeared to be an entrenched cavalier attitude toward expenses and by others for not defending MPs vigorously enough. On May 19 he became the first speaker in three centuries to be forced to resign his post; he was succeeded on June 22 by Conservative MP John Bercow.

Prime Minister Brown asked Sir Thomas Legg, a retired civil servant, to conduct an independent audit of all expense claims since 2004. In mid-October Legg wrote to each MP with his findings. It was reported that up to 500 out of a total of 646 MPs were asked to pay back some of their expenses, including Brown and Conservative Party leader David Cameron. Most MPs agreed to abide by Legg's request, though some challenged his findings, arguing that he was effectively changing the rules retrospectively and was challenging expense claims that were within the accepted rules at the time that they were made. Public opinion polls, however, showed that most voters thought most MPs were dishonestly claiming money to which they were not entitled. New rules were agreed on that both restricted what MPs could claim and required that all expense claims be published online, but these reforms did little to quell public suspicion.

Brown was also forced onto the defense by demands that Nepalese Gurkha soldiers who had fought for the

British army be allowed to retire in Britain. Government proposals to offer very limited immigration rights were rejected by the Commons on April 29. Three weeks later, following an effective campaign by actress Joanna Lumley (see BIOGRAPHIES), the government announced that it would, after all, allow retired Gurkha soldiers to retire in the U.K.

In Scotland the minority Scottish National Party government ran into trouble on January 28 when the Scottish Parliament rejected its budget. Scotland's first minister, Alex Salmond, had to make concessions to other parties to secure the passage of the budget on February 4. In Wales, Rhodri Morgan announced on October 1, two days after his 70th birthday, that he would step down after almost 10 years as the Welsh first minister. The Welsh Labour Party elected Carwyn Jones as his successor. He took over as first minister on December 10.

On October 1 the U.K.'s Supreme Court came into being. Previously the highest court in the land had been the Appellate Committee of the House of Lords, where panels of Law Lords would meet to decide cases referred by the Court of Appeal. Following growing calls to keep the legislative and judicial institutions completely separate, the Supreme Court was formally established.

British actress and social activist Joanna Lumley awaits the government's decision on whether all Gurkha soldiers who fought for the British army will be granted the right to settle in the U.K. The final ruling, in favour of the Gurkhas, came in May.

Economic Affairs. Amid the global recession, the U.K.'s GDP fell by 2.5% in the first quarter of 2009. The declines were gentler after that, although the announcement of a third-quarter slide of 0.2%, the sixth quarterly decline in GDP in succession, meant that the recession was the longest since quarterly GDP data were first collected in 1955. By the final months of the year, there were signs that the trough of the recession had been reached, with output 6% below its early-2008 peak, and a tentative recovery had begun. Despite signs of economic recovery, however—including a steady rise in property values from the spring—unemployment continued to rise, reaching 2.5 million, or 8% of the labour force, by the end of the year, compared with 1.9 million at the end of 2008.

The Bank of England (BOE), under the guidance of its governor, Mervyn King (see BIOGRAPHIES), acted aggressively in the early months of the year to revive demand. Its benchmark interest rate started the year at 2%; by March it had fallen to just 0.5%, the lowest in the BOE's 300-year history. In addition, the BOE embarked on a program of "quantitative easing," to inject more money into the economy by buying bonds from companies and banks. By the end of the year, the BOE had injected £200 billion (about \$320 billion) into the money supply.

One reason why monetary policy was loosened so dramatically was that there was little room for further fiscal expansion. Government measures that had been announced in 2008 to support the economy, combined with rapidly falling tax revenues, led the chancellor of the Exchequer to forecast in his budget speech on April 22 that government borrowing in fiscal 2009–10 was likely to reach £175 billion (about \$260 billion), or 12.4% of GDP, the highest peacetime figure for the U.K. in recent decades. This meant that Darling could not stimulate the economy further through tax cuts or higher spending. Indeed, he gave advance warning of future tax increases, intended to take effect as the economy recovered. He announced that the top rate of income tax would rise in 2010 to 50% for those earning more than £150,000 (about \$220,000) a year and that personal tax allowances for those earning more than £100,000 a year (about \$150,000) would be withdrawn.

On April 2 Brown hosted a summit of the Group of 20 (G-20) major advanced and emerging countries in London to

Matt Dunham/AP

Protesters take part in an antiwar demonstration in London on October 24.

discuss the global recession. He was publicly praised by U.S. Pres. Barack Obama for his role since September 2008 in leading the international response to the financial crisis. At the summit the G-20 members agreed to inject \$1.1 trillion into the global economy, including an additional \$500 billion for less-developed countries.

On January 19 Lloyds TSB completed its acquisition of the Halifax Bank of Scotland Group, to form the Lloyds Banking Group (LBG). The new bank remained vulnerable, however, like other major U.K. banks, which continued to require government support in the form of equity stakes and the insurance of "toxic" loans. The banks' plight was underlined by the Royal Bank of Scotland's (RBS's) announcement on February 26 of an annual loss of £24.1 billion (about \$35 billion), the biggest loss in U.K. company history. Toward the end of the year, the government owned 70% of RBS and 43.5% of LBG. In response to a European Commission ruling on the conditions under which state aid was permitted, the government announced on November 3 that both RBS and LBG would be required to sell off some of their mortgage, insurance, and retail banking subsidiaries to smaller banks or to companies new to banking.

Foreign Affairs. The U.K.'s military involvement in Iraq ended in 2009. On April 30 the U.K. base in Basra province was formally handed over to U.S. forces; the final British troops left Iraq at the end of July. U.K. forces—which at their peak in 2003 numbered 46,000—suffered 179 fatalities during the six years in which they served in Iraq. Brown on June 15 announced that a full, inde-

pendent inquiry would be held into Britain's involvement in Iraq to find out what lessons could be learned. Brown said that the inquiry, to be chaired by Sir John Chilcot, a retired civil servant, would be conducted in private, but the prime minister subsequently yielded to pressure, not least from Chilcot, to allow that, where possible, hearings could be conducted in public.

As U.K. forces were leaving Iraq, they were arriving in Afghanistan, and by October they numbered 9,500 there, mainly in Helmand province. Amid accusations that British troops lacked some of the equipment that they needed to operate effectively, U.K. casualties increased sharply during the year. In 2009 U.K. forces suffered 108 fatalities, up sharply from 51 in 2008 and 42 in 2007, to bring the total since 2001 to 245. On October 14 Brown said that British troops needed to stay in Afghanistan "to protect British streets" from al-Qaeda. Public support for the war fell as the death toll among U.K. troops increased, and a survey in November by market-research company YouGov found that more than 70% of the British public wanted the troops brought home within 12 months.

On August 20 Kenny MacAskill, Scotland's justice minister, ordered the release of 'Abd al-Basit al-Megrahi from jail on compassionate grounds. Megrahi, a Libyan, was serving a life sentence for helping to plant a bomb on Pan Am Flight 103, which in 1988 crashed into the town of Lockerbie, Scot., killing 270 people, including 179 Americans. At the time of his release, Megrahi, who had been diagnosed with terminal cancer, was appealing his conviction. Megrahi returned to a hero's welcome

in Libya, which had reportedly negotiated his release with the Scottish authorities. The event led to some friction between the U.K. and the U.S., which publicly condemned Megrahi's release.

In October, Brown and Foreign Secretary Miliband proposed that former prime minister Tony Blair be selected as the president of the European Council, a new post established by the Lisbon Treaty, which came into effect on December 1. The post eventually went to Belgian Prime Minister Herman Van Rompuy, while the U.K.'s Baroness Ashton was named high representative for foreign affairs and security policy. (See BIOGRAPHIES.)

Northern Ireland. The 11-year-old Good Friday Agreement remained in force in Northern Ireland, despite occasional armed attacks by fringe military groups. On March 7 two British troops were shot dead by members of the Real Irish Republican Army outside a British army base in the province. One of the hard-line republican groups, the Irish National Liberation Army (INLA), announced on October 11 that it regarded the war as over and would henceforth use only peaceful means to pursue its goals. The INLA had declared a ceasefire in 1998 but was subsequently accused of having involvement in a number of serious crimes.

Meanwhile, First Minister Peter Robinson, of the Democratic Unionist Party, and Martin McGuinness, his Sinn Féin deputy first minister and erstwhile bitter enemy, continued to provide the province with political leadership, jointly lobbying the European Union and the U.S. (where they met President Obama in March) for extra financial help and investment. The main source of tension between the two men in 2009 concerned policing. Under the Good Friday Agreement, ultimate control over policing in the province would be handed over to the Northern Ireland Executive. Throughout 2009 McGuinness urged that the transfer take place as swiftly as possible. Robinson was more cautious, ostensibly because he feared that the U.K. would not provide enough funding for the police service but also because he feared that his party would lose ground to rival Protestant parties if Sinn Féin was seen to have too much influence over the new police service. On October 21 Brown announced additional funding. Full agreement on a transfer of powers, however, had not been achieved by the end of 2009.

(PETER KELLNER)

UNITED STATES

Area: 9,522,055 sq km (3,676,486 sq mi), including 204,083 sq km of inland water and 156,049 sq km of the Great Lakes that lie within U.S. boundaries but excluding 109,362 sq km of coastal water

Population (2009 est.): 307,226,000

Capital: Washington, D.C.

Head of state and government: Presidents George W. Bush and, from January 20, Barack Obama

In 2009, after decades of international economic, military, and political leadership, the United States faced serious limits on its ability to control world affairs. Years of fiscal excess exacerbated the effects of a severe global recession, reducing U.S. influence abroad and allowing less-developed countries, including China, to assume—at least temporarily—the U.S.'s historical role as the world's engine of economic growth. A new president, Barack Obama, started the year with high expectations and ended it with what appeared to be a significant legislative victory, but he also learned the limits of power in a politically divided country.

The Economy. The U.S. struggled through the year under the burden of its most severe economic downturn since the Great Depression. Joined by other major governments, the U.S. adopted unprecedented stimulus measures aimed at saving jobs and restoring growth, fully utilizing the borrowing and spending powers of the U.S. Department of the Treasury and the monetary and credit-creation devices of the central banking system. By year's end the intervention appeared to have stopped the economic decline, but economists worried that recovery would be slow by historical standards and hindered by excessive government intervention and borrowing.

The U.S. recession officially started in December 2007, but the slump accelerated as businesses reacted to major financial market turmoil the following year and a resulting reduction in credit. GDP contracted 6.3% in late 2008 and 5.7% in early 2009—the most dismal two quarters for the U.S. economy in more than 60 years. In mid-February, Obama signed a \$787 billion stimulus spending measure. Initially, financial

markets reacted negatively, with stock prices sinking to 1997 levels by early March.

As more cracks in the economy appeared, the federal government responded with increasing activism. The Treasury Department was forced to extend a total of \$80 billion to two ailing automobile manufacturers, taking 8% ownership of Chrysler and a 61% stake in General Motors and forcing both companies into temporary bankruptcy. Insurance giant AIG, which reinsured numerous mortgage securities that went sour, needed even more help, taking \$170 billion in government funds to remain solvent after staggering losses. By late spring, aided by loans authorized under the 2008 Troubled Assets Relief Program (TARP) emergency legislation, financial institutions had begun to stabilize. Treasury Secretary Timothy Geithner (*see* BIOGRAPHIES) established “stress tests” to make certain remaining banks were adequately capitalized and accurately projecting their losses. Even so, 140 banks failed during 2009.

The U.S. central bank kept interest rates at historic lows to encourage borrowing and economic activity. The target rate for federal funds was pegged at zero to 0.25% for the entire year, which helped to keep rates for business loans and mortgages down. The Federal Reserve pumped well over \$1 trillion into the economy by purchasing Treasury bonds and mortgage instruments, effectively printing new money to keep interest rates at minimal levels.

As 2009 began, unemployment stood at 7.2% and was climbing. Obama administration officials warned that unless the stimulus bill was approved, unemployment might climb as high as 9%. Even with massive federal intervention, however, job losses continued, with unemployment hitting 10.2% in October—the highest jobless rate in more than a quarter of a century—before easing slightly to 10% in December.

After the stock market's March lows, the Standard & Poor's index of 500 large-company stocks (S&P 500) began a solid upward drive that lasted through the remainder of 2009, creating gains of almost 25% for the year. The upswing erased most of the stock market losses of 2008, which averaged some 40%, but also produced major inequities. By year's end, the seven largest banks that had received TARP funding had repaid the government with dividends and interest, in part to escape government supervision, including caps on executive pay. This meant that some financial industry executives were receiving outsized bonuses even as jobs continued to disappear across the country.

GDP finally turned positive in the third quarter, gaining 2.2% and raising hopes that the country was emerging from recession. Some economists, however, noted that the economic growth was made possible only by temporary federal stimulus programs, including an \$8,000 tax credit for first-time home buyers and a \$3 billion “cash for clunkers” program designed to remove gas-

guzzling autos from the road and replace them with new, more fuel-efficient ones.

Inflation virtually disappeared during the recession. For the first time in 35 years, Social Security and other pensioners received no inflation adjustment because the consumer price index for the fiscal year ended September 30 actually dropped. Even so, energy and food prices began climbing again late in the year, signaling an imminent return to the modest inflation of recent years.

The recession erased most remaining traces of fiscal responsibility in Washington. Stimulative policies helped balloon the U.S. federal deficit to \$1.42 trillion for the fiscal year, three times the previous record set a year earlier. A similar deficit was forecast for fiscal year 2010, part of a deficit projection of \$9 trillion for the next decade. Fiscal imbalance, in addition to low interest rates, helped depress the value of the U.S. dollar against foreign currencies for much of the year and prompted frequent grumbling from countries that held U.S. Treasury debt.

Domestic Policy. Like his predecessor, Obama entered office vowing to reduce partisanship in Washington, but he made little progress in his first year. With Democrats holding substantial majorities in both houses of Congress, Obama allowed congressional leaders to shape important legislation. Republicans, largely excluded from substantive negotiations on key bills, were able to slow progress on several of Obama's legislative priorities.

In the president's first month in office, Democrats pushed three major bills through Congress with minimal or no Republican support. The first, the Lilly Ledbetter Fair Pay Act, overturned a 2007 U.S. Supreme Court decision and extended the time frame in which pay discrimination plaintiffs are able to file a complaint. The second bill was a reauthorization and expansion of the State Children's Health Insurance Program, a measure that had been vetoed twice by former president George W. Bush as fiscally irresponsible. The House of Representatives passed a third bill—the \$787 billion stimulus spending measure—without any Republican votes. The bill was strongly tilted toward projects supported by Democratic Party constituencies, including renewable energy incentives

Amid the most severe economic downturn in the U.S. since the Great Depression, protesters gather outside the Bank of America Tower in New York City in April.

and union construction jobs. The partisan actions helped solidify the Republican caucus, particularly in the Senate, where 60 votes were effectively required for most legislative action.

The president was able to accomplish numerous changes through executive order in early 2009. In January Obama rescinded the "Mexico City policy"—which had been reinstated by Bush in 2001—to allow the resumption of U.S. foreign aid funding for international family planning groups that facilitated abortion services or abortion counseling. In March he removed restrictions on federal funding for stem cell research that had been established by the Bush administration eight years earlier.

Obama's overall job-approval rating, as measured by public opinion polls, topped 65% in early 2009 but dropped steadily to around 50% in late December. His rating was weighed down by rising unemployment, perceived federal overreaching, and hard decisions that he had to make on his legislative and policy agendas. Obama was able to secure an uneventful Senate confirmation of his first Supreme Court nominee, Sonia Sotomayor (see BIOGRAPHIES), by a vote of 68–31 in August. Later that month, however, when Obama renominated Ben Bernanke for a second term as chairman of the Federal Reserve Board (Fed), the nomination was quickly bogged down amid congressional de-

mands for more transparency and added control over the Fed. Bernanke had not been confirmed by year's end.

In June, declaring that the subprime mortgage crisis had been caused by "insufficient regulation," Obama proposed a sweeping increase in federal authority over the country's financial institutions. By December the House had approved—again without any Republican votes—legislation that cracked down on hedge funds and credit-rating agencies, established a new financial consumer watchdog agency, and increased congressional scrutiny of Fed monetary policy. The Senate was set to take up the legislation in 2010.

Later in June the House approved a controversial Obama administration energy and environmental protection bill on a largely party-line vote. The "cap-and-trade" legislation, which would establish a system of buying and selling pollution permits

to meet emissions limits, aimed to slash greenhouse-gas emissions to 17% below 2005 levels by 2020. Opponents complained that the legislation would hamstring American industry and cause major increases in taxes and the cost of American goods. The Senate failed to take up the legislation during 2009 as opposition mounted, and several analysts declared the cap-and-trade concept dead.

At year's end Obama obtained a major victory on his top domestic policy priority when both chambers of Congress approved national health care reform bills after contentious legislative bargaining. The two versions were to be reconciled in early 2010. Both bills would extend access to health insurance to an additional 30 million Americans, prohibit denial of coverage by insurers, and require most Americans to obtain insurance or face financial penalties. The bills would pay for expanded care in part through tax increases on higher-income earners and reductions in payments to providers of Medicare and Medicaid services.

Although Democrats were optimistic that Obama would eventually get a final bill to sign, serious problems remained. Critics complained that the legislation would raise revenues quickly but delay benefits and called into question its estimated \$900 billion price tag over 10 years. Republicans labeled the measure

Roger L. Wollenberg—UPI/Landov

Opponents of proposed health care reform legislation rally on Capitol Hill in Washington, D.C., on November 5.

a government takeover of health care, and no GOP member voted for either bill. The Senate dropped a provision setting up a government-run insurance option to compete with private firms, angering liberal Democrats, and also watered down a strict House measure prohibiting public funds from being spent on abortion services. At year's end, support for the legislation dropped markedly amid allegations that some Senate votes had been effectively bought via special-interest provisions. Even so, the apparent breakthrough on health care provided an upbeat ending to a difficult first year for the new administration.

War and National Security. President Obama moved quickly in departing from Bush administration efforts to combat Islamist terrorism and extremism. Part of the effort was semantic; the new administration stopped using terminology such as "war on terrorism" while narrowing the focus to combating al-Qaeda and its allies. Only days after his inauguration, Obama signed executive orders that banned the use of harsh interrogation techniques on captured terrorist suspects, abolished secret CIA overseas prisons, and called for closing the U.S. military detention facility at Guantánamo Bay, Cuba, within a year.

The Guantánamo deadline was especially controversial and proved overly ambitious. It implied rejection of Bush-backed military tribunals conducted outside U.S. soil, suggesting instead that the 242 remaining detainees held

at Guantánamo as "enemy combatants" would be either released, transferred to other countries, or tried in U.S. civilian courts. Few countries were interested in taking high-risk prisoners, however; in addition, federal trials of detainees posed some enormous procedural and security problems, and terrorism recidivism was high among released prisoners. In May the administration altered its course and announced that it would retain the use of military tribunals, albeit with new procedures that would provide additional defendant rights.

Attorney General Eric Holder declared in November that Khalid Sheikh Mohammed and four

other Guantánamo detainees would stand trial in federal court in New York City on charges stemming from the Sept. 11, 2001, attacks. This decision meant that the defendants, all of whom had been captured abroad, would receive most of the constitutional protections and process rights afforded U.S. citizens. Holder defended the venue as appropriate because most September 11 victims were civilians and the attacks occurred on U.S. soil. The one-year deadline for closing the Guantánamo facility was abandoned. Administration officials explored the possibility of confining most of the inmates at an unused state prison in rural northwestern Illinois, and federal acquisition of the prison was under way at year's end. Another idea—transferring numerous prisoners to Yemen—was widely discredited after concerns were raised over al-Qaeda activity in that country. Yemeni extremists were linked to the perpetrator of an attempted bombing of an airliner bound for Detroit on Christmas Day. The suspect in a mass shooting at the U.S. Army base in Ft. Hood, Texas, in November was also linked to a radical Islamist cleric in Yemen.

The military focus shifted from Iraq to Afghanistan during the year. In his presidential campaign, Obama had criticized U.S. involvement in Iraq and suggested that Afghanistan pacification efforts were wrongly shortchanged as a result. As security conditions in Iraq continued to improve, the new administration began slowly removing U.S.

military personnel, with an announced goal of ending U.S. combat operations by mid-2010 and exiting the country entirely by late 2011. The military outlook in Afghanistan deteriorated rapidly, however, as Taliban insurgents regrouped and stepped up attacks on U.S. and NATO forces.

In February Obama announced plans to send 17,000 additional U.S. troops to Afghanistan, bringing the total troop commitment to 68,000. He also ordered a comprehensive review of the U.S. mission in Afghanistan. His military appointees concluded their review in August and asked for the deployment of up to 40,000 more troops. The request came as evidence of fraud nearly overturned the Afghan national election. At the same time, U.S. troop fatalities in the country were mounting (they doubled in 2009 compared with the previous year), and antiwar activists were raising the spectre of another Vietnam-like disaster for the U.S. military. Following three months of internal deliberations, in what was likely the most important decision of his first year in office, Obama announced that he would send 30,000 fresh U.S. troops to Afghanistan in an attempt to blunt the insurgency and that he would use his best efforts to recruit another 10,000 troops from reluctant NATO allies.

With the decision to send more troops, however, Obama also called for a drawdown of combat forces to begin after 18 months, leading many conservatives to fault the commitment as unserious. Left-wing critics complained that despite superficial changes, Obama had adopted and even escalated most war and national security policies of his predecessor. Obama defended his path as he accepted the Nobel Peace Prize in Oslo in December. "Evil does exist in the world," he said. "There will be times when nations—acting individually or in concert—will find the use of force not only necessary but morally justified." (See NOBEL PRIZES.)

Foreign Policy. The new administration worked to project a more cooperative and tolerant image of the U.S. abroad during 2009, acknowledging past errors and seeking to repair strained U.S. diplomatic relationships in many parts of the world. In April Obama sought a "fresh start" with Russia, telling Russian Pres. Dmitry Medvedev that "the relationship between our two countries has been allowed to drift." In June Obama delivered a long-promised address in Cairo in which he pledged "a new beginning between the United States and

Muslims.” He told an audience of Latin American leaders in Trinidad and Tobago that if “we occasionally confess to having strayed from our values and our ideals, that strengthens our hand,” and in a speech in Strasbourg, France, he acknowledged that “there have been times when America has shown arrogance and been dismissive, even derisive.”

This diplomatic outreach was well received internationally, but tangible results on specific major international controversies were almost nonexistent during the year. Some world leaders applauded the approach as helpful toward restoring the vitality of U.S. diplomacy, while critics suggested that the U.S. was instead pandering, projecting weakness, and abandoning a leadership role that had provided stability in an uncertain world.

Progress in the U.S.’s relationship with Russia was modest. Even after U.S. Vice Pres. Joe Biden declared that Russia was a nation in decline, Russia allowed the U.S. to use its airspace to resupply allied military forces in Afghanistan and promised a new nuclear arms reduction agreement by year’s end. In September, in a major concession, the U.S. dramatically abandoned elements of its long-standing European missile shield project—including planned missile interceptors in Poland and a radar site in the Czech Republic. The Strategic Arms Reduction Talks I (START I) treaty was allowed to expire in December without a replacement, and Russia pressed for additional concessions by threatening to restart development of new offensive weaponry.

Efforts to thwart the nuclear ambitions of North Korea and Iran again went nowhere in 2009. The U.S. offered several initiatives to entice North Korea into abandoning its nuclear weapons research, including bilateral negotiations, but the North Korean regime continued to test missiles and nuclear weapons and staved off ongoing international pressure to shutter its nuclear facilities.

Despite active U.S. diplomacy, both public and private, Iran also evaded proposals to reign in its nuclear development. Obama drew widespread criticism from opponents who thought he issued only a mild condemnation of an Iranian government crackdown on pro-democracy dissidents following a disputed election in June. Obama also downplayed the belated discovery of a new Iranian fuel-reprocessing facility in Qom. In October Iranian negotiators in Geneva appeared to agree to a U.S.-backed proposal to send most of Iran’s

stockpile of low-enriched uranium to Russia for reprocessing—a plan that would have delayed any Iranian nuclear weapon by at least a year. Iran’s government later reneged on the proposal.

Obama’s open hand to Latin America did not immediately produce results. At the meeting in Trinidad and Tobago, Obama was photographed warmly greeting Venezuelan Pres. Hugo Chávez, but the effort stilled Chávez’s anti-American rhetoric only briefly. Venezuela later announced that it was cooperating on nuclear development with Iran. The U.S. State Department sided with a Chávez ally, Honduran Pres. Manuel Zelaya, after he was overthrown in June and deported to Costa Rica. The U.S. pressured Honduras to restore Zelaya to power, suspending military and development aid to the country and canceling U.S. visas for Honduran officials. The interim Honduran government refused to accede, however, and instead proceeded to new elections in November. Although the U.S. ultimately urged recognition of the balloting results, which removed Zelaya’s party from control, the development was widely viewed as a sign of declining U.S. influence in Latin America.

As the Chinese economy grew rapidly out of its 2008 downturn and the U.S. economy struggled, U.S.-China relations sustained awkward moments. China was a significant holder of U.S. Treasury bonds, and Beijing officials repeatedly warned against excessive U.S. borrowing. An influential Chinese central banker published a paper in March that predicted that the U.S. dollar would eventually be replaced as the world’s reserve currency. Obama visited China in November and was given a decidedly mixed reception, which included a joint “press conference” (at which no questions were allowed) and a meeting with Chinese students that authorities prevented from being televised.

In December China and the U.S.—the world’s largest emitters of carbon dioxide—were central players at the UN Climate Change Conference in Copenhagen. Both countries made demands of each other while declining to make serious concessions. As a result, aspirational goals but no enforceable actions defined the outcome. Throughout the event, Chinese officials appeared to avoid serious negotiations with their U.S. counterparts, and Obama expressed chagrin when he appeared at a Chinese meeting with Indian, Brazilian, and South African officials to which he had not been invited. (DAVID C. BECKWITH)

DEVELOPMENTS IN THE STATES 2009

Fiscal troubles created by a long-running national economic recession dominated the priorities of U.S. state governments in 2009. Almost all states were constitutionally required to balance their budgets, and, facing major deficit projections, officials took drastic measures to reduce costs and increase revenue. The fiscal crisis, termed the most severe for states since the Great Depression, discouraged creation of new legislative programs, prompted major tax increases during economic hard times, and caused unusual tensions in the symbiotic relationship between states and the federal government.

Several lower-tax states with energy-based economies were able to weather the downturn relatively easily and used federal stimulus funds to avoid significant trims to state services. In states with more costly government services, however, such as California, New York, and Michigan, the federal aid failed to cover their budget gaps, which forced lawmakers to cut programs and increase taxes and fees. While the economy showed signs of recovery by midyear, state finances were slow to stabilize. In the face of declining tax revenues and rising expenses from unemployment, Medicaid, and other so-

A protester chants during a demonstration staged in July by health care workers and others outside the gated entrance to the private residential community in Los Angeles where California Gov. Arnold Schwarzenegger lives.

Reed Saxon/AP

cial payments, numerous states ended the year facing the possibility of additional severe budget deficits in 2010 without the help of further federal assistance. All 50 states held regular legislative sessions during the year; and 15 staged one or more special sessions, often to deal with budget matters.

Structures, Powers. Under fiscal pressure, some state governments reformed services and operations, often by consolidating functions, reducing hours, and increasing efficiency. Utah's 2008 enactment of a four-day workweek for some agencies was closely watched. Maine's governor issued a controversial economy measure to consolidate school districts, and the state's voters later refused to overturn it. California faced the country's most severe financial problems, and the state chief justice criticized the California initiative and referendum process as having produced haphazard and counterproductive policies over the years. Voters in Maine and Washington rejected "taxpayer bill of rights" measures designed to limit government growth.

In November, benefiting from deteriorating public confidence in government officials, Republicans made gains in limited state elections. In New Jersey and Virginia the GOP wrested away governorships previously held by Democrats; a Republican also took over as governor in Arizona after Pres. Barack Obama named Gov. Janet Napolitano to his cabinet. Republicans picked up seats in legislative elections in Virginia and New Jersey and in a handful of special elections in four other states. For 2010, 26 governorships would be held by Democrats and 24 by Republicans. Democrats owned a more comfortable advantage in state legislatures, enjoying two-house control of 27 states, while Republicans held a majority in both chambers of 14 states. In 8 states the legislatures were split or tied, and Nebraska had a non-partisan unicameral legislature.

Federalism. The year saw historic developments in state-federal relations. As state budgets deteriorated rapidly in the face of national economic conditions, the U.S. Congress rushed billions of dollars in aid to state treasuries to maintain services and control deficits. In many cases, however, this aid came with strings attached, imposing federal policies on unenthusiastic state governments and, in some instances, countering state efforts to reduce social services spending. For example, one federal stimulus program to assist state unemployment insurance efforts required

that part-time workers be covered; Republican governors in Texas, South Carolina, Alabama, Louisiana, Alaska, and Mississippi initially rejected those funds. Legislatures in South Carolina and Alaska overturned gubernatorial decisions and accepted almost all federal assistance offered.

Federal efforts to improve homeland security prompted another face-off over the 2005 Real ID Act, which required states to tighten standards on the issuance of state driver's licenses as well as identification cards. Washington warned that residents of states unable to comply by the December 31 deadline could not use existing licenses as identification to board airplanes or enter federal buildings. With only a small minority of states on track to meet the deadline, the government granted an extension until May 2011.

Finances. The fiscal crisis preoccupied state governments throughout the year and led to a second consecutive year of reduced general fund spending. Revenue from all major state tax sources diminished by more than 10% as the national economy languished, while required expenditures for unemployment, health care, and other programs rose dramatically. Stimulus funds were used to shore up state expenditures for social services, infrastructure programs, public schools, and general economic stabilization. The aid also allowed a few, mostly smaller, states to balance their budgets without dramatic legislative adjustments, although 13 states drained their rainy-day funds in order to resolve budget problems.

To reduce costs, 22 states laid off government workers and 23 made across-the-board reductions in agency budgets. In some cases interest groups were able to stop planned cuts via lawsuits. Colorado, Kansas, Michigan, North Carolina, and Washington were among states closing prisons. Arizona and California resorted to selling public buildings to raise funds and then leasing them back. Even though the federal stimulus program promised \$100 billion to shore up state education—usually among the last items cut in any downturn—Idaho, Kansas, Utah, Nevada, and Washington trimmed spending on public schools, and Florida, Kansas, and Washington reduced higher-education support.

The crisis overcame traditional legislative reluctance to raise taxes during economic downturns. In revenue actions 29 states raised taxes or fees to generate \$23.9 billion in new revenue,

the largest increase on record. Twelve states raised sales taxes, producing \$6.1 billion in additional net revenue. Twelve states also increased individual income taxes. Eight states increased the rate for their highest-income earners. California (\$4.3 billion) and New York (\$4.1 billion) accounted for the lion's share of \$10.7 billion in added net income taxes. Three states boosted motor-fuel levies, while 17 states increased taxes on tobacco and alcohol. Increased fees for licenses and services were enacted in 19 states, producing \$5.3 billion in additional revenue, including \$2 billion in New York alone.

At year's end the economic downturn showed signs of easing, but social service expenditures in most states continued to climb as state revenue lagged. Some state officials began lobbying Washington for another round of aid even while they prepared for a decline in overall state spending for an unprecedented third consecutive year.

Social Issues. Despite setbacks, legal recognition of same-sex marriage expanded significantly during the year. Vermont, New Hampshire, and the District of Columbia became the first jurisdictions to sanction gay marriage through legislative process. In November, Maine voters rescinded a gay-marriage law passed by the legislature earlier in the year. The Iowa Supreme Court declared that state's ban on same-sex marriages to be unconstitutional.

Nevada authorized domestic partnerships, and the state of Washington strengthened its domestic partnership laws. The California Supreme Court affirmed the validity of Proposition 8, a 2008 initiative that overturned the high court's extension of full same-sex marriage rights, but the ruling also validated 18,000 gay marriages performed before the vote was taken. By year's end 5 states and the District of Columbia fully sanctioned same-sex marriage, and 7 more provided for domestic partnerships or civil unions; 30 states, including California, had constitutional provisions banning same-sex marriage.

Arkansas became the 15th state to ban late-term "partial-birth" abortions. Kansas, Ohio, and North Dakota required medical clinics to post notices advising women that they could not be coerced into having an abortion. Georgia became the first state to provide for adoption of human embryos; critics said that the law was a back-door attempt to extend legal rights to embryos. Utah joined eight states with "fetal pain" legislation; the law required doc-

tors to offer anesthesia for a fetus before abortions performed 20 or more weeks after conception.

Under recession-induced pressure to raise additional revenue, states continued to expand legalized gaming. In November, Ohio voters approved casinos in four cities after having rejected four similar ballot proposals. Kansas became the first jurisdiction to provide for state-owned casinos, although actual gambling operations at its initial Dodge City site were to be run by a private firm under a lease arrangement.

Law, Ethics. Reversing a recent trend, the imposition of capital punishment ticked up during 2009. Eleven states executed a total of 52 men; 24 of those were in a single state, Texas. New Mexico became the second state in three years to repeal the death penalty, and Maryland narrowed the criteria for its imposition. The governor of Texas became embroiled in a controversy over whether he had allowed an innocent man to be executed for arson in 2004. Objections to the death penalty as cruel and unusual punishment continued. Nebraska became the last among 35 death-penalty states to authorize execution by lethal injection, and Ohio became the first to authorize a slow-acting single-dose intravenous anesthetic to replace the three-injection method used elsewhere across the country.

The year produced unprecedented ethics drama involving ranking state officials. Following his indictment on federal corruption charges, including an alleged attempt to sell Pres. Barack Obama's former Senate seat, Illinois Gov. Rod Blagojevich was impeached and removed from office by the Illinois legislature. He was only the eighth governor in U.S. history to have been ousted after impeachment.

Alaska Gov. Sarah Palin, the 2008 Republican vice presidential candidate, abruptly resigned her office at midyear, complaining of "frivolous" ethics investigations by the state legislature. At year's end South Carolina lawmakers voted not to impeach Gov. Mark Sanford, who had been under investigation after having confessed to using state funds to pursue an extramarital affair. New Mexico Gov. Bill Richardson withdrew as the Obama administration's candidate to head the U.S. Commerce Department owing to an ongoing investigation into New Mexico state contracting practices. Former New York Senate president Joseph L. Bruno was convicted on fraud and corruption charges involving the acceptance of

money from firms doing business with the state.

Three powerful speakers of state house chambers left office early under fire. In Florida, Ray Sansom quit after accusations that he had funneled funds to a college that later hired him; he was later indicted by a state grand jury. In Massachusetts, Salvatore DiMasi resigned amid allegations that he had helped solicit kickbacks from a state contractor. He was also later indicted on federal fraud and extortion charges. In Georgia, Glenn Richardson attempted suicide and later resigned amid rumours of his having had an extramarital affair with a lobbyist.

Health, Welfare. The U.S. Congress debated a sweeping reform of national health care in late 2009. Most congressional bills envisioned a major expansion of Medicaid, a health insurance program for low-income persons that is jointly funded by federal and state governments and run by states. State officials, however, feared they would be burdened with stepped-up obligations and no method of paying for them. Some Democratic proposals also included a "public option"—that is, a government health plan that would compete with private insurers. To meet objections that the provision of a public option would lead to government takeover of health care, bill writers explored turning over numerous details to individual states or allowing individual states to opt out. These controver-

sies helped slow consideration of health care reform. The House and the Senate passed their bills in early November and late December, respectively.

Medicaid expenditures soared; to help states defray added costs, the federal stimulus bill contained \$87 billion in funds for a two-year period ending in 2011. The transfers, however, came with stipulations that states had to retain the eligibility and application processes they had in place as of mid-2008. That meant that Arizona, California, Florida, Rhode Island, and South Carolina had to rescind stricter eligibility requirements they had enacted since mid-2008. In yet another federalism controversy, as H1N1 (swine) flu threatened the U.S., states were given responsibility for distributing flu vaccine even as health department employees were being furloughed during budget cutting. One result was an ominous shortfall in vaccine distribution, but the most severe predictions of a swine flu epidemic failed to materialize by year's end. (See also Special Report on page 194.)

Reversing a controversial policy of the George W. Bush administration, the Obama administration announced it would no longer pursue criminal cases against users of medical marijuana who followed state laws. Fourteen states allowed the use of marijuana prescribed by medical personnel. In November balloting, Maine voters approved an expansion of the state's medical marijuana program. (DAVID C. BECKWITH)

URUGUAY

Area: 177,879 sq km (68,679 sq mi)

Population (2009 est.): 3,361,000

Capital: Montevideo

Head of state and government: President
Tabaré Ramón Vázquez Rosas

In 2009, for the fifth time since the restoration of democratic rule in 1985, Uruguayans went to the polls to elect a president and the entire parliament. The elections took place on October 25. The results gave the ruling Progressive Encounter–Broad Front (EP-FA) leftist coalition a majority in both houses of the parliament, but after narrowly failing to win 50% of the vote, the EP-FA's presidential candidate, José Mujica, was forced into a runoff election with the second-place finisher, former president Luis Lacalle of the Blanco Party. The runoff was held on November 29. As expected, Mujica won by a comfortable margin, earning 53% of the vote to 43% for Lacalle. Mujica was scheduled to take office on March 1, 2010.

Mujica promised to run an administration similar to that of Brazilian Pres. Luiz Inácio Lula da Silva—i.e., a leftist government that would respect the rules of international finance and investment while striving to improve the plight of the less fortunate. Former finance minister Danilo Astori, who was to serve as Mujica's vice president, was expected to have a large say in running the economy. Mujica's background as a former Tupamaro guerrilla leader and as the current leader of the Movement of Popular Participation—one of the more radical factions within the EP-FA—caused some to worry about the future direction of the government. Mujica's ruffled persona and shoot-from-the-hip speaking style perhaps contributed to this concern. Nevertheless, Uruguay's democracy was clearly successfully consolidated.

The five-year term of Pres. Tabaré Vázquez culminated with the successful implementation of a program to provide laptop computers to all primary schoolchildren in Uruguay. The ability of same-sex couples to adopt children was legalized during the year. Health care was made more fully accessible to the poor through a some-

José Mujica campaigns for president of Uruguay in October. He won in a runoff election on November 29.

what controversial increase in the personal income tax.

Even with a slowdown in economic growth brought on by the worldwide financial crisis, Uruguay was expected to see a modest positive gain in GDP for the year. Unemployment remained historically low, and foreign investment was especially strong. A new container terminal at the port of Montevideo was opened late in the year.

UZBEKISTAN

Area: 447,400 sq km (172,700 sq mi)

Population (2009 est.): 27,606,000

Capital: Tashkent

Chief of state and head of government:

President Islam Karimov, assisted by Prime
Minister Shavkat Mirziyayev

Though Uzbekistan appeared to be one of the least affected by the global financial crisis of all the Central Asian states, in February 2009 Pres. Islam Karimov complained that the crisis was harming Uzbek exports; nevertheless, the country maintained a 8.2% growth rate, the highest in the Commonwealth of Independent States (CIS). In his in-

dependence day speech at the beginning of September, Karimov declared that the anticrisis measures adopted by the government had produced "convincing" results, and he attributed Uzbekistan's economic success to the country's having followed its own development path.

As part of the program designating 2009 as the Year of Development and Improvement of the Countryside, the little-developed Navoi region was declared a free economic zone; the Uzbek leadership aspired to attract investment amounting to \$900 million by year's end. A visit in May by South Korean Pres. Lee Myung-bak raised expectations for increased investment by Seoul in Uzbek industry.

Uzbekistan's relations with its neighbours Kyrgyzstan and Tajikistan worsened during the year. Uzbekistan remained adamant in its opposition to the construction of large-scale hydroelectric projects in those two countries, and in February Karimov persuaded his Turkmen counterpart to join him in opposing construction of the two power dams, thereby infuriating the Tajiks, whose rhetoric toward Uzbekistan became sharper as the year progressed. Uzbek-Tajik relations began to deteriorate at the very beginning of the year when Uzbekistan stopped transmission of power purchased by Tajikistan from Turkmenistan. In September an Uzbek expert questioned the safety of the large power plants built in Tajikistan and Kyrgyzstan during the Soviet era; his concerns were raised later in the month by Uzbek Foreign Minister Vladimir Norov in the UN General Assembly. This event marked an escalation of the verbal feud between Uzbekistan and its upstream neighbours.

Relations between Uzbekistan and Kyrgyzstan were strained by the occasionally high-handed behaviour of Uzbek border guards and the Uzbek reinforcement of the common border after an armed attack in May on a police post in the town of Khonobod near the Kyrgyz frontier. The attack was initially attributed to the militant Islamic Movement of Uzbekistan; the Kyrgyz Border Service denied Uzbek assertions that the group had come from Kyrgyzstan.

Despite security concerns, in June Uzbekistan refused to join the Rapid Reaction Force of the Collective Security Treaty Organization because the latter's charter did not prohibit the use of force in conflicts within the CIS. In October, despite worries over human

rights abuses dating back to 2005, when Uzbek government troops fired on unarmed protesters, the EU lifted the last of several sanctions that had been imposed against it. (BESS BROWN)

VANUATU

Area: 12,190 sq km (4,707 sq mi)

Population (2009 est.): 240,000

Capital: Port Vila

Chief of state: Presidents Kalkot Mataskelekele, Maxime Carlot Korman (acting) from August 16, and, from September 2, Iolu Abil

Head of government: Prime Minister Edward Natapei

Vanuatu's economy slowed during 2009. Pressure by the Group of 20 and the U.S. on Vanuatu to end its tax havens led to declines in activity in Vanuatuan offshore financial centres. From December 2006 to June 2008, external assets fell from \$292 million to \$116 million. Though regional source economies contracted, tourism grew significantly, and the numbers of visiting cruise ships increased. In July, France financed the construction of a new airport on Pentecost, which would exploit the island's tourist potential and reduce its isolation. Increases in quotas for Vanuatuan horticultural workers in New Zealand and Australia were also producing useful revenues.

On the external political front, Vanuatu established diplomatic relations with the United Arab Emirates and renewed a dispute with France over the ownership of two uninhabited islands that France maintained were part of its overseas territory of New Caledonia. New Caledonian leader Victor Tutugoro, however, had signed a document declaring that Matthew and Hunter islands belonged to Vanuatu.

In September, after two earlier tries by Vanuatu's electoral college to elect a new chief of state, Iolu Abil was installed as the country's new president. Pres. Kalkot Mataskelekele's term in office had ended in August, and his bid for reelection was unsuccessful. The government faced criticism and political challenges for the mishandling of funds by the Commodities Marketing Board and Air Vanuatu. (CLUNY MACPHERSON)

VATICAN CITY STATE

Area: 44 ha (109 ac)

Population (2009 est.): about 800

Chief of state: (sovereign pontiff) Pope Benedict XVI

Head of administration: Secretary of State Tarcisio Cardinal Bertone

The year 2009 marked the 80th anniversary of the founding of the Vatican City State, which was established as an independent and sovereign state through a bilateral agreement reached with Italy on Feb. 11, 1929. The Vatican sponsored a number of anniversary celebrations, and a commemorative exposition was held for the public between February and May.

Dramatic tensions between the Vatican and the Italian government emerged during the year after the Roman Catholic newspaper *Avvenire* published articles highly critical of Italian Prime Minister Silvio Berlusconi. The articles concerned not only the Italian government's draconian response to illegal immigration but also what was claimed to be scandalous conduct by the prime minister in his private life. Following a series of journalistic exchanges that included an attack on *Avvenire's* top editor by *Il Giornale*, a Berlusconi family newspaper, Vatican Secretary of State Tarcisio Cardinal Bertone canceled a planned dinner with Berlusconi and took a public stance in favour of *Avvenire* and its editor. The prime minister subsequently dissociated himself from *Il Giornale's* attack. In an effort to reestablish a collaborative relationship with the Italian government, Pope Benedict XVI met with Berlusconi's chief adviser in early September.

Another controversy erupted over Pope Benedict's public claim—made during his official visit to Africa in March—that the distribution of condoms could not arrest the spread of AIDS; he instead advocated sexual abstinence and marital fidelity. The intransigence of his position on family planning and abortion was well known and allegedly led to the Vatican's rejection of several nominees to the post of U.S. ambassador to the Holy See; among those rejected was Caroline Kennedy, the daughter of former U.S. president John F. Kennedy. Theologian

Miguel H. Díaz was eventually confirmed as ambassador in August.

In May the pope toured the Holy Land, where he met with representatives of the major faiths. On this and other occasions, he called for a strengthening of the role of the UN in promoting world peace.

During Russian Pres. Dmitry Medvedev's visit to Italy in early December, he also met with the pope and with Bertone. On December 3 Medvedev and the pope announced an agreement to upgrade the level of representation between Russia and the Vatican to full diplomatic relations.

(GREGORY O. SMITH)

VENEZUELA

Area: 916,445 sq km (353,841 sq mi)

Population (2009 est.): 28,583,000

Capital: Caracas

Head of state and government: President Hugo Chávez Frías

Venezuelan Pres. Hugo Chávez scored a decisive victory on Feb. 15, 2009, when voters approved a referendum to remove term limits for all elected officials, which thus enabled Chávez to run for reelection in 2012. This measure won the support of 54.4% of the voters and restored to Chávez the political momentum that he had lost after voters defeated his first attempt to scrap term limits in December 2007. Emboldened, Chávez maneuvered to create the hybrid military-socialist regime that he touted as "twenty-first century socialism." On July 25 he opined that he would not object to being given powers to eliminate all "counterrevolutionary" laws by the end of the year. More than 80% of the deputies in the National Assembly were loyal to Chávez, but they declined to give him those powers. Still, the deputies passed important legislation that moved Venezuela closer to the Cuban model. Noteworthy in this regard were laws that increased government control over police forces, education, and the expropriation of land. In addition, community councils received new powers to determine the manner in which expropriated property could be used. Finally, the government introduced a bill in the National Assembly that criminalized the

provision of false information that harmed the state; conviction for this offense could bring a prison sentence of up to four years.

The official government political party, the United Socialist Party of Venezuela (PSUV), became more institutionalized and the opposition fragmented during the year. The National Electoral Council (CNE) oversaw the PSUV's internal elections for delegates to the First Extraordinary Congress, which took place over three weeks beginning on November 21. Party members elected 772 delegates to attend the conclave, at which the PSUV's institutional structure was organized, party leaders were chosen, and procedures were established for selecting candidates to run in the National Assembly elections scheduled for Sept. 26, 2010. There was concern in the PSUV that the opposition could win the one-third of National Assembly seats necessary to block fundamental changes to the state's administrative structure. Thus, the government introduced legislation that downsized the representation of party coalitions and gave the Chávez-controlled CNE the power to arbitrarily redraw electoral districts until just prior to the 2010 elections.

Venezuela's economy remained dependent on revenue from petroleum sales. In November the Ministry of Finance projected that oil revenues for 2009 would amount to \$18.33 billion. Non-oil revenues were expected to total \$39.07 billion, and debt was likely to reach \$16.42 billion. Inflation approached 30%, real wages fell, and distribution programs sustained large cuts in their budgets. One study found that food consumption among poorer Venezuelans was declining despite discounts of up to 40% at Mercal, the state-owned grocery chain. Mercal's sales fell by more than 11% in the first half of the year. Many units of the government's primary-care health network, Barrio Adentro, closed despite being staffed by thousands of Cuban doctors. The Foreign Exchange Administration Commission reported that the government authorized \$29.9 billion for imports through September—a 47% decrease compared with 2008.

In the international arena, Chávez sought to strengthen the Bolivarian Alternative for the Americas—which he described as an “anti-imperialist military alliance”—and to develop the Union of South American Nations into an institution capable of managing political and military tensions. The Brazilian Senate voted in October to support

Venezuela's bid to join the Common Market of the South (Mercosur). Venezuela's admission was cast into doubt on November 8 when Chávez told his people to “prepare for war” with Colombia, one of Mercosur's five associate members. Chávez was angered by Colombian Pres. Álvaro Uribe's decision to allow the U.S. to use military installations in Colombia as bases from which to hunt down drug traffickers. Relations between Venezuela and the U.S. remained frosty. (DAVID J. MYERS)

VIETNAM

Area: 331,212 sq km (127,882 sq mi)

Population (2009 est.): 88,577,000

Capital: Hanoi

Chief of state: President Nguyen Minh Triet

Head of government: Prime Minister Nguyen Tan Dung

Four major issues dominated Vietnam's domestic politics in 2009: the economy, bauxite mining, Roman Catholic land claims, and political dissent. In January the Central Committee of the Vietnam Communist Party (VCP) conducted a review of party policies at its ninth plenum. The meeting focused on corruption and personnel policy. It adopted a resolution calling for measures to prevent recession, reduce inflation, and stabilize the macroeconomy.

Long-simmering discontent over the government's decision to approve bauxite mining in the Central Highlands and to award the construction contract to a Chinese company erupted in public. A loose coalition of environmental scientists, academics, and retired officials opposed the government. General Vo Nguyen Giap, a national military hero, wrote three letters to party and state leaders urging reconsideration on environmental and national security grounds. These concerns were echoed at a government seminar in April to review bauxite mining and were raised on the floor of the National Assembly in May. Catholic priests and dissident Buddhists also weighed in. The government was eventually forced to revise its plans and address the impact on the environment and ethnic minority community.

At midyear the Central Committee held its 10th plenum, which initiated

preparations for the 11th national congress, scheduled for January 2011. The meeting reviewed draft socioeconomic plans for 2011–20, proposed alterations to the party's 1991 platform, and appointed three subcommittees to deal with administrative matters, leadership selection, and amendments to the party statutes.

Relations with China became a domestic issue when Beijing unilaterally declared a moratorium on fishing in the South China Sea from May 16 to August 1, the height of Vietnam's fishing season. Chinese fishery vessels aggressively chased Vietnamese fishermen out of the area by seizing catches and detaining and fining boat crews.

In July the Roman Catholic Church became involved in a major dispute over ownership of land that once belonged to the Tam Toa church in the Vinh diocese in the city of Dong Hoi. During July and August tens of thousands of parishioners held public prayer vigils and mass rallies to protest police brutality, demand the release of those arrested, and call for land confiscated by the state to be returned to the church. Riot police and bulldozers leveled the site in August, and in November authorities returned to remove a statue of the Virgin Mary from the Catholic cemetery there.

Security authorities continued to arrest and detain prominent pro-democracy activists. In October, Vietnam tried and convicted six persons for their role in 2008 in hanging banners in Haiphong calling for political freedom. Three other dissidents received separate trials in Hanoi. In December former army officer Tran Anh Kim, one of five dissidents arrested in June, was convicted and sentenced to more than five years in prison for subversion. The other four, notably U.S.-educated human rights lawyer Le Cong Dinh, were expected to be tried in 2010.

In October the Central Committee held its 11th plenum to discuss future economic plans and the draft political report to be presented to the 11th congress. The plenum concluded that Vietnam had begun its recovery from the global financial crisis with a GDP growth rate projected at 5.2% for the year. Later the government announced that it would extend until March 2010 portions of the economic stimulus package that it had enacted.

Vietnamese leaders crisscrossed the globe in 2009 to promote Vietnam's interests. Party Secretary-General Nong Duc Manh visited Japan in April and Australia and New Zealand in Septem-

ber. President Nguyen Minh Triet addressed the UN General Assembly and Security Council Summit on Nuclear Nonproliferation and Nuclear Disarmament in September before flying to Cuba. In November he visited Venezuela and Singapore, and in December he journeyed to Italy, the Vatican, Spain, and Slovakia. Deputy Prime Minister and Minister of Foreign Affairs Pham Gia Khiem, who accompanied the president, made a separate trip to Washington to promote trade and educational cooperation.

Prime Minister Nguyen Tan Dung visited numerous countries around the globe, including China twice, first in April to participate in the Boao Forum for Asia (a symposium on Asia's economic future) and then in October to attend a trade and investment conference in Chengdu. He also attended the 15th Association of Southeast Asian Nations summit in Thailand in October. During 2009 Vietnam hosted visits by the presidents of Laos, South Korea, and Sri Lanka; the prime ministers of Thailand, France, and Finland; and the foreign minister of Cuba.

(CARLYLE A. THAYER)

YEMEN

Area: 528,076 sq km (203,891 sq mi)

Population (2009 est.): 22,858,000

Capital: Sanaa

Chief of state: President Maj. Gen. 'Ali 'Abdallah Salih

Head of government: Prime Minister Ali Muhammad Mujawar

Ruling a poor country with limited resources, the Yemeni government faced two important challenges in 2009. The first was a series of strikes and demonstrations by secessionists in the south, aimed at reviving the old republic of South Yemen (1967–90). The second was an armed uprising of the al-Houthis along the mountainous northern border with Saudi Arabia. The al-Houthis were tribal clans who belonged to the Zaydi branch of Shi'ite Islam (whereas nearly two-thirds of Yemenis were Sunnis). The al-Houthis, who were revolting for the sixth time since 2004, claimed that they were politically marginalized; the government con-

Antigovernment demonstrators attend a rally in the southern Yemeni city of Habbaleen on October 14.

Reuters/Landov

tended that they were seeking to revive the old Zaydi monarchy that had been toppled by a coup d'état in 1962.

In early November al-Houthi elements made an incursion into Saudi Arabia. The Saudis counterattacked with land and air strikes. Both Yemen and the Saudis accused Iran of supporting the Shi'ite al-Houthis, thereby feeding Shi'ite-Sunni tensions in the region. By December armed conflicts with the al-Houthis had left thousands dead or wounded, and some 150,000 civilians had fled the area. Both the U.S. and Saudi Arabia feared that al-Qaeda, which had a presence in Yemen, would take advantage of the weak government and instability to expand its influence in Yemen and Saudi Arabia. At year's end there were indications that the al-Houthis were willing to pursue peace talks with Saudi Arabia.

Yemen remained a country with high unemployment (20%) and shortages of water, electricity, and municipal services. The Yemeni government was trying to attract foreign investment to stimulate the economy. It also continued seeking entrance into a partnership with the Gulf Cooperation Council to help its economy and provide employment for its workers. (LOUAY BAHRY)

ZAMBIA

Area: 752,612 sq km (290,585 sq mi)

Population (2009 est.): 12,935,000

Capital: Lusaka

Head of state and government: President Rupiah Banda

Reflecting on his first year in office as president of Zambia, Rupiah Banda in 2009 frankly described his experience as "tough." He complained about uncooperative members within his own ruling Movement for Multiparty Democracy (MMD) and malicious media attacks. He castigated opposition politician Michael Sata, leader of the Patriotic Front (PF), as "evil" and the "son of Satan." In August Banda withstood an impeachment attempt led by PF and United Party for National Development (UPND) parliamentarians. Shortly afterward, a dispute arose within the MMD leadership about the timing of a national convention to elect party officers. President Banda and his supporters contained the dissent by dissolving the provincial branch executive that had been opposing them, but this action only buttressed allegations of autocratic behaviour and lack of transparency.

In August former president Frederick Chiluba (1991–2002) was acquitted of corruption charges after a long trial; this was the first time that an African former head of state had undergone a credible trial in his own country. Earlier in the year his wife, Regina, had been imprisoned for having received stolen funds during his term of office, and in 2007 the U.K.'s High Court had determined that the former president had bilked the Zambian government of some \$46 million. In the trial that ended in 2009, he was accused of having embezzled half a million dollars during his 10-year presidency, but the judge ruled that the prosecution had not established that the funds in question could be traced to government money. A local officer of Transparency International observed that the case demonstrated the inherent complica-

tions involved in fighting corruption in Africa.

The effects of the global recession on Zambia's economy were mitigated by high copper prices, which were driven by strong demand from China, the world's largest consumer. Global electronics manufacturers also sustained demand and investment in mining. By the end of the year, copper prices had more than doubled. To reduce overdependence on the mining sector, which supplied most of the country's foreign earnings, the World Bank and other international agencies urged Zambia to develop alternative sources of revenue, including tourism and agriculture. Although poverty continued to be a serious problem, the economy had strengthened, characterized by a stable currency and increasing trade. Although inflation topped 12%, growth was anticipated to exceed 5% in 2009–10.

Zambia had become a model country in malaria-reduction policy; a 2008 survey showed that the prevalence of the malaria parasite in children under age five had decreased by more than 50% since 2006. Mortality rates in this age group had also been reduced by 29% from 2002 to 2007, which health professionals largely attributed to the success of the country's new malaria policy. (LARAY DENZER)

ZIMBABWE

Area: 390,757 sq km (150,872 sq mi)

Population (2009 est.): 12,523,000, of which about 3,000,000 people might be living outside the country

Capital: Harare

Chief of state: President Robert Mugabe

Head of government: Prime Minister Morgan Tsvangirai

On Feb. 11, 2009, Morgan Tsvangirai, leader of the Movement for Democratic Change (MDC-T), was sworn in as prime minister of Zimbabwe's new unity government, a coalition of the MDC-T, the Zimbabwe African National Union–Patriotic Front (ZANU-PF), and

On March 11, hundreds of mourners in Buhera, Zimb., attend the burial of Susan Tsvangirai, wife of Zimbabwean Prime Minister Morgan Tsvangirai; her death in a head-on automobile collision in which her husband was also injured prompted speculation of an assassination attempt.

the small MDC splinter group led by Arthur Mutambara (MDC-M). This was the result of protracted negotiations brokered by the Southern African Development Community (SADC). From the beginning, political analysts expected that the new government was a fragile, uneasy power-sharing arrangement, which the SADC had strong-armed the parties into accepting. Essentially, Tsvangirai was cast as the junior partner to his archrival, Pres. Robert Mugabe. On March 6 suspicion about ZANU-PF objectives deepened when the prime minister was injured in a head-on automobile collision in which his wife, Susan, was killed. Many MDC-T officials and supporters believed that this accident was an assassination attempt, for Tsvangirai had survived a previous attempt on his life and several brutal beatings at the hands of his political opponents.

In his inaugural speech Tsvangirai advocated a policy for democratic reconstruction; however, Pres. Mugabe's intransigence and unyielding control over home affairs, the military, and the security forces blocked any reform. Throughout the year Tsvangirai complained about continued harassment and manhandling of MDC-T members, including legislators and ministers, some of whom faced criminal charges. Of these, the most conspicuous case

was that of Roy Bennett, whose nomination as deputy minister of agriculture Mugabe refused to accept. Two days after the unity government came into effect, Bennett, a white farmer and the MDC-T treasurer, was detained on charges of alleged antigovernment activities. He was released on bail in March but was rearrested in October. Bennett's case highlighted the issue of Mugabe's blocking the appointment of top government officials, which in mid-October culminated in the MDC-T's boycott of cabinet meetings with the president. After intervention by SADC leaders, Tsvangirai agreed to lift the three-week boycott on the understanding that the power-sharing agreement would be implemented fully within 30 days.

Despite the tense political scene, the new government managed to turn around the economy. At the end of 2008, Zimbabwe had set an unenviable record as the second most-

extreme example of hyperinflation in world history (after Hungary in 1946). On February 2, the government devalued the Zimbabwe dollar—as it had six months earlier—dropping 12 zeros to make Z\$1 trillion of the old currency redenominated to Z\$1.00. Then in April the new unity government suspended the Zimbabwean dollar for at least a year, opting to allow the use of selected foreign currencies, notably the South African rand and the U.S. dollar, in financial transactions. This gambit proved to be effective, as subsequent events showed. In March retail prices fell significantly. By August the month-on-month inflation rate had fallen to 0.4%, and by year's end GDP was projected to grow by about 6–7% in 2010. The agricultural and mining sectors began to improve as restructuring programs were established and investment began to return. The major problem that remained was Zimbabwe's \$1.4 billion debt to the IMF, the World Bank, and the African Development Bank, which the government was unable to repay; however, the policies of the new prime minister and his financial officials won a considerable amount of international support, which resulted in rescheduled loan repayments and offers of development assistance by foreign donors.

INTRODUCTION

Britannica World Data provides a statistical portrait of some 220 countries and dependencies of the world, at a level appropriate to the significance of each. It contains 217 country statements (the "Nations of the World" section), ranging in length from one to seven pages, and permits, in the 15 major thematic tables (the "Comparative National Statistics" [CNS] section), comparisons among these larger countries and 3 other states.

Updated annually, *Britannica World Data* is particularly intended as direct, structured support for many of *Britannica's* other reference works—encyclopaedias, yearbooks, atlases—at a level of detail that their editorial style or design do not permit.

Like the textual, graphic, or cartographic modes of expression of these other products, statistics possess their own inherent editorial virtues and weaknesses. Two principal goals in the creation of *Britannica World Data* were up-to-dateness and comparability, each possible to maximize separately, but not always possible to combine. If, for example, research on some subject is completed during a particular year (x), figures may be available for 100 countries for the preceding year ($x - 1$), for 140 countries for the year before that ($x - 2$), and for 180 countries for the year before that ($x - 3$).

Which year should be the basis of a thematic compilation for 218 countries so as to give the best combination of up-to-dateness and comparability? And, should $x - 1$ be adopted for the thematic table, ought up-to-dateness in the country table (for which year x is already available) be sacrificed for agreement with the thematic table? In general, the editors have opted for maximum up-to-dateness in the country statistical boxes and maximum comparability in the thematic tables.

Comparability, however, also resides in the meaning of the numbers compiled, which may differ greatly from country to country. The headnotes to the thematic tables explain many of these methodological problems; the Glossary serves the same purpose for the country statistical pages. Published data do not always provide the researcher or editor with a neat, unambiguous choice between a datum compiled on two different bases (say, railroad track length, or route length), one of which is wanted and the other not. More often a choice must be made among a variety of official, private, and external intergovernmental (UN, FAO, IMF) sources, each reporting its best data but each representing a set of problems: (1) of methodological variance from (or among) international conventions; (2) of analytical completeness (data for a single year may, successively, be projected [based on 10 months' data], preliminary [for 12 months], final, revised or adjusted, etc.); (3) of time frame, or accounting interval (data may represent a full Gregorian calendar year [preferred], a fiscal year, an Islamic or other national or religious year, a multiyear period or average [when a one-year statement would contain unrepresentative results]); (4) of continuity with previous data; and the like. Finally, published data on a

particular subject may be complete and final but impossible to summarize in a simple manner. The education system of a single country may include, for example, public and private sectors; local, state, or national systems; varying grades, tracks, or forms within a single system; or opportunities for double-counting or fractional counting of a student, teacher, or institution. When no recent official data exist, or they exist, but may be suspect, the tables may show unofficial estimates, a range (of published opinion), analogous data, or no data at all.

The published basis of the information compiled is the statistical collections of *Encyclopædia Britannica, Inc.*, some of the principal elements of which are enumerated in the Bibliography. Holdings for a given country may include any of the following: the national statistical abstract; the constitution; the most recent censuses of population; periodic or occasional reports on vital statistics, social indicators, agriculture, mining, labour, manufacturing, domestic and foreign trade, finance and banking, transportation, and communications. Further information is received in a variety of formats—telephone, letter, fax, microfilm and microfiche, and most recently, in electronic formats such as computer disks, CD-ROMs, and the Internet. So substantial has the resources of the Internet become that it was decided to add uniform resource locators (URLs) to the great majority of country pages and a number of the CNS tables (summary world sites with data on all countries still being somewhat of a rarity) so as to apprise the reader of the possibility and means to access current information on these subjects year-round.

The recommendations offered are usually to official sites (national statistical offices, general national governments, central banks, embassies, intergovernmental organizations [especially the UN Development Programme], and the like). Though often dissimilar in content, they will usually be updated year-round, expanded as opportunity permits, and lead on to related sites, such as parliamentary offices, information offices, diplomatic and consular sites, news agencies and newspapers, and, beyond, to the myriad academic, commercial, and private sites now accessible from the personal computer. While these URLs were correct and current at the time of writing, they may be subject to change.

The great majority of the social, economic, and financial data contained in this work should not be interpreted in isolation. Interpretive text of long perspective, such as that of the *Encyclopædia Britannica* itself; political, geographic, and topical maps, such as those in the *Britannica Atlas*; and recent analysis of political events and economic trends, such as that contained in the articles of the *Book of the Year*, will all help to supply analytic focus that numbers alone cannot. By the same token, study of those sources will be made more concrete by use of *Britannica World Data* to supply up-to-date geographic, demographic, and economic detail.

GLOSSARY

A number of terms that are used to classify and report data in the "Nations of the World" section require some explanation.

Those italicized terms that are used regularly in the country compilations to introduce specific categories of information (*e.g.*, *birth rate*, *budget*) appear in this glossary in italic boldface type, followed by a description of the precise kind of information being offered and how it has been edited and presented.

All other terms are printed here in roman boldface type. Many terms have quite specific meanings in statistical reporting, and they are so defined here. Other terms have less specific application as they are used by different countries or organizations. Data in the country compilations based on definitions markedly different from those below will usually be footnoted.

Terms that appear in small capitals in certain definitions are themselves defined at their respective alphabetical locations.

Terms whose definitions are marked by an asterisk (*) refer to data supplied only in the larger two- to four-page country compilations.

activity rate, *see* participation/activity rates.

age breakdown, the distribution of a given population by age, usually reported here as percentages of total population in 15-year age brackets except for, when available, the 75–84 group. When substantial numbers of persons do not know, or state, their exact age, distributions may not total 100.0%.

aquatic plants production, the weight of aquatic plants (primarily seaweeds) harvested in freshwater or marine areas; the share harvested by farming is *aquaculture* production.

area, the total surface area of a country or its administrative subdivisions, including both land and inland (nontidal) water area. Land area is usually calculated from "mean low water" on a "plane table," or flat, basis.

area and population, a tabulation usually including the first-order administrative subdivisions of the country (such as the states of the United States), with capital (headquarters, or administrative seat), area, and population. When these subdivisions are especially numerous or, occasionally, nonexistent, a planning, electoral, census, or other nonadministrative scheme of regional subdivisions has been substituted.

associated state, *see* state.

atheist, in statements of religious affiliation, one who professes active opposition to religion; "nonreligious" refers to those professing only no religion, nonbelief, or doubt.

balance of payments, a financial statement for a country for a given period showing the balance among: (1) transactions in goods, services, and income between that country and the rest of the world, (2) changes in ownership or valuation of that country's monetary gold, SPECIAL DRAWING RIGHTS, and claims on and liabilities to the rest of the world, and (3) unrequited transfers and counterpart entries needed (in an accounting sense) to balance transactions and changes among any of the foregoing types of exchange that are not mutually offsetting. Detail of national law as to what constitutes a transaction, the basis of its valuation, and the

size of a transaction visible to fiscal authorities all result in differences in the meaning of a particular national statement.*

balance of trade, the net value of all international goods trade of a country, usually excluding reexports (goods received only for transshipment), and the percentage that this net represents of total trade.

Balance of trade refers only to the "visible" international trade of goods as recorded by customs authorities and is thus a segment of a country's BALANCE OF PAYMENTS, which takes all visible and invisible trade with other countries into account. (Invisible trade refers to imports and exports of money, financial instruments, and services such as transport, tourism, and insurance.) A country has a favourable, or positive (+), balance of trade when the value

of exports exceeds that of imports and negative (–) when imports exceed exports.

barrel (bbl), a unit of liquid measure. The barrel conventionally used for reporting crude petroleum and petroleum products is equal to 42 U.S. gallons, or 159 litres. The number of barrels of crude petroleum per metric ton, ranging typically from 6.20 to 8.13, depends upon the specific gravity of the petroleum. The world average is roughly 7.33 barrels per ton.

birth rate, the number of live births annually per 1,000 of midyear population. Birth rates for individual countries may be compared with the estimated world annual average of 20.3 births per 1,000 population in 2005.

budget, the annual receipts and expenditures—of a central government for its activities only; does not include state, provincial, or local

governments or semipublic (parastatal, quasi-nongovernmental) corporations unless otherwise specified. Figures for budgets are limited to ordinary (recurrent) receipts and expenditures, wherever possible, and exclude capital expenditures—*i.e.*, funds for development and other special projects originating as foreign-aid grants or loans.

When both a recurrent and a capital budget exist for a single country, the former is the budget funded entirely from national resources (taxes, duties, excises, etc.) that would recur (be generated by economic activity) every year. It funds the most basic governmental services, those least able to suffer interruption. The capital budget is usually funded by external aid and may change its size considerably from year to year.

capital, usually, the actual seat of government and administration of a state. When more than one capital exists, each is identified by kind; when interim arrangements exist during the creation or movement of a national capital, the *de facto* situation is described.

Anomalous cases are annotated, such as those in which (1) the *de jure* designation under the country's laws differs from actual local practice (*e.g.*, Benin's designation of one capital in constitutional law, but another in actual practice), (2) international recognition does not validate a country's claim (as with the proclamation by Israel of a capital on territory not internationally recognized as part of Israel), or (3) both a state and a capital have been proclaimed on territory recognized as part of another state (as with the Turkish Republic of Northern Cyprus).

capital budget, *see* budget.

causes of death, as defined by the World Health Organization (WHO), "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of accident or violence which produced the fatal injury." This principle, the "underlying cause of death," is the basis of the medical judgment as to cause; the statistical classification system according to which these causes are grouped and named is the *International List of Causes of Death*, the latest revision of which is the Tenth. Reporting is usually in terms of events per 100,000 population. When data on actual causes of death are unavailable, information on morbidity, or illness rate, usually given as reported cases per 100,000 of infectious diseases (notifiable to WHO as a matter of international agreement), may be substituted.

chief of state/head of government, paramount national governmental officer(s) exercising the highest executive and/or ceremonial roles of a country's government. In general usage, the chief of state is the formal head of a national state. The primary responsibilities of the chief of state may range from the purely ceremonial—convening legislatures and greeting foreign officials—to the exercise of complete national executive authority. The head of government, when this function exists separately, is the officer nominally charged (by the constitution) with the majority of actual executive powers, though they may not in practice be exercised, especially in military or single-party regimes in which effective power may reside entirely outside the executive governmental machinery provided by the constitution. A prime minister, for example, usually the actual head of government, may in practice exercise only Cabinet-level authority.

In communist countries an official identified as the chief of state may be the chairman of the policy-making organ, and the official given as the head of government the chairman of the nominal administrative/executive organ.

c.i.f. (trade valuation): *see* imports.

commonwealth (U.K. and U.S.), a self-governing political entity that has regard to the common weal, or good; usually associated with the United Kingdom or United States. Examples include the Commonwealth (com-

posed of independent states [from 1931 onward]), Puerto Rico since 1952, and the Northern Marianas since 1979.

communications, collectively, the means available for the public transmission of information within a country. Data are tabulated for: daily newspapers and their total circulation; television as total numbers of receivers; telephone data as landlines, or the number of subscriber lines (not receivers) having access to the public switched network; cellular telephones and Internet broadband users as number of subscribers; and personal computers and Internet users as number of units. For each, a rate per 1,000 persons is given.

constant prices, an adjustment to the members of a financial time series to eliminate the effect of inflation year by year. It consists of referring all data in the series to a single year so that "real" change may be seen.

constitutional monarchy, *see* monarchy.

consumer price index (CPI), also known as the retail price index, or the cost-of-living index, a series of index numbers assigned to the price of a selected "basket," or assortment, of basic consumer goods and services in a country, region, city, or type of household in order to measure changes over time in prices paid by a typical household for those goods and services. Items included in the CPI are ordinarily determined by governmental surveys of typical household expenditures and are assigned weights relative to their proportion of those expenditures. Index values are period averages unless otherwise noted.

coprincipality, *see* monarchy.

current prices, the valuation of a financial aggregate as of the year reported.

de facto population, for a given area, the population composed of those actually present at a particular time, including temporary residents and visitors (such as immigrants not yet granted permanent status, "guest" or expatriate workers, refugees, or tourists), but excluding legal residents temporarily absent.

de jure population, for a given area, the population composed only of those legally resident at a particular time, excluding temporary residents and visitors (such as "guest" or expatriate workers, refugees, or tourists), but including legal residents temporarily absent.

death rate, the number of deaths annually per 1,000 of midyear population. Death rates for

individual countries may be compared with the estimated world annual average of 8.6 deaths per 1,000 population in 2005.

density (of population), usually, the *DE FACTO* POPULATION of a country divided by its total area. Special adjustment is made for large areas of inland water, desert, or other uninhabitable areas—*e.g.*, excluding the ice cap of Greenland.

dependency, an area annexed to, or controlled by, an independent state but not an integral part of it; a non-self-governing territory. A dependency has a charter and may have a degree of self-government. A crown dependency is a dependency originally chartered by the British government (*see* Table).

direct taxes, taxes levied directly on firms and individuals, such as taxes on income, profits, and capital gains. The *immediate* incidence, or burden, of direct taxes is on the firms and individuals thus taxed; direct taxes on firms may, however, be passed on to consumers and other economic units in the form of higher prices for goods and services, blurring the distinction between direct and indirect taxation.

divorce rate, the number of legal, civilly recognized divorces annually per 1,000 population.

doubling time, the number of complete years required for a country to double its population at its current rate of natural increase.

earnings index, a series of index numbers comparing average wages in a collective industrial sample for a country or region with the same industries at a previous period to measure changes over time in those wages. It is most commonly reported for wages paid on a daily, weekly, or monthly basis; annual figures may represent total income or averages of these shorter periods. The scope of the earnings index varies from country to country. The index is often limited to earnings in manufacturing industries. The index for each country applies to all wage earners in a designated group and ordinarily takes into account basic wages (overtime is normally distinguished), bonuses, cost-of-living allowances, and contributions toward social security. Some countries include payments in kind. Contributions toward social security by employers are usually excluded, as are social security benefits received by wage earners.

economically active population, *see* population economically active.

Virgin Islands (of the U.S.)

¹Excludes territories (1) to which Antarctic Treaty is applicable in whole or in part, (2) without permanent civilian population, (3) without internationally recognized civilian government (Western Sahara, Gaza Strip), or (4) representing unadjudicated unilateral or multilateral territorial claims.

education, tabulation of the principal elements of a country's educational establishment, classified as far as possible according to the country's own system of primary, secondary, and tertiary levels (the usual age limits for these levels being identified in parentheses), with total number of teachers and students (whether full- or part-time). The student-teacher ratio and enrollment rates are calculated whenever available data permit.

educational attainment, the distribution of the population age 25 and over with completed educations by the highest level of formal education attained or completed; it must sometimes be reported, however, for age groups still in school or for the economically active only.

emirate, *see* monarchy.

enrollment rates, if net (for primary and secondary levels of education): number of students in a theoretical age group for a given level of education expressed as a percentage of the total population of that age group; if gross: number of (domestically enrolled) students, regardless of age, expressed as a percentage of a theoretical age group (for the tertiary level of education UNESCO Institute for Statistics defines the theoretical age group as being the 5-year age group following the secondary school-leave).

enterprise, a legal entity formed to conduct a business, which it may do from more than one establishment.

ethnic/linguistic composition, ethnic, racial, or linguistic composition of a national population, reported here according to the most reliable breakdown available, whether published in official sources (such as a census) or in external analysis (when the subject is not addressed in national sources).

exchange rate, the value of one currency compared with another, or with a standardized unit of account such as the SPECIAL DRAWING RIGHT, or as mandated by local statute when one currency is "tied" by a par value to another. Rates given usually refer to free market values when the currency has no, or very limited, restrictions on its convertibility into other currencies.

exports, material goods legally leaving a country (or customs area) and subject to customs regulations. The total value and distribution by percentage of the major items (in preference to groups of goods) exported are given, together with the distribution of trade among major trading partners (usually single countries or trading blocs). Valuation of goods exported is free on board (f.o.b.) unless otherwise specified. The value of goods exported and imported f.o.b. is calculated from the cost of production and excludes the cost of transport.

external debt, public and publicly guaranteed debt with a maturity of more than one year owed to nonnationals of a country and repayable in foreign currency, goods, or services. The debt may be an obligation of a national or subnational governmental body (or an agency of either), of an autonomous public body, or of a private debtor that is guaranteed by a public entity. The debt is usually either outstanding (contracted) or disbursed (drawn).

external territory (Australia), *see* territory.

federal, consisting of first-order political subdivisions that are prior to and independent of the central government in certain functions.

federal constitutional monarchy, *see* monarchy.

federal republic, *see* republic.

federation, union of coequal, preexisting political entities that retain some degree of autonomy and (usually) right of secession within the union.

fertility rate, *see* total fertility rate.

financial aggregates, tabulation of seven-year time series, providing principal measures of the financial condition of a country, including: (1) the exchange rate of the national currency against the U.S. dollar, the pound sterling, and the International Monetary Fund's SPECIAL

DRAWING RIGHT (SDR), (2) the amount and kind of international reserves (holdings of SDRs, gold, and foreign currencies) and reserve position of the country in the IMF, and (3) principal economic rates and prices (central bank discount rate, government bond yields, and industrial stock [share] prices). For BALANCE OF PAYMENTS, the origin in terms of component balance of trade items and balance of invisibles (net) is given.*

fisheries production, the live-weight equivalent of the aquatic animals (including fish, crustaceans, mollusks, and other aquatic mammals) caught in freshwater or marine areas by national fleets and landed in domestic or foreign harbours for commercial, industrial, or subsistence purposes. The share of fisheries production that is harvested by farming is *aquaculture* production.

f.o.b. (trade valuation), *see* exports.

food, *see* daily per capita caloric intake.

foreign direct investment (FDI), a long-term investment with a significant degree of control by a business entity or individual of one country into another country's economy. FDI comprises three components—equity capital, reinvested earnings, and intra-company loans. The net balance of the three FDI components is often volatile from one year to the next. If negative for a particular time period, the balance of the three components is called a reverse investment, or disinvestment.

form of government/political status, the type of administration provided for by a country's constitution—whether or not suspended by extralegal military or civil action, although such de facto administrations are identified—together with the number of members (elected, ap-pointed, and ex officio) for each legislative house, named according to its English rendering. Dependent states (*see* Table) are classified according to the status of their political association with the administering country.

gross domestic product (GDP), the total value of the final goods and services produced by residents and nonresidents within a given country during a given accounting period, usually a year. Unless otherwise noted, the value is given in current prices of the year indicated. The *System of National Accounts* (SNA, published under the joint auspices of the UN, IMF, OECD, EC, and World Bank) provides a framework for international comparability in classifying domestic accounting aggregates and international transactions comprising "net factor income from abroad," the measure that distinguishes GDP and GNP.

gross national income (GNI), also called gross national product (GNP), the total value of final goods and services produced both from within a given country and from external (foreign) transactions in a given accounting period, usually a year. Unless otherwise noted, the value is given in current prices of the year indicated. GNI is equal to GROSS DOMESTIC PRODUCT adjusted by net factor income from abroad, which is the income residents receive from abroad for factor services (labour, investment, and interest) less similar payments made to nonresidents who contribute to the domestic economy.

head of government, *see* chief of state/head of government.

health, a group of measures including number of accredited physicians currently practicing or employed and their ratio to the total population; total hospital beds and their ratio; and INFANT MORTALITY RATE.

household, economically autonomous individual or group of individuals living in a single dwelling unit. A family household is one composed principally of individuals related by blood or marriage.

household income and expenditure, data for average size of a HOUSEHOLD (by number of individuals) and median household income. Sources

of income and expenditures for major items of consumption are given as percentages.

In general, household income is the amount of funds, usually measured in monetary units, received by the members (generally those 14 years old and over) of a household in a given time period. The income can be derived from (1) wages or salaries, (2) nonfarm or farm SELF-EMPLOYMENT, (3) transfer payments, such as pensions, public assistance, unemployment benefits, etc., and (4) other income, including interest and dividends, rent, royalties, etc. The income of a household is expressed as a gross amount before deductions for taxes. Data on expenditure refer to consumption of personal or household goods and services; they normally exclude savings, taxes, and insurance; practice with regard to inclusion of credit purchases differs markedly.

imports, material goods legally entering a country (or customs area) and subject to customs regulations; excludes financial movements. The total value and distribution by percentage of the major items (in preference to groups of goods) imported are given, together with the direction of trade among major trading partners (usually single countries), trading blocs (such as the European Union), or customs areas (such as Belgium-Luxembourg). The value of goods imported is given free on board (f.o.b.) unless otherwise specified; f.o.b. is defined above under EXPORTS.

The principal alternate basis for valuation of goods in international trade is that of cost, insurance, and freight (c.i.f.); its use is restricted to imports, as it comprises the principal charges needed to bring the goods to the customs house in the country of destination. Because it inflates the value of imports relative to exports, more countries have, latterly, been estimating imports on an f.o.b. basis as well.

incorporated territory (U.S.), *see* territory.

independent, of a state, autonomous and controlling both its internal and external affairs. Its date usually refers to the date from which the country was in effective control of these affairs within its present boundaries, rather than the date independence was proclaimed or the date recognized as a de jure act by the former administering power.

indirect taxes, taxes levied on sales or transfers of selected intermediate goods and services, including excises, value-added taxes, and tariffs, that are ordinarily passed on to the ultimate consumers of the goods and services. Figures given for individual countries are limited to indirect taxes levied by their respective central governments unless otherwise specified.

infant mortality rate, the number of children per 1,000 live births who die before their first birthday. Total infant mortality includes neonatal mortality, which is deaths of children within one month of birth.

invisibles (invisible trade), *see* balance of trade.

kingdom, *see* monarchy.

labour force, portion of the POPULATION ECONOMICALLY ACTIVE (PEA) comprising those most fully employed or attached to the labour market (the unemployed are considered to be "attached" in that they usually represent persons previously employed seeking to be reemployed), particularly as viewed from a short-term perspective. It normally includes those who are self-employed, employed by others (whether full-time, part-time, seasonally, or on some other less than full-time, basis), and, as noted above, the unemployed (both those previously employed and those seeking work for the first time). In the "gross domestic product and labour force" table, the majority of the labour data provided refer to population economically active, since PEA represents the longer-term view of working population and, thus, subsumes more of the marginal workers who are often missed by shorter-term surveys.

land use, distribution by classes of vegetational cover or economic use of the land area only (excluding inland water, built-up areas, and wasteland), reported as percentages. The principal categories utilized include: (1) arable land under temporary cultivation including land left fallow for less than five years, (2) land under permanent cultivation (significantly tree crops but also grapes, pineapples, and bananas), (3) pastures and rangeland, which includes land in temporary or permanent use whose principal purpose is the growing of animal fodder, and (4) forest areas, whose definition overlaps with other land use classes per the FAO *State of the World's Forests*; forest areas may include scrub forests, forest plantations, and recently afforested or reforested land.

life expectancy, the number of years a person born within a particular population group (age cohort) would be expected to live, based on actuarial calculations.

literacy, the ability to read and write a language with some degree of competence; the precise degree constituting the basis of a particular national statement is usually defined by the national census and is often tested by the census enumerator. Elsewhere, particularly where much adult literacy may be the result of literacy campaigns rather than passage through a formal educational system, definition and testing of literacy may be better standardized.

major cities, usually the five largest cities/towns proper (national capitals are almost always given, regardless of size); fewer cities/towns may be listed if there are fewer urban localities in the country. For multipage tables, 10 or more may be listed.* Populations for cities/towns will usually refer to the city/town proper—i.e., the legally bounded corporate entity, or the most compact, contiguous, demographically urban portion of the entity defined by the local authorities. Occasionally figures for METROPOLITAN AREAS, urban areas, or urban agglomerations are cited when the relevant civil entity at the core of a major agglomeration had an unrepresentatively small population.

manufacturing, mining, and construction enterprises/retail sales and service enterprises, a detailed tabulation of the principal industries in these sectors, showing for each industry the number of enterprises and employees, wages in that industry as a percentage of the general average wage, and the value of that industry's output in terms of value added or turnover.*

marriage rate, the number of legal, civilly recognized marriages annually per 1,000 population.

material well-being, a group of measures indicating the percentage of households or dwellings possessing certain goods or appliances, including automobiles, telephones, television receivers, refrigerators, air conditioners, and washing machines.*

metropolitan area, a city and the region of dense, predominantly urban, settlement around the city; the population of the whole usually has strong economic and cultural affinities with the central city.

military expenditure, the apparent value of all identifiable military expenditure by the central government on hardware, personnel, pensions, research and development, etc., reported here both as a percentage of the GNP, with a comparison to the world average, and as a per capita value in U.S. dollars.

military personnel, see total active duty personnel.

mobility, the rate at which individuals or households change dwellings, usually measured between censuses and including international as well as domestic migration.*

monarchy, a government in which the CHIEF OF STATE holds office, usually hereditarily and for life, but sometimes electively for a term. The

state may be a coprincipality, emirate, kingdom, principality, sheikhdom, or sultanate. The powers of the monarch may range from absolute (i.e., the monarch both reigns and rules) through various degrees of limitation of authority to nominal, as in a constitutional monarchy, in which the titular monarch reigns but others, as elected officials, effectively rule.

monetary unit, currency of issue, or that in official use in a given country; name and abbreviation or symbol according to local practice or name and 3-digit code according to the ISO (International Organization for Standardization); and valuation in U.S. dollars and U.K. pounds sterling, usually according to free-market rates.

See also exchange rate.

natural increase, also called natural growth, or the balance of births and deaths, the excess of births over deaths in a population; the rate of natural increase is the difference between the BIRTH RATE and the DEATH RATE of a given population. The estimated world average during 2005 was 11.7 per 1,000 population, or 1.35% annually. Natural increase is added to the balance of migration to calculate the total growth of that population.

nonreligious, see atheist.

official development assistance, officially administered grants and concessional loans that donors (usually developed countries) give to developing countries to promote economic development and welfare.

official language(s), that (or those) prescribed by the national constitution for day-to-day conduct and publication of a country's official business or, when no explicit constitutional provision exists, that of the constitution itself, the national gazette (record of legislative activity), or like official documents. Other languages may have local protection, may be permitted in parliamentary debate or legal action (such as a trial), or may be "national languages," for the protection of which special provisions have been made, but these are not deemed official. The United States, for example, does not yet formally identify English as "official," though it uses it for virtually all official purposes.

official name, the local official form(s), short or long, of a country's legal name(s) taken from the country's constitution or from other official documents. The English-language form is usually the protocol form in use by the country, the U.S. Department of State, and the United Nations.

official religion, generally, any religion prescribed or given special status or protection by the constitution or legal system of a country. Identification as such is not confined to constitutional documents utilizing the term explicitly.

organized territory (U.S.), see territory.

overseas department (France), see department.

overseas territory (France), see territory.

parliamentary state, see state.

part of a realm, a dependent Dutch political entity with some degree of self-government and having a special status above that of a colony (e.g., the prerogative of rejecting for local application any law enacted by The Netherlands).

participation/activity rates, measures defining differential rates of economic activity within a population. Participation rate refers to the percentage of those employed or economically active who possess a particular characteristic (sex, age, etc.); activity rate refers to the fraction of the total population who are economically active.

passenger-miles, or **passenger-kilometres**, aggregate measure of passenger carriage by a specified means of transportation, equal to the number of passengers carried multiplied by the number of miles (or kilometres) each passenger is transported. Figures given for countries are often calculated from ticket sales and ordi-

narily exclude passengers carried free of charge.

people's republic, see republic.

place of birth/national origin, if the former, numbers of native- and foreign-born population of a country by actual place of birth; if the latter, any of several classifications, including those based on origin of passport at original admission to country, on cultural heritage of family name, on self-designated (often multiple) origin of (some) ancestors, and on other systems for assigning national origin.*

political status, see form of government/political status.

population, the number of persons present within a country, city, or other civil entity at the date of a census of population, survey, cumulation of a civil register, or other enumeration. Unless otherwise specified, populations given are DE FACTO, referring to those actually present, rather than DE JURE, those legally resident but not necessarily present on the referent date. If a time series, noncensus year, or per capita ratio referring to a country's total population is cited, it will usually refer to midyear of the calendar year indicated.

population economically active, the total number of persons (above a set age for economic labour, usually 10–15 years) in all employment statuses—self-employed, wage- or salary-earning, part-time, seasonal, unemployed, etc. The International Labour Organisation defines the economically active as "all persons of either sex who furnish the supply of labour for the production of economic goods and services." National practices vary as regards the treatment of such groups as armed forces, inmates of institutions, persons seeking their first job, unpaid family workers, seasonal workers and persons engaged in part-time economic activities. In some countries, all or part of these groups may be included among the economically active, while in other countries the same groups may be treated as inactive. In general, however, the data on economically active population do not include students, persons occupied solely in family or household work, retired persons, persons living entirely on their own means, and persons wholly dependent upon others.

See also labour force.

population projection, the expected population in the years 2010 and 2020, embodying the country's own projections wherever possible. Estimates of the future size of a population are usually based on assumed levels of fertility, mortality, and migration. Projections in the tables, unless otherwise specified, are medium (i.e., most likely) variants, whether based on external estimates by the United Nations, World Bank, or U.S. Department of Commerce or on those of the country itself.

price and earnings indexes, tabulation comparing the change in the CONSUMER PRICE INDEX over a period of seven years with the change in the general labour force's EARNINGS INDEX for the same period.

principality, see monarchy.

production, the physical quantity or monetary value of the output of an industry, usually tabulated here as the most important items or groups of items (depending on the available detail) of primary (extractive) and secondary (manufactured) production, including construction. When a single consistent measure of value, such as VALUE ADDED, can be obtained, this is given, ranked by value; otherwise, and more usually, quantity of production is given.

public debt, the current outstanding debt of all periods of maturity for which the central government and its organs are obligated. Publicly guaranteed private debt is excluded. For countries that report debt under the World Bank Debtor Reporting System (DRS), figures for outstanding, long-term EXTERNAL DEBT are given.

purchasing power parity, an economic theory used to determine the number of units in a country's currency that are required to buy the same amount of goods and services in another country. As such it is often used to compare the standards of living between countries expressed in a common currency which is usually U.S.\$.. *Britannica World Data* publishes only purchasing power parity rates as calculated by the World Bank method.

quality of working life, a group of measures including weekly hours of work (including overtime); rates per 100,000 for job-connected injury, illness, and mortality; coverage of labour force by insurance for injury, permanent disability, and death; workdays lost to labour strikes and stoppages; and commuting patterns (length of journey to work in minutes and usual method of transportation).*

railroads, mode of transportation by self-driven or locomotive-drawn cars over fixed rails. Length-of-track figures include all mainline and spurline running track but exclude switching sidings and yard track. Route length, when given, does not compound multiple running tracks laid on the same trackbed.

recurrent budget, *see* budget.

religious affiliation, distribution of nominal religionists, whether practicing or not, as a percentage of total population. This usually assigns to children the religion of their parents.

remittances, amount of a migrant's earnings sent from the migration destination to the place of origin. Remittance data are compiled somewhat differently from one country source to another but usually include cash transfers of long-term legal migrants. Cash transfers of short-term ("for less than one year of residence") legal migrants or the cash transfers of illegal migrants and refugees are also often included with remittances. The standard (but not universal) sources used in BWD for national remittances are the latest editions of World Bank publications and UNCTAD *Handbook of Statistics*. These two sources may also (1) include net wages and salaries of all nonresident migrants and (2) approximate the value of migrants' transfers of household and personal effects to their place of origin as part of a broader remittances definition.

republic, a state with elected leaders and a centralized presidential form of government, local subdivisions being subordinate to the national government. A *federal republic* (as distinguished from a unitary republic) is a republic in which power is divided between the central government and the constituent subnational administrative divisions (e.g., states, provinces, or cantons) in whom the central government itself is held to originate, the division of power being defined in a written constitution and jurisdictional disputes usually being settled in a court; sovereignty usually rests with the authority that has the power to amend the constitution. A *unitary republic* (as distinguished from a federal republic) is a republic in which power originates in a central authority and is not derived from constituent subdivisions. A *people's republic*, in the dialectics of Communism, is the first stage of development toward a communist state, the second stage being a *socialist republic*. An *Islamic republic* is structured around social, ethical, legal, and religious precepts central to the Islamic faith.

retail price index, *see* consumer price index.

retail sales and service enterprises, *see* manufacturing, mining, and construction enterprises/retail sales and service enterprises.

roundwood, wood obtained from removals from forests, felled or harvested (with or without bark), in all forms. Roundwood used for fuel is fuelwood; other roundwood used in

construction, paper products, flooring, furniture manufacture, etc., is called industrial roundwood.

rural, *see* urban-rural.

self-employment, work in which income derives from direct employment in one's own business, trade, or profession, as opposed to work in which salary or wages are earned from an employer.

self-governing, of a state, in control of its internal affairs in degrees ranging from control of most internal affairs (though perhaps not of public order or of internal security) to complete control of all internal affairs (*i.e.*, the state is autonomous) but having no control of external affairs or defense. In this work the term self-governing refers to the final stage in the successive stages of increasing self-government that generally precede independence.

service/trade enterprises, *see* manufacturing, mining, and construction enterprises/retail sales and service enterprises.

sex distribution, ratios, calculated as percentages, of male and female population to total population.

sheikhdom, *see* monarchy.

social deviance, a group of measures, usually reported as rates per 100,000 for principal categories of socially deviant behaviour, including specified crimes, alcoholism, drug abuse, and suicide.*

social participation, a group of measures indicative of the degree of social engagement displayed by a particular population, including rates of participation in such activities as elections, voluntary work or memberships, trade unions, and religion.*

social security, public programs designed to protect individuals and families from loss of income owing to unemployment, old age, sickness or disability, or death and to provide other services such as medical care, health and welfare programs, or income maintenance.

socialist republic, *see* republic.

sources of income, *see* household income and expenditure.

Special Drawing Right (SDR), a unit of account utilized by the International Monetary Fund (IMF) to denominate monetary reserves available under a quota system to IMF members to maintain the value of their national currency unit in international transactions.*

state, in international law, a political entity possessing the attributes of: territory, permanent civilian population, government, and the capacity to conduct relations with other states. Though the term is sometimes limited in meaning to fully independent and internationally recognized states, the more general sense of an entity possessing a *preponderance* of these characteristics is intended here. It is, thus, also a first-order civil administrative subdivision, especially of a federated union. An associated state is an autonomous state in free association with another that conducts its external affairs and defense; the association may be terminated in full independence at the instance of the autonomous state in consultation with the administering power. A *parliamentary state* is an independent state of the Commonwealth that is governed by a parliament and that may recognize the British monarch as its titular head.

structure of gross domestic product and labour force, tabulation of the principal elements of the national economy, according to standard industrial categories, together with the corresponding distribution of the labour force (when possible POPULATION ECONOMICALLY ACTIVE) that generates the GROSS DOMESTIC PRODUCT.

sultanate, *see* monarchy.

territory, a noncategorized political dependency; a first-order administrative subdivision; a

dependent political entity with some degree of self-government, but with fewer rights and less autonomy than a colony because there is no charter. An *external territory* (Australia) is a territory situated outside the area of the country. An *organized territory* (U.S.) is a territory for which a system of laws and a settled government have been provided by an act of the United States Congress. An *overseas territory* (France) is an overseas subdivision of the French Republic with elected representation in the French Parliament, having individual statutes, laws, and internal organization adapted to local conditions.

ton-miles, or ton-kilometres, aggregate measure of freight hauled by a specified means of transportation, equal to tons of freight multiplied by the miles (or kilometres) each ton is transported. Figures are compiled from waybills (nationally) and ordinarily exclude mail, specie, passengers' baggage, the fuel and stores of the conveyance, and goods carried free.

total active duty personnel, full-time active duty military personnel (excluding militias and part-time, informal, or other paramilitary elements), with their distribution by percentages among the major services.

total fertility rate, the sum of the current age-specific birth rates for each of the child-bearing years (usually 15-49). It is the probable number of births, given present fertility data, that would occur during the lifetime of each woman should she live to the end of her child-bearing years.

tourism, service industry comprising activities connected with domestic and international travel for pleasure or recreation; confined here to international travel and reported as expenditures in U.S. dollars by tourists of all nationalities visiting a particular country and, conversely, the estimated expenditures of that country's nationals in all countries of destination.

transfer payments, *see* household income and expenditure.

transport, all mechanical methods of moving persons or goods. Data reported for national establishments include: for railroads, length of track and volume of traffic for passengers and cargo (but excluding mail, etc.); for roads, length of network and numbers of passenger cars and of commercial vehicles (*i.e.*, trucks and buses); and for air transport, traffic data for passengers and cargo.

undernourished population, the number of persons according to an FAO study whose daily caloric consumption (based on a weighted average of all age and sex groups) is below a minimum level needed for maintaining a healthy life and performing light physical activity.

unincorporated territory (U.S.), *see* territory.

unitary republic, *see* republic.

urban-rural, social characteristic of local or national populations, defined by predominant economic activities, "urban" referring to a group of largely nonagricultural pursuits, "rural" to agriculturally oriented employment patterns. The distinction is usually based on the country's own definition of urban, which may depend only upon the size (population) of a place or upon factors like employment, administrative status, density of housing, etc.

value added, also called value added by manufacture, the gross output value of a firm or industry minus the cost of inputs—raw materials, supplies, and payments to other firms—required to produce it. Value added is the portion of the sales value or gross output value that is actually created by the firm or industry. Value added generally includes labour costs, administrative costs, and operating profits.

The Nations of the World

Afghanistan

Official name: Islamic Republic of Afghanistan (Jomhūri-ye Eslāmī-ye Afghānestān [Dari]); Da Afghanistan Eslami Jamhuriyat (Pashto)¹.

Form of government: Islamic republic¹ with two legislative bodies (House of Elders [102]; House of the People [249]).

Head of state and government: President.

Capital: Kabul.

Official languages: Dari; Pashto².

Official religion: Islam.

Monetary unit: (new) afghani (Af);

valuation (Sept. 1, 2009)

1 U.S.\$ = Af 47.53; 1 £ = Af 77.12³.

(value added in Af '000,000; 2005–06): food 48,575; chemicals 1,206; cement, bricks, and ceramics 809; textiles, wearing apparel, and fur 569; base metals 139. Energy production (consumption): electricity (kW-hr; 2006–07) 916,900,000 (483,600,000); hard coal (metric tons; 2006) 33,000 (33,000); crude petroleum, n.a. (none); petroleum products (metric tons; 2006) none (186,000); natural gas (cu m; 2006) 20,000,000 (20,000,000).

Household income and expenditure (2003). Average household size 8.0; sources of income: wages and salaries 49%, self-employment 47%; expenditure (2004)¹²: food 60.6%, housing and energy 16.5%, clothing 9.1%.

Population economically active (2006): total 8,207,000¹³; activity rate of total population 31.5%¹³ (participation rates: ages 15–64, 60.3¹³; female 23.1¹³; unemployed [January 2009] c. 33%).

Price index (2005 = 100)

	2004	2005	2006	2007	2008
Consumer price index	89.2	100.0	103.5	121.0	148.5

Land use as % of total land area (2007): in temporary crops 5.4%, in permanent crops 0.2%, in pasture 46.0%, forest area 1.2%.

Selected balance of payments data. Receipts from (U.S.\$'000,000): tourism (1998) 1.0; remittances, n.a.; foreign direct investment (2005–07 avg.) 268; official development assistance (2007) 3,951. Disbursements for (U.S.\$'000,000).

Foreign trade¹⁴

Balance of trade (current prices)

	2002–03	2003–04	2004–05	2005–06	2006–07	2007–08
U.S.\$'000,000	–2,352	–1,957	–1,872	–2,087	–2,328	–2,567
% of total	92.2%	87.2%	75.4%	73.1%	73.7%	73.9%

Imports (2006–07): U.S.\$2,744,000,000 (machinery and equipment 19.4%; household items and medicine 12.0%; food 12.0%; base and fabricated metals 10.0%; mineral fuels 9.3%). **Major import sources** (2005–06): Japan 16.8%; Pakistan 15.9%; China 12.8%; Russia 9.2%; Uzbekistan 8.3%.

Exports (2006–07): U.S.\$416,000,000 (carpets and handicrafts 45.0%; dried fruits 30.3%; fresh fruits 9.4%; skins 5.5%)¹⁵. **Major export destinations** (2005–06): Pakistan 77.6%; India 6.0%; Russia 3.4%; U.A.E. 2.9%.

Transport and communications

Transport. Railroads (2006): route length 10 km. Roads (2006): total length 42,150 km (paved 29%). Vehicles (2005): passenger cars 41,000; trucks and buses 100,000. Air transport (2004–05): passenger-km 681,000,000; metric ton-km cargo 20,624,000.

Demography

Population (2009): 21,829,000.

Density (2009): persons per sq mi 7.3, persons per sq km 2.8.

Urban-rural (2005): urban 88.2%; rural 11.8%.

Sex distribution (2008): male 50.09%; female 49.91%.

Age breakdown (2008): under 15, 18.7%; 15–29, 20.8%; 30–44, 22.0%; 45–59, 20.0%; 60–74, 12.2%; 75–84, 4.5%; 85 and over, 1.8%.

Population projection: (2020) 24,721,000; (2030) 26,907,000.

Ethnic composition (2007): white and others not elsewhere classified 90.2%; Asian (excl. Middle East) 7.3%; aboriginal 2.5%.

Religious affiliation (2006): Christian 63.9%, of which Roman Catholic 25.6%, Anglican Church of Australia 18.7%, other Christian 19.6% (Uniting Church 5.7%, Presbyterian 2.9%, Orthodox 2.6%, Baptist 1.6%, Lutheran 1.3%); Buddhist 2.1%; Muslim 1.7%; Hindu 0.7%; Jewish 0.4%; no religion 18.7%; other 12.5%.

Major urban centres/metropolitan areas (2006): Sydney 3,641,422/4,119,191; Melbourne 3,371,888/3,592,590; Brisbane 1,676,389/1,763,132; Perth 1,256,035/1,445,077; Adelaide 1,040,719/1,105,840; Gold Coast (QLD)—Tweed Heads (NSW) 454,436/541,675; Newcastle 288,732/493,467; Canberra (ACT)—Queanbeyan (NSW) 356,120/368,128; Gosford (Central Coast) 282,726/n.a.; Wollongong 234,482/263,535; Sunshine Coast (Caloundra) 184,662/209,578; Hobart 128,577/200,524; Geelong 137,220/160,992; Townsville 128,808/143,330; Cairns 98,349/122,731; Toowoomba 95,265/114,480; Darwin 66,291/105,990; Launceston 71,395/99,674; Albury (NSW)—Wodonga (VIC) 73,497/96,292.

Place of birth (2006): 70.9% native-born; 29.1% foreign-born, of which Europe 10.5% (United Kingdom 5.2%, Italy 1.0%, Greece 0.6%, Germany 0.5%, The Netherlands 0.4%, Poland 0.3%), Asia and Middle East 7.3% (China [including Hong Kong] 1.4%, Vietnam 0.8%, India 0.7%), New Zealand 2.0%, Africa, the Americas, and other 9.3%.

Mobility (1999). Population age 15 and over living in the same residence as in 1998: 84.4%; different residence between states, regions, and neighbourhoods 15.6%.

Households (2006). Total number of households 8,058,248. Average household size 2.6; 1 person (2003–04) 25.4%, 2 persons (2003–04) 33.9%, 3 or more persons (2003–04) 40.7%. Family households 5,665,000 (70.3%), nonfamily 2,393,000 (29.7%), of which 1-person 26.5%.

Immigration (2006–07): permanent immigrants admitted 140,148, from New Zealand 17.1%, United Kingdom 16.6%, India 9.6%, China 8.6%, Philippines 4.0%, South Africa 2.9%, Vietnam 2.2%, Malaysia 2.1%, Sri Lanka 1.9%, Sudan 1.8%. **Emigration** (2006–07): 72,100, to New Zealand 19.3%, United Kingdom 18.2%, United States 10.0%, Hong Kong 7.5%. Refugee arrivals (2006–07) 13,017.

Vital statistics

Birth rate per 1,000 population (2007–08): 13.6 (world avg. 20.3); (2006) within marriage 67.3%; outside of marriage 32.7%.

Death rate per 1,000 population (2007–08): 6.7 (world avg. 8.5).

Natural increase rate per 1,000 population (2007–08): 6.9 (world avg. 11.8).

Total fertility rate (avg. births per childbearing woman; 2007–08): 1.93.

Marriage/divorce rates per 1,000 population (2006): 5.5/2.5.

Life expectancy at birth (2008): male 79.2 years; female 84.0 years.

Major causes of death per 100,000 population (2006): diseases of the circulatory system 220.6, of which ischemic heart disease 142.3; malignant neoplasms

(cancers) 192.0; diseases of the respiratory system 52.5; accidents and violence 37.9; endocrine, nutritional, and metabolic diseases 24.8; diseases of the nervous system 23.7; diseases of the digestive system 21.7.

Social indicators

Quality of working life. Average workweek (2007): 34.6 hours. Working 50 hours a week or more (2006) 22.5%. Annual rate per 100,000 workers for: accidental injury and industrial disease (2006) 1,070; death (2006) 2.0. Proportion of employed persons insured for damages or income loss resulting from: injury 100%; permanent disability 100%; death 100%. Working days lost to industrial disputes per 1,000 employees (2006): 22. Means of transportation to work (2003): private automobile 74.5%; public transportation 12.0%; motorcycle, bicycle, and foot 5.7%. Discouraged job seekers (2006): 52,900 (0.5% of labour force).

Distribution of household income (2005–06)

percentage of household income by quintile				
lowest	second	third	fourth	highest
7.9%	12.9%	17.5%	23.2%	38.5%

Educational attainment (2005). Percentage of population age 15–64 having: no formal schooling and incomplete secondary education 48.5%; completed secondary and postsecondary, technical, or other certificate/diploma 28.9%; bachelor's degree 14.2%; incomplete graduate and graduate degree or diploma 5.4%; unknown 3.0%.

Social participation. Eligible voters participating in last national election (2007): 94.8%; voting is compulsory. Trade union membership in total workforce (2006): 20.3%. Volunteerism rate of population age 18 and over (2006) 34.1%.

Social deviance (2007). Offense rate per 100,000 population for: murder 1.2; sexual assault 94.1; assault 839; auto theft 364; burglary and housebreaking 1,182; robbery 85.6, of which armed robbery 36.5. Incidence per 100,000 in general population of: prisoners 129; suicide (2006) 8.7.

Material well-being (2005). Households possessing: refrigerator 99.9%; washing machine 96.4%; dishwasher 41.5%; automobiles per 1,000 population (2006) 544.

National economy

Gross national income (GNI; 2008): U.S.\$862,461,000,000 (U.S.\$40,350 per capita); purchasing power parity GNI (U.S.\$34,040 per capita).

Vital statistics

Birth rate per 1,000 population (2007): 12.8 (world avg. 20.3).

Death rate per 1,000 population (2007): 8.5 (world avg. 8.5).

Natural increase rate per 1,000 population (2007): 4.3 (world avg. 11.8).

Total fertility rate (avg. births per childbearing woman; 2007): 1.68.

Marriage/divorce rates per 1,000 population: (2000) 13.1/n.a.

Life expectancy at birth (2007): male 71.2 years; female 75.8 years.

Major causes of death per 100,000 population (2002): diseases of the circulatory system 270.5; malignant neoplasms (cancers) 165.0; communicable diseases 84.1; diabetes mellitus 70.0; accidents, poisonings, and violence 29.3.

National economy

Budget (2006–07). Revenue⁵: Bds\$2,156,000,000 (tax revenue 95.8%, of which VAT 30.1%, corporate taxes 20.6%, personal income taxes 13.8%, import duties 6.8%; nontax revenue 4.2%). Expenditures: Bds\$2,351,000,000 (current expenditure 89.1%, of which education 19.0%, general public service 15.7%, debt payments 14.0%, health 12.2%, roads and transportation 5.1%, defense 2.5%; development expenditure 10.9%).

Production (metric tons except as noted). Agriculture, forestry, fishing (2006): sugarcane (2007) 354,000, sweet potatoes 2,000, coconuts 1,950, cucumbers and gherkins 1,800, okra 1,550, chilies and green peppers 1,250, yams 1,150; livestock (number of live animals) 19,000 pigs, 10,800 sheep, 3,400,000 chickens; roundwood (2007) 11,100 cu m, of which fuelwood 46%; fisheries production 1,974 (from aquaculture, none). Mining and quarrying (2006): limestone 1,900,000, clay and shale 145,000. Manufacturing (2007): cement 294,184, raw sugar 34,700, rum (2005) 132,000 hectolitres, beer (2005) 87,000 hectolitres; other manufactures include industrial chemicals, electronic components, garments, and wooden furniture. Energy production (consumption): electricity (kW-hr; 2007) 924,000,000 (924,000,000); coal, none (none); crude petroleum (barrels; 2007) 303,000 ([2006] negligible); petroleum products (metric tons; 2006) 1,000 (252,000); natural gas (cu m; 2007) 21,100,000 ([2006] 26,857,000).

Household income and expenditure. Average household size (2004) 2.8; income per household: n.a.; expenditure (2001): food 33.8%, medical and personal care 17.0%, housing 12.3%, household furnishings and operations 10.1%, education and recreation 7.4%, energy 6.3%.

Population economically active (December 2005): total 145,800; activity rate of total population 53.1% (participation rates: ages 15 and over, 69.0%; female 49.5%; unemployed [July–September 2008] 8.4%).

Price index (2005 = 100)

Major cities/urban agglomerations (2008³): Brussels 148,873/1,831,496; Antwerp 472,071/955,338; Liège 190,102/641,591; Gent 237,250/423,320; Charleroi 201,593/405,236.

Vital statistics

Birth rate per 1,000 population (2008): 11.7 (world avg. 20.3); within marriage 58.0%; outside of marriage 42.0%.

Death rate per 1,000 population (2007): 9.5 (world avg. 8.5).

Total fertility rate (avg. births per childbearing woman; 2008): 1.82.

Life expectancy at birth (2008): male 77.5 years; female 83.5 years.

Major causes of death per 100,000 population (2002): cardiovascular diseases 359.6, of which ischemic heart disease 145.5, cerebrovascular disease 89.7; malignant neoplasms (cancers) 275.3.

National economy

Budget (2007). Revenue: €160,393,000,000 (social security contributions 28.8%, personal income tax 23.3%, taxes on goods and services 23.1%). Expenditures: €161,154,000,000 (social insurance benefits 46.3%, of which health 12.8%; wages 24.1%; interest on debt 7.8%; capital expenditure 5.9%).

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): sugar beets 5,746,892, cow's milk 3,000,000, potatoes 2,877,685, wheat 1,480,710, pork 1,000,100, corn (maize) 602,642, barley 365,049, chicory roots 361,305, apples 330,000, pears 218,000; livestock (number of live animals) 6,270,000 pigs, 2,639,700 cattle; roundwood 4,945,000 cu m, of which fuelwood 14%; fisheries production (2006) 24,219 (from aquaculture 5%). Mining and quarrying (2007): marble 340,000. Manufacturing (value added in €'000,000; 2007): chemicals and chemical products 9,228; base and fabricated metals 8,174; food/beverages/tobacco 6,257; transport equipment 3,872; non-electrical machinery and equipment 3,606. Energy production (consumption): electricity (kW-hr; 2007) 88,278,000,000 (93,248,000,000¹⁰); hard coal (metric tons; 2007) none (5,371,000); lignite (metric tons; 2006) 29,000 (313,000); crude petroleum (barrels; 2007) none (235,000,000¹⁰); petroleum products (metric tons; 2006) 28,114,000 (17,514,000); natural gas (cu m; 2007) none ([2006] 21,922,000,000).

Household income and expenditure. Avg. household size (2005) 2.4; average net income per household (2003) €24,455 (U.S.\$27,602); sources of income (2003): wages and transfer payments 69.3%, property income 11.1%; expenditure (2004): housing 21.0%, food, beverages, tobacco 15.8%, transportation 13.4%, recreation and culture 8.6%.

Land use as % of total land area (2007): in temporary crops 24.2%, in permanent crops 0.8%, in pasture 19.4%, forest area 22.0%.

Population economically active (2006): total 4,647,200; activity rate 44.2% (participation rates: ages 15–64, 58.8%; female 44.4%; unemployed [2008] 7.1%).

Death rate per 1,000 population (2008): 7.5 (world avg. 8.5).

Natural increase rate per 1,000 population (2008): 13.1 (world avg. 11.8).

Total fertility rate (avg. births per childbearing woman; 2008): 2.48.

Life expectancy at birth (2008): male 64.8 years; female 66.4 years.

Major causes of death per 100,000 population (2006)⁷: diseases of the digestive system 21.3, of which alcohol-related liver diseases 14.5; diseases of the respiratory system 13.6; diseases of the circulatory system 13.1; neonatal deaths 11.0.

National economy

Budget (2007–08). Revenue: Nu 20,481,000,000 (grants 40.7%; nontax revenue 33.0%, of which dividends and transfers of profits 28.4%; tax revenue 23.7%, of which corporate income taxes 9.2%; other 2.6%). Expenditures: Nu 22,223,000,000 (capital expenditures 52.3%, current expenditures 47.7%).

Public debt (external, outstanding; July 2008): U.S.\$779,900,000.

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): corn (maize) 94,500, rice 69,000, potatoes 57,000, oranges 36,500, apples 10,700, ginger 7,350, nutmeg, mace, and cardamom 5,800, mustard seed 4,500; livestock (number of live animals) 385,000 cattle, (2005) 45,538 yaks, 26,000 horses; roundwood 4,796,000 cu m, of which fuelwood 97%; fisheries production (2006) 300 (from aquaculture, negligible). Mining and quarrying (2007): limestone 560,000; dolomite 440,000; gypsum 165,000; ferrosilicon 21,000. Manufacturing (value of sales in Nu '000,000; 2007): ferroalloys 1,886; cement 1,664; chemical products 1,406; wood board products (2006) 382. Energy production (consumption): electricity (kW-hr; 2006) 3,357,000,000 (739,000,000); coal (metric tons; 2006) 98,000 (52,000); crude petroleum, none (none); petroleum products (metric tons; 2006) none (51,000); natural gas, none (none).

Household income and expenditure. Average household size (2007) 5.0; income per household: n.a.⁸; sources of income: n.a.; expenditure (2007): food and beverages 31.6%, education 15.6%, housing/energy 14.6%, clothing and footwear 6.5%, transportation and communication 6.3%, food away from home 6.1%.

Population economically active (2005): total 256,895; activity rate of total population 38.2% (participation rates: ages 15–64, 62.7%; female 36.6%; officially unemployed [2007] 3.7%).

Demography

Population (2009): 191,481,000.

Density (2009): persons per sq mi 58.2, persons per sq km 22.5.

Urban-rural (2005): urban 84.2%; rural 15.8%.

Sex distribution (2005): male 49.32%; female 50.68%.

Age breakdown (2005): under 15, 27.6%; 15–29, 27.7%; 30–44, 21.7%; 45–59, 14.1%; 60–74, 6.6%; 75–84, 1.8%; 85 and over, 0.5%.

Population projection: (2020) 207,143,243; (2030) 216,410,030.

Doubling time: 70 years.

Racial composition (2000): white 53.7%; mulatto and mestizo 39.1%; black and black/Amerindian 6.2%; Asian 0.5%; Amerindian 0.4%.

Religious affiliation (2005)⁴: Roman Catholic 65.1%; Protestant 12.7%, of which Assemblies of God 9.2%; independent Christian 10.7%, of which Universal Church of the Kingdom of God 2.2%; Spiritist (Kardecist) 1.3%; Jehovah's Witness 0.7%; African and syncretic religions 0.4%; Muslim 0.4%; nonreligious/other 8.7%.

Major cities⁵ and metropolitan areas (2007): São Paulo 10,238,500 (19,226,426); Rio de Janeiro 6,093,500 (11,563,302); Belo Horizonte 2,412,900 (5,450,084); Porto Alegre 1,379,100 (3,896,515); Recife 1,533,600 (3,654,534); Salvador 2,891,400 (3,598,454); Brasília 2,348,600 (3,507,662); Fortaleza 2,431,400 (3,436,515); Curitiba 1,797,400 (3,124,596); Campinas 1,022,000 (2,635,261); Belém 1,399,800 (2,043,543); Goiânia 1,236,400 (1,973,892); Manaus 1,602,100 (1,612,475); Vitória 314,000 (1,609,532).

Other principal cities ⁵ /metropolitan areas (2007)

Families. Average family size (2005) 3.2; (1996) 1–2 persons 25.2%, 3 persons 20.3%, 4 persons 22.2%, 5–6 persons 23.3%, 7 or more persons 9.0%.

Emigration (2000): Brazilian emigrants living abroad 1,887,895; in the U.S. 42.3%, in Paraguay 23.4%, in Japan 12.0%.

Immigration (2000): foreign-born immigrants living in Brazil 683,830; from Europe 56.3%, of which Portugal 31.2%; South/Central America 21.0%; Asia 17.8%, of which Japan 10.4%.

Vital statistics

Birth rate per 1,000 population (2008): 16.4 (world avg. 20.3).

Death rate per 1,000 population (2008): 6.4 (world avg. 8.5).

Natural increase rate per 1,000 population (2008): 10.0 (world avg. 11.8).

Total fertility rate (avg. births per childbearing woman; 2008): 1.90.

Life expectancy at birth (2008): male 68.7 years; female 76.0 years.

Marriage/divorce rates per 1,000 population (2005): 6.3/1.3.

Major causes of death per 100,000 population (2004)⁹: diseases of the circulatory system 178.5, of which cerebrovascular disease 56.9, ischemic heart disease 54.3; malignant neoplasms (cancers) 88.0; external causes 79.7, of which accidents 35.9, violence 35.2 (excl. suicide 5.0); diseases of the respiratory system 63.9; diseases of the digestive system 30.4; infectious and parasitic diseases 28.8; diabetes mellitus 24.5; causes unknown 79.3.

Adult population (ages 15–49) living with HIV (2007): 0.6% (world avg. 0.8%).

Social indicators

Educational attainment (2005). Percentage of population age 25 and over having: no formal schooling or less than one year of primary education 15.0%; 1 to 3 years of primary education 13.7%; complete primary/incomplete secondary 40.2%; complete secondary 18.8%; 1 to 3 years of higher education 3.8%; 4 years or more of higher education 8.0%; unknown 0.5%.

Distribution of income (2006)					
percentage of national income by quintile					
1	2	3	4	5 (highest)	
3.0	6.8	11.3	18.3	60.6	

Quality of working life. Proportion of employed population receiving minimum wage (2002): 53.5%. Number and percentage of children (age 5–17) working: 5,400,000 (12.6% of age group).

Access to services. Proportion of urban households having access to (2006): safe public (piped) water supply 93.2%; public (piped) sewage system 66.8%; garbage collection 90.3%. Rural households have far less access to services.

Social participation. Voter turnout at last (October 2006) national legislative election: 83.3%. Trade union membership in total workforce (2001): 19,500,000. Practicing Roman Catholic population in total affiliated Roman Catholic population (2000): large cities 10–15%; towns and rural areas 60–70%.

Social deviance. Annual murder rate per 100,000 population (2005): Brazil 29.6; Rio de Janeiro only (2002) 56; São Paulo only (2002) 54.

Leisure. Favourite leisure activities include: playing soccer, dancing, practicing capoeira, rehearsing all year in neighbourhood samba groups for celebrations of Carnival, and competing in water sports, volleyball, and basketball.

Material well-being. Urban households possessing (2006): electricity 99.7%, colour television receiver 94.8%, refrigerator 93.3%, washing machine 42.2%, computer 25.5%, Internet access 19.6%, freezer 16.1%.

National economy

Gross national income (GNI; 2008): U.S.\$1,411,224,000,000 (U.S.\$7,350 per capita); purchasing power parity GNI (U.S.\$10,070 per capita).

Place of birth (2006): 80.2% native-born; 19.8% foreign-born, of which Asian 8.1%, European 7.3%, Latin American 1.2%, African 1.2%.

Mobility (2006). Population living in the same residence as in 2001: 59.1%; different residence, same municipality 22.0%; same province, different municipality 12.1%; different province 2.9%; different country 3.9%.

Households. Total number of households (2006) 12,437,470. Average household size 2.5; 1 person 26.8%, 2 persons 33.6%, 3 persons 15.9%, 4 persons 15.0%, 5 or more persons 8.7%.

Immigration (2007): permanent immigrants admitted 236,758; from Asia/Pacific 47.6%, of which China 11.4%, India 11.0%, Philippines 8.1%; Africa/Middle East 20.5%; Europe 16.5%; Latin America 10.9%; U.S. 4.4%; refugee population (end of 2007) 175,741.

Vital statistics

Birth rate per 1,000 population (2007–08): 11.0 (world avg. 20.3); (c. 2002) within marriage c. 62%; outside of marriage c. 38%.

Death rate per 1,000 population (2007–08): 7.2 (world avg. 8.5).

Natural increase rate per 1,000 population (2007–08): 3.8 (world avg. 11.8).

Total fertility rate (avg. births per childbearing woman; 2006): 1.59.

Marriage/divorce rates per 1,000 population: (2006) 4.6/(2004) 2.2.

Life expectancy at birth (2006): male 76.9 years; female 83.7 years.

Major causes of death per 100,000 population (2004): diseases of the circulatory system 226.4; malignant neoplasms (cancers) 208.3; diseases of the res-

piratory system 61.0; diseases of the nervous system 31.9; accidents 27.6; diseases of the digestive system 26.9; diabetes mellitus 24.3.

Social indicators

Educational attainment (2006). Percentage of population age 25–64 having: less than complete secondary education 15.5%; complete secondary 23.9%; higher vocational 12.4%; some college/university 25.3%; bachelor's degree 14.6%; beyond bachelor's/master's 7.5%; doctorate 0.8%.

Distribution of income (2006)

percentage of family after-tax income by quintile				
1	2	3	4	5 (highest)
2.3%	7.6%	14.8%	24.3%	51.0%

Quality of working life. Average workweek (2007): 35.6 hours. Annual rate per 100,000 workers for (2006): injury, accident, or industrial illness 1,998; death 5.9. Average days lost to labour stoppages per 1,000 employee-workdays (2001): 0.7. Average round-trip commuting time (2005): 63 minutes; mode of transportation (2006): auto driver 72.3%, auto passenger 7.7%, public transportation 11.0%, walking 6.4%, bicycling 1.3%, other/unknown 1.3%. Labour force covered by a pension plan (2006): 38.1%.

Social participation. Eligible voters participating in last national election (October 2008): 58.8%. Population over 18 years of age participating in voluntary work (2000): 26.7%. Trade union membership as percentage of civilian labour force (2007) 29.4%. Attendance at religious services on a weekly basis (2006): 17%.

Social deviance (2007). Offense rate per 100,000 population for: violent crime 929.6, of which battery/aggravated battery/dangerous operation of vehicle 718.5, robbery 89.8, sexual assault 65.0, homicide 1.8; property crime 3,319.7, of which breaking and entering 700.3, auto theft 443.2, fraud 267.7.

Leisure (1998). Favourite leisure activities (hours weekly): television (2004) 21.4; radio (2005) 19.1; social time 13.3; reading 2.8; sports and entertainment 1.4.

Material well-being (2006). Households possessing: owned automobile 59.7%; owned truck/van 36.9%; landline telephone only (December 2007) 24.0%; cellular phone (December 2007) 72.4%; air conditioner 48.1%; cable television 65.2%; home computer 75.4%; Internet use from home 68.1%; dishwasher 57.7%.

National economy

Gross national income (GNI; 2008): U.S.\$1,390,040,000,000 (U.S.\$41,730 per capita); purchasing power parity GNI (U.S.\$36,220 per capita).

Demography

Population (2009): 1,331,433,000.

Density (2009): persons per sq mi 360.2; persons per sq km 139.1.

Urban-rural (2009⁴): urban 45.7%; rural 54.3%.

Sex distribution (2009⁴): male 51.47%; female 48.53%.

Age breakdown (2007)⁷: under 15, 17.9%; 15–29, 21.4%; 30–44, 26.8%; 45–59, 20.3%; 60–74, 10.4%; 75–84, 2.7%; 85 and over, 0.5%.

Population projection: (2020) 1,409,432,000; (2030) 1,440,274,000.

Ethnic composition (2005)⁸: Han (Chinese) 90.95%; Chuang 1.37%; Manchu 0.82%; Yi 0.79%; Hui 0.77%; Miao 0.75%; Uighur 0.74%; Tuchia 0.65%; Tibetan 0.57%; Mongolian 0.49%; Tung 0.28%; Puyi 0.26%; Yao 0.24%; Korean 0.14%; Pai 0.14%; Hani 0.12%; Li 0.11%; Kazakh 0.09%; Tai 0.08%; other 0.64%.

Religious affiliation (2005): nonreligious 39.2%; Chinese folk-religionist 28.7%; Christian 10.0%, of which unregistered Protestant 7.7%⁹, registered Protestant 1.2%⁹, unregistered Roman Catholic 0.5%⁹, registered Roman Catholic 0.4%⁹; Buddhist 8.4%; atheist 7.8%; traditional beliefs 4.4%; Muslim 1.5%.

Major urban agglomerations (2007)¹⁰: Shanghai 14,987,000; Beijing 11,106,000; Guangzhou 8,829,000; Shenzhen 7,581,000; Wuhan 7,243,000; Tianjin 7,180,000; Chongqing 6,461,000; Shenyang 4,787,000; Dongguan 4,528,000; Chengdu 4,123,000; Xi'an 4,009,000; Nanjing 3,679,000; Guiyang 3,662,000; Harbin 3,621,000; Changchun 3,183,000; Dalian 3,167,000; Zibo 3,061,000; Hangzhou 3,007,000; Kunming 2,931,000; Taiyuan 2,913,000; Qingdao 2,866,000; Jinan 2,798,000; Zhengzhou 2,636,000; Fuzhou 2,606,000; Changsha 2,604,000; Lanzhou 2,561,000; Xiamen 2,519,000; Jinxi 2,426,000.

Households⁸. Average family household size (2005) 3.1, of which urban family households 3.0, rural family households 3.3; 1 person 10.7%, 2 persons 24.5%, 3 persons 29.8%, 4 persons 19.2%, 5 persons 10.2%, 6 persons 3.8%, 7 persons 1.1%, 8 or more persons 0.7%.

Mobility (2007)⁷. Population residing in registered enumeration area 90.4%; population not residing in registered enumeration area 9.6%.

Vital statistics

Birth rate per 1,000 population (2008): 12.1 (world avg. 20.3).

Death rate per 1,000 population (2008): 7.1 (world avg. 8.5).

Natural increase rate per 1,000 population (2008): 5.0 (world avg. 11.8).

Total fertility rate (avg. births per childbearing woman; 2007): 1.77.

Marriage/divorce rates per 1,000 population (2007): 7.5/1.6.

Life expectancy at birth (2007): male 71.3 years; female 74.8 years.

Adult population (ages 15–49) *living with HIV* (2007): 0.1%¹¹ (world avg. 0.8%).

Major causes of death per 100,000 population (2006): malignant neoplasms (cancers) 136.5; cerebrovascular diseases 100.3; heart diseases 80.1; diseases of the respiratory system 78.1; accidents and poisoning 40.1; endocrine, nutritional, and metabolic diseases 17.3; diseases of the digestive system 12.3.

Social indicators

Educational attainment (2007)⁷. Percentage of population age 6 and over having: no formal schooling 8.0%; incomplete/complete primary education 31.8%; some secondary 40.2%; complete secondary 13.4%; some postsecondary through advanced degree 6.6%.

Distribution of income (2004)

percentage of urban household income by quintile				
1	2	3	4	5 (highest)
9.2	13.7	17.5	22.4	37.2

Quality of working life. Average workweek (November 2007; hours actually worked): 45.5 hours. Annual rate per 100,000 workers for (2008): death in mining, industrial, or commercial enterprises 2.82. Death toll from work accidents (2008) 91,172.

Access to services. Percentage of population having access to electricity (2005) 99.4%. Percentage of total (urban, rural) population with safe public water supply (2002) 83.6% (94.0%, 73.0%). Sewage system (1999): total (urban, rural) households with flush apparatus 20.7% (50.0%, 4.3%), with pit latrines 69.3% (33.6%, 86.7%), with no latrine 5.3% (7.8%, 4.1%).

Social participation. Eligible voters participating in last national election: n.a. Population participating in voluntary work: n.a. Trade union membership in total labour force (2006): 169,942,200 (c. 22%). Percentage of population who consider themselves religious (2005–06) 31.4%.

Social deviance. Annual reported arrest rate per 100,000 population (2007) for: theft 248.0; robbery 22.2; fraud 16.6; injury 12.3; rape 2.4; homicide 1.2.

Material well-being. Urban households possessing (number per household; 2004): bicycles 1.4; colour televisions (2007) 1.4; washing machines 1.0; refrigerators 0.9; air conditioners 0.7; cameras 0.5; computers (2007) 0.5. Rural families possessing (number per household; 2004): bicycles 1.2; colour televisions (2007) 0.9; washing machines 0.4; refrigerators 0.2; air conditioners 0.05; cameras 0.04; computers (2007) 0.04.

National economy

Gross national income (GNI; 2008): U.S.\$3,678,488,000,000 (U.S.\$2,770 per capita); purchasing power parity GNI (U.S.\$6,020 per capita).

Public debt (external, outstanding; 2007): U.S.\$87,653,000,000.

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): grains—rice 185,490,000, corn (maize) 151,830,000, wheat 109,860,000, barley 3,851,000; oilseeds—soybeans 15,600,000, peanuts (groundnuts) 13,016,000, rapeseed 10,375,000, sunflower seeds 1,800,000; fruits and nuts—watermelons 63,000,000, apples 27,500,000, citrus 19,617,100, cantaloupes 13,650,000, pears 12,500,000, bananas 7,100,000; other—sugarcane 105,651,000, sweet potatoes 102,000,000, potatoes 72,000,000, cabbage 36,000,000, tomatoes 33,500,000, cucumbers 28,000,000, seed cotton 22,872,000, onions 20,500,000, eggplants 18,000,000, chilies and peppers 14,000,000, garlic 12,000,000, spinach 12,000,000, asparagus 6,250,000, tobacco leaves 2,395,000, tea 1,186,500, silkworm cocoons (2003) 667,000; livestock (number of live animals) 501,475,621 pigs, 197,267,883 goats, 171,961,000 sheep, 116,859,793 cattle, 22,717,000 water buffalo, 4,509,633,000 chickens, 736,912,000 ducks; roundwood 294,401,900 cu m, of which fuelwood 68%; fisheries production 46,079,311 (from aquaculture 68%); aquatic plants production 10,081,245 (from aquaculture 97%). Mining and quarrying (2005; by world rank): metal content of mine output—iron ore 138,000,000 (3), zinc 2,450,000 (1), manganese 1,100,000 (5), lead 1,000,000 (1), copper 740,000 (7), antimony 120,000 (1), tin 110,000 (1), tungsten 61,000 (1), silver 2,500 (3), gold 225 (2); metal ores—bauxite 18,000,000 (3), vanadium 17,000 (1); nonmetals—salt 44,547,000 (2), phosphate rock 9,130,000 (2), magnesite 4,700,000 (1), barite 4,200,000 (1), talc 3,000,000 (1), fluorspar 2,700,000 (1), asbestos 520,000 (2), strontium 140,000 (2). Distribution of industrial production (percentage of total value added by source of funding;

2007) from: domestic sources 68.5%, of which private enterprises 23.2%, limited liability corporations 22.3%, shareholding corporations 9.9%, state-owned enterprises 9.0%, collectives 2.5%; foreign sources 21.0%; Hong Kong-, Macau-, or Taiwan-based enterprises 10.5%. Retail trade (percentage of total sales by sector; 2007): domestically funded enterprises 88.0%, of which limited liability corporations 29.6%, private enterprises 26.6%, shareholding corporations 20.1%, state-owned enterprises 6.9%, collectives 2.2%; foreign-funded enterprises 8.1%; Hong Kong-, Macau-, or Taiwan-based enterprises 3.9%.

Manufacturing and mining enterprises (2007)

	no. of enterprises	no. of employees	value added (Y '000,000)
Manufacturing			
Iron and steel (base)	7,161	3,044,300	900,714
Telecommunications equipment, computers, other electronics	11,220	5,879,200	792,457

Demography

Area: 440,832 sq mi, 1,141,749 sq km.

Population (2009): 44,972,000².

Density (2009): persons per sq mi 102.0, persons per sq km 39.4.

Urban-rural (2005): urban 73.6%; rural 26.4%.

Sex distribution (2007): male 49.01%; female 50.99%.

Age breakdown (2007): under 15, 29.8%; 15–29, 25.4%; 30–44, 22.3%; 45–59, 14.4%; 60–74, 6.2%; 75–84, 1.6%; 85 and over, 0.3%.

Population projection: (2020) 50,912,000; (2030) 55,768,000.

Ethnic composition (2006): mestizo c. 58%; white c. 20%; mulatto c. 14%; black c. 4%; black-Amerindian c. 3%; Amerindian c. 1%.

Religious affiliation (2007): Roman Catholic c. 80.0%; Protestant/independent Christian c. 13.5%; Mormon c. 0.3%; nonreligious c. 2.0%; other c. 4.2%.

Major cities (2007): Bogotá 7,033,914; Medellín 2,248,912; Cali 2,139,535; Barranquilla 1,144,470; Cartagena 871,342; Cúcuta 582,332.

Vital statistics

Birth rate per 1,000 population (2007): 20.2 (world avg. 20.3).

Death rate per 1,000 population (2007): 5.5 (world avg. 8.5).

Total increase rate per 1,000 population (2007): 14.7 (world avg. 11.8).

Natural fertility rate (avg. births per childbearing woman; 2007): 2.51.

Life expectancy at birth (2007): male 68.4 years; female 76.2 years.

Major causes of death per 100,000 population (2005)³: diseases of the circulatory system 164.4; malignant neoplasms (cancers) 90.4; violence and suicides 70.1; diseases of the respiratory system 56.9; accidents 31.6.

Adult population (ages 15–49) **living with HIV** (2007): 0.6% (world avg. 0.8%).

National economy

Budget (2007). Revenue: Col\$103,986,000,000,000 (tax revenue 56.4%, of which taxes on goods and services 26.1%, income taxes 16.7%; nontax revenue 39.3%; other 4.3%). Expenditures: Col\$110,014,000,000,000 (interest on debt 25.1%; other 74.9%).

Population economically active (2006): total 20,177,100; activity rate 44.5% (participation rates: ages 12–55, 63.2%; female 43.0%; unemployed [April 2008–March 2009] 11.5%).

Price and earnings indexes (2005 = 100)

Cyprus

Island of Cyprus

Area: 3,572 sq mi, 9,251 sq km.
Population (2009): 1,084,000¹.

Two de facto states currently exist on the island of Cyprus: the Republic of Cyprus (ROC), predominantly Greek in character, occupying the southern two-thirds of the island, which is the original and still the internationally recognized de jure government of the whole island; and the Turkish Republic of Northern Cyprus (TRNC), proclaimed unilaterally Nov. 15, 1983, on territory originally secured for the Turkish Cypriot population by the July 20, 1974, intervention of Turkey. Only Turkey recognizes the TRNC. Provision of separate data below does not imply recognition of either state's claims but is necessitated by the lack of unified data.

Republic of Cyprus

Official name: Kipriakí Dhimokratía (Greek); Kıbrıs Cumhuriyeti (Turkish) (Republic of Cyprus).

Form of government: unitary multiparty republic with a unicameral legislature (House of Representatives [80²]).

Head of state and government: President.

Capital: Lefkosia (conventional Nicosia).

Official languages: Greek; Turkish.

Monetary unit: euro (€); valuation (Sept. 1, 2009)

1 U.S.\$ = €0.70; 1 £ = €1.13³.

Demography

Area⁴: 2,276 sq mi, 5,896 sq km.

Population (2009): 808,000⁵.

Age breakdown (2008⁶): under 15, 17.5%; 15–29, 24.0%; 30–44, 21.6%; 45–59, 19.6%; 60–74, 12.2%; 75 and over, 5.1%.

Ethnic composition (2000): Greek Cypriot 91.8%; Armenian 3.3%; Arab 2.9%, of which Lebanese 2.5%; British 1.4%; other 0.6%.

Religious affiliation (2001): Greek Orthodox 94.8%; Roman Catholic 2.1%, of which Maronite 0.6%; Anglican 1.0%; Muslim 0.6%; other 1.5%.

Urban areas (2008⁶): Lefkosia 231,800⁷; Limassol 183,000; Larnaca 81,700.

Vital statistics

Birth rate per 1,000 population (2007): 10.9 (world avg. 20.3).

Death rate per 1,000 population (2007): 6.8 (world avg. 8.5).

Total fertility rate (avg. births per childbearing woman; 2007): 1.39.

Life expectancy at birth (2006–07): male 78.3 years; female 81.9 years.

National economy

Budget (2005). Revenue: £C 3,273,700,000 (excises and import duties 41.4%, income tax 22.3%, social security contributions 19.9%). Expenditures: £C 3,459,300,000 (current expenditures 91.3%, development expenditures 8.7%).

Gross national income (GNI; 2007): U.S.\$19,617,000,000 (U.S.\$24,940 per capita); purchasing power parity GNI (U.S.\$26,370 per capita).

Demography

Population (2009): 14,005,000.

Density (2009): persons per sq mi 133.3, persons per sq km 51.5.

Urban-rural (2005): urban 62.8%; rural 37.2%.

Sex distribution (2005): male 50.15%; female 49.85%.

Age breakdown (2005): under 15, 32.6%; 15–29, 27.4%; 30–44, 19.5%; 45–59, 12.1%; 60–74, 6.1%; 75–84, 1.8%; 85 and over, 0.5%.

Doubling time: 68 years.

Population projection: (2020) 15,804,000; (2030) 17,144,000.

Ethnic composition (2000): mestizo 42.0%; Amerindian 40.8%; white 10.6%; black 5.0%; other 1.6%.

Religious affiliation (2005): Roman Catholic (practicing) c. 35%; Roman Catholic (non-practicing) c. 50%; other (significantly Evangelical Protestant) c. 15%.

Major cities (2003): Guayaquil 2,387,000⁵; Quito 1,514,000⁵; Cuenca 303,994; Machala 217,266; Santo Domingo de los Colorados 211,689; Portoviejo 194,916.

Vital statistics

Birth rate per 1,000 population (2008): 14.9 (world avg. 20.3).

Death rate per 1,000 population (2008): 4.3 (world avg. 8.5).

Total fertility rate (avg. births per childbearing woman; 2005): 2.70.

Marriage/divorce rates per 1,000 population (2008): 5.5/1.2.

Life expectancy at birth (2005): male 71.7 years; female 77.6 years.

Major causes of death per 100,000 population (2005): diseases of the circulatory system 94.0; malignant neoplasms (cancers) 51.9; accidents and violence 44.6; diabetes mellitus 21.1; pneumonia and influenza 20.8.

National economy

Budget (2006). Revenue: U.S.\$6,895,000,000 (nonpetroleum revenue 75.1%, of which value-added tax 32.3%, income tax 15.5%, customs duties 9.0%; petroleum export revenue 24.9%). Expenditures: U.S.\$7,011,000,000 (current expenditure 76.2%; capital expenditure 23.8%).

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): sugarcane 7,300,000, bananas 6,130,000, oil palm fruit 2,100,000, rice 1,300,000, corn (maize) 880,000, plantains 590,000, cocoa beans 87,600, coffee 32,500, pyrethrum and dried flowers (2004) 105; livestock (live animals) 5,050,000 cattle, 1,300,000 pigs, 1,050,000 sheep, 110,000,000 chickens; roundwood 6,082,000 cu m, of which fuelwood 68%; fisheries production 554,745 (from aquaculture 31%). Mining and quarrying (2007): limestone 5,374,000; gold 3,186 kg. Manufacturing (value added in U.S.\$'000,000; 2004): refined petroleum 1,794; food products 870; beverages 845; plastics 341; printing and publishing 233; bricks, cement, and ceramics 213. Energy production (consumption): electricity (kW-hr; 2006) 14,814,000,000 (16,383,000,000); coal, none (none); crude petroleum (barrels; 2007) 187,000,000 ([2006] 55,500,000); petroleum products (metric tons; 2006) 7,453,000 (8,218,000); natural gas (cu m; 2006) 687,000,000 (687,000,000).

Population economically active (2006): total 4,204,800; activity rate of total population 45.2% (participation rates: ages 15–64, 69.6%; female 38.7%; unemployed [March 2006–February 2007] 10.1%).

Price index (2005 = 100)

Demography

Population (2009): 845,000.

Density (2009): persons per sq mi 119.8, persons per sq km 46.2.

Urban-rural (2007): urban 50.7%; rural 49.3%.

Sex distribution (2007): male 51.02%; female 48.98%.

Age breakdown (2007): under 15, 29.0%; 15–29, 27.9%; 30–44, 21.1%; 45–59, 14.5%; 60–74, 6.1%; 75 and over, 1.4%.

Population projection: (2020) 921,000; (2030) 1,021,000.

Doubling time: 54 years.

Ethnic composition (2007): Fijian 56.8%; Indian 37.5%; other Pacific islanders 3.0%, of which Rotuman (Polynesian/other) 1.2%; European/part-European 1.7%; Chinese 0.6%; other 0.4%.

Religious affiliation (2007): Christian 64.4%, of which Methodist 34.6%, Roman Catholic 9.1%, Assemblies of God 5.7%; Hindu 27.9%; Muslim 6.3%; other 1.4%.

Major urban areas (2007): Nasinu 87,446; Suva 85,691 (urban agglomeration, 241,432); Lautoka 52,220; Nausori 47,604; Nadi 42,284.

Vital statistics

Birth rate per 1,000 population (2007): 20.7 (world avg. 20.3).

Death rate per 1,000 population (2007): 7.1 (world avg. 8.5).

Natural increase rate per 1,000 population (2007): 12.9 (world avg. 11.8).

Total fertility rate (avg. births per childbearing woman; 2006): 2.73.

Marriage/divorce rates per 1,000 population (2004): 8.6/n.a.

Life expectancy at birth (2006): male 67.3 years; female 72.5 years.

Major causes of death per 100,000 population (2001): diseases of the circulatory system 330.0; diseases of the respiratory system 50.2; infectious and parasitic diseases 45.8; malignant neoplasms 38.0; accidents and violence 31.7.

National economy

Budget (2006). Revenue: F\$1,373,000,000 (tax revenue 90.7%, of which taxes on goods and services 40.9%, income taxes 32.5%; other 9.3%). Expenditures: F\$1,530,000,000 (general administration 25.0%; education 22.4%; economic affairs 14.2%; public order 9.4%; health 9.3%; defense 5.4%).

Public debt (external, outstanding; June 2009): U.S.\$273,000,000.

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): sugarcane 3,200,000, coconuts 140,000, cow's milk 58,000, taro 38,000, cassava 34,500, rice 15,000, cattle meat 8,400, ginger 4,300, yaqona (kava) (2006) 2,259; livestock (number of live animals) 315,000 cattle, 4,300,000 chickens; roundwood 509,000 cu m, of which fuelwood 7%; fisheries production (2006) 47,319 (from aquaculture 1%). Mining and quarrying (2005): gold 3,800 kg; silver 1,500 kg. Manufacturing (value added in U.S.\$'000,000; 2004): food products 63; textiles and clothing 53; beverages 46; sawn wood and wood products including furniture 28. Energy production (consumption): electricity (kW-hr; 2006) 840,000,000 (841,000,000); coal (metric tons; 2006) none (12,000); crude petroleum, none (none); petroleum products (metric tons; 2006) none (489,000); natural gas, none (none).

Household income and expenditure. Average household size (2007) 4.7; average annual income per household (2002–03) F\$12,753 (U.S.\$6,176); sources of income (2002–03): wages and salaries 54.0%, self-employment 17.1%; expenditure (2002–03): food, beverages, and tobacco 31.2%, housing and energy 18.5%, transportation and communications 17.9%, education 4.5%.

Population economically active (2007): total 334,787; activity rate of total population 40.0% (participation rates: ages 15–64, 57.0%; female 33.9%; unemployed 8.6%).

Demography

Population (2009): 62,596,000⁴.

Density (2009): persons per sq mi 298.0, persons per sq km 115.1.

Urban-rural (2003): urban 76.3%; rural 23.7%.

Sex distribution (2007²): male 48.60%; female 51.40%.

Age breakdown (2006²): under 15, 18.4%; 15–29, 19.1%; 30–44, 21.1%; 45–59, 20.4%; 60–74, 12.7%; 75–84, 6.3%; 85 and over, 2.0%.

Population projection (2020) 65,237,000; (2030) 66,787,000.

Ethnic composition (2000): French 76.9%; Algerian and Moroccan Berber 2.2%; Italian 1.9%; Portuguese 1.5%; Moroccan Arab 1.5%; Flemish 1.4%; Algerian Arab 1.3%; Basque 1.3%; Jewish 1.2%; German 1.2%; Vietnamese 1.0%; Catalan 0.5%; other 8.1%.

Religious affiliation (2004): Roman Catholic 64.3%, of which practicing c. 8%; nonreligious/atheist c. 27%; Muslim 4.3%; Protestant 1.9%; Buddhist c. 1%; Jewish 0.6%; Jehovah's Witness 0.4%; Orthodox 0.2%; other 0.3%.

Major cities/urban agglomerations (2006): Paris 2,181,371/10,142,977; Marseille 839,043/1,418,481; Lyon 472,305/1,417,463; Lille 226,014/1,016,205; Nice 347,060/940,017; Toulouse 437,715/850,873; Bordeaux 232,260/803,117; Nantes 282,853/568,743; Toulon 167,816/543,065; Douai-Lens: Douai (2005) 40,094, Lens (2005) 34,872/512,462; Strasbourg 272,975/440,265; Grenoble 156,107/427,658; Rouen 107,904/388,798; Valenciennes (2005) 41,506/355,660; Nancy 105,468/331,279; Metz 124,435/322,946; Montpellier 251,634/318,225; Tours 136,942/306,974; Saint-Étienne 177,480/286,400; Rennes 209,613/282,550.

Households (2004). Average household size 2.36; 1 person 32.8%, 2 persons 32.5%, 3 persons 15.1%, 4 persons 12.8%, 5 persons or more 6.8%. Individual households 14,320,000 (56.0%); collective households 11,232,000 (44.0%).

Immigration: total immigrant population (2005²) c. 4,850,000; immigrants admitted (2002) 205,707, of which North African 30.7%, EU 20.8%, sub-Saharan African 15.2%, Asian 14.1%, other European 11.8%.

Vital statistics

Birth rate per 1,000 population (2008): 12.9 (world avg. 20.3); (2007) within marriage 48.3%; outside of marriage 51.7%.

Death rate per 1,000 population (2008): 8.6 (world avg. 8.5).

Natural increase rate per 1,000 population (2008): 4.3 (world avg. 11.8).

Total fertility rate (avg. births per childbearing woman; 2008): 2.00.

Marriage/divorce rates per 1,000 population: (2008) 4.3/(2003) 2.1.

Life expectancy at birth (2008): male 77.6 years; female 84.4 years.

Major causes of death per 100,000 population (2004): malignant neoplasms (cancers) 251.9; diseases of the circulatory system 243.0; accidents and violence 61.7; diseases of the respiratory system 50.0; diseases of the digestive system 37.8; endocrine, metabolic, and nutritional disorders 31.1.

Adult population (ages 15–49) living with HIV (2007): 0.4% (world avg. 0.8%).

Social indicators

Educational attainment (2002). Percentage of population age 25–64 with no formal schooling through lower-secondary education 35%, upper secondary/higher vocational 41%, university 24%.

Quality of working life. Legally worked week for full-time employees (2005) 36.0 hours. Rate of fatal injuries per 100,000 insured workers (2004): 3.7.

Average days lost to labour stoppages per 1,000 workers (2004): 13. Trade union membership (2003): 1,900,000 (c. 8% of labour force).

Access to services (2004). Proportion of principal residences having: electricity 97.4%; indoor toilet 94.6%; indoor kitchen with sink 94.2%; hot water 60.3%; air conditioner 15.4%.

Social participation. Eligible voters participating in last (May 2007) national election: 84.0%. Population over 15 years of age participating in voluntary associations (1997): 28.0%. Percentage of population who “never” or “almost never” attend church services (2000) 60%; percentage of Roman Catholic population who attend Mass weekly (2003) 12%.

Social deviance. Offense rate per 100,000 population (2006) for: murder 1.5, rape 16.0, other assault 269.2; theft (including burglary and housebreaking) 3,403.8. Incidence per 100,000 in general population of: homicide (2001) 0.8; suicide (2001) 16.1.

Leisure. Members of sports federations (2007): 16,254,000, of which football (soccer) 2,321,000. Movie tickets sold (2005): 174,200,000. Average daily hours of television viewing for population age 4 and over (2007): 3.45.

Material well-being (2004). Households possessing: automobile (2007) 82%; colour television 95%; personal computer 45%; washing machine 92%; microwave 74%; dishwasher (2001) 39%.

National economy

Gross national income (2008)⁵: U.S.\$2,702,180,000,000 (U.S.\$42,250 per capita); purchasing power parity GNI (U.S.\$34,400 per capita).

Urban-rural (2005): urban 51.9%; rural 48.1%.

Sex distribution (2007): male 51.25%; female 48.75%.

Age breakdown (2007): under 15, 26.0%; 15–29, 26.6%; 30–44, 23.4%; 45–59, 15.3%; 60–74, 6.9%; 75 and over, 1.8%.

Population projection: (2020) 300,000; (2030) 324,000.

Ethnic composition (2000): Polynesian 84.4%, of which Tahitian 41.0%, Tuamotuan 8.5%; mixed European-Polynesian 17.0%; Han Chinese 11.3%; French 11.0%; other 2.3%.

Religious affiliation (2005): Protestant c. 36%, of which Māōhi Protestant Church (Presbyterian) c. 33%; Roman Catholic c. 31%; other Christian c. 11%, of which Mormon c. 6%; Chinese folk-religionist, nonreligious, and other c. 22%.

Major communes (2007): Faa'a 29,781⁴; Papeete 26,050 (urban agglomeration 131,695⁵); Punaauia 25,399⁴; Pirae 14,551⁴; Nunue 4,927⁶.

Vital statistics

Birth rate per 1,000 population (2007): 17.2 (world avg. 20.3); (2004) within marriage c. 26%; outside of marriage c. 74%.

Death rate per 1,000 population (2007): 4.8 (world avg. 8.5).

Total fertility rate (avg. births per childbearing woman; 2007): 2.11.

Marriage/divorce rates per 1,000 population (2006): 4.6/n.a.

Life expectancy at birth (2007): male 71.9 years; female 77.1 years.

Major causes of death per 100,000 population (2003): diseases of the circulatory system 105.3; malignant neoplasms (cancers) 99.2; accidents, suicide, and violence 49.4; respiratory diseases 37.6.

National economy

Budget (2007). Revenue: CFPF 143,113,000,000 (tax revenue 72.6%; state grants 15.5%; loans 7.8%; nontax revenue 4.1%). Expenditures: CFPF 144,492,000,000 (current expenditure 71.6%; capital expenditure 22.0%; debt service 6.4%).

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): coconuts 87,000, roots and tubers 10,450 (of which cassava 4,300), copra (2008) 10,423, pineapples 3,400, sugarcane 3,000, *noni* juice and puree (export production; 2008) 1,924, tomatoes 1,100, lettuce 900, cucumbers 870, bananas 800, vanilla 37; livestock (number of live animals) 27,000 pigs, 16,500 goats, 12,000 cattle; roundwood 4,300 cu m, of which fuelwood 100%; fisheries production 13,126 (from aquaculture, negligible); export production of black pearls (2008) 9,349 kg. Mining and quarrying: submerged phosphate deposits at Mataiva Atoll were not mined in 2009. Manufacturing: mostly food and beverages and fabricated metal products; other specific manufactures include *monoï* oil (primarily refined coconut and sandalwood oils), printed cloth, and sandals. Energy production (consumption): electricity (kW-hr; 2006) 667,000,000 (667,000,000); coal, none (none); crude petroleum, none (none); petroleum products (metric tons; 2006) none (266,000).

Population economically active (2007): total 107,926; activity rate of total population 41.6% (participation rates: ages 15 and over, 56.2%; female 41.0%; unemployed 11.7%).

Total fertility rate (avg. births per childbearing woman; 2007): 5.20.

Marriage/divorce rates per 1,000 population: n.a.

Life expectancy at birth (2006): male 52.3 years; female 56.0 years.

Major causes of death per 100,000 population (2002): infectious and parasitic diseases c. 404, of which malaria c. 94; cardiovascular diseases c. 172; lower respiratory infections c. 145; accidents c. 80.

National economy

Budget (2007). Revenue: D 3,663,500,000 (tax revenue 82.9%, of which taxes on goods and services 36.7%, taxes on income and profits 24.1%; nontax revenue 11.8%; grants 5.3%). Expenditures: D 3,635,000,000 (current expenditure 71.1%, of which interest payments 22.4%; capital expenditure 26.8%; net lending 2.1%).

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): millet 160,000, peanuts (groundnuts) 100,000, sorghum 40,000, corn (maize) 40,000, paddy rice 40,000, oil palm fruit 36,000, fresh vegetables 3,000, cassava 7,800, pulses (mostly beans) 3,300, findo (local cereal; 2005) 600; live-stock (number of live animals) 334,000 cattle, 280,000 goats, 150,000 sheep; roundwood 778,200 cu m, of which fuelwood 86%; fisheries production 43,574 (from aquaculture, negligible). Mining and quarrying: sand, clay ([2007] 14,000), and gravel are excavated for local use. Manufacturing (value added in U.S.\$; 1995): food products and beverages 6,000,000; textiles, clothing, and footwear 750,000; wood products 550,000. Energy production (consumption): electricity (kW-hr; 2007) 213,000,000 ([2006] 166,000,000); coal, none (none); crude petroleum, none (none); petroleum products (metric tons; 2006) none (109,000); natural gas, none (none).

Population economically active (2006): total 754,000; activity rate of total population 45.3% (participation rates: ages 15–64, 77.1%; female 45.6%; unemployed, n.a.).

Price index (2005 = 100)							
	2002	2003	2004	2005	2006	2007	2008
Consumer price index	71.4	83.5	95.4	100.0	102.1	107.5	112.3

Household income and expenditure. Average household size (2003) 8.6; income per household: n.a.; sources of income: n.a.; expenditure (1991)⁷: food and beverages 58.0%, clothing and footwear 17.5%, energy and water 5.4%, housing 5.1%, education, health, transportation and communications, recreation, and other 14.0%.

Public debt (external, outstanding; 2007): U.S.\$704,000,000.

Gross national income (GNI; 2008): U.S.\$653,000,000 (U.S.\$390 per capita); purchasing power parity GNI (U.S.\$1,280 per capita).

Sex distribution (2008⁴): male 48.98%; female 51.02%.

Ethnic composition (by nationality; 2000): German 88.2%; Turkish 3.4% (including Kurdish 0.7%); Italian 1.0%; Greek 0.7%; Serb 0.6%; Russian 0.6%; Polish 0.4%; other 5.1%.

Households (2007). Number of households 39,722,000; average household size 2.1; 1 person 38.7%, 2 persons 34.0%, 3 persons 13.4%, 4 persons 10.3%, 5 or more persons 3.6%.

Age breakdown (2007⁴): under 15, 13.9%; 15–29, 17.6%; 30–44, 22.4%; 45–59, 21.1%; 60–74, 16.7%; 75–84, 6.3%; 85 and over, 2.0%.

Religious affiliation (2005): Protestant 35.0%, of which Lutheran/Reformed churches c. 34%; Roman Catholic 32.5%; Sunni Muslim 4.3%; Orthodox 1.7%; New Apostolic (an independent Christian group) 0.5%; Buddhist 0.3%; Jewish 0.2%; nonreligious 18.0%; atheist 2.0%; other 5.5%.

Resident foreign population (2008⁴): 6,744,900 (8.2% of total population); **region/country of birth:** EU countries 34.7%, of which Italy 7.8%, Poland 5.7%, Greece 4.4%, Austria 2.6%; Turkey 25.4%; other Asian countries 12.1%; combined Serbia and Montenegro 4.9%; African countries 4.0%; Croatia 3.3%; Russia 2.8%; Bosnia and Herzegovina 2.3%; U.S. 1.5%; other 9.0%.

Population with immigrant background (2008): 14,800,000 (18% of total population).

Immigration/emigration trends (2007): foreigners arriving 680,000; Germans departing 165,000.

Vital statistics

Birth rate per 1,000 population (2008): 8.2 (world avg. 20.3); within marriage 68.2%; outside of marriage 31.8%.

Death rate per 1,000 population (2008): 10.3 (world avg. 8.5).

Natural increase rate per 1,000 population (2008): –2.1 (world avg. 11.8).

Total fertility rate (avg. births per childbearing woman; 2008): 1.37.

Marriage/divorce rates per 1,000 population (2007): 4.5/2.3.

Life expectancy at birth (2008): male 77.2 years; female 82.5 years.

Major causes of death per 100,000 population (2006): diseases of the circulatory system 435.7, of which ischemic heart disease 175.0, cerebrovascular disease 79.1, hypertensive diseases 34.6; malignant neoplasms (cancers) 256.8, of which lung cancer 49.5, colon cancer 33.0; diseases of the respiratory system 66.6; diseases of the digestive system 52.2; diabetes mellitus 27.1; accidents 22.7; suicide 11.9.

Social indicators

Educational attainment (2006). Percentage of population age 25–64 having: no formal schooling through primary education 3%; lower secondary 14%; upper secondary 52%; post-secondary non-tertiary 7%; higher vocational 9%; university 14%; advanced degree 1%.

Quality of working life. Average workweek (2007): 38.4 hours. Annual rate per 100,000 workers (2007) for: injuries or accidents at work 2,803; deaths 2.16. Proportion of labour force insured for damages of income loss resulting from: injury, virtually 100%; permanent disability, virtually 100%; death, virtually 100%. Average days lost to labour stoppages per 1,000 workers (2008): 3.7.

Access to services. Proportion of dwellings (2002) having: electricity, virtually 100%; piped water supply, virtually 100%; flush sewage disposal (1993) 98.4%; public fire protection, virtually 100%.

Social participation. Eligible voters participating in last (September 2005) national election 77.7%. Trade union membership in total workforce (2009)⁴: 6,441,045 (15.4%). Population “religious”/“deeply religious” (2007): in western Germany 78%/21%; in eastern Germany 36%/8%; 15% of Roman Catholics “regularly” attend religious services.

Social deviance (2006)⁷. Conviction rate per 100,000 population for: murder⁸ and manslaughter 0.8; sexual abuse of children 3.1; rape 2.7; assault and battery 91.3; theft 195.3; fraud 132.4.

Leisure. Favourite leisure activities include playing football (soccer; registered participants, 2004) 6,272,804, as well as watching television, using the computer, going to the cinema, attending theatrical and musical performances, visiting museums, and taking part in package tours.

Material well-being (2008). Households possessing: automobile (2005) 76.8%; refrigerator 98.6%; freezer 52.4%; dishwasher 62.5%; microwave oven 69.6%; washing machine (2004) 95.5%; clothes dryer 38.5%; television (2004) 95.0%; DVD player (2006) 59%; personal computer (2006) 71.6%; Internet access (2006) 57.9%; MP3 player (2006) 23%.

National economy

Budget (2007)⁹. Revenue: €1,064,730,000,000 (tax revenue 54.5%, of which individual income taxes 21.6%, general taxes on goods and services 15.6%, excise taxes 6.0%; social security contributions 37.6%; nontax revenue 7.5%; other 0.4%). Expenditures: €1,061,590,000,000 (social protection 45.7%; health 14.0%; education 9.1%; economic affairs 7.2%; public debt payments 6.3%; public order 3.5%; defense 2.4%).

Total public debt (May 2009): U.S.\$2,052,000,000,000.

Production (metric tons except as noted; 2007). Agriculture, forestry, fishing: cereal grains 42,294,600 (of which wheat 21,366,800, barley 11,034,200), sugar beets 26,114,000, potatoes 11,604,500, rapeseed 5,320,000, grapes 1,300,000, apples 911,900, cabbages 735,500, gooseberries (2006) 40,000, hops 28,600, currants 8,800; livestock (number of live animals) 26,530,000 pigs, 12,600,800 cattle, 2,444,400 sheep, 108,000,000 chickens; roundwood 76,728,000 cu m, of which fuelwood 11%; fisheries production 293,757 (from aquaculture 15%). Mining and quarrying (metric tons; 2006): potash (potassium oxide content) 3,625,000; bentonite 364,000; feldspar 167,332; barite 85,524.

Major towns (2009⁴): Nuuk (Godthåb) 15,105; Sisimiut (Holsteinsborg) 5,458; Ilulissat (Jakobshavn) 4,528; Qaqortoq (Julianehåb) 3,302.

Vital statistics

Birth rate per 1,000 population (2007): 14.9 (world avg. 20.3); (1993) within marriage 29.2%; outside of marriage 70.8%.

Death rate per 1,000 population (2007): 7.8 (world avg. 8.5).

Natural increase rate per 1,000 population (2007): 7.1 (world avg. 11.8).

Total fertility rate (avg. births per childbearing woman; 2007): 2.28.

Marriage/divorce rates per 1,000 population (1999): 4.5/n.a.

Life expectancy at birth (2006): male 66.4 years; female 73.6 years.

Major causes of death per 100,000 population (2006; 2 categories only): malignant neoplasms (cancers) c. 186; suicide c. 88.

National economy

Budget (general government; 2007). Revenue: DKK 8,625,000,000 (block grant from Danish government 44.8%; taxes on income and wealth 33.9%; import duties 6.5%; other 14.8%). Expenditures: DKK 8,239,000,000 (social welfare 26.0%, education 19.3%, health 12.1%, general administration 11.7%, economic affairs 11.6%, public order 3.7%, defense 2.2%).

Production (metric tons except as noted). Agriculture, fishing, other marine: locally grown broccoli, cauliflower, and cabbage sold commercially for the first time in 2007, potatoes also produced; roundwood, n.a.; fish catch (2006) 213,600 (of which prawn 132,500, Greenland halibut 44,900, Atlantic cod 10,600, lumpfish 10,000, crab 3,600); number of other marine catch (2006): narwhals 411, minke whales 181, beluga whales 137, porpoises 2,923, seals 187,613, walrus 45; livestock (number of live animals; 2007) 21,704 sheep, 2,441 tame reindeer, 216 horses; number of animals killed (2006) reindeer 15,002, musk ox 2,393, polar bear 118. Mining (2007): gold 1,639 kg. Manufacturing: principally fish and prawn processing, handicrafts, hides and skins, and ship repair. Energy production (consumption): electricity (kW-hr; 2006) 344,000,000 (268,000,000); coal, none (none); crude petroleum, none (none); petroleum products (metric tons; 2006) none (184,000); natural gas, none (none).

Tourism (2008): number of overnight stays at hotels 236,913, of which visitors from within Greenland 115,289, from Denmark 79,396, from the U.S. 6,532.

Land use as % of total land area (2007): in temporary crops, negligible, in permanent crops, none, in pasture 0.6%, forest area, negligible (2 sq km [1.2 sq mi]).

Household income and expenditure. Average household size (2008⁴) 2.5; average gross income per household (2005) DKK 354,000 (U.S.\$59,030); sources of income: n.a.; expenditure (1994): food, beverages, and tobacco 41.6%, housing and energy 22.4%, transportation and communications 10.2%, recreation 6.4%.

Grenada

Official name: Grenada.

Form of government: constitutional monarchy with two legislative houses (Senate [13]; House of Representatives [15]).

Chief of state: British Monarch represented by Governor-General.

Head of government: Prime Minister.

Capital: St. George's.

Official language: English.

Official religion: none.

Monetary unit: Eastern Caribbean dollar (EC\$); valuation (Sept. 1, 2009)
1 U.S.\$ = EC\$2.70; 1 £ = EC\$4.38.

Demography

Population (2009): 107,000.

Density (2009): persons per sq mi 804.5, persons per sq km 311.0.

Urban-rural (2008): urban 30.9%; rural 69.1%.

Sex distribution (2008): male 51.96%; female 48.04%.

Age breakdown (2008): under 15, 32.4%; 15–29, 33.7%; 30–44, 21.6%; 45–59, 8.2%; 60–74, 3.1%; 75 and over, 1.0%.

Population projection: (2020) 112,000; (2030) 112,000.

Doubling time: 71 years.

Ethnic composition (2000): black 51.7%; mixed 40.0%; Indo-Pakistani 4.0%; white 0.9%; other 3.4%.

Religious affiliation (2005): Roman Catholic c. 41%; Protestant (of which significantly Anglican and Seventh-day Adventist) c. 30%; Rastafarian c. 5%; nonreligious/other c. 24%.

Major localities (2006): St. George's 4,300 (urban agglomeration [2007] 32,000); Gouyave 3,400; Grenville 2,500; Victoria 2,300.

Vital statistics

Birth rate per 1,000 population (2008): 18.1 (world avg. 20.3).

Death rate per 1,000 population (2008): 8.2 (world avg. 8.5).

Natural increase rate per 1,000 population (2008): 9.9 (world avg. 11.8).

Total fertility rate (avg. births per childbearing woman; 2008): 2.30.

Marriage/divorce rates per 1,000 population (2001): 5.0/1.1.

Life expectancy at birth (2008): male 67.1 years; female 70.5 years.

Major causes of death per 100,000 population (2002): diseases of the circulatory system 413; malignant neoplasms (cancers) 178; diabetes mellitus 63; diseases of the respiratory system 25.

National economy

Budget (2008). Revenue: EC\$516,100,000 (tax revenue 84.1%, of which tax on international trade 45.5%, corporate taxes 13.8%; grants 10.0%; nontax revenue 5.9%). Expenditures: EC\$627,500,000 (current expenditure 65.9%, of which wages 32.0%, transfers 14.9%, debt service 5.6%; capital expenditure 34.1%).

Public debt (external, outstanding; 2007): U.S.\$249,740,000.

Gross national income (GNI; 2008): U.S.\$603,000,000 (U.S.\$5,710 per capita); purchasing power parity GNI (U.S.\$8,060 per capita).

Demography

Population (2009): 184,000.
Density (2009)³: persons per sq mi 880.4, persons per sq km 340.1.
Urban-rural (2003): urban 93.7%; rural 6.3%.
Sex distribution (2007): male 50.35%; female 49.65%.
Age breakdown (2006): under 15, 29.0%; 15–29, 23.0%; 30–44, 22.2%; 45–59, 16.1%; 60–74, 7.4%; 75 and over, 2.3%.
Population projection (2020) 226,000; (2030) 242,000.
Doubling time: 45 years.
Ethnic composition (2007): Chamorro 41.4%; other Micronesian 10.3%; Filipino 29.3%; white 4.0%; other (mostly mixed race) 15.0%.
Religious affiliation (2005): Roman Catholic c. 72%; Protestant c. 12%; non-religious/other c. 16%.
Major populated places (2000): Tamuning 10,833; Mangilao 7,794; Yigo 6,391; Astumbo 5,207; Hagåtña 1,122.

Vital statistics

Birth rate per 1,000 population (2007): 20.2 (world avg. 20.3); (2004) within marriage 42.8%; outside of marriage 57.2%.
Death rate per 1,000 population (2007): 4.5 (world avg. 8.5).
Natural increase rate per 1,000 population (2007): 15.7 (world avg. 11.8).
Total fertility rate (avg. births per childbearing woman; 2006): 2.58.
Marriage/divorce rates per 1,000 population (2004): 9.4/11.9.
Life expectancy at birth (2007): male 75.7 years; female 82.0 years.
Major causes of death per 100,000 population (2005): ischemic heart disease 130.8; malignant neoplasms (cancers) 57.1; cerebrovascular disease 38.3; accidents 27.7; diabetes mellitus 19.4; suicide 17.1.

National economy

Budget (2007). Revenue: U.S.\$514,400,000 (taxes 82.9%, of which income taxes 48.8%; federal contributions 14.5%; other 2.6%). Expenditures: U.S.\$394,800,000 (education 45.7%; public order 18.4%; general administration 11.1%; interest 3.2%; health 2.5%).
Public debt: n.a.
Production (metric tons except as noted). Agriculture, forestry, fishing (2007): coconuts 53,200, vegetables 2,685, roots and tubers 2,630, watermelons 2,500, eggs 750, fruits 620; roundwood, n.a.; livestock (number of live animals) 5,200 pigs, 210,000 chickens; roundwood, n.a.; fisheries production 804 (from aquaculture 20%). Mining and quarrying: sand and gravel. Manufacturing (value of sales in U.S.\$'000; 2007): cement, bricks, and ceramics 72,811; food processing 23,244; printing and publishing 10,008; other industries include textiles/garments and boat building. Energy production (consumption): electricity (kW-hr; 2006) 1,891,000,000 (1,891,000,000); crude petroleum, none (none); petroleum products (metric tons; 2002) none (1,333,000); natural gas, none (none).
Household income and expenditure. Average household size (2007) 3.8; annual average (median) household income (2006) U.S.\$49,795⁴ (U.S.\$40,373)⁴; sources of income: n.a.; expenditure (2007)⁵: health care 20.4%, household furnishings 15.7%, food and nonalcoholic beverages 14.7%, energy 11.3%, transportation 8.6%, clothing and footwear 6.7%, housing 5.3%.
Population economically active (2007): total 63,600⁸; activity rate of total population c. 36% (participation rates: over age 15 [2005] 61.1%; female 38.1%; unemployed 8.3%).

Households (2001). Total number of households 193,579,954. Average household size 5.3. Type of household: permanent 51.8%; semipermanent 30.0%; temporary 18.2%. Average number of rooms per household 2.2; 1 room 38.4%, 2 rooms 30.0%, 3 rooms 14.3%, 4 rooms 7.5%, 5 rooms 2.9%, 6 or more rooms 3.7%, unspecified number of rooms 3.2%.

Vital statistics

Birth rate per 1,000 population (2008): 22.8 (world avg. 20.3).

Death rate per 1,000 population (2008): 8.2 (world avg. 8.5).

Natural increase rate per 1,000 population (2008): 14.6 (world avg. 11.8).

Total fertility rate (avg. births per childbearing woman; 2008): 2.80.

Marriage/divorce rates per 1,000 population: n.a./n.a.

Life expectancy at birth (2008): male 63.0 years; female 67.0 years.

Major causes of death per 100,000 population (2002): infectious and parasitic diseases 420, of which HIV/AIDS 34; diseases of the circulatory system 268, of which ischemic heart disease 146; accidents, homicide, and other violence 100; malignant neoplasms (cancers) 71; chronic respiratory diseases 58.

Adult population (ages 15–49) **living with HIV** (2008): 0.4% (world avg. 0.8%).

Social indicators

Educational attainment (2001). Percentage of population age 25 and over having: no formal schooling 48.1%; incomplete primary education 9.0%; complete primary 22.1%; secondary 13.7%; higher 7.1%.

Distribution of expenditure (2004–05)

percentage of household expenditure by decile/quintile									
1	2	3	4	5	6	7	8	9	10 (highest)
3.6	4.5	—11.3—	—14.9—	—20.4—			14.2	31.1	

Quality of working life. Average workweek (2006): 46.9¹⁵. Rate of fatal injuries per 100,000 employees (2006) 38¹⁵. Agricultural workers in servitude to creditors (early 1990s) 10–20%. Children ages 5–14 working as child labourers (2003): 35,000,000 (14% of age group). Percentage of population living below the poverty line (2004–05): 21.7%.

Access to services (2005–06)¹⁶. Percentage of total (urban, rural) households having access to: electricity for lighting purposes 67.9% (93.1%, 55.7%), kerosene for lighting purposes (2001) 36.9% (8.3%, 46.6%), water closets 24.3% (50.8%, 11.4%), pit latrines 7.9% (7.0%, 8.6%), no latrines 55.3% (16.8%, 74.0%), closed drainage for waste water (2001) 12.5% (34.5%, 3.9%), open drainage for waste water (2001) 33.9% (43.4%, 30.3%), no drainage for waste water (2001) 53.6% (22.1%, 65.8%). Type of fuel used for cooking in households: firewood 54.4% (23.0%, 69.6%), LPG (liquefied petroleum gas) 24.7% (58.7%, 8.2%), dung 10.6% (2.8%, 14.4%), kerosene 3.2% (8.2%, 0.8%), coal 1.9% (4.3%, 0.8%). Source of drinking water: hand pump or tube well 42.8% (21.3%, 53.2%), piped water 24.5% (50.7%, 11.8%), well 9.3% (2.9%, 12.4%), river, canal, spring, public tank, pond, or lake 1.5% (0.8%, 1.8%).

Social participation. Eligible voters participating in April/May 2004 national election: 58.1%. Registered trade unions (2005): 78,465.

Social deviance (2003)¹⁷. Offense rate per 100,000 population for: murder 3.1; rape 1.5; dacoity (gang robbery) 0.5; theft 23.0; riots 5.4. Rate of suicide per 100,000 population (2007): 10.5.

Material well-being (2005–06)¹⁶. Total (urban, rural) households possessing: television receivers 44.2% (73.2%, 30.1%), cellular telephones 16.8% (36.3%, 7.4%), scooters, motorcycles, or mopeds 17.2% (30.5%, 10.8%), cars, jeeps, or vans 2.7% (6.1%, 1.0%). Households availing banking services (2001) 35.5% (49.5%, 30.1%).

National economy

Gross national income (GNI; 2008): U.S.\$1,215,485,000,000 (U.S.\$1,070 per capita); purchasing power parity GNI (U.S.\$2,960 per capita).

Natural increase rate per 1,000 population (2008): 1.7 (world avg. 11.8).

Total fertility rate (avg. births per childbearing woman; 2006): 1.65.

Marriage/divorce rates per 1,000 population: (2006) 5.3/(2003) 4.4.

Life expectancy at birth (2006): male 75.3 years; female 81.2 years.

Major causes of death per 100,000 population (2005): diseases of the circulatory system 347.5, of which ischemic heart diseases 123.4, cerebrovascular disease 86.9; malignant neoplasms (cancers) 246.7; diseases of the respiratory system 146.0; diseases of the digestive system 35.2; accidents 26.4.

National economy

Budget (2007–08). Revenue: £598,318,000 (customs duties and excise taxes 71.8%; income taxes 26.6%; nontax revenue 1.6%). Expenditures: £518,186,000 (health and social security 43.5%; education 19.5%; transportation 7.5%; home affairs 7.2%; local government/environment 5.7%; tourism and recreation 5.2%).

Production. Agriculture, forestry, fishing: main crops include hay, oats, barley, wheat, and orchard crops; livestock (number of live animals; 2007) 145,864 sheep, 36,934 cattle, 565 pigs; roundwood, n.a.; fish catch (value of principal catch in £; 2008): scallops 2,325,000, lobster 441,000, queen scallops 300,300, crab (2007) 295,000; fisheries production by tonnage (2007) 3,760 metric tons (from aquaculture, none). Mining and quarrying: sand, gravel, and limestone. Manufacturing (value added in £; 2006–07): electrical and nonelectrical machinery/apparatus, textiles, other 121,700,000; food and beverages 24,400,000. Energy production (consumption): electricity (kW-hr; 2008) n.a. (391,800,000); crude petroleum, none (n.a.); petroleum products, n.a. (n.a.); natural gas, none (n.a.).

Household income and expenditure. Average household size (2006) 2.4; average annual income per household (2006–07) £36,624 (U.S.\$70,648); sources of income (2006–07): wages and salaries 72.1%, interest/private pensions 11.3%, transfer payments 11.0%, self-employment 2.1%, other 3.5%; expenditure (January 2008): recreation and culture 22.2%, housing and energy 15.5%, food and nonalcoholic beverages 13.1%, transportation 12.0%, restaurants and hotels 8.1%, household furnishings 5.7%.

Gross national income (at current market prices; 2006–07): U.S.\$3,512,000,000 (U.S.\$43,579 per capita).

Demography

Population (2009): 60,325,000.
Density (2009): persons per sq mi 518.5, persons per sq km 200.2.
Urban-rural (2005): urban 67.6%; rural 32.4%.
Sex distribution (2008⁴): male 48.56%; female 51.44%.
Age breakdown (2008⁴): under 15, 14.1%; 15–29, 16.3%; 30–44, 23.8%; 45–59, 20.1%; 60–74, 16.1%; 75–84, 7.2%; 85 and over, 2.4%.
Population projection: (2020) 62,938,000; (2030) 64,787,000.
Ethnolinguistic composition (2000): Italian 96.0%; North African Arab 0.9%; Italo-Albanian 0.8%; Albanian 0.5%; German 0.4%; Austrian 0.4%; other 1.0%.
Religious affiliation (2005): Roman Catholic *c.* 83%, of which practicing *c.* 28%; Muslim *c.* 2%; nonreligious/atheist *c.* 14%; other *c.* 1%.
Major cities/urban agglomerations (2008⁴/2007): Rome 2,718,768 (3,339,000); Milan 1,299,633 (2,945,000); Naples 973,132 (2,250,000); Turin 908,263 (1,652,000); Palermo 663,173 (863,000); Genoa 610,887; Bologna 372,256; Florence 364,710; Bari 322,511; Catania 298,957; Venice 268,993; Verona 264,191; Messina 243,997; Padua 210,173; Trieste 205,356; Taranto 195,130; Brescia 189,742; Prato 185,603; Reggio di Calabria 185,577; Modena 179,937; Parma 178,718.
Households. Average household size (2008⁴) 2.4; composition of households (2001): 1 person 24.9%, 2 persons 27.1%, 3 persons 21.6%, 4 persons 19.0%, 5 or more persons 7.4%. Family households (2001): 21.810,676, of which couple with children 41.5%, single family 24.9%, couple without children 20.8%, mother with children 7.3%, father with children 1.6%.
Immigration (2008⁴): resident foreigners 3,432,651, of which from EU countries 17.7%, other Europe 23.0%, North African countries 15.2%, other Africa 6.6%, Asian countries 7.7%, other/not stated 29.8%.

Vital statistics

Birth rate per 1,000 population (2008): 9.6 (world avg. 20.3); (2007) within marriage 79.3%; outside of marriage 20.7%.
Death rate per 1,000 population (2008): 9.8 (world avg. 8.5).
Natural increase rate per 1,000 population (2008): –0.2 (world avg. 11.8).
Total fertility rate (avg. births per childbearing woman; 2007): 1.37.
Marriage/divorce rates per 1,000 population (2007): 4.2/0.8.
Life expectancy at birth (2007): male 78.6 years; female 84.1 years.
Major causes of death per 100,000 population (2006): diseases of the circulatory system 373.4; malignant neoplasms 286.2; diseases of the respiratory system 60.7; diseases of the digestive system 39.2.
Adult population (ages 15–49) *living with HIV* (2007): 0.4%⁶ (world avg. 0.8%).

Social indicators

Educational attainment (2007). Percentage of population ages 25 to 64 having: no formal schooling through primary education 15%; lower secondary 33%; upper secondary 37%; university 13%; other 2%.
Quality of working life. Average workweek (2008): 34.6 hours. Annual rate per 100,000 workers (2007) for: nonfatal injury 2,647; fatal injury 4. Number of working days lost to labour stoppages per 1,000 workers (2007): 52.6.
Material well-being. Rate per 100 households possessing (2008): mobile phone 88.5; personal computer 50.1; Internet access 42.0; satellite dish 30.7.
Transport used for work per 100 employees (includes double-counting; 2008): car 75.7%, walking 11.1%, bus 4.9%, motorcycle/motorbike 4.6%, bicycle 3.1%, train 2.9%, underground 2.5%, other 2.9%.
Social participation. Eligible voters participating in last national election (April 2008): over 80%. Trade union membership in total workforce (2004): *c.* 30%.

Social deviance (2007). Offense rate per 100,000 population for: murder/manslaughter 4.6; rape 8.2; theft 2,756; battery 132.2; robbery 86.2.
Access to services (2002). Nearly 100% of dwellings have access to electricity, a safe water supply, and toilet facilities.
Leisure (2006). Favourite leisure activities (attendance per 100 people age 6 and over): cinema 48.9; museum/art exhibition 27.7; sporting events 27.3; discotheque 24.8; archaeological sites/monuments 21.1.

National economy

Gross national income (GNI; 2008): U.S.\$2,109,075,000,000 (U.S.\$35,240 per capita); purchasing power parity GNI (U.S.\$30,250 per capita).

Demography

Population (2009): 2,702,000.

Density (2009): persons per sq mi 636.7, persons per sq km 245.8.

Urban-rural (2008): urban 53.3%; rural 46.7%.

Sex distribution (2009²): male 49.28%; female 50.72%.

Age breakdown (2009²): under 15, 27.9%; 15–29, 25.0%; 30–44, 23.8%; 45–59, 12.4%; 60–74, 7.1%; 75 and over, 3.8%.

Population projection: (2020) 2,818,000; (2030) 2,857,000.

Doubling time: 67 years.

Ethnic composition (2001): black 91.6%; mixed race 6.2%; East Indian 0.9%; Chinese 0.2%; white 0.2%; other/unknown 0.9%.

Religious affiliation (2001): Protestant 61.2%, of which Church of God 23.8%⁴, Seventh-day Adventist 10.8%, Pentecostal 9.5%; Roman Catholic 2.6%; other Christian 1.7%; Rastafarian 0.9%; nonreligious 20.9%; other 12.7%.

Major cities (2006): Kingston 585,300⁵; Spanish Town 148,800; Portmore 103,900; Montego Bay 82,700; Mandeville 47,700; May Pen 44,800.

Vital statistics

Birth rate per 1,000 population (2008): 16.7 (world avg. 20.3).

Death rate per 1,000 population (2008): 6.3 (world avg. 8.5).

Natural increase rate per 1,000 population (2008): 10.4 (world avg. 11.8).

Total fertility rate (avg. births per childbearing woman; 2008): 2.30.

Marriage/divorce rates per 1,000 population (2008): 8.1/0.8.

Life expectancy at birth (2008): male 71.9 years; female 75.4 years.

Major causes of death per 100,000 population (2002): circulatory diseases 321, of which cerebrovascular disease 135; malignant neoplasms (cancers) 130; communicable diseases 106; diabetes 81.

National economy

Budget (2008–09). Revenue: J\$276,199,800,000 (tax revenue 89.1%; nontax revenue 5.8%; grants and other revenue 5.1%). Expenditures: J\$351,521,400,000 (public debt 35.6%; wages and salaries 31.7%; capital expenditures 11.8%).

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): sugarcane 2,000,000, fruit 415,000 (of which oranges 142,000), coconuts 170,000, yams 127,000, bananas 125,000, chicken meat 101,500, pumpkins, squash, and gourds 36,300, pimiento and allspice (2005) 10,400, coffee 2,700; livestock (number of live animals) 430,000 cattle, 12,500,000 chickens; roundwood 833,800 cu m, of which fuelwood 67%; fisheries production 22,164 (from aquaculture 25%). Mining and quarrying (2008): bauxite 14,697,000; alumina 3,991,000; limestone (2007) 2,950,000; gypsum 238,000. Manufacturing (2008): cement 724,600,000; animal feeds (2005) 367,600; sugar 140,000; flour 132,561; molasses 62,654; beer 859,870 hectolitres; rum [and other distilled spirits] 265,349 hectolitres; cigarettes (2005) 724,313,000 units. Energy production (consumption): electricity (kW-hr; 2006) 7,473,000,000 (7,473,000,000; hard coal (metric tons; 2006) none (32,000); crude petroleum (barrels; 2006) none (7,440,000); petroleum products (metric tons; 2006) 995,000 (3,806,000); natural gas, none (none).

Land use as % of total land area (2007): in temporary crops 16.1%, in permanent crops 10.2%, in pasture 21.1%, forest area 31.2%.

Population economically active (2008): total 1,302,400; activity rate of total population 48.4% (participation rates: ages 14 and over [2006] 64.6%; female 45.4%; unemployed 10.3%).

not reported	2,198,200	4.7

Mobility (2007). Percentage of total population moving: within a prefecture 2.3%; between prefectures 2.0%.

Vital statistics

Birth rate per 1,000 population (2008): 8.6 (world avg. 20.3).
Death rate per 1,000 population (2008): 8.8 (world avg. 8.5).
Natural increase rate per 1,000 population (2008): –0.2 (world avg. 11.8).
Total fertility rate (avg. births per childbearing woman; 2008): 1.37.
Marriage/divorce rates per 1,000 population (2008): 5.8 (average age at first marriage, men 30.2 years; women 28.5 years)/2.0.
Life expectancy at birth (2008): male 79.3 years; female 86.1 years.
Major causes of death per 100,000 population (2007): malignant neoplasms (cancers) 303.6; heart disease 158.4; cerebrovascular disease 114.6; pneumonia 99.4; accidents 34.3; suicide 27.8; renal failure 19.5; diseases of the liver 14.6; pulmonary disease 13.4; diabetes mellitus 12.6.

Social indicators

Educational attainment (2007). Percentage of population ages 25–64 having: no formal schooling through upper secondary education 59%; higher vocational 18%; university 23%.

Distribution of income (2000)

percentage of average household income by quintile				
1	2	3	4	5 (highest)
11.2	15.3	18.7	23.0	31.7

Quality of working life. Average hours worked per week (2008): 40.7. Annual rate of deaths/nonfatal injuries per 100,000 workers (2008): 1.9/177.5. Proportion of labour force insured for damages or income loss resulting from injury, permanent disability, and death (2005): 53.1%. Average man-days lost to labour stoppages per 1,000 workdays (2006): 1.8. Average duration of journey to work⁸ (2003): 34.2 minutes.

Access to services (2004). Proportion of households having access to: safe public water supply 96.9%; public sewage system c. 68%.

Social participation. Eligible voters participating in last national election (August 2009): 69%. Adult population working as volunteers at least once

in the year (2006) 26.2%. Trade union membership in total workforce (2007): 15.1%.

Social deviance (2005). Offense rate per 100,000 population for: homicide 1.0; robbery 3.0; larceny and theft 151.6. Incidence in general population of: alcoholism per 100,000 population, n.a.; drug and substance abuse 0.1. Rate of suicide per 100,000 population (2007): 24.1.

Leisure/use of personal time

Discretionary daily activities (2006)

(Population age 10 years and over)

	weekly average hrs./min.
Total discretionary daily time	6:23
of which	
Hobbies and amusements	0:45
Sports	0:15
Learning (except schoolwork)	0:12
Social activities	0:22
Radio, television, newspapers, and magazines	2:24
Rest and relaxation	1:25
Other activities	1:00

Favourite sports according to the rates of participation (2006): males—bowling 27.2%, jogging/marathon 26.8%, fishing 20.8%, baseball 17.6%, stretching 15.7%, golf 14.9%; females—stretching 22.0%, bowling 18.6%, jogging/marathon 17.0%, swimming in pool 15.3%.

Favourite amusements according to the rates of participation (2006): males—lotteries 43.7%, karaoke 41.6%, home video games 34.3%; females—lotteries 39.8%, karaoke 36.4%, card games 27.3%.

Favourite hobbies according to the rates of participation (2006): average for both sexes—personal computer-related activities c. 37%, listening to music c. 33%, gardening c. 29%.

Favourite excursions according to the rates of participation (2006): average for both sexes—taking part in domestic sightseeing tours c. 52%, going for a drive c. 46%, visiting zoos, museums, aquariums, or botanical gardens c. 34%, visiting amusement parks c. 25%, picnicking/hiking c. 24%.

Material well-being (2003–04). Households possessing: automobile 81.6%; air conditioner (2002) 87.2%; personal computer 77.5%.

National economy

Gross national income (GNI; 2008): U.S.\$4,879,171,000,000 (U.S.\$38,210 per capita); purchasing power parity GNI (U.S.\$35,220 per capita).

Age breakdown (2008³): under 15, 16.8%; 15–29, 19.9%; 30–44, 22.5%; 45–59, 22.6%; 60–74, 13.1%; 75–84, 3.8%; 85 and over, 1.3%.

Population projection: (2020) 38,000; (2030) 39,000.

Ethnic composition (2007³): Liechtensteiner 66.1%; Swiss 10.3%; Austrian 5.8%; Italian 3.4%; German 3.4%; other 11.0%.

Religious affiliation (2002): Christian 83.9%, of which Roman Catholic 76.0%, Protestant 7.0%, Orthodox 0.8%; Muslim 4.1%; nonreligious/other/unknown 12.0%.

Major cities (2008³): Schaan 5,690; Vaduz 5,109; Triesen 4,713; Balzers 4,509; Eschen 4,137.

Vital statistics

Birth rate per 1,000 population (2008): 9.9 (world avg. 20.3); within marriage 86.0%; outside of marriage 14.0%.

Death rate per 1,000 population (2008): 5.8 (world avg. 8.5).

Natural increase rate per 1,000 population (2008): 4.1 (world avg. 11.8).

Total fertility rate (avg. births per childbearing woman; 2008): 1.40.

Marriage/divorce rates per 1,000 population (2008): 5.8/2.8.

Life expectancy at birth (2006): male 78.9 years; female 83.1 years.

Major causes of death per 100,000 population (2006): diseases of the circulatory system 230.3; malignant neoplasms (cancers) 153.5; diseases of the respiratory system 51.2; accidents, violence, and suicide 22.7; diseases of the digestive system 19.9.

National economy

Budget (2007). Revenue: CHF 1,010,300,000 (current revenue 98.2%, of which taxes and duties 75.7%, investment income 16.5%, charges and fees 4.0%; capital revenue 1.7%). Expenditures: CHF 1,029,200,000 (current expenditure 89.7%, of which wages and salaries 18.2%, financial affairs 17.1%, depreciation on portfolio securities 7.2%; capital expenditure 10.3%).

Public debt: none.

Tourism (2007): 59,603 tourist arrivals; receipts from visitors, n.a.

Selected balance of payments data: n.a.

Population economically active (2008³): total 16,193⁴; activity rate of total population 45.3% (participation rates: age 15 and over [2006³] 54.3%; female [2004³] 41.4%; unemployed [2007] 2.7%).

Education and health

Educational attainment (2006). Population age 6 and over 267,283; percentage with bachelor's degree 0.6%, master's degree 0.3%. **Literacy** (2006): total population age 15 and over literate 93.5%; males literate 92.5%; females literate 94.5%.

Education (2005)

	teachers	students	student/ teacher ratio	enrollment rate (%)
Primary (age 6–12)	3,336	54,770	16.4	97
Secondary/Voc. (age 13–17)	2,088 ²²	32,645	13.7 ²²	67
Tertiary ²³	138	6,898	50.0	... (age 18–22)

Health (2008): physicians 575 (1 per 539 persons); hospital beds 785 (1 per 395 persons); infant mortality rate per 1,000 live births 11; undernourished population (2002–04) 30,000 (10% of total population based on the consumption of a minimum daily requirement of 1,840 calories).

Military

Total active duty personnel (2006): 2,000-member paramilitary incorporates coast guard duties. **Paramilitary expenditure as percentage of GDP** (2008): 4.9%; per capita expenditure U.S.\$139.

¹New constitution ratified on Aug. 7, 2008; first multiparty election held in October 2008. ²Also spelled Maale or Male'. ³Maldives is divided into 20 administrative districts corresponding to atoll groups; arrangement shown here is from north to south. Total area figures are pre-December 2004 (or pre-Indian Ocean tsunami). ⁴A new administrative arrangement of 7 provinces and 1 capital district was pending in October 2009. ⁵For 196 inhabited administrative islets only. ⁶Excludes foreigners residing in the Maldives for employment purposes (representing [in 2009] c. 80,000 legal workers and c. 20,000 undocumented workers). Most foreign workers are Indian or Bangladeshi. ⁷Total area of all 1,192 islets (including 88 resort islets and 34 industrial/other islets) is 298 sq km (115 sq mi). ⁸Based on areas of inhabited islets only. ⁹The only non-Sunni are Shi'i members of the Indian trading community and non-Muslim workers who serve alcohol on the resort islands. ¹⁰Includes workers not actively seeking employment. ¹¹Data taken from the Household Income and Expenditure Survey 2002–03, comprising 834 households in both Male and outer atolls. ¹²Weights of consumer price index components. ¹³At constant prices of 1995. ¹⁴Less imputed bank service charges. ¹⁵Includes 18,605 unemployed. ¹⁶Imports c.i.f.; exports f.o.b. ¹⁷Exports include reexports unless otherwise footnoted. ¹⁸Domestic exports only. ¹⁹Male airport; both international and domestic flights. ²⁰Circulation of 2 daily newspapers. ²¹Subscribers. ²²2002. ²³2003; Maldives College of Higher Education.

Demography

Population (2009): 315,000⁶.

Density (2009)⁸: persons per sq mi 6,984, persons per sq km 2,697.

Urban-rural (2006): urban 34.7%; rural 65.3%.

Sex distribution (2006): male 50.66%; female 49.34%.

Age breakdown (2006): under 15, 31.1%; 15–29, 33.2%; 30–44, 18.3%; 45–59, 9.2%; 60–74, 5.2%; 75–84, 1.1%; 85 and over, 0.2%; unknown 1.7%.

Population projection⁶: (2020) 375,000; (2030) 422,000.

Doubling time: 37 years.

Ethnic composition (2000)⁶: Maldivian 98.5%; Sinhalese 0.7%; other 0.8%.

Religious affiliation: virtually 100% Sunni Muslim⁹.

Major islets (2006): Male² (capital island) 103,693; Hithadhoo 9,465; Fuvammulah 7,636; Kulhudhuffushi 6,998; Thinadhoo 4,442.

Vital statistics

Birth rate per 1,000 population (2008): 22 (world avg. 20.3).

Death rate per 1,000 population (2008): 3 (world avg. 8.5).

Total fertility rate (avg. births per childbearing woman; 2006): 2.1.

Marriage/divorce rates per 1,000 population (2006): 18.6/7.3.

Life expectancy at birth (2007): male 72.3 years; female 73.7 years.

Major causes of death per 100,000 population (2005): external causes 227.1; diseases of the circulatory system 19.9; diseases of the respiratory system 15.8; malignant neoplasms (cancers) 12.3.

National economy

Budget (2008). Revenue: Rf 7,757,000,000 (nontax revenue 48.6%, of which resort lease rent 19.5%; tax revenue 43.7%, of which import duties 31.7%; grants 7.2%; other 0.5%). Expenditures: Rf 9,789,000,000 (general administration 21.8%; community programs 20.5%; education 15.6%; health 12.8%; police/security 9.1%; defense 5.6%).

Public debt (external, outstanding; 2008): U.S.\$471,700,000.

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): vegetables 28,526, bananas 11,000, coconuts 2,625, nuts 2,100; roundwood, n.a.; fisheries production 144,169, of which skipjack tuna 97,342, yellowfin tuna 24,415 (from aquaculture, none). Mining and quarrying: coral for construction materials. Manufacturing: details, n.a.; however, major industries include boat building and repairing, coir yarn and mat weaving, coconut and fish processing, lacquerwork, garment manufacturing, and handicrafts. Energy production (consumption): electricity (kW-hr; 2008) 301,000,000 ([2006] 212,000,000); petroleum products (metric tons; 2006) none (283,000).

Selected balance of payments data. Receipts from (U.S.\$'000,000): tourism (2007) 586; remittances (2008) 3; foreign direct investment (2005–07 avg.) 13; official development assistance (2007) 37. Disbursements for (U.S.\$'000,000): tourism (2007) 92; remittances (2008) 103.

Population economically active (2006): total 128,836; activity rate of total population 43.1% (participation rates: ages 15–64, 65.8%; female 41.3%; unemployed 14.4%¹⁰).

Price index (2005 = 100)

	2004	2005	2006	2007	2008
Consumer price index	98.7	100.0	103.5	111.2	124.8

Household income and expenditure. Average household size (2006) 6.5; average annual income per household (2002–03)¹¹ Rf 188,743 (U.S.\$14,746); sources of income (2002–03)¹¹: self-employment 34.5%, wages and salaries 31.5%, rent 13.4%; expenditure (2004)¹²: food, beverages, and tobacco 33.3%, housing and energy 19.5%, clothing and footwear 6.0%, communications 5.8%, health 5.4%.

Gross national income (GNI; 2008): U.S.\$1,126,000,000 (U.S.\$3,630 per capita); purchasing power parity GNI (U.S.\$5,280 per capita).

Demography

Population (2009): 53,800.

Density (2009): persons per sq mi 768.0, persons per sq km 296.5.

Urban-rural (2008): urban 68.0%; rural 32.0%.

Sex distribution (2008): male 50.99%; female 49.01%.

Age breakdown (2008): under 15, 38.5%; 15–29, 29.6%; 30–44, 16.8%; 45–59, 10.5%; 60–74, 3.6%; 75–84, 0.8%; 85 and over, 0.2%.

Population projection: (2020) 62,000; (2030) 67,000.

Ethnic composition (2006)⁷: Marshallese 92.1%; other Pacific Islanders 1.0%; East Asians 0.5%; U.S. white 0.3%; other 6.1%.

Religious affiliation (1999): Protestant 85.0%, of which United Church of Christ 54.8%, Assemblies of God 25.8%; Roman Catholic 8.4%; Mormon 2.1%; nonreligious 1.5%; other/unknown 3.0%.

Major towns (1999): Majuro² (2004) 20,800; Ebeye (in Kwajalein Atoll) 9,345; Laura (in Majuro Atoll) 2,256; Ajeltake (in Majuro Atoll) 1,170; Enewetak 823.

Vital statistics

Birth rate per 1,000 population (2008): 31.5 (world avg. 20.3).

Death rate per 1,000 population (2008): 4.6 (world avg. 8.5).

Natural increase rate per 1,000 population (2008): 26.9 (world avg. 11.8).

Total fertility rate (avg. births per childbearing woman; 2008): 3.68.

Life expectancy at birth (2008): male 68.9 years; female 73.0 years.

Major causes of death per 100,000 population (2007–08; registered deaths only): sepsis/septicemia 83.7; malignant neoplasms (cancers) 41.3; pneumonia 26.3; myocardial infarction 24.2.

National economy

Budget (2007). Revenue: U.S.\$98,900,000 (U.S. government grants 63.6%; tax revenue 25.0%, of which income tax 11.0%, import duties 8.9%; nontax revenue 11.4%). Expenditures: U.S.\$99,900,000 (current expenditure 79.0%, capital expenditure 21.0%).

Public debt (external, outstanding; 2008): U.S.\$87,000,000.

Production (metric tons except as noted). Agriculture, forestry, fishing (2002–03): copra (2007) 5,491, breadfruit 4,536, coconuts 885, bananas 161, pandanus 114, taro 108; livestock (number of live animals) 12,900 pigs, 86,000 chickens; roundwood, n.a.; fisheries production (2006) 42,019, of which skipjack 37,661 (from aquaculture, none). Mining and quarrying: for local construction only. Manufacturing (2007): copra 5,491; coconut oil and processed (chilled or frozen) fish are important products; the manufacture of handicrafts and personal items (clothing, mats, boats, etc.) by individuals is also significant. Energy production (consumption): electricity (kW-hr; 2006) 104,000,000 (104,000,000); coal, none (none); petroleum products (metric tons; 2006) none (30,000).

Population economically active (1999): total 14,677; activity rate of total population 28.9% (participation rates: ages 15–64, 52.1%; female 34.1%; unemployed [2007] 30.9%).

Migration. Legal Mexican immigrants entering the U.S. in 2004: 173,664; total number of illegal Mexican immigrants in U.S. (2006) 6,600,000.

Vital statistics

Birth rate per 1,000 population (2008): 19.1 (world avg. 20.3); (c. 2003) within marriage 62%; outside of marriage 38%.

Death rate per 1,000 population (2008): 4.8 (world avg. 8.5).

Natural increase rate per 1,000 population (2008): 14.3 (world avg. 11.8).

Total fertility rate (avg. births per childbearing woman; 2008): 2.10.

Marriage/divorce rates per 1,000 population (2007): 5.6/0.7.

Life expectancy at birth (2008): male 74.0 years; female 78.8 years.

Major causes of death per 100,000 population (2007): diseases of the circulatory system 103.8; endocrine, metabolic, and nutritional disorders 80.9; malignant neoplasms (cancers) 65.0; accidents and violence 52.0; diseases of the digestive system 46.9; diseases of the respiratory system 41.3.

Adult population (ages 15–49) **living with HIV** (2007): 0.3%⁷ (world avg. 0.8%).

Social indicators

Educational attainment (2005). Percentage of population age 15 and over having: no formal schooling 8.4%; incomplete primary education 14.3%; complete primary 17.6%; incomplete/complete secondary 25.2%; vocational/professional 31.3%; advanced university (masters or doctorate degree) 0.7%; other/unknown 2.5%.

Access to services (2005). Proportion of dwellings having: electricity 96.6%; piped water supply 87.8%; piped sewage 84.8%.

Distribution of income (2008)

percentage of household income by decile

1	2	3	4	5	6	7	8	9	10 (highest)
1.7	2.9	3.9	4.9	6.0	7.4	9.2	11.7	16.1	36.2

Material well-being. Percentage of households possessing (2005): television 91.0%, refrigerator 79.0%, washing machine 62.7%, computer 19.6%.

Quality of working life (2008). Average workweek 44.5 hours. Annual rate per 100,000 insured workers for: injury 3,569; death 10. Labour stoppages: 21, involving 13,242 workers.

Social participation. Eligible voters participating in last national election (July 2006): 58.6%. Trade union membership in total workforce (2000): formal sector only, less than 20%; both formal and informal sectors, c. 17%. Practicing religious population (1995–97): percentage of adult population attending church services at least once per week 46%.

Social deviance (2007). Formally registered offense rate per 100,000 population for: murder 6.2; property damage 14.5; rape 4.3; battery 30.2; robbery 69.3; illegal narcotics possession 16.0; fraud 4.4; squatting 3.3; breaking and entering 2.5. Incidence per 100,000 in general population of: alcoholism (2000) 7.6; suicide 4.2.

National economy

Gross national income (GNI; 2008): U.S.\$1,061,444,000,000 (U.S.\$9,980 per capita); purchasing power parity GNI (U.S.\$14,270 per capita).
